ECONOMY

Agriculture accounted for 12.9% of GDP in 1998, industry 35.2% and services 50.2%.

Policy. A reform programme was announced in 1992, including the privatization of 20 state-owned enterprises. Further privatization legislation followed in 1993. A new economic plan was promulgated in Nov. 1996, envisaging privatization of the oil and electricity sectors, but in 1998 privatization was put on hold as the sale of 35% of state telecommunications companies was suspended in April 1998 owing to a lack of serious bidders. Congress approved the Economic Transformation Law on 1 March 2000 to introduce flexibility into the labour market and encourage further private investment in the oil, electrical and telecommunications sectors.

Performance. Real GDP growth was negative in 1999, at -7.3%, partly owing to years of mismanagement and partly to El Niño. The economy was forecast to recover in 2000, however, with a growth rate expected to be around 2%. Total GDP in 1998 was US\$18.4bn.

Budget. Total revenue and total expenditure from 1991 to 1995 (in 1bn. sucres) was as follows:

	1991	1992	1993	1994	1995
Revenue	1,907	3,096	4,371	5,374	8,030
Expenditure	1,739	3,145	4,166	5,717	8,451

The budget deficit in 1998 was nearly 6% of GDP.

In 2000 VAT was increased from 10% to 12% and corporate tax from 15% to 25%.

Currency. The monetary unit is the US dollar. Inflation was 24% in 1996 and had risen to 43% by Dec. 1998. In March 2000 the government passed a law to phase out the former national currency, the *sucre*, to be replaced by the US dollar, and in April bank cash machines began dispensing dollars instead of sucres. On 11 Sept. 2000 the dollar became the only legal currency. In Feb. 1998 foreign exchange reserves were US\$1,957m. and in Jan. 2000 gold reserves were 410,000 troy oz.

Banking and Finance. The Central Bank of Ecuador (*Governor*, José Luis Ycaza Pazmiño), the bank of issue, with a capital and reserves of US\$1,557m. at 31 Dec. 1995, is modelled after the Federal Reserve Banks of the USA; through branches opened in 16 towns, it now deals in mortgage bonds. All commercial banks must be affiliated to the Central Bank. Legislation of May 1994 liberalized the financial sector.

There are stock exchanges in Quito and Guayaquil.

Weights and Measures. The metric system is the legal standard but English and old Spanish measures are still in use. A case (*caja*) of bananas = 18.14 kg.

KEY HISTORICAL EVENTS

Egypt was part of the Ottoman Empire from 1517 but came under the control of Britain after 1882 until limited independence in 1922. Muhammad Ali (1805–40) succeeded in establishing a hereditary dynasty of Khedives but with the opening of the Suez Canal in 1869 and Britain's purchase of the Khedives' shares, Egypt's strategic importance paved the way for foreign intervention and domination.

In the Second World War (1939–45) Egypt supported the Allies. Following a revolution in July 1952 led by Gen. Neguib, King Farouk abdicated in favour of his son but in 1953 the monarchy was abolished. Neguib became president but encountered opposition from the military when he attempted to move towards a parliamentary republic. Col. Gamal Abdel Nasser became head of state on 14 June 1954 (president from 1956), and remained in office until he died on 28 Sept. 1970. In 1956 Egypt nationalized the Suez Canal, a move which led Britain, France and Israel to mount military attacks against Egypt until forced by the UN and the USA to withdraw.

The 1960s and 1970s saw constant conflict with Israel until President Muhammad Anwar Sadat, who succeeded Nasser, made a dramatic peace treaty with Israel in March 1979. Sadat was assassinated on 6 Oct. 1981, and was succeeded by the vice-president, Lieut.-Gen. Muhammad Hosni Mubarak.

TERRITORY AND POPULATION

Egypt is bounded in the east by Israel and Palestine, the Gulf of Aqaba and the Red Sea, south by Sudan, west by Libya and north by the Mediterranean. The total area is 997,739 sq. km, but the cultivated and settled area, that is, the Nile Valley, Delta and oases, covers only 35,189 sq. km. A number of new desert cities are being developed to entice people away from the overcrowded Nile valley. Population density in this latter, 1992, 1,557·9 per sq. km. In 1998, 54·7% of the population were rural. In 1997 the population was 61,404,000.

The UN gives a projected population for 2010 of 80·26m.

2·3m. Egyptians were living abroad in 1997.

In Greater Cairo is one of the Seven Wonders of the World, the Great Pyramids, and not far away on the Giza platform is the Sphinx.

CONSTITUTION AND GOVERNMENT

The Constitution was approved by referendum on 11 Sept. 1970. It defines Egypt as 'an Arab Republic with a democratic, socialist system' and the Egyptian people as 'part of the Arab nation'. The *President* is nominated by the People's Assembly and confirmed by plebiscite for a 6-year term. The President may appoint 1 or more *Vice-Presidents*. ECONOMY

In 1998 services accounted for 50-2% of GDP, industry 32-3% and agriculture 17-5%.

Policy. A privatization programme which began in 1993, and in earnest in 1996, has been such a success that Egypt has been ranked fourth in the world in the list of countries which have carried out privatization programmes. By Sept. 2000 a total of

135 state-owned enterprises had been sold, generating US\$4.2bn. Foreign investment (US\$900m. in 1996) has financed a huge development project in the Sinai Peninsula and Upper Egypt which aims to increase the inhabited area of the country from 6% to 20% in 20 years.

Performance. Real GDP growth was 5.6% in 1998 and 6.0% in 1999. Total GDP in 1999 was an estimated US\$89bn. With Egypt's economy enjoying a period of buoyancy, economic growth of 5.2% was forecast for 2000.

Budget. The financial year runs from 1 July. Revenues in 1997-98 were £E69,084m. and expenditure £E71,703m. Main sources of revenue were income and profits taxes, 22.7%; sales taxes, 18.3%; customs duties, 17.8%; oil revenue, 7.0%. Main items of expenditure were salaries and pensions, 31.0%; public debt interest, 21.5%.

Currency. The monetary unit is the *Egyptian pound* (EGP) of 100 *piastres*. In Feb. 1991 the official exchange rate was abolished, leaving a free rate and a rate set by a panel of bankers. Inflation was estimated to be 3.1% in 1999. Foreign exchange reserves were US\$18,541m. in Jan. 1998 and gold reserves were 2.43m. troy oz in Dec. 1999. Total money supply in Jan. 1998 was £E49,361m.

In 1998, 4 major public-sector commercial banks accounted for some 55% of all banking assets: the National Bank of Egypt, the Banque Misr, the Bank of Alexandria and the Banque du Caire. There were 40 other domestic commercial banks, 15 investment banks and 30 regional development banks, as well as foreign banks, branches and joint ventures. Savings and term deposits in 1992 totalled £E83,034m.

There are stock exchanges in Cairo and Alexandria.

Weights and Measures. In 1951 the metric system was made official with the exception of the feddan and its subdivisions. However, other traditional measures are still in use; *Kadah* = 1/96th ardeb = 3.36 pints. *Rob* = 4 kadahs = 1.815 gallons. *Keila* = 8 kadahs = 3.63 gallons. *Ardeb* = 96 kadahs = 43.555 gallons, or 5.44439 bu., or 198 cu. decimetres. *Rotl* = 144 dirhems = 0.9905 lb. *Oke* = 400 dirhems = 2.75137 lb. *Qantar* or 100 rotls or 36 okes = 99.0493 lb. 1 *Qantar* of unginned cotton = 315 lb. 1 *Qantar* of ginned cotton = 99.05 lb. The approximate weight of the ardeb is as follows: wheat, 150 kg; beans, 155 kg; barley, 120 kg; maize, 140 kg; cotton seed, 121 kg. *Feddan*, the unit of measure for land = 4,200.8 sq. metres = 7,468.148 sq. pics = 1.03805 acres. 1 sq. pic = 6.0547 sq. ft = 0.5625 sq. metre.

Oil reserves in 2000 were 8.2bn. bbls. Production of crude oil has been declining from a record 992,000 bbls. a day in 1996 to an estimated 770,000 bbls. a day in 1999.

As a result of a series of new discoveries in 1999 and 2000 gas reserves are thought to be as high as 3,400,000m. cu. metres. Annual revenue from future natural gas exports could exceed US\$1.5bn. 1999 total production amounted to 14.7bn. cu. metres. By 1995, 75% of power was gas-generated.

Water. The Aswan High Dam, completed in 1970, allows for a perennial irrigation system.

The world's biggest pumping station is being constructed in Egypt in the Nile Basin. When completed in 2002 it will pump 5.5bn. cu. metres of water a year into a 67 km canal to irrigate up to 500,000 acres of desert land.

The Nile provides 85% of the water used in irrigation, some 55,000m. cu. metres annually. There were 90,000 tractors in 1997 and 2,370 harvester-threshers.

In 1994 there were 5,214 agricultural co-operatives. 0.71m. feddan of land had been distributed by 1991 to 0.35m. families under an agrarian reform programme. República de El Salvador

Capital: San Salvador

Population estimate, 2000: 6·32m.

GDP per capita: (PPPS) 4,036

HDI/world rank: 0·696/104

KEY HISTORICAL EVENTS

Conquered by Spain in 1526, El Salvador remained under Spanish rule until 1821. Thereafter, El Salvador was a member of the Central American Federation comprising the states of El Salvador, Guatemala, Honduras, Nicaragua and Costa Rica until this federation was dissolved in 1839. In 1841 El Salvador declared itself an independent republic.

The country's history has been marked by political violence. The repressive dictatorship of President Maximiliano Hernandez Martínez lasted from 1931 to 1944 when he was deposed as were his successors in 1948 and 1960. The military junta that followed gave way to more secure presidential succession although left-wing guerrilla groups were fighting government troops in the late 1970s. As the guerrillas grew stronger and gained control over a part of the country, the USA sent economic aid and assisted in the training of Salvadorean troops. A new constitution was enacted in Dec. 1983 but the presidential election was boycotted by the main left-wing organization, the Favabundo Martí National Liberation Front (FMLN). Talks between the government and the FMLN in April 1991 led to constitutional reforms in May, envisaging the establishment of civilian control over the armed forces and a reduction in their size. On 16 Jan. 1992 the government and the FMLN signed a peace agreement.

TERRITORY AND POPULATION

El Salvador is bounded in the northwest by Guatemala, northeast and east by Honduras and south by the Pacific Ocean. The area (including 247 sq. km of inland lakes) is 21,041 sq. km. Population (1992 census), 5,047,925 (female 52%); 1996 est., 5·79m., giving a population density of 275 per sq. km.

The UN gives a projected population for 2010 of 7·56m.

In 1998, 54·1% of the population were rural. In 1995, 1m. Salvadoreans were living abroad, mainly in the USA.

The republic is divided into 14 departments. Areas (in sq. km) and 1992 census populations:

KEY HISTORICAL EVENTS

Equatorial Guinea consists of the island of Bioko, for centuries called Fernando Po; other smaller islands and the mainland territory of Rio Muni. Fernando Po was named after the Portuguese navigator Fernão do Po. The island was then ruled for 3 centuries by Portugal until 1778 when it was ceded to Spain. For some decades after taking possession of Fernando Po, Spain did not effectively occupy it and allowed Britain to establish a naval base at Clarence (later Santa Isabel), which was important for the suppression of slave trading over a wide area. Spain asserted its rule from the 1840s. On Fernando Po the Spanish grew cocoa on European-owned plantations using imported African labour. This traffic led to an international scandal in 1930 when Liberians were found to be held in virtual slavery. Later many Nigerians were employed, often in poor conditions.

African nationalist movements began in the 1950s. Internal self-government was granted in 1963. In 1969 Spain suspended the constitution but then, under pressure to grant independence, agreed on condition of its approval by a referendum, which was given on 11 Aug. 1969. The two parts of Equatorial Guinea were united under Macías Nguema who established single-party rule. Up to a third of the population was killed or else left the country. Macías was declared President-for-Life in July 1972 but was overthrown by a military coup on 3 Aug. 1979.

A constitution approved by a referendum on 3 Aug. 1982 restored some institutions but a Supreme Military Council remained the sole political body until constitutional rule was resumed on 12 Oct. 1982.

TERRITORY AND POPULATION

The mainland part of Equatorial Guinea is bounded in the north by Cameroon, east and south by Gabon, and west by the Gulf of Guinea, in which lie the islands of Bioko (formerly Macías Nguema, formerly Fernando Póo) and Annobón (called Pagalu from 1973 to 1979). The total area is 28,051 sq. km (10,831 sq. miles) and the population at the 1983 census was 304,000. Estimate (July 1997), 443,000; density, 16 per sq. km. Another 110,000 are estimated to remain in exile abroad.

The UN gives a projected population for 2010 of 574,000.

In 1998, 54.1% of the population were rural.

The 7 provinces are grouped into 2 regions—Continental (C), chief town Bata; and Insular (I), chief town Malabo—with areas and populations as follows:

	<i>Sq. km</i>	<i>Census 1983</i>	<i>Chief town</i>
Annobón (I)	17	2,006	San Antonio de Palea
Bioko Norte (I)	776	46,221	Malabo
Bioko Sur (I)	1,241	10,969	Luba
Centro Sur (C)	9,931	52,393	Evinayong
Kié-Ntem (C)	3,943	70,202	Ebebiyin
Litoral (C)	6,665 ¹	66,370	Bata
Wele-Nzas (C)	5,478	51,839	Mongomo

¹Including the adjacent islets of Corisco, Elobey Grande and Elobey Chico (17 sq. km).

In 1995 the capital, Malabo, had a population of 30,000.

The main ethnic group on the mainland is the Fang, which comprises 85% of the total population; there are several minority groups along the coast and adjacent islets. On Bioko the indigenous inhabitants (Bubis) constitute 60% of the population there, the balance being mainly Fang and coast people. On Annobón the indigenous

inhabitants are the descendants of Portuguese slaves and still speak a Portuguese patois. The official language is Spanish.

The President appointed and leads a Council of Ministers.

On 12 Oct. 1987 a single new political party was formed as the *Partido Democrático de Guinea Ecuatorial*.

A referendum on 17 Nov. 1991 approved the institution of multi-party democracy, and a law to this effect was passed in Jan. 1992. The electorate is restricted to citizens who have resided in Equatorial Guinea for at least 10 years. A parliament created as a result, the *National Assembly*, has 80 seats.

KEY HISTORICAL EVENTS

Italy was the colonial ruler from 1890 until 1941 when Eritrea fell to British forces and a British protectorate was set up. This ended in 1952 when the UN sanctioned federation with Ethiopia. In 1962 Ethiopia became a unitary state and Eritrea was incorporated as a province. Eritreans began an armed struggle for independence under the leadership of the Eritrean People's Liberation Front (EPLF) which culminated successfully in the capture of Asmara on 24 May 1991. Thereafter the EPLF maintained a *de facto* independent administration recognized by the Ethiopian government. Sovereignty was proclaimed on 24 May 1993. In 1999 fighting broke out along the border with Ethiopia. After the failure of international mediation, the 13-month long-truce between Eritrea and Ethiopia ended in May 2000. Ethiopia launched a major offensive in the ongoing war over territorial disputes and claimed victory. In June both sides agreed to an Organization of African Unity peace deal to end the 2-year border war.

TERRITORY AND POPULATION

Eritrea is bounded in the northeast by the Red Sea, southeast by Djibouti, south by Ethiopia and west by Sudan. Some 300 islands form the Dahlak Archipelago, most of them uninhabited. The latter consists of the members of the People's Front for Democracy and Justice (PFDJ; until Feb. 1994 EPLF) Central Committee and 60 other deputies (including 11 seats reserved for women). It elects the

President, who in turn appoints the *State Council* made up of 14 ministers and the governors of the 10 provinces. The President chairs both the State Council and the National Assembly.

DEFENCE

Conscription for 18 months was introduced in 1994 for all Eritreans between the ages of 18 and 40, with some exceptions. The total strength of all forces was estimated at 180,000–200,000 in 1999.

Defence expenditure totalled US\$309m. in 1999 (US\$77 per capita and 44.4% of GDP—the highest percentage of any country in the world). This compares to US\$196m. in 1997 (US\$52 per capita and 25.2% of GDP).

Army. The army had a strength of around 180,000 in 1999. There were an additional 120,000 reservists available.

Navy. Most of the former Ethiopian Navy is now in Eritrean hands. The main bases and training establishments are at Massawa and Assab. Personnel numbered 1,100 in 1999.

Air Force. Personnel numbers were estimated at 1,000 in 1999. There were over 19 combat aircraft including MiG-23s, MiG-21s and MiG-29s.

INTERNATIONAL RELATIONS

A border dispute between Eritrea and Ethiopia broke out in May 1998. Eritrean troops took over the border town of Badame after a skirmish between Ethiopian police units and armed men from Eritrea. Ethiopia maintained that Badame and Sheraro, a nearby town, had always been part of Ethiopia and called Eritrea's action an invasion. An agreement ending hostilities was signed in June 2000, followed by a peace accord in Dec. A buffer zone has been created to separate the armies.

Eritrea is a member of the UN, OAU, African Development Bank, COMESA and is an ACP member state of the ACP-EU relationship.

ECONOMY

In 1997 agriculture accounted for 9.3% of GDP, services 61.2% and industry 29.5%.

Eritrea's resources are meagre, the population small and poorly-educated; communications are difficult and there is a shortage of energy.

Performance. Total GDP in 1998 was US\$0.6bn. The economy is estimated to have contracted by 1.0% in 1998, and by a further 2.0% in 1999 as the conflict with neighbouring Ethiopia worsened.

Budget. Revenues in 1996 were US\$226m. and expenditure US\$453m. Over 40 enterprises are scheduled for privatization.

Currency. A new currency, the *nakfa*, has replaced the Ethiopian currency, the *birr*. However, its introduction led to tensions with Ethiopia, adversely affecting cross-border trade. Inflation was 6.0% in 1998.

Banking and Finance. The central bank is the National Bank of Eritrea (*Governor*, Tequie Beyene). All banks and financial institutions are state-run. There is a Commercial Bank of Eritrea with 15 branches, an Eritrean Investment and Development Bank with 13 branches, a Housing and Commercial Bank of Eritrea with 7 branches and an Insurance Corporation.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 73 MW in 1995. Electricity is provided to only some 10% of the population.

Minerals. There are deposits of gold, silver, copper, zinc, sulphur, nickel, chrome and potash. Basalt, limestone, marble, sand and silicates are extracted. Oil exploration is taking place in the Red Sea. Salt production totals 200,000 tonnes annually.

Agriculture. Agriculture engaged approximately 79% of the economically active population in 1997. Several systems of land ownership (state, colonial, traditional) co-exist. In 1994 the PFDJ proclaimed the sole right of the state to own land. There were 391,000 ha of arable land in 1997 and 2,000 ha of permanent crops. Main agricultural products, 1998 (in 1,000 tonnes): sorghum, 62; potatoes, 40; millet, 27; barley, 22; maize, 12; wheat, 12. Fisheries. The total catch in 1998 was 1,576 tonnes, exclusively from marine waters, but a joint French–Eritrean project to assess fish stocks in the Red Sea suggests a sustainable yield of up to 70,000 tonnes a year.

INDUSTRY

Light industry was well developed in the colonial period but capability has declined. Processed food, textiles, leatherware, building materials, glassware and oil products are produced. Industrial production accounted for nearly 30% of GDP in 1997, with the manufacturing sector providing over 15%.

Labour. In 1996 the labour force was 1,649,000 (53% males).

INTERNATIONAL TRADE

Eritrea is dependent on foreign aid for most of its capital expenditure. Total external debt in 1998 was US\$149m.

Imports and Exports. In 1996 exports were valued at 520·4m. birr and imports at 3,062·8m. birr. The main exports are drinks, leather and products, textiles and oil products. The leading imports are machinery and transport equipment, basic manufactures, and food and live animals. Principal import suppliers: Saudi Arabia, Italy, UAE, Germany. KEY HISTORICAL EVENTS

Estonia was part of the Holy Roman Empire until it became a Swedish possession in the 17th century. On Sweden's defeat by Peter the Great, Estonia passed to the Russian Empire in 1721. The workers' and soldiers' Soviets, which came to prominence in 1917, were overthrown with the assistance of British naval forces in May 1919 and a democratic republic proclaimed. In March 1934 this regime was, in turn, overthrown by a fascist coup. The secret protocol of the Soviet-German

agreement of 23 Aug. 1939 assigned Estonia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of the Estonian Soviet Socialist Republic. At a referendum in March 1991, 77.8% of votes cast were in favour of independence. A fully independent status was conceded by the USSR State Council on 6 Sept. 1991.

TERRITORY AND POPULATION

Estonia is bounded in the west and north by the Baltic Sea, east by Russia and south by Latvia. There are 1,541 offshore islands, of which the largest are Saaremaa and Hiiumaa, but only 14 are permanently inhabited. Area, 45,227 sq. km (17,462 sq. miles); population, 1,439,197 (2000), giving a density of 31.8 per sq. km.

The UN gives a projected population for 2010 of 1.34m.

As of 1 Jan. 2000, 69.1% of the population lived in urban areas. Of the whole population, Estonians accounted for 65.3%, Russians 28.1%, Ukrainians 1.5%, Belorussians 0.9%, and Finns 0.9%. The capital is Tallinn (Jan. 2000 population, 408,329). Other large towns are Tartu (101,744), Narva (73,295), Kohtla-Järve (65,566) and Pärnu (50,966). There are 15 counties, 47 towns and 207 rural municipalities.

The official language is Estonian.

SOCIAL STATISTICS

1999 births, 12,545; deaths, 18,435. Rates (per 1,000 population): birth, 8.7, death, 12.8. Suicides in 1999 numbered 463 (rate of 32.2 per 100,000 population). There were 14,503 induced abortions in 1999 (25,587 in 1993). Expectation of life in 1999 was 65.4 years for males and 76.1 years for females. Annual population growth rate, 1990-99, -1.2%. Infant mortality, 1999 (per 1,000 live births), 9.5. Fertility rate, 1999, 1.3 births per woman.

CLIMATE

Because of its maritime location Estonia has a moderate climate, with cool summers and mild winters. Average daily temperatures in 1999: Jan. -4.0°C; July 18.8°C. Rainfall is heavy, 500-700 mm per year, and evaporation low.

CONSTITUTION AND GOVERNMENT

A draft constitution drawn up by a constitutional assembly was approved by 91.1% of votes cast at a referendum on 28 June 1992. Turn-out was 66.6%. The constitution came into effect on 4 July 1992. It defines Estonia as a 'democratic state guided by the rule of law, where universally recognized norms of international law are an inseparable part of the legal system.' It provides for a 101-member national assembly (*Riigikogu*) elected for 4-year terms. There are 11 electoral districts with 8 to 11 mandates each. Candidates may be elected: a) by gaining more than 'quota', i.e. the number of votes cast in a district divided by the number of its mandates; b) by standing for a party which attracts for all of its candidates more than the quota, in

order of listing: c) by being listed nationally for parties which clear a 5% threshold and eligible for the seats remaining according to position on the lists. The head of state is the *President*, elected by the Riigikogu for 5-year terms. Presidential candidates must gain the nominations of at least 20% of parliamentary deputies. If no candidate wins a two-thirds majority in any of 3 rounds, the Speaker convenes an electoral college, composed of parliamentary deputies and local councillors. At this stage any 21 electors may nominate an additional candidate. The electoral college elects the President by a simple majority.

Citizenship requirements are 2 years residence and competence in Estonian for existing residents. For residents immigrating after 1 April 1995, 5 years qualifying residence is required.

National Anthem. 'Mu isamaa, mu õnn ja rõõm' ('My native land, my pride and joy'); words by J. V. Jannsen, tune by F. Pacius (same as Finland).

RECENT ELECTIONS

Presidential elections were held in 3 rounds on 26–27 Aug. 1996. There were 2 candidates. No candidate gained sufficient votes to be elected. On 20 Sept. 1996 President Meri was re-elected by an electoral college against 4 opponents.

Parliamentary elections were held on 7 March 1999. The electorate numbered 857,270, turn-out was 57.43%. Of the 101 seats, the Estonian Centre Party (K) won 28 seats (with 23.4% of the total votes); Pro Patria Union (I), 18 seats (16.1%); Estonian Reform Party (RE), 18 seats (15.9%); Mõõdukad (M), 17 seats (15.2%); Estonian Coalition Party (KE), 7 seats (7.6%); the Country People's Party (EME), 7 seats (7.3%); Estonian United People's Party (EÜRP), 6 seats (6.1%).

ENERGY AND NATURAL RESOURCES

Electricity. In 1999, 92% of electricity was produced by burning oil shale (down from 98% in 1996). Installed capacity was 3.3m. kW in 1999 and production was 8.52bn. kWh. Consumption per capita was 5,604 kWh in 1997. A pilot wind-turbine project was set up in 1996. Electricity production in power plants in 1999 was 8,265 gWh (9,217 gWh in 1997).

Oil and Gas. There are rich oil shale deposits estimated at 3,972m. tonnes in 1997. A factory for the production of gas from shale and a 208 km-pipeline from Kohtla-Järve supplies shale gas to Tallinn, and exports to St Petersburg. Natural gas is imported from Russia.

Water. A total of 6 isolated underground water complexes provide 75% of the water consumed.

Minerals. Oil shale is the most valuable mineral resource. Production volume has decreased (from 21.2m. tonnes in 1990 to 12m. tonnes in 1999) because of falls in exports and domestic electricity consumption, and an increase in the use of natural gas. There are extensive peat deposits, estimated at 1.5bn. tonnes in 1997. Phosphorites and super-phosphates are found and refined, and lignite, limestone, dolomite, clay, sand and gravel are mined.

Agriculture. Farming is concentrated on milk and meat production. Large state and collective farms are being converted into shareholding enterprises. The remainder are being divided into small private holdings for collective farm workers or former owners. Farming employs around 6% of the population. At 1 Jan. 1999 there were 11,700 private farms and 680 agricultural enterprises averaging 490 ha cultivable land. In 1999 there were 1.12m. ha of arable land and 818,700 ha of field crops. In 1995, 13.1% of the labour force was employed in agriculture. Minimum prices and the quantity of state purchases of agricultural produce were guaranteed by the government for 1997, along with agricultural supports of 332.81m. kroons. Gross agricultural output in 1999 was 5.6bn. kroons.

Private, municipal and state ownership of forests is allowed. In 1999 there were 600,000 ha of privately owned forests out of a total of 2,143,000 ha. In 1999 the annual timber cut was 6.7m. cu. metres, of which 3.7m. cu. metres was from private forests.

Environment. According to the *World Bank Atlas* Estonia's carbon dioxide emissions in 1996 were the equivalent of 11.2 tonnes per capita.

KEY HISTORICAL EVENTS

The ancient empire of Ethiopia has its legendary origin in the meeting of King Solomon and the Queen of Sheba. The empire developed at Askum in the north in the centuries before and after the birth of Christ as a result of Semitic immigration from South Arabia. Ethiopia's subsequent history is one of sporadic expansion southwards and eastwards, checked from the 16th to early 19th centuries by devastating wars with Muslims and Gallas. Modern Ethiopia dates from the reign of the Emperor Theodore (1855–68). Menelik II (1889–1913) defeated the Italians in 1896 and thereby safeguarded the empire's independence in the

scramble for Africa.

In 1923 the heir to the throne, Ras Tafari (crowned Emperor Haile Selassie five years later), succeeded in getting Ethiopia admitted as an independent country to the League of Nations. However, the League was ineffective in preventing a second Italian invasion in 1936. The emperor fled the country, only returning when the Allied forces defeated the Italians in 1941.

In 1950 the former Italian colony of Eritrea, from 1941 under British military administration, was handed over to Ethiopia. Thereafter, a secessionist movement fought a guerrilla war for independence under the Eritrean Peoples' Liberation Front (EPLF). A military government, known as the Dergue, assumed power on 12 Sept. 1974 under the leadership of Lieut. Col. Mengistu Haile Miriam. It deposed the emperor, abolished the monarchy and mounted an agricultural collectivization programme. In 1977 Somalia invaded Ethiopia and took control of the Ogaden region. After a counter offensive with Soviet and Cuban support the area was recaptured. Following ever-increasing territorial gains by the insurgent Ethiopian People's Revolutionary Democratic Front (EPRDF) and the EPLF, Mengistu fled the country. In July 1991 a conference of 24 political groups, called to appoint a transitional government, agreed a democratic charter. Eritrea seceded, and became independent, on 24 May 1993. In 1999 fighting broke out along Ethiopia's border with Eritrea. After the failure of international mediation, the 13-month long-truce between Ethiopia and Eritrea ended in May 2000. Ethiopia launched a major offensive in the ongoing war over territorial disputes and claimed victory. In June both sides agreed to an Organization of African Unity peace deal to end the 2-year border war. Economic progress, including market-led reforms, raised hopes of higher living standards until three successive years of drought left food resources seriously depleted. Widespread malnutrition led to calls for international aid.

TERRITORY AND POPULATION

Ethiopia is bounded in the northeast by Eritrea, east by Djibouti and Somalia, south by Kenya and west by Sudan. It has a total area of 1,104,300 sq. km. The secession of Eritrea in 1993 left Ethiopia without a coastline. An Eritrean–Ethiopian agreement of July 1993 gives Ethiopia rights to use the Eritrean ports of Assab and Massawa.

The first census was carried out in 1984: population, 42,019,418 (without Eritrea, 39,570,266). 1994 census population: 49,218,178. Estimate (1995), 56·68m. (16·7% urban in 1998); density, 51 per sq. km.

The UN gives a projected population for 2010 of 89·51m.

The 1994 Constitution provides for a federation of 9 regions: Afar, Amhara, Benshangli, Gambella, Harar, Oromia, the Peoples of the South, Somalia and Tigre.

The population of the capital, Addis Ababa, was 2,534,000 in 1999. Other large towns (1994 populations): Dire Dawa, 164,851; Nazret, 127,842; Mekele, 119,779; Jimma, 119,717.

There are 6 major ethnic groups (in % of total population in 1996): Oromo, 31%; Amhara, 30%; Tigrinya, 7%; Gurage, 4.7%; Somali, 4.1%; Sidamo, 3.2%. There are also some 60 minor ethnic groups and 286 languages are spoken. The *de facto* official language is Amharic, though Oromo-speakers form the largest group.

SOCIAL STATISTICS

Births, 1995, 2,741,000; deaths, 965,000. Rates per 1,000 population, 1995: births, 48.6; deaths, 17.1. Expectation of life at birth in 1998 was 42.5 years for males and 44.4 years for females. Annual population growth rate, 1990–99, 2.7%; infant mortality, 1998, 110 per 1,000 live births; fertility rate, 1999, 6.2 births per woman.

CLIMATE

The wide range of latitude produces many climatic variations between the high, temperate plateaus and the hot, humid lowlands. The main rainy season lasts from June to Aug., with light rains from Feb. to April, but the country is very vulnerable to drought. Addis Ababa, Jan. 59°F (15°C), July 59°F (15°C). Annual rainfall 50" (1,237 mm). Harar, Jan. 65°F (18.3°C), July 64°F (17.8°C). Annual rainfall 35" (897 mm). Massawa, Jan. 78°F (25.6°C), July 94°F (34.4°C). Annual rainfall 8" (193 mm).

CONSTITUTION AND GOVERNMENT

A 548-member constituent assembly was elected on 5 June 1994; turn-out was 55%. The EPRDF gained 484 seats. On 8 Dec. 1994 it unanimously adopted a new federal Constitution which provides for the creation of a federation of 9 regions based (except the capital and the southern region) on a predominant ethnic group. These regions have the right of secession after a referendum. The *President*, a largely ceremonial post, is elected by parliament, the 548-member *Council of People's Representatives*. There is also an upper house, the 117-member *Federal Council*.

National Anthem. 'Yazegennat keber ba-ltyop yachchen santo' ('In our Ethiopia our civic pride is strong'); words anonymous, tune by S. Lulu.

INTERNATIONAL RELATIONS

A border dispute between Ethiopia and Eritrea broke out in May 1998. Eritrean troops took over the border town of Badame after a skirmish between Ethiopian police units and armed men from Eritrea. Ethiopia maintained that Badame and Sheraro, a nearby town, had always been part of Ethiopia and called Eritrea's action an invasion. An agreement ending hostilities was signed in June 2000, followed by a peace accord in Dec. A buffer zone has been created to separate the armies.

Ethiopia is a member of the UN, OAU, African Development Bank, COMESA and is an ACP member state of the ACP-EU relationship.

ECONOMY

Agriculture accounted for 49.8% of GDP in 1998, industry 6.7% and services 43.5%.

Policy. Following a long period of stagnation, the Ethiopian economy came to a turning point in 1991 when peace was restored. An Economic Reform Programme was instituted in 1992 aimed at stabilizing the economy and deregulating economic activities to prepare the ground for a free-market economy. Also in 1992, a government agency, the Ethiopian Investment Authority, was created to promote, facilitate and co-ordinate foreign investment in the country. An Economic Rehabilitation and Reconstruction Programme (ERRP), launched in 1991-92, eased foreign exchange regulations to allow for imports of raw materials and capital equipment. But economic growth has been hampered by three years of drought leading to widespread food shortages.

A privatization programme began in 1995, since when more than 150 companies have been privatized, yielding some US\$340m. for the state. Around 300 companies are to be privatized altogether.

Performance. Over the 3-year period from 1992-93 to 1994-95 real overall GDP growth averaged 6.5%. However, the economy is estimated to have contracted by 0.5% in 1998, and by a further 3.5% in 1999 as the conflict with neighbouring Eritrea worsened. In 1998 total GDP was US\$6.5bn.

Budget. The fiscal year ends on 6 July. Revenue, 1996-97, US\$1bn.; expenditure, US\$1.5bn.

Banking and Finance. The central bank and bank of issue is the National Bank of Ethiopia (founded 1964; *Governor*, Dubale Jale). The country's largest bank is the state-owned Commercial Bank of Ethiopia. The complete monopoly held by the bank ended with deregulation in 1994, but it still commands about 90% of the market share. On 1 Jan. 1975 the government nationalized all banks, mortgage and insurance companies.

Weights and Measures. The metric system is officially in use. Traditional units include the *frasilla* (= approximately 37½ lb), and the *gasha*, which can vary between 80 and 300 acres. The Julian calendar remains in use; the year has 13 months, and is 7 years behind the Gregorian calendar.

By 1993, 96% of agricultural land was worked by smallholdings averaging 0.5–1.5 ha. KEY HISTORICAL EVENTS

The Fiji Islands were first recorded in detail by Capt. Bligh after the mutiny of the *Bounty* (1789). In the 19th century the demand for sandalwood attracted merchant ships. Deserters and shipwrecked men stayed. Tribal wars were bloody and general until Fiji was ceded to Britain on 10 Oct. 1874. Fiji gained independence on 10 Oct. 1970. It remained an independent state within the Commonwealth with a Governor-General appointed by the Queen until 1987. In the general election of 12 April

1987 a left-wing coalition came to power with the support of the Indian population who outnumbered the indigenous Fijians by 50% to 44%. However, it was overthrown in a military coup. A month later, Fiji declared itself a Republic and Fiji's Commonwealth membership lapsed.

In 1990 a new coalition restored civilian rule but made it impossible for Fijian Indians to hold power. A rapprochement with Indian leaders led to an agreement to restore multi-racial government in 1998. Fiji rejoined the Commonwealth in 1997. On 27 July 1998 a new constitution changed the country's name from Fiji to Fiji Islands.

A coup was staged in May 2000 under the leadership of George Speight, a failed businessman. His main aim was to exclude Indians from the government. An interim government, excluding Speight supporters, was appointed on 3 July 2000 to rule for 18 months. On 26 July George Speight and 400 of his supporters were arrested.

TERRITORY AND POPULATION

The Fiji Islands comprise 332 islands and islets (about one-third are inhabited) lying between 15° and 22° S. lat. and 174° E. and 177° W. long. KEY HISTORICAL EVENTS

Finland was part of Sweden until the 18th century when the southeast territory was conquered by Russia. The rest of the country was ceded to Russia by the treaty of Hamina in 1809 when Finland became an autonomous grand-duchy retaining its laws and institutions under a grand duke, the Emperor of Russia. The Diet, elected since 1906 on universal suffrage, produced in 1916 a social democrat majority, the first in Europe. After the Russian revolution Finland declared itself independent but civil war broke out in Jan. 1918 between the 'whites' and 'reds', the latter supported by Russian Bolshevik forces. The defeat of the red guards led to a peace

treaty with Soviet Russia, signed in 1920. On 30 Nov. 1939 a Soviet invasion compelled Finland to cede 32,806 sq. km including the Carelian Isthmus, Viipuri and the shores of Lake Ladoga. When the German attack on the USSR was launched in June 1941 Finland was again involved in war against the USSR. On 19 Sept. 1944 an armistice was signed in Moscow. Finland agreed to cede more territory and to pay reparations. To pacify the USSR, the post-war premier and later president Juho Passikivi pursued a policy of neutralism favourable to the Russians. This policy, known as Finlandization, was continued under Presidents Urho Kekkonen (1956–81) and Mauno Koivisto (1981–94). With the collapse of the Soviet Union, Finland was able to adopt an independent foreign policy which led to EU admission in 1995.

Fertility rate, 1999, 1.7 births per woman. In 1999 Finland received 3,106 asylum applications, equivalent to 0.6 per 1,000 inhabitants.

A UNICEF report published in 2000 showed that 4.3% of children in Finland live in poverty (in households with income below 50% of the national median), the third lowest percentage of any country behind Sweden and Norway.

CLIMATE

A quarter of Finland lies north of the Arctic Circle. The climate is severe in winter, which lasts about 6 months, but mean temperatures in the south and southwest are less harsh, 21°F (–6°C). In the north, mean temperatures may fall to 8.5°F (–13°C). Snow covers the ground for three months in the south and for over six months in the far north. Summers are short but quite warm, with occasional very hot days. Precipitation is light throughout the country, with one third falling as snow, the remainder mainly as rain in summer and autumn. Helsinki (Helsingfors), Jan. 23°F (–5°C), July 65.7°F (18.7°C). Annual rainfall 24.5" (623 mm).

CONSTITUTION AND GOVERNMENT

Finland is a republic governed by the Constitution of 17 July 1919.

Parliament consists of one chamber of 200 members chosen by direct and proportional election by all citizens of 18 or over. The country is divided into 15 electoral districts, with a representation proportional to their population. Every citizen over the age of 18 is eligible for Parliament, which is elected for 4 years, but can be dissolved sooner by the President.

The *President* is elected for 6 years by direct popular vote. In the event of no candidate winning an absolute majority, a second round is held between the 2 most successful candidates. Although the President used to choose who formed the government, since 1999 it has been the responsibility of Parliament to select the Prime Minister.

National Anthem. 'Maamme'/'Vårt land' ('Our land'); words by J. L. Runeberg, tune by F. Pacius (same as Estonia).

RECENT ELECTIONS

Presidential elections were held on 16 Jan. 2000 with a second round on 6 Feb. In the first round SDP candidate Tarja Halonen came first with 40.0%, followed by Esko Aho (KESK) with 34.4%. There were 5 other candidates. In the run-off Halonen won with 51.6% against 48.4% for Aho. Turn-out was around 80%.

At the elections for the 200-member parliament on 21 March 1999, turn-out was 68%. Defence expenditure in 1999 totalled US\$1,695m. (US\$328 per capita), representing 1.4% of GDP.

Army. The Army consists of 1 armoured training brigade, 6 infantry training brigades, 3 infantry regiments, 1 artillery brigade, 3 brigade artillery regiments, 4 anti-aircraft regiments, 1 engineer regiment (including ABC school), 3 brigade signals battalions and a reserve officer school. Total strength of 27,300 (21,600 conscripts).

Frontier Guard. This comes under the purview of the Ministry of the Interior, but is militarily organized to participate in the defence of the country. It is in charge of border surveillance and border controls. It is also responsible for conducting maritime search and rescue operations. Personnel, 1999, 3,400 (professional) with a potential mobilizational force of 22,000.

Navy. The organization of the Navy was changed on 1 July 1998. The Coastal Defence, comprising the coast artillery and naval infantry, was merged into the navy.

About 50% of the combatant units are kept manned, with the others on short-notice reserve and re-activated on a regular basis. Naval bases exist at Upinniemi (near Helsinki), Turku and Kotka. Naval Infantry mobile troops are trained at Tammisaari. Total personnel strength (1999) was 5,000, of whom 2,500 were conscripts.

INTERNATIONAL RELATIONS

Finland is a member of the UN, WTO, NATO Partnership for Peace, OECD, EU, Council of Europe, OSCE, CERN, Nordic Council, Council of the Baltic Sea States, Inter-American Development Bank, Asian Development Bank, IOM and the Antarctic Treaty. Finland has acceded to the Schengen Accord, which abolishes border controls between Finland, Austria, Belgium, Denmark, France, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain and Sweden.

ECONOMY

Services accounted for 63% of GDP in 1999, industry 33% and agriculture 4%.

According to the Berlin-based organization *Transparency International*, Finland has the least corruption in business and government of any country in the world. It received 10 out of 10 in a corruption perceptions index published in 2000.

Policy. The Finnish economy not only saw rapid growth in the late 1990s but also redressed a number of imbalances in the economy. Owing to these developments, employment has risen substantially, aided by reductions in taxes and indirect labour costs as well as by structural reforms that have improved the functioning of the labour markets. Finnish public finances have been brought into balance and state debt into decline, as targeted by the government.

Performance. Real GDP growth was 4.2% in 1999 and forecast to be 5.2% in 2000. Total GDP was US\$129.4bn. in 1999.

The OECD reported in 1999 that 'Finland's recent economic performance has been admirable in most respects and the economy is projected to do well in 2000. The monetary conditions may become too easy in 2000, however, and excessive wage rises due to labour market bottlenecks are a major risk, despite the still high unemployment. Sound macroeconomic fundamentals, a strong competitive position and the existence of a pole of excellence in the electronic equipment sector may not be sufficient to achieve a satisfactory labour market performance in the coming years. The new government has identified the need to reduce taxes and to proceed with labour and product market reforms, but the envisaged income tax cuts are fairly timid whilst most reform measures, such as the reform of the early retirement scheme, still have to be specified. Wide-ranging and timely reform measures would help to alleviate obstacles to the continuation of strong, non-inflationary growth in the medium term and increase the chances of further reducing unemployment significantly. Some labour market reforms, especially of the early retirement scheme, could have an immediate effect on labour supply. In the absence of such reforms, a tight fiscal policy stance will be all the more needed to prevent overheating. Concerning sustainable development, both a more systematic economic assessment of environmental policy measures and a further integration of environmental matters in sectoral policies are needed.'

Finland was placed first in the world in the Current Competitiveness Index Ranking in the World Economic Forum's *Global Competitiveness Report 2000*. In the 2000 *World Competitiveness Yearbook*, compiled by the International Institute for Management Development, Finland came third in the world ranking behind the USA and Singapore.

Reductions in income tax in recent years have reduced the total tax burden to 46.2% in 1998 and an estimated 46.8% in 2000. Of the total expenditure, 1999, 13% went to education and culture, 4% to transport, 20% to health and social security, 6% to agriculture and forestry, 4% to defence and 54% to other expenditure according to the budget.

The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002—until then the national currency will be used for payment in cash. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking; by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and marks until the markka is withdrawn from circulation—which must be by 1 July 2002 and is scheduled for 28 Feb. 2002.

The *markka* (FIM) or mark consists of 100 *pennis*. The mark was pegged to the ecu in June 1991 with a 3% margin of fluctuation. It was devalued by 12.3% in Nov. 1991, and unpegged from the ecu in Sept. 1992. Inflation in 1998 was 1.4%, declining to 1.2% in 1999. In Feb. 1998 foreign exchange reserves were

US\$7,064m. and in Jan. 2000 gold reserves were 1.57m. troy oz. Total money supply in Feb. 1998 was 210,276m. marks. Currency in circulation at the end of 1999 amounted to 19,919m. marks.

Banking and Finance. The central bank is the Bank of Finland (founded in 1811), owned by the State and under the guarantee and supervision of Parliament. Its *Governor* is Matti Vanhala. It is the only bank of issue, and the limit of its right to issue notes is fixed equal to the value of its assets of gold and foreign holdings plus 1,500m. marks.

At the end of 1999 the deposits in banking institutions totalled 330,813m. marks and the loans granted by them 361,492m. marks.

The most important groups of banking institutions in 1999 were:

	<i>Number of institutions</i>	<i>Number of offices</i>	<i>Deposits (1m. marks)</i>	<i>Loans (1m. marks)</i>
Commercial banks	9	686	201,249	233,233
Savings banks	40	245	26,252	22,039
Co-operative banks	289	653	97,664	89,359
Foreign banks	7	15	5,648	16,861

The 3 largest banks are MeritaNordbanken (formed in 1997 when Nordbanken of Sweden merged with Merita of Finland), the state-owned Leonia (formerly Postipankki) and Okobank. In March 2000 MeritaNordbanken acquired Denmark's Unidanmark, thereby becoming the Nordic region's biggest bank in terms of assets. It has also become Europe's leading Internet bank, by July 2000 having 1.4m. Internet banking clients. By early 2001 approximately 40% of the Finnish population were using e-banking, the highest percentage in any country.

There is a stock exchange in Helsinki, which is one of the best performers among small industrialized nations. In 1999 share prices rose by 125%.

In 1998 Finland received US\$11bn. worth of foreign direct investment, equivalent to 8.9% of GDP. No other country received foreign investment totalling such a high proportion of its GDP.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 17.13m. kW in 2000. Production was 67,324m. kWh in 1998 (21.9% hydro-electric) and 66,655m. kWh in 1999 (18.8%). Consumption per capita in 1999 was an estimated 15,041 kWh. In 2000 there were 4 nuclear reactors. Parliament has rejected the construction of a fifth. Supply: 220 volts; 50 Hz.

Oil and Gas. There is no oil and gas production.

Water. Finland has abundant surface water and groundwater resources relative to its population and level of consumption. The total groundwater yield is estimated to be 10–30bn. cu. metres a day, of which some 6m. is suitable for water supplies. Approximately 15% of this latter figure is made use of at the present time. A total of 2–4% of Finland's exploitable water resources are utilized each year.

Minerals. Notable of the mines are Pyhäsalmi (zinc–copper), Orivesi (gold ore), Hitura (nickel) and Kemimaa (chromium). In 2000 the metal content (in tonnes) of the output of copper ore was 11,500; of zinc ore, 16,100; of nickel ore, 2,600; and of chromium, 260,600.

Agriculture. The cultivated area covers only 6% of the land, and of the economically active population 6% were employed in agriculture and forestry in 1999. The arable area was divided in 1998 into 153,443 farms, and the distribution of this area by the size of the farms was: less than 5 ha cultivated, 51,740 farms; 5–20 ha, 58,913 farms; 20–50 ha, 33,708 farms; 50–100 ha, 7,909 farms; over 100 ha, 1,173 farms.

Agriculture accounted for 7.8% of exports and 8.6% of imports in 1997.

The principal crops (area in 1,000 ha, yield in 1,000 tonnes) were in 1999:

<i>Crop</i>	<i>Area</i>	<i>Yield</i>	<i>Crop</i>	<i>Area</i>	<i>Yield</i>
Rye	12.3	23.6	Oats	403.9	990.1
Barley	581.0	1,567.7	Potatoes	32.3	791.1
Wheat	117.7	254.1	Hay	175.1	592.7

The total area under cultivation in 1998 was 2,003,000 ha. Approximately 6.3% of all agricultural land is used for organic farming. Production of dairy butter in 1999 was 59,660 tonnes; and of cheese, 87,602 tonnes.

Livestock (1999): horses, 54,500 (including trotting and riding horses, and ponies); cattle, 1,086,800; pigs, 1,351,300; poultry, 4,386,600; reindeer (1995), 333,000.

Forestry. The total forest land amounts to 22.9m. ha. The productive forest land covers 20.0m. ha. Timber production in 1998 was 53.67m. cu. metres. Finland is one of the largest producers of roundwood in Europe, but in 1998 it was the second largest importer of roundwood in the world after Japan. Finland's per capita consumption of industrial roundwood is the highest in the world, at 11.3m. cu. metres per person in 1998.

Environment. According to the *World Bank Atlas* Finland's carbon dioxide emissions in 1996 were the equivalent of 11.5 tonnes per capita.

Fisheries. The catch in 1998 was 181,304 tonnes, of which 133,686 tonnes came from sea fishing. In 1999 there were 257 food fish production farms in operation, of which 82 were freshwater farms. Their total production amounted to 15,449 tonnes. In addition there were 143 fry-farms and 312 natural food rearers, most of these in freshwater.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in Finland in April 2000 were Nokia (market capitalization of US\$241,308.1m., ranked 9th in the world), Sonera (market capitalization of US\$39,229.5m.) and Stora Enso (market capitalization of US\$7,498.5m.).

Finland originally became industrialized by harnessing its forest resources. Over a century later, forests are still Finland's most crucial raw material resource, although the metal and engineering industry has long been Finland's leading branch of manufacturing, both in terms of value added and as an employer. Today Finland is a typical advanced industrial economy: two-thirds of its total output is generated in the service sector.

In 1998 there were 30,386 establishments in industry (of which 27,990 were manufacturing concerns) with 436,791 personnel (of whom 414,181 were in manufacturing). Gross value of industrial production in 1998 was 508,681m. marks, of which manufacturing accounted for 478,212m. marks.

Labour. In 1999 the labour force was 2,557,000 (52% males). In 1999, 65.7% of the economically active population worked in services, 21.3% in manufacturing and 15.5% in trade and restaurants. In 1999 unemployment was 10.2%, against 3.2% in 1990, but down from 20.0% in 1993. In Dec. 2000 the rate had dropped further still to 8.3%.

Trade Unions. There are 3 labour organizations: the Confederation of Unions for Academic Professionals—Akateemisten Toimihenkilöiden Keskusjärjestö (AKAVA); the Finnish Confederation of Salaried Employees—Toimihenkilökeskusjärjestö (STTK); and the Central Organization of Finnish Trade Unions (SAK). According to an incomes policy agreement reached by the central labour market organizations in Dec. 2000, which is in force until the end of 2002, wages and salaries were to be raised by 2.1% in Feb. 2001 and by 1.9% in March. 2002. The government has undertaken to cut taxes on wages and salaries to support moderate pay increases.

INTERNATIONAL TRADE

At the start of the 1990s a collapse in trade with Russia led to the worst recession in the country's recent history. Today, exports to Russia are less than 5% of the total.

The product pattern of exports has also changed dramatically over the last 40 years. In 1960 wood and paper industry dominated exports with their 69% contribution. By 1995 the metal and engineering industry was the largest export sector. But as capital goods for the forest industry form a large proportion of machinery exports, 'the forest cluster' can still be considered the dominant exporter.

Rail. On 31 Dec. 1999 the total length of the line operated was 5,836 km (2,234 km electrified), all of it owned by the State. The gauge is 1,524 mm. In 1999, 53m. passengers and 40·0m. tonnes of freight were carried. There is a metro (17 km) and tram/light rail network (75·8 km) in Helsinki.

In 1995 the Finnish State Railways was transformed into a joint-stock company. Operations continue under the VR Group, the largest transport services group in Finland.

Civil Aviation. The main international airport is at Helsinki (Vantaa), and there are also international airports at Turku, Tampere, Rovaniemi and Oulu. The national carrier is Finnair. Scheduled traffic of Finnish airlines covered 82m. km in 1999. The number of passengers was 7·4m. and the number of passenger-km 12,916,000 in 1999; the air transport of freight and mail amounted to 351·7m. tonne-km. In 1998 services were also provided by Aer Lingus, Aeroflot, Air Baltic, Air Botnia, Air Canada, Air China, Air Express, Air France, Alitalia, Austrian Airlines,

Balkan, British Airways, Continental Airlines, Czech Airlines, Delta Air Lines, Deutsche BA, El Al, Estonian Air, Iberia, Icelandair, KLM, Lithuanian Airlines, LOT, Lufthansa, Malév, SABENA, SAS, Skyways, Swissair, Thai Airways International, Tyrolean Airways and United Airlines. Helsinki-Vantaa handled 9,564,028 passengers in 1999 (6,760,931 on international flights) and 93,457 tonnes of freight.

In 1999 the total number of vessels arriving in Finland from abroad was 27,705 and the goods discharged amounted to 38m. tonnes. The goods loaded for export from Finnish ports amounted to 37.6m. tonnes.

The lakes, rivers and canals are navigable for about 6,300 km. Timber floating has some importance, and there are about 8,802 km of floatable inland waterways. In 1999 bundle floating was about 1.0m. tonnes.

Telecommunications. In 1999 there were 2,856,000 telephone main lines in use (552.9 per 1,000 persons). 3,633,900 mobile telephones were in use in Nov. 2000. According to a survey conducted in Dec. 2000 around 88% of Finnish households own a mobile phone. The rate among 18- and 19-year-olds is almost 100%. Mobile subscribers account for 54% of all telephone subscribers—a percentage only exceeded in Cambodia. In mid-1999 approximately 19% of Finnish households only had a mobile phone and did not have a fixed-line phone at all. The Finnish company Nokia is the world's biggest manufacturer of mobile phones, making 41m. of the 163m. phones sold in 1998. It is by far the biggest company in Finland, accounting for 4.5% of the country's GDP and more than half the value of its stock exchange. The biggest operator is Sonera (formerly Telecom Finland). Approximately 50% of all voice and data traffic streams through the company's networks, and around 60% of all mobile users are Sonera customers. Finland has the lowest rates in Europe for both fixed and mobile phone calls.

In 1999 there were 1.86m. PCs in use (360 per 1,000 persons) and, in 1997, 198,000 fax machines. There were 2.27m. Internet users in Aug. 2000.

SOCIAL INSTITUTIONS

Justice. The lowest court of justice is the District Court. In most civil cases a District Court has a quorum with 3 legally qualified members present. In criminal cases as well as in some cases related to family law the District Court has a quorum with a chair and 3 lay judges present. In the preliminary preparation of a civil case and in a criminal case concerning a minor offence, a District Court is composed of the chair only. From the District Court an appeal lies to the courts of appeal in Turku, Vaasa, Kuopio, Helsinki, Kouvola and Rovaniemi. The Supreme Court sits in Helsinki. Appeals from the decisions of administrative authorities are in the final instance decided by the Supreme Administrative Court, also in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the Chancellor of Justice and the Ombudsman or Solicitor-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the government; the latter is appointed by Parliament.

At the end of 1999 the daily average number of prisoners was 2,743 of which 126 were women. The number of convictions in 1999 was 292,516, of which 232,873 were for minor offences with a maximum penalty of fines, and 23,867 with penalty of imprisonment. 11,324 of the prison sentences were unconditional.

Religion. Liberty of conscience is guaranteed to members of all religions. National churches are the Lutheran National Church and the Greek Orthodox Church of Finland. The Lutheran Church is divided into 8 bishoprics (Turku being the

archiepiscopal see), 80 provostships and 595 parishes. The Greek Orthodox Church is divided into 3 bishoprics (Kuopio being the archiepiscopal see) and 27 parishes, in addition to which there are a monastery and a convent.

CULTURE

Helsinki was one of nine European Cities of Culture in the year 2000, with the theme of 'Knowledge, Technology and the Future'. 2000 also marked the 450th anniversary of the founding of Helsinki. The other Cities of Culture were Avignon (France), Bergen (Norway), Bologna (Italy), Brussels (Belgium), Kraków (Poland), Prague (Czech Republic), Reykjavík (Iceland) and Santiago de Compostela (Spain). The title attracts large European Union grants.

Broadcasting. The Finnish Broadcasting Company, YLE, is the biggest national radio and television service provider. YLE operates two television channels (colour by PAL) with full national coverage. The second biggest television broadcaster, the privately owned Commercial MTV3, has one nationwide channel. A new private TV channel, Ruutunelonen, started in 1997. Television programmes from TV Sweden are transmitted over YLE's channel 4. There are some 30 local TV stations that mainly relay foreign and domestic programmes over cable and radio waves, in addition to locally produced material. The only radio broadcaster with full nationwide coverage is YLE. It transmits 3 national channels in Finnish and one in Swedish, as well as various regional channels, including 1 in Sami in Lapland. At the end of 1999 there were 52 local radio stations. Two of them, the news and music stations Nova and Classic, cover almost 60% of the population. There were 3.2m. newspapers is 2.3m. There are 5,129 registered periodicals with a total circulation of over 21m. In terms of total circulation of dailies relative to population, Finland ranks second in Europe after Norway. Most newspapers are bought on subscription rather than from newsstands. Only two newspapers depend entirely on newsstand sales. The five bestselling newspapers in 2000 were: *Helsingin Sanomat* (average daily circulation, 451,463 copies), *Ilta-Sanomat* (212,408), *Aamulehti* (134,779), *Iltaalehti* (122,533) and *Turun Sanomat* (115,023). Theme and amusement parks are popular tourism destinations for the Finns, while international tourists visit the country's nature attractions. Major international tourist attractions include Santa Park on the Polar Circle, the Kemi Snow Castle, and the Bomba House and Carelian Village in Nurmes. KEY HISTORICAL EVENTS

Gaul, the area that is now France, was conquered by Julius Caesar in the 1st century BC and became a part of the Roman Empire. In the 3rd and 4th centuries it was overrun by Germanic tribes and in the 10th century Norsemen invaded. There was a long period of conflict with England, typified by the Hundred Years' War (1337–1453); and this was followed by rivalry with Spain in the latter part of the 15th and in the 16th century. The Reformation caused a long religious civil war between 1562 and 1598, at the end of which the Huguenot leader Henry of Navarre was converted to Catholicism and reigned as the first Bourbon king, Henry IV. The two powerful ministers of the 17th century, Cardinal Richelieu and Mazarin, successively ensured that France, and not Spain, established itself as the dominant country in Europe. Militarily, this was achieved by the treaties of Westphalia (which ended the Thirty Years' War in 1648) and of the Pyrenees (1659).

The second half of the 18th century saw France defeated by England in the Seven Years' War (1756–63). The French Revolution began in 1789 when the 'Third Estate' assumed power as a National Assembly and overthrew the government. Riots and the storming of the Bastille were followed by the proclamation of a republic (1792) and the execution of the king, Louis XVI (1793). A Reign of Terror followed during which thousands were guillotined. After these excesses the Directory ruled from 1795 until 1799 when it was overthrown by Napoleon Bonaparte, who became First Consul and then Emperor (1804) of the first French Empire. Napoleon went on to gain control of most of Europe until he was finally defeated at the Battle of Waterloo in 1815. The monarchy was restored, with the Bourbon family reigning (officially from 1814). A revolution in 1830 brought Louis Philippe, son of the Duke of Orleans, to the throne as a constitutional monarch. This 'July Monarchy' was overthrown in 1848 and superseded by the Second Republic, with Louis Napoleon (nephew of Napoleon I) elected president. In 1852 he took the title of Emperor Napoleon III, and hence began the Second Empire. However, the early military failures of France in the Franco-Prussian War (1870–71) led to Napoleon being deposed and the proclamation of the Third Republic in 1870. This survived both the First World War, which was fought chiefly on French soil, and also 44 successive governments from the end of the war in 1918 until 1940. In 1940 German troops invaded France, the French government capitulated, and a pro-German government was established at Vichy. Gen. Charles de Gaulle headed a Free French government in London, while in France the Resistance continued to harass the German Army of Occupation.

When France was liberated in 1944 a provisional government under de Gaulle ruled the country until the Fourth Republic was established in 1946 and de Gaulle retired. The country now faced problems in Algeria and in Indo-China. There were many changes of government up to 1958. In that year de Gaulle was recalled as prime minister and then president of the Fifth Republic. He granted independence to Algeria (1962) and was successful in establishing a firm and stable government until rioting and strikes by students and workers led to his resignation in 1969. He was succeeded by Georges Pompidou, who died in 1974 and then by Giscard d'Estaing. Both presidents continued Gaullist policies but in 1981 François Mitterrand, a socialist, was elected to the presidency. For a time he had to govern in an uneasy relationship with a right-wing premier, Jacques Chirac. Mitterrand's period of office was clouded by charges of corruption. In 1995 Chirac was elected President in succession to the ailing Mitterrand, who died the following year. An ill-judged general election called by Chirac led to a socialist government headed by Lionel Jospin, who is frequently at odds with his right-wing President.

TERRITORY AND POPULATION

France is bounded in the north by the English Channel (*La Manche*), northeast by Belgium and Luxembourg, east by Germany, Switzerland and Italy, south by the Mediterranean (with Monaco as a coastal enclave), southwest by Spain and Andorra, and west by the Atlantic Ocean. The total area is 549,090 sq. km. Paris is the most populous agglomeration in Europe, with a population of over 9.6m. More than 14% of the population of Paris are foreign and 19% are foreign born.

Population (1999 census), 58.52m.; density, 108 persons per sq. km.

The UN gives a projected population for 2010 of 59.94m.

In 1998, 75.2% of the population lived in urban areas.

The growth of the population has been as follows:

<i>Census</i>	<i>Population</i>	<i>Census</i>	<i>Population</i>	<i>Census</i>	<i>Population</i>
1801	27,349,003	1946	40,506,639	1975	52,655,802
1861	37,386,313	1954	42,777,174	1982	54,334,871
1901	38,961,945	1962	46,519,997	1990	56,615,155
1921	39,209,518	1968	49,778,540	1999	58,518,748
1931	41,834,923				

According to the 1990 census, there were 3.5m. people of foreign extraction in France (7.4% of the population). The largest groups of foreign residents in 1992 were: Portuguese (649,714), Algerians (614,207) and Moroccans (572,652). 92,410 persons were naturalized in 1995 (126,337 in 1994).

Controls on illegal immigration were tightened in July 1991. Automatic right to citizenship for those born on French soil was restored in 1997 by the new left-wing coalition government. New immigration legislation, which was due to come into force in 1998, brought in harsher penalties for organized traffic in illegal immigrants and extended asylum laws to include people whose lives are at risk from non-state as well as state groups. It also extended nationality at the age of 18 to those born in France of non-French parents, provided they have lived a minimum of 5 years in France since the age of 11.

The areas, populations and chief towns of the 22 metropolitan regions at the 1999 census were as follows:

<i>Regions</i>	<i>Area (sq. km)</i>	<i>Population</i>	<i>Chief town</i>

Paris: Situated on the River Seine and covering an area of 105 sq. km Paris has a population of 2.1m. Conquered by Julius Caesar in 52 BC, it became an important Roman town. In the 19th century it became known as a cultural and intellectual centre for artists and philosophers. The Eiffel Tower, 320 metres high and built for the 1889 Universal Exposition, dominates the skyline as one of Europe's most recognizable landmarks and is now France's second most visited tourist attraction, after Disneyland Paris.

France has 6 national parks, 35 regional national parks and 132 nature reserves.

Languages. The official language is French. Breton and Basque are spoken in their regions. The *Toubon* legislation of 1994 seeks to restrict the use of foreign words in official communications, broadcasting and advertisements (a previous such decree dated from 1975). The Constitutional Court has since ruled that imposing such restrictions on private citizens would infringe their freedom of expression.

CONSTITUTION AND GOVERNMENT

The Constitution of the Fifth Republic, superseding that of 1946, came into force on 4 Oct. 1958. It consists of a preamble, dealing with the Rights of Man, and 92 articles.

France is a republic, indivisible, secular, democratic and social; all citizens are equal before the law (Art. 1). National sovereignty resides with the people, who exercise it through their representatives and by referendums (Art. 3). Constitutional reforms of July 1995 widened the range of issues on which referendums may be called. Political parties carry out their activities freely, but must respect the principles of national sovereignty and democracy (Art. 4).

A constitutional amendment of 4 Aug. 1995 deleted all references to the 'community' (*communauté*) between France and her overseas possessions, representing an important step towards the constitutional dismantling of the former French colonial empire.

The head of state is the President, who sees that the Constitution is respected; ensures the regular functioning of the public authorities, as well as the continuity of the state; is the protector of national independence and territorial integrity (Art. 5). As a result of a referendum held on 24 Sept. 2000 the President is elected for 5 years by direct universal suffrage (Art. 6). Previously the term of office had been 7 years. The President appoints (and dismisses) a Prime Minister and, on the latter's advice, appoints and dismisses the other members of the government (*Council of Ministers*) (Art. 8); presides over the Council of Ministers (Art. 9); may dissolve the National Assembly, after consultation with the Prime Minister and the Presidents of the two Houses (Art. 12); appoints to the civil and military offices of the state (Art. 13). In times of crisis, the President may take such emergency powers as the circumstances demand; the National Assembly cannot be dissolved during such a period (Art. 16).

Parliament consists of the National Assembly and the Senate. The National Assembly is elected by direct suffrage by the second ballot system (by which candidates winning 50% or more of the vote in their constituencies are elected, candidates winning less than 12.5% are eliminated and other candidates go on to a second round of voting); the Senate is elected by indirect suffrage (Art. 24). Since 1996 the National Assembly has convened for an annual 9-month session. It comprises 577 deputies, elected by a two-ballot system for a 5-year term from single-member constituencies (555 in Metropolitan France, 22 in the overseas departments and dependencies), and may be dissolved by the President.

The *Senate* comprises 321 senators elected for 9-year terms (one-third every 3 years) by an electoral college in each Department or overseas dependency, made up of all members of the Departmental Council or its equivalent in overseas dependencies, together with all members of Municipal Councils within that area. The *Speaker* of the Senate deputizes for the President of the Republic in the event of the latter's incapacity. Senate elections were last held on 27 Sept. 1998.

The *Constitutional Council* is composed of 9 members whose term of office is 9 years (non-renewable), one-third every 3 years; 3 are appointed by the President of the Republic, 3 by the President of the National Assembly, 3 by the President of the Senate; in addition, former Presidents of the Republic are, by right, life members of the Constitutional Council (Art. 56). It oversees the fairness of the elections of the President (Art. 58) and Parliament (Art. 59), and of referendums (Art. 60), and acts

as a guardian of the Constitution (Art. 61). Its *President* is Yves Guéna (app. 2000).

The *Economic and Social Council* advises on Government and Private Members' Bills (Art. 69). It comprises representatives of employers', workers' and farmers' organizations in each Department and Overseas Territory.

DEFENCE

The President of the Republic is the supreme head of defence policy and exercises command over the Armed Forces. He is the only person empowered to give the order to use nuclear weapons. He is assisted by the Council of Ministers, which studies defence problems, and by the Defence Council and the Restricted Defence Committee, which formulate directives.

Legislation of 1996 inaugurated a wide-ranging reform of the defence system over 1997–2002, with regard to the professionalization of the armed forces (brought about by the ending of military conscription and consequent switch to an all-volunteer defence force), the modification and modernization of equipment and the restructuring of the defence industry. Defence was reported to be the main casualty of the Jospin administration's first budget. In 1999 defence expenditure totalled US\$37,814m. (US\$651 per capita), the highest in the EU. It is estimated under current plans that by 2002 the Army will have been reduced by more than 30% from 1997 levels, the Navy by about 16%, the Air Force by almost 20%. Defence spending as a proportion of GDP has fallen from 4% in 1988 to 2.7% in 1999.

French forces are not formally under the NATO command structure, although France signed the NATO strategic document on eastern Europe in Nov. 1991. The Minister of Defence attends informal NATO meetings which have an agenda of French interest, but not the formal twice-yearly meetings. Since Dec. 1995 France has taken a seat on the NATO Military Committee. In 2000, 2,700 service personnel were stationed in Germany, 17,470 in the overseas departments and territories, 9,538 on UN peacekeeping missions and 1,078 constituted the 'French maritime presence' abroad.

Conscription is for 10 months, but as a result of a law of 28 Oct. 1997 males born after 31 Dec. 1978 are no longer compelled to perform national service.

Nuclear Weapons. Having carried out its first test in 1961, there have been 210 tests in all. The last French test was in 1996 (this compares with the last UK test in 1991 and the last US test in 1993). The nuclear arsenal consisted of approximately 464 warheads in Jan. 2000 according to the Stockholm International Peace Research Institute.

Arms Trade. France was the world's third largest exporter after the USA and the UK in 1999, with sales worth US\$6,630m., or 12.4% of the world total). In 1987 sales had been worth US\$8.3bn., but had only represented 9.0% of the world total.

Army. The Army comprises the Land Force Command (CFAT), based in Lille, which is a single command over all forces. Apart from the Franco-German brigade, there are 8 brigades, each made up of between 4 and 7 battalions (infantry, MBTS, artillery, engineer), 1 airmobile brigade and 4 logistics brigades.

Personnel numbered (2000) 169,342 (47,055 conscripts and 9,157 women) including 16,500 marines and a Foreign Legion of 8,000. There were 242,500 reserves in 1999. The 1997–2002 Programming Act will provide for the following force at the end of the transitional period: 16,000 officers, 50,000 NCOs, 66,500 army enlistees, 5,500 volunteers, 34,000 civilians and 30,000 reservists. Equipment levels by 2002 will include 426 heavy tanks, 350 light tanks and 292 helicopters.

Gendarmerie. The paramilitary police force exists to ensure public security and maintain law and order, as well as participate in the operational defence of French territory as part of the armed forces. It consisted in 2000 of 100,350 personnel including 5,650 conscripts, 4,970 women and 1,870 civilians. It comprises a territorial force of 62,050 personnel throughout the country, a mobile force of 17,000 personnel and specialized formations including the Republican Guard, the Air Force and Naval Gendarmeries, and an anti-terrorist unit.

Navy. The missions of the Navy are to provide the prime element of the French independent nuclear deterrent through its force of strategic submarines; to assure the security of the French offshore zones; to contribute to NATO's missions; and to

provide on-station and deployment forces overseas in support of French territorial interests and UN commitments. French territorial seas and economic zones are organized into 3 maritime districts (with headquarters in Cherbourg, Brest and Toulon).

The strategic deterrent force comprises 4 nuclear-powered strategic-missile submarines, including 2 of 4 new-generation ships of a new, much larger, class, *Le Triomphant* and *Le Téméraire*, which entered service in 1997 and 1999.

Until it was withdrawn from service in 2000, the *Foch*, of 33,000 tonnes, was the principal surface ship. The 40,000-tonne nuclear-powered replacement *Charles de Gaulle*, which was launched at Brest in 1994, commissioned in Oct. 2000. There is 1 cruiser, the *Jeanne d'Arc*, completed in 1964 and used in peacetime as a training vessel. Other surface combatants include 4 destroyers and 35 frigates.

The naval air arm, *Aviation Navale*, numbers some 3,500 personnel. Operational aircraft include Super-Etendard nuclear-capable strike aircraft, Etendard reconnaissance aircraft and US-built Crusader F-8P all-weather fighters. The maritime Rafale combat aircraft was scheduled to enter service on board the *Charles de Gaulle*. A small Marine force of 1,600 *Fusiliers Marins* provides assault groups.

Personnel in 2000 numbered 49,491, including 5,018 conscripts, 3,466 women and 9,602 civilians.

Air Force. Created in 1934, the Air Force was reorganized in June 1994. The Conventional Forces in Europe (CFE) Agreement imposes a ceiling of 800 combat aircraft. There were 531 combat aircraft in 1999 including 352 Mirage jets (F-1s, MIVPs, 2000s, IV Ps) and 66 Jaguars.

Personnel (2000) 60,535 (938 conscripts; 6,300 women; 5,500 civilians). Air Force reserves in 1999 numbered 79,500 with the potential of an additional 100,000.

INTERNATIONAL RELATIONS

France is a member of the UN, WTO, the Council of Europe, BIS, WEU, EU, OSCE, OECD, CERN, Inter-American Development Bank, Asian Development Bank, the Pacific Community, IOM, Antarctic Treaty and the International Organization for Francophonie. France is a signatory to the Schengen Accord, which abolishes border controls between France, Austria, Belgium, Denmark, Finland, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain and Sweden.

At a referendum in Sept. 1992 to approve the ratification of the Maastricht treaty on European union of 7 Feb. 1992, 12,967,498 votes (50.81%) were cast for and 12,550,651 (49.18%) against.

France is the focus of the *Communauté Francophone* (French-speaking Community) which formally links France with many of its former colonies in Africa. A wide range of agreements, both with members of the Community and with other French-speaking countries, extend to economic and technical matters, and in particular to the disbursement of overseas aid.

ECONOMY

Agriculture accounted for 2.3% of GDP in 1998, industry 26.2% and services 71.5%.

Policy. A second phase of privatization (the first being in 1986–87) involving some 20 state enterprises was initiated by legislation of May 1993, by which the state retained the right to acquire a 'golden share' to give itself veto powers in the national interest. Between 1992 and 1998 privatization proceeds amounted to US\$49bn.

Performance. Real GDP growth was 2.3% in 1997, 3.2% in 1998 and 2.9% in 1999. Growth of 3.5% was forecast for 2000. Total GDP in 1999 was US\$1,436bn.

The OECD reported in 2000 that 'France has not enjoyed such a favourable economic situation for ten years. After performing poorly during 1990–96, the French economy benefited from rapidly growing activity, low inflation and growth that was richer in jobs, and entered the new millennium with an effervescent stock market and favourable prospects. After a temporary pause in the wake of the Asian and Russian crises, activity picked up again, and the outturn for 1999 as a whole exceeded most forecasts, with real GDP growing by 2.9 per cent.'

Budget. In 1997 public spending was cut by an extra 10,000m. francs when the new government came to power in June. The budget for 1998 envisaged no further cuts in public spending (but an increase in line with inflation forecast at 1.5%); and a reduction in the public deficit from 3.1% of GDP in 1997 (dramatically reduced in June from an estimated 3.5% and rising by the acquisition of 22,000m. francs in emergency corporate taxes) to 3% of GDP, which is the uppermost limit of the Maastricht criteria on budget deficits.

Receipts and expenditure in 1m. francs:

	1998	1999
Revenue	1,388,660	1,494,270
Expenditure	1,650,390	1,710,080

The standard rate of VAT is 19.6% (reduced rate, 5.5%). In Aug. 2000 a series of tax cuts was announced, including the gradual reduction of the top rate of income tax from 54% to 52.5% by 2003 and of corporate tax from 36.6% to 33.3%.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in France; irrevocable conversion rate 6.55957 francs to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002—until then the national currency will be used for payment in cash. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and francs until the franc is withdrawn from circulation—which must be by 1 July 2002 and is scheduled for 17 Feb. 2002.

The franc (FRF) is made up of 100 centimes. Notes in circulation at 29 Jan. 1998: 261,338m. francs. In Feb. 1998 foreign exchange reserves were US\$28,035m. and in Jan. 2000 gold reserves were 97.24m. troy oz. Inflation in 1999 was 0.5%, with a rate of 1.3% forecast for 2000.

Franc Zone. 13 former French colonies (Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Comoros, the Republic of the Congo, Côte d'Ivoire, Gabon, Mali, Niger, Senegal and Togo), the former Spanish colony of Equatorial Guinea and the former Portuguese colony of Guinea-Bissau are members of a Franc Zone, the CFA (*Communauté Financière Africaine*). Comoros uses the Comorian franc. From 1948 to 1994, 1 French franc equalled 50 francs CFA. The franc CFA was devalued by 50% on 11 Jan. 1994 and the Comorian franc by 25%. The franc CFP (*Comptoirs Français du Pacifique*) is the common currency of the French dependencies of French Polynesia, New Caledonia and Wallis and Futuna. It has a parity of CFP francs 18.18 to the French franc.

Banking and Finance. The central bank and bank of issue is the *Banque de France* (Governor, Jean-Claude Trichet, appointed 1993), founded in 1800, and nationalized on 2 Dec. 1945. In 1993 it received greater autonomy in line with EU conditions. The Governor is appointed for a 6-year term (renewable once) and heads the 9-member Council of Monetary Policy.

The National Credit Council, formed in 1945 to regulate banking activity and consulted in all political decisions on monetary policy, comprises 45 members nominated by the government; its president is the Minister for the Economy; its Vice-President is the Governor of the Banque de France.

In 1996 there were 1,445 banks and other credit institutions, including 400 shareholder-owned banks and 342 mutual or savings banks. 4 principal deposit banks were nationalized in 1945, the remainder in 1982; the latter were privatized in 1987. The banking and insurance sectors underwent a flurry of mergers, privatizations, foreign investment, corporate restructuring and consolidation in 1997, in both the national and international fields. The largest banks in 1998 (with assets in 1bn. francs) were: Crédit Agricole (2,565), Société Générale (2,519), Banque Nationale de Paris (2,132), Groupe Paribas (1,627), Crédit Lyonnais (1,371).

The state savings organization *Caisse Nationale d'Epargne* is administered by the post office on a giro system. There are also commercial savings banks (*caisses d'épargne et de prévoyance*). Deposited funds are centralized by a non-banking

body, the *Caisse de Dépôts et Consignations*, which finances a large number of local authorities and state-aided housing projects, and carries an important portfolio of transferable securities.

There is a stock exchange (Bourse) in Paris; it is a component of Euronext, which was created in Sept. 2000 through the merger of the Paris, Brussels and Amsterdam bourses.

Weights and Measures. The metric system is in general use.

ENERGY AND NATURAL RESOURCES

Electricity. The state-owned monopoly Electricité de France is responsible for power generation and supply under the Ministry of Industry. Installed capacity was 108,000 MW in 1997. Electricity production in 1998: 480.97bn. kWh, of which 76.2% was nuclear. Hydro-electric power contributes about 12.5% of total electricity output. Consumption per capita in 1997 was 7,693 kWh. In 1997 France was the European Union's biggest exporter of electricity with 71.4bn. kWh. Electricité de France is Europe's leading electricity producer, generating more than twice as much in 1998 (460bn. kWh) as the second largest producer.

France, not rich in natural energy resources, is at the centre of Europe's nuclear energy industry. In 2000 there were 58 nuclear reactors in operation—more than in any other country—with a generating capacity in 1999 of 61,723 MW. Only Lithuania has a higher percentage of its electricity generated through nuclear power.

Oil and Gas. In 1996, 16m. bbls. of crude oil were produced. The greater part came from the Parentis oilfield in the Landes. Reserves in 1997 totalled 117m. bbls. The importation and distribution of natural gas is the responsibility of the government monopoly Gaz de France. Production of natural gas (1995) was 33,395m. cu. metres. Gas reserves were 19bn. cu. metres in 1997.

Minerals. France is a significant producer of nickel, uranium, iron ore, bauxite, potash, pig iron, aluminium and coal. Société Le Nickel extracts in New Caledonia and is the world's third largest nickel producer; France is the world's seventh largest uranium producer. The mining sector contributed 1% of GDP in 1994, and employed 0.8% of the workforce.

Coal production (1997): 7m. tonnes. Coal power generators contributed 6.2% of total energy consumption in 1994. Coal reserves in Jan. 1996: 139m. tonnes. Production of other principal minerals and metals (1994, in 1,000 tonnes): salt (1998), 7,000; iron ore (metal content), 708; aluminium (1998), 400; potash salts, 936; gold (1997), 4,350 kg.

Agriculture. France has the highest agricultural production in Europe, accounting for more than a fifth of the European Union total. In 1998 the agricultural sector employed about 910,000 people, down from 1,869,000 in 1980. Agriculture accounts for 14.5% of exports and 11.4% of imports.

In 1998 there were 680,000 holdings (average size 42 ha), down from over 1m. in 1988. Co-operatives account for between 30–50% of output. There were 1,312,000 tractors and 154,000 harvester-threshers in 1997. Although the total number of tractors has been declining steadily in recent years, increasingly more powerful ones are being used. In 1997, 362,000 tractors in use were of 80 hp or higher, compared to 96,000 in 1979.

Of the total area of France (54.9m. ha), the utilized agricultural area comprised 29.92m. ha in 1999. 18.40m. ha were arable, 10.36m. ha were under pasture, and 1.16m. ha were under permanent crops including vines (0.91m. ha).

Area under cultivation and yield for principal crops:

	Area (1,000 ha)			Production (1,000 tonnes)

Total fruit and vegetable production in 1998 was 18,671,000 tonnes. Other important vegetables include peas (3,311,000 tonnes in 1998), tomatoes (800,000 tonnes), carrots (670,000 tonnes), cauliflowers (500,000 tonnes) and onions (340,000 tonnes). France is the world's leading producer of both sugarbeets and peas. Total area under cultivation and yield of grapes from the vine (1998): 885,000 ha; 7m. tonnes. Wine production (1998): 5,163,000 tonnes. France and Italy are by far the largest wine producers in the world. France was the leading producer in 1997, but Italy produced more in 1998. Consumption in France has declined dramatically in recent times, from nearly 120 litres per person in 1966 to 60 litres per person in 1997.

Figures compiled by the Soil Association, a British organization, show that in 1999 France set aside 220,000 ha (1% of its agricultural land) for the growth of organic crops, compared to the EU average of 2.2%.

Livestock (1998, in 1,000): cattle, 20,097; pigs, 15,864; sheep, 9,460; goats, 1,083; horses, 362; asses and mules, 39; chickens, 238,000; turkeys, 42,000; ducks, 23,000. Livestock products (1998, in 1,000 tonnes): pork, bacon and ham, 2,333; beef and veal, 1,595; lamb and mutton, 145; poultry, 2,324; horse, 10; eggs, 954. Milk production, 1998 (1,000 tonnes): cows', 24,500; sheep's, 243; goats', 480. Cheese production, 1,625,000 tonnes. France is the second largest cheese producer in the world after the USA.

Forestry. Forestry is France's richest natural resource, with a revenue of about 8,000m. francs a year, and employs 550,000 people. In 1995 forest covered 15.03m. ha (27.3% of the land area). In 1990 the area under forests had been 14.23m. ha, or 25.9% of the land area. 73.7% of forest is private; 26% state-owned. Timber production in 1998 was 42.77m. cu. metres.

Environment. According to the *World Bank Atlas* France's carbon dioxide emissions in 1996 were the equivalent of 6.2 tonnes per capita.

Fisheries. In 1998 there were 6,074 fishing vessels totalling (in 1996) 176,356 GRT, and 16,556 fishermen. Catch in 1998 was 536,254 tonnes, of which 531,754 tonnes were from marine waters.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in France in April 2000 were France Telecom (market capitalization of US\$169,163.9m.), Total Fina Elf (market capitalization of US\$111,528.9m.) and Vivendi (market capitalization of US\$66,570.4m.).

The industrial sector employs about 27% of the workforce. In Nov. 1997 capacity utilization in industry was approaching 85%. Chief industries: steel, chemicals, textiles, aircraft, machinery, electronic equipment, tourism, wine and perfume.

Industrial production (1996, in 1,000 tonnes): distillate fuel oil, 33,337; crude steel, 20,200 (1999); cement, 19,780 (1997); petrol, 18,007; pig iron, 13,428 (1997); residual fuel oil, 10,516; sulphuric acid, 2,382 (1995); caustic soda, 1,561 (1994). France is one of the biggest producers of mineral water, with output of 6,123m. litres in 1996.

Engineering production (1999, in 1,000 units): cars, 4,200; car tyres, 59,700; television sets (1994), 2,796.

Labour. Out of an economically active population of 23,529,000 in March 2000, 44.7% were women. By sector, 71.5% worked in services (58.1% in 1980), 24.4% in industry and construction (33.1% in 1980) and 4.1% in agriculture (8.8% in 1980). Some 5m. people work in the public sector at national and local level. It was estimated in 1997 that 51% of households have no-one working in the private sector.

A new definition of 'unemployed' was adopted in Aug. 1995, omitting persons who had worked at least 78 hours in the previous month. Unemployment in 1998 was close to 3m. or 11.5% (1997, 12.5%) of the active population. The long-term

jobless accounted for almost 40% of those seeking work. By Dec. 2000, however, the unemployment rate had dropped to 9.2%—the lowest rate since 1991. For the first time in nearly 50 years the French unemployment rate was lower than that of Germany. In the year to March 2000 a total of 430,000 jobs were created, representing the biggest jump in employment for 30 years. An average of 400,000 new jobs have been created every year since Lionel Jospin became prime minister in 1997, compared to an average of 40,000 a year for much of the previous 20 years.

Conciliation boards (*Conseils de Prud'hommes*) mediate in labour disputes. They are elected for 5-year terms by 2 colleges of employers and employees. Between 1989 and 1998 strikes cost France an average of 45 days per 1,000 employees a year, compared to the EU average of 85 per 1,000. In Jan. 1998 the minimum wage (SMIC) was 39.29 francs an hour (6,664 francs a month). SMIC affects about 1.5m. wage-earners. The average annual wage was 114,314 francs in 1994. Retirement age is 60, although in 1995 the average actual age for retirement among males was 59. A 5-week annual holiday is statutory.

In May 1998 the national assembly approved a reduction in the working week from 39 to 35 hours. The main provisions obliged all companies employing more than 20 people to introduce the shorter working week from Feb. 2000 and all the rest from 2002. The law offers a sliding scale of incentives to employers provided that they cut working hours and create extra jobs. A second piece of legislation was planned for 1999 to determine how overtime would be paid, the working hours of salaried staff and the number of hours to be worked during the year.

Trade Unions. The main trade union confederations in 1997 were as follows: the Communist-led CGT (Confédération Générale du Travail), founded 1895; the CGT-FO (Confédération Générale du Travail—Force Ouvrière) which broke away from the CGT in 1948; the CFTC (Confédération Française des Travailleurs Chrétiens), founded in 1919 and divided in 1964, with a breakaway group retaining the old name and the main body continuing under the new name of CFDT (Confédération Française Démocratique du Travail); and the CGC (Confédération Générale des Cadres) formed in 1944, which represents managerial and supervisory staff. The main haulage confederation is the FNTR; the leading employers' association is the CNPF, often referred to as the *Patronat*. Unions are not required to publish membership figures, but in 1993 the 2 largest federations, the CGT and CFDT, had an estimated 0.63m. and 0.65m. members respectively.

Although France has the lowest rate of trade union membership in Europe (9% in 1997, compared to 29% in Germany, 33% in Britain and over 90% in Sweden), its trade unionists have considerable clout: they run France's welfare system; staff the country's dispute-settling industrial tribunals (*conseils de prud'hommes*); and fix national agreements on wages and working conditions. A union call to strike is invariably answered by more than a union's membership. Nearly 6m. working days were lost in French strikes in 1995 compared to 415,000 in Britain and 247,000 in Germany.

INTERNATIONAL TRADE

The trade balance showed a surplus of nearly 200,000m. francs in 1997 due to a strong export market, and a drop in imports owing to sluggish domestic demand. Trade balance (1997 estimate, in US\$): 19,900m. (1998 forecast, 24,800m.).

Privatization legislation of May 1993 gave foreign nationals the right to acquire more than 20% of a firm's capital (the previous limit). In 1997, following intense activity on the equity market, approximately one-third of French equity was owned by foreign investors.

Imports and Exports. Total imports (1999): US\$276.3bn.; total exports, US\$300.3bn. Principal imports include: oil, machinery and equipment, chemicals, iron and steel, and foodstuffs. Major exports: metals, chemicals, industrial equipment, consumer goods and agricultural products.

Foreign trade by sector (1999, as % of total trade):

	% Imports	% Exports
Agriculture and foodstuffs	10.1	13.1
Energy	7.1	2.7
Cars	10.9	13.4
Producer durables	23.4	25.5
Intermediate goods	32.9	31.5
Consumer goods	15.6	13.8

In 1999 the chief import sources (as % of total imports) were as follows: Germany, 17.2%; Italy, 9.6%; USA, 8.8%; UK, 8.4%; Spain, 7.1%. The chief export markets (as % of total) were: Germany, 15.7%; UK, 10.3%; Italy, 9.4%; Spain, 9.1%; USA, 7.8%. Exports to other European Union members constituted 64.2% of the total, and imports from fellow European Union members accounted for 61.5% of all imports.

Trade Fairs. Paris ranks as the world's leading major convention city by the Union des Associations Internationales (UAI), hosting 2.63% of international meetings held in 1999.

COMMUNICATIONS

Roads. In 1998 there were 893,300 km of road, including 10,300 km of motorway. France has the longest road network in the EU. Around 90% of all freight is transported by road. In 1998 there were 26,800,000 private cars and 5,418,000 lorries, 82,000 buses, and 870,000 motorcycles and scooters (1996). The average distance travelled by a passenger car in 1997 was 14,000 km. Road passenger traffic in 1998 totalled 753.1bn. passenger-km. In 1998 there were 8,437 road deaths, up from 7,989 in 1997.

Rail. In 1938 all the independent railway companies were merged with the existing state railway system in a Société Nationale des Chemins de Fer Français (SNCF), which became a public industrial and commercial establishment in 1983. Legislation came into effect in 1997 which vested ownership of the railway infrastructure (track and signalling) in a newly established public corporation, the National Railway Network (RFN). The RFN is funded by payments for usage from the SNCF, government and local subventions and authority capital made available by the state derived from the proceeds of privatization. The SNCF remains responsible for maintenance and management of the rail network. The legislation also envisages the establishment of regional railway services which receive funds previously given to the SNCF as well as a state subvention. These regional bodies negotiate with SNCF for the provision of suitable services for their area. SNCF is the most heavily indebted and subsidized (38,000m. francs a year) company in France.

In 1997 SNCF totalled 33,769 km of track (one third of it electrified). High-speed TGV lines link Paris to the south and west of France, and Paris and Lille to the Channel Tunnel (Eurostar). The high-speed TGV line appeared in 1983; it had 1,860 km of track in 1997, and another 4,400 km planned by 2015. Services from London through the Channel Tunnel began operating in 1994. Rail passenger traffic in 1998 totalled 64.5bn. passenger km.

The Paris transport network consisted in 1993 of 202 km of metro, 352 km of regional express railways, 9.1 km of light rail and 7 km of passenger stock. There are metros in Lille (29 km), Lyons (20.8 km), Toulouse (10 km) and Marseilles (19.5 km), and tram/light railway networks in Grenoble (14.6 km), Lille (23 km), Marseilles (3 km), Nantes (16.5 km), Rouen (17 km), St Étienne (7 km) and Strasbourg (11.4 km).

Civil Aviation. The main international airports are at Paris (Charles de Gaulle), Paris (Orly), Bordeaux (Mérignac), Lyons (Satolas), Marseilles-Provence, Nice-Côte d'Azur, Strasbourg (Entzheim), Toulouse (Blagnac) and Nantes (Atlantique). The following had international flights to only a few destinations in 1998: Brest, Caen, Carcassonne, Clermont-Ferrand, Deauville, Le Havre, Le Touquet, Lille, Pau, Rennes, Rouen and Saint-Étienne. The national airline is Air France. In 1997 it flew 511.3m. km, carrying 32,710,600 passengers (15,479,300 on international flights). In 1999 Charles de Gaulle airport handled 43,438,734 passengers (38,156,599 on international flights) and 980,672 tonnes of freight; Orly was the second busiest airport, handling 25,330,915 passengers (19,045,942 on domestic flights) and 115,696 tonnes of freight.

Shipping. In 1998 the merchant fleet comprised 808 vessels (of 100 gross tons or more) totalling 4.85m. GRT, including 69 tankers of 2.83m. GRT. In 1997 vessels totalling 1,989.8m. NRT entered ports. In 1993 from a total of 215 vessels (all sizes; GRT: 3,928,000), 212m. tonnes of cargo were unloaded, including 130m. tonnes of crude and refined petroleum products, 93m. tonnes were loaded; total passenger traffic was 29.2m. Chief ports: Marseilles, Le Havre, Nantes, Bordeaux and Rouen.

France has extensive inland waterways. Canals are administered by the public authority France Navigable Waterways (FVN). In 1993 there were 8,500 km of navigable rivers, waterways and canals (of which 1,647 km were accessible to vessels over 3,000 tons), with a total traffic of 59.8m. tonnes.

Telecommunications. France Télécom became a limited company on 1 Jan. 1997. In June 1999, 34.1m. telephone main lines (579 for every 1,000 inhabitants) were in use. In Nov. 2000 there were 24.29m. mobile phone subscribers (up from 21.4m. in June 1999, 11.08m. in 1998. In 1997, 2.8m. fax machines were in use. There were 13m. PCs in use (equivalent to 221 per 1,000 persons) in 1999. There were still 39,000 telex subscribers in 1996, although telex usage has declined considerably in recent years. There were around 9m. Internet users in March 2000—just over 15% of the population.

Postal Services. There were 16,919 post offices in 1994. In 1995 a total of 24,391m. pieces of mail were processed, or 419 items per person. La Poste is a public enterprise under autonomous management responsible for mail delivery and financial services.

SOCIAL INSTITUTIONS

Justice. The system of justice is divided into 2 jurisdictions: the judicial and the administrative. Within the judicial jurisdiction are common law courts including 473 lower courts (*tribunaux d'instance*, 11 in overseas departments), 186 higher courts (*tribunaux de grande instance*, 5 *tribunaux de première instance* in the overseas territories), and 454 police courts (*tribunaux de police*, 11 in overseas departments).

The *tribunaux d'instance* are presided over by a single judge. The *tribunaux de grande instance* usually have a collegiate composition, but may be presided over by a single judge in some civil cases. The *tribunaux de police*, presided over by a judge on duty in the *tribunal d'instance*, deal with petty offences (*contraventions*); correctional chambers (*chambres correctionnelles*, of which there is at least 1 in each *tribunal de grande instance*) deal with graver offences (*délits*), including cases involving imprisonment up to 5 years. Correctional chambers normally consist of 3 judges of a *tribunal de grande instance* (a single judge in some cases). Sometimes in cases of *délit*, and in all cases of more serious *crimes*, a preliminary inquiry is made in secrecy by one of 569 examining magistrates (*juges d'instruction*), who either dismisses the case or sends it for trial before a public prosecutor.

Within the judicial jurisdiction are various specialized courts, including 227 commercial courts (*tribunaux de commerce*), composed of tradesmen and manufacturers elected for 2 years initially, and then for 4 years; 271 conciliation boards (*conseils de prud'hommes*), composed of an equal number of employers and employees elected for 5 years to deal with labour disputes; 437 courts for settling rural landholding disputes (*tribunaux paritaires des baux ruraux*, 11 in overseas departments); and 116 social security courts (*tribunaux des affaires de sécurité sociale*).

When the decisions of any of these courts are susceptible of appeal, the case goes to one of the 35 courts of appeal (*cours d'appel*), composed each of a president and a variable number of members. There are 104 courts of assize (*cours d'assises*), each composed of a president who is a member of the court of appeal, and 2 other magistrates, and assisted by a lay jury of 9 members. These try crimes involving imprisonment of over 5 years. The decisions of the courts of appeal and the courts of assize are final. However, the Court of Cassation (*cour de cassation*) has discretion to verify if the law has been correctly interpreted and if the rules of procedure have been followed exactly. The Court of Cassation may annul any judgment, following which the cases must be retried by a court of appeal or a court of assizes.

The administrative jurisdiction exists to resolve conflicts arising between citizens and central and local government authorities. It consists of 34 administrative courts (*tribunaux administratifs*, 7 in overseas departments and territories) and 5 administrative courts of appeal (*cours administratives d'appel*). The Council of State is the final court of appeal in administrative cases, though it may also act as a court of first instance.

Cases of doubt as to whether the judicial or administrative jurisdiction is competent in any case are resolved by a *Tribunal de conflits* composed in equal measure of members of the Court of Cassation and the Council of State. In 1997 the new government restricted its ability to intervene in individual cases of justice.

Penal code. A revised penal code came into force on 1 March 1994, replacing the *Code Napoléon* of 1810. Penal institutions consist of: (1) *maisons d'arrêt*, where persons awaiting trial as well as those condemned to short periods of imprisonment are kept; (2) punishment institutions – (a) central prisons (*maisons centrales*) for those sentenced to long imprisonment, (b) detention centres for offenders showing promise of rehabilitation, and (c) penitentiary centres, establishments combining (a) and (b); (3) hospitals for the sick. Special attention is being paid to classified treatment and the rehabilitation and vocational re-education of prisoners including work in open-air and semi-free establishments. Juvenile delinquents go before special judges in 138 (11 in overseas departments and territories) juvenile courts (*tribunaux pour enfants*); they are sent to public or private institutions of supervision and re-education.

The first Ombudsman (*Médiateur*) was appointed for a 6-year period in Jan. 1973. The present incumbent is Bernard Stasi (app. 1998).

Capital punishment was abolished in Aug. 1981. In metropolitan France the detention rate on 1 Jan. 1999 was 84.2 prisoners per 100,000 population, up from 50 per 100,000 in 1975. The average period of detention in 1998 was 8.3 months. The principal offences committed were: theft, 27.2%; rape and other sexual assaults, 21.0%; drug-related offences, 16.8%. The population of the 186 penal establishments (3 for women) in Jan. 1999 was 52,961 including 2,029 women.

Weston, M., *English Reader's Guide to the French Legal System*. Oxford, 1991

Religion. A law of 1905 separated church and state. In 1996 there were 95 Roman Catholic dioceses in metropolitan France and 112 bishops. In Feb. 2001 there were 6 Cardinals. In 1997 there were 44.86m. Roman Catholics (over 75% of the population), 3.24m. Muslims, 1.08m. Protestants and 0.61m. Jews. An estimated 6.26m. people were non-religious and there were 2m. atheists.

Education. The primary, secondary and higher state schools constitute the 'Université de France'. Its Supreme Council of 84 members has deliberative, administrative and judiciary functions, and as a consultative committee advises respecting the working of the school system; the inspectors-general are in direct communication with the Minister. For local education administration France is divided into 25 academic areas, each of which has an Academic Council whose members include a certain number elected by the professors or teachers. The Academic Council deals with all grades of education. Each is under a Rector, and each is provided with academy inspectors, 1 for each department.

Compulsory education is provided for children of 6–16. The educational stages are as follows:

1. Non-compulsory pre-school instruction for children aged 2–5, to be given in infant schools or infant classes attached to primary schools.

2. Compulsory elementary instruction for children aged 6–11, to be given in primary schools and certain classes of the *lycées*. It consists of 3 courses: preparatory (1 year), elementary (2 years), intermediary (2 years). Physically or mentally handicapped children are cared for in special institutions or special classes of primary schools.

3. Lower secondary education (*Enseignement du premier cycle du Second Degré*) for pupils aged 11–15, consists of 4 years of study in the *lycées* (grammar schools), *Collèges d'Enseignement Technique* or *Collèges d'Enseignement Général*.

4. Upper secondary education (*Enseignement du second cycle du Second Degré*) for pupils aged 15–18: (1) *Long, général or professionnel* provided by the *lycées* and leading to the *baccalauréat* or to the *baccalauréat de technicien* after 3 years; and (2) *Court*, professional courses of 3, 2 and 1 year are taught in the *lycées d'enseignement professionnel*, or the specialized sections of the *lycées*, CES or CEG.

The following table shows the number of schools in 1994–95 and the numbers of teachers and pupil in 1995–96:

	Number of Schools	Teachers	Pupils
Nursery	18,989	105,925	2,500,867
Primary	41,244	216,938	4,065,005
Secondary	11,212	478,592	5,980,518

¹Includes vocational education institutions.

Higher education is provided by the state free of charge in the universities and in special schools, and by private individuals in the free faculties and schools. Legislation of 1968 redefined the activities and workings of universities. Bringing several disciplines together, 780 units for teaching and research (*UER—Unités d'Enseignement et de Recherche*) were formed which decided their own teaching activities, research programmes and procedures for checking the level of knowledge gained. They and the other parts of each university must respect the rules designed to maintain the national standard of qualifications. The UERs form the basic units of the 69 state universities and 3 national polytechnic institutes (with university status), which are grouped into 25 *Académies*. There are also 5 Catholic universities in Paris, Angers, Lille, Lyons and Toulouse; and private universities. There were 2,107,600 students at universities in 1994–95.

Outside the university system, higher education (academic, professional and technical) is provided by over 400 schools and institutes, including the 177 *Grandes Écoles*, which are highly selective public or private institutions offering mainly technological or commercial curricula. These have an annual output of about 17,000 graduates, and in 1994–95 there were also 71,271 students in preparatory classes leading to the *Grandes Écoles*; in 1993–94, 232,844 were registered in the Sections de Techniciens Supérieurs, 71,273 in the *Écoles d'Ingénieurs*.

Adult literacy rate in 1998 was at least 99%.

In 1995 total expenditure on education came to 6.1% of GNP and represented 11.1% of total government expenditure.

Health. Ordinances of 1996 created a new regional regime of hospital administration and introduced a system of patients' records to prevent abuses of public health benefits. In 1995 there were 160,235 doctors (equivalent to 1 for every 362 persons), 39,284 dentists, 53,085 pharmacists, 330,943 nurses and 11,957 midwives; and 3,810 hospitals, with a provision of 118 beds per 10,000 population.

In 1998 France spent 9.6% of its GDP on health, with public spending amounting to 76.4% of the total. A survey published by the World Health Organization in June 2000 to measure health systems in all of the sovereign countries and find which country has the best overall health care ranked France in first place.

The average French adult smokes 4.0 cigarettes a day, compared to a European Union average of 4.5, and drinks 14.1 litres of alcohol a year, compared to a European Union average of 11.1 litres. France has the highest alcohol consumption per person of any EU member country. It has the lowest rate of cardiovascular disease in the EU, but the highest rate of cancer among men.

Welfare. An order of 4 Oct. 1945 laid down the framework of a comprehensive plan of Social Security and created a single organization which superseded the various laws relating to social insurance, workmen's compensation, health insurance, family allowances, etc. All previous matters relating to Social Security are dealt with in the Social Security Code, 1956; this has been revised several times. The Chamber of Deputies and Senate, meeting as Congress on 19 Feb. 1996, adopted an important revision of the Constitution giving parliament powers to review annually the funding of social security (previously managed by the trade unions and employers' associations), and to fix targets for expenditure in the light of anticipated receipts.

In 1997, 6m. people were dependent on the welfare system, which accounted for more than a quarter of GDP (US\$333,000m.). The Social Security budget had a deficit of some 17,000m. francs in 1996, and a cumulative debt (1992–96) of 250,000m. francs. A special levy, the new social debt repayment tax (RDS), at 0.5% on all incomes including pensions and unemployment benefit, has been introduced to clear the cumulative debt. A modest reform of the system was announced in June 1997 which will include a review of all welfare benefits.

Contributions. The general social security contribution (CSG) introduced in 1991 was raised by 4% to 7.5% in 1997 by the Jospin administration in an attempt to dramatically reduce the deficit on social security spending, effectively almost doubling the CSG. All wage-earning workers or those of equivalent status are insured regardless of the amount or the nature of the salary or earnings. The funds for the general scheme are raised mainly from professional contributions, these being fixed within the limits of a ceiling and calculated as a percentage of the salaries. The calculation of contributions payable for family allowances, old age and industrial injuries relates only to this amount; on the other hand, the amount payable

for sickness, maternity expenses, disability and death is calculated partly within the limit of the 'ceiling' and partly on the whole salary. These contributions are the responsibility of both employer and employee, except in the case of family allowances or industrial injuries, where they are the sole responsibility of the employer.

Self-employed Workers. From 17 Jan. 1948 allowances and old-age pensions were paid to self-employed workers by independent insurance funds set up within their own profession, trade or business. Schemes of compulsory insurance for sickness were instituted in 1961 for farmers, and in 1966, with modifications in 1970, for other non-wage-earning workers.

Social Insurance. The orders laid down in Aug. 1967 ensure that the whole population can benefit from the Social Security Scheme; at present all elderly persons who have been engaged in the professions, as well as the surviving spouse, are entitled to claim an old-age benefit.

Sickness Insurance refunds the costs of treatment required by the insured and the needs of dependants.

Maternity Insurance covers the costs of medical treatment relating to the pregnancy, confinement and lying-in period; the beneficiaries being the insured person or the spouse.

Insurance for Invalids is divided into 3 categories: (1) those who are capable of working; (2) those who cannot work; (3) those who, in addition, are in need of the help of another person. According to the category, the pension rate varies from 30 to 50% of the average salary for the last 10 years, with additional allowance for home help for the third category.

Old-Age Pensions for workers were introduced in 1910 and are now fixed by the Social Security Code of 28 Jan. 1972. Since 1983 people who have paid insurance for at least 37½ years (150 quarters) receive at 60 a pension equal to 60% of basic salary. People who have paid insurance for less than 37½ years but no less than 15 years can expect a pension equal to as many 1/150ths of the full pension as their quarterly payments justify. In the event of death of the insured person, the husband or wife of the deceased person receives half the pension received by the latter. Compulsory supplementary schemes ensure benefits equal to 70% of previous earnings.

Family Allowances. A controversial programme of means-testing for Family Allowance was introduced in 1997 by the new administration. The Family Allowance benefit system comprises: (a) Family allowances proper, equivalent to 25.5% of the basic monthly salary for 2 dependent children, 46% for the third child, 41% for the fourth child, and 39% for the fifth and each subsequent child; a supplement equivalent to 9% of the basic monthly salary for the second and each subsequent dependent child more than 10 years old, and 16% for each dependent child over 15 years. (b) Family supplement for persons with at least 3 children or one child aged less than 3 years. (c) Ante-natal grants. (d) Maternity grant is equal to 260% of basic salary. Increase for multiple births or adoptions, 198%; increase for birth or adoption of third or subsequent child, 457%. (e) Allowance for specialized education of handicapped children. (f) Allowance for orphans. (g) Single parent allowance. (h) Allowance for opening of school term. (i) Allowance for accommodation, under certain circumstances. (j) Minimum family income for those with at least 3 children. Allowances (b), (g), (h) and (j) only apply to those whose annual income falls below a specified level.

Workmen's Compensation. The law passed by the National Assembly on 30 Oct. 1946 forms part of the Social Security Code and is administered by the Social Security Organization. Employers are invited to take preventive measures. The application of these measures is supervised by consulting engineers (assessors) of the local funds dealing with sickness insurance, who may compel employers who do not respect these measures to make additional contributions; they may, in like manner, grant rebates to employers who have in operation suitable preventive measures. The injured person receives free treatment, the insurance fund reimburses the practitioners, hospitals and suppliers chosen freely by the injured. In cases of

temporary disablement, the daily payments are equal to half the total daily wage received by the injured. In case of permanent disablement, the injured person receives a pension, the amount of which varies according to the degree of disablement and the salary received during the past 12 months.

Unemployment Benefits vary according to circumstances (full or partial unemployment) which are means-tested.

CULTURE

Avignon was one of nine European Cities of Culture in the year 2000, along with Bergen (Norway), Bologna (Italy), Brussels (Belgium), Helsinki (Finland), Kraków (Poland), Prague (Czech Republic), Reykjavík (Iceland) and Santiago de Compostela (Spain). The title attracts large European Union grants.

Broadcasting. The broadcasting authority (an independent regulatory commission) is the *Conseil Supérieur de l'Audiovisuel (CSA)*. Public radio is provided by Radio France which broadcasts nationwide on *France Info*, *France Inter*, *France Musique*, *France Culture*, *Radio Bleue* and *Le Mouv'* and, locally, via 39 radio stations. In Oct. 1998 there were 3,229 private local radio stations. An external service, *Radio-France Internationale*, was founded in 1931 (as 'Poste Coloniale'), and broadcasts in 20 languages. Two of the state-owned TV channels are partly financed by advertising—*FR2* and *FR3*—and there are 4 private terrestrial channels. Colour is by SECAM H. TV broadcasts must contain at least 60% EU-generated programmes and 50% of these must be French.

There are 3 state controlled national TV channels. Until the mid-1990s, French state controlled television was protected from competition by legislation but under pressure from the private sector and cable companies, the 2 public channels were re-named and France Television was created to manage them. The third channel, *La Cinquième*, started up in 1994, mainly as an education service. The 4 main terrestrial private channels broadcasting nationwide are: *TF1*, a former state channel privatized in 1987; *M6*, established in 1987; *Arte*, a joint Franco-German cultural channel; and *Canal Plus*, a subscription channel. There were 116 TV channels altogether in 1997, up from 32 in 1980.

France has been broadcasting via satellite since 1984 with a combined service relaying programmes from Belgian and Swiss as well as French satellites. More satellites have been added including *TDF1* and *TDF2* broadcasting for *Arte*, *Canal Plus* and *Radio France*. *Télécom A* and *Télécom B* transmit for the principal TV stations and from 1995, *Astra*, *Eutelsat* and *Télécom* satellites have been broadcasting to the majority of households able to receive television. Digital Television arrived in 1996 and 3 new satellites, *Canal Satellite*, *Télévision par Satellite* and *AB Sat*, were launched. In 1999 there were 3.5m. satellite and cable TV subscribers.

In addition to specialized French national channels, foreign channels are also transmitted to approximately 1.5m. French households via cable.

There were about 58m. radio receivers in use in 1997 and 35.5m. TV sets.

Cinema. There were 4,762 cinemas in 1998; attendances totalled 170m. in 1998 (130m. in 1995); gross box office receipts came to 4,523m. francs in 1995; 115 full-length films were made in 1994. In 1996 French films took 37% of the national market, but in 1998 this dropped to 27%. Around 360 new screens were to be opened between 1998 and 2000.

Press. There were about 80 daily papers (10 nationals, 70 provincials) in 1997. Top dailies: *L'Équipe*; *Le Monde*; *Le Parisien-Aujourd'hui*; *Le Figaro-L'Aurore*; *Libération*; *France-Soir*; *Ouest France*; *Le Progrès*; *Centre France*; *Sud Ouest*; *Voix du Nord*. The *Journal de Dimanche* is the only national Sunday paper. In 1995 total daily press circulation was 13.6m. copies, up from 10.3m. in 1980. In 1995 a total of 34,766 book titles were published.

Tourism. There were 75,000,000 foreign tourists in 2000; tourism receipts in 1998 were US\$29.93bn. France is the most popular tourist destination in the world, and receipts from tourism in 1998 were exceeded only in the USA and Italy. The most visited tourist attractions in 1998 were Disneyland Paris (12.1m.), the Eiffel Tower

(6.1m.) and the Louvre (5.7m.). Around 11m. foreigners a year visit Paris. Countries of origin (visitors, in 1,000) in 1993: Germany, 12,900; UK, 8,000; Netherlands, 7,100; Italy, 6,300; Spain, 3,000; Belgium, 2,000; USA, 1,900; Switzerland, 1,900; Portugal, 1,700. There were 583,578 classified hotel rooms in 18,563 hotels in 2000. 39,000 new jobs were created in 2000 through tourism.

Festivals. *Religious Festivals:* Assumption of the Blessed Virgin Mary (15 Aug.) and All Saints Day (1 Nov.) are both Public Holidays.

Cultural Festivals: The Grande Parade de Montmartre, Paris (1 Jan.); the Carnival of Nice (Feb.–March); the Fête de la Victoire (8 May), celebrates victory in World War Two; the May Feasts take place in Nice regularly throughout May; the prestigious Cannes Film Festival, which has been running since 1946, lasts two weeks in mid-May; the Avignon Festival is a celebration of theatre that attracts average attendances of 140,000 each year and runs for most of July; Bastille Day (14 July) sees celebrations, parties and fireworks across the country. The Festival International d'Art Lyrique, focusing on classical music, opera and ballet, takes place in Aix-en-Provence every July.

Libraries. In 1997 there were 2,577 public libraries, 2 National libraries and 186 Higher Education libraries; they held a combined 125,772,000 volumes. There were 295,229,000 visits to the libraries in 1997.

OVERSEAS DEPARTMENTS

GUADELOUPE

KEY HISTORICAL EVENTS

The islands were discovered by Columbus in 1493. The Carib inhabitants resisted Spanish attempts to colonize. A French colony was established on 28 June 1635, and apart from short periods of occupancy by British forces, Guadeloupe has since remained a French possession. On 19 March 1946 Guadeloupe became an Overseas Department.

TERRITORY AND POPULATION

Guadeloupe consists of a group of islands in the Lesser Antilles with a total area of 1,705 sq. km. The two main islands, Basse-Terre (to the west) and Grande-Terre (to the east), are joined by a bridge over a narrow channel. Adjacent to these are the islands of Marie Galante (to the southeast), La Désirade (to the east), and the Îles des Saintes (to the south); the islands of St Martin and St Barthélemy lie 250 km to the northwest.

<i>Island</i>	<i>Area (sq. km)</i>	<i>1999 populations</i>	<i>Chief town</i>
St Martin ¹	53 ²	29,078	Marigot
St Barthélemy	21	6,852	Gustavia
Basse-Terre	848	172,693	Basse-Terre

Îles des Saintes	13	2,998	Terre-de-Bas
La Désirade	22	1,620	Grande Anse
Marie-Galante	158	12,488	Grand-Bourg

¹Northern part only; the southern third is Dutch. ²Includes uninhabited Tintamarre.

Population at the last census (1999), 422,496. The UN gives a projected population for 2010 of 511,000. An estimated 99.4% of the population were urban in 1995. Population of principal towns (1999): Les Abymes, 63,054; Saint-Martin, 29,078; Pointe-à-Pitre, 20,948; Basse-Terre, 12,410. Basse-Terre is the seat of government, while larger Pointe-à-Pitre is the department's main economic centre and port; Les Abymes is a 'suburb' of Pointe-à-Pitre.

French is the official language, but Creole is spoken by the vast majority, except on St Martin.

The Comoro group was granted administrative autonomy within the French Republic and became an Overseas Territory. When the other 3 islands voted to become independent (as the Comoro state) in 1974, Mayotte voted against this and remained a French dependency. In Dec. 1976 it became (following a further referendum) a Territorial Collectivity.

The whole territory covers 373 sq. km (144 sq. miles). The projected population for 2000 is 157,000. Population density is just over 400 persons per sq. km.

The spoken language is Shimaoré (akin to Comorian, an Arabized dialect of Swahili), but French remains the official, commercial and administrative language.

OVERSEAS TERRITORIES

SOUTHERN AND ANTARCTIC TERRITORIES

The Territory of the TAAF was created on 6 Aug. 1955. It comprises the Kerguelen and Crozet archipelagoes, the islands of Saint Paul and Amsterdam (formerly Nouvelle Amsterdam), all in the southern Indian ocean, and Terre Adélie. Since 2 April 1997 the administration has had its seat in Saint-Pierre, Réunion; before that it was in Paris. The Administrator is assisted by a 7-member consultative council which meets twice yearly in Paris; its members are nominated by the government for 5 years. The 15-member Polar Environment Committee, which in 1993 replaced the former Consultative Committee on the Environment (est. 1982), meets at least once a year to discuss all problems relating to the preservation of the environment.

The French Institute for Polar Research and Technology was set up to organize scientific research and expeditions in Jan. 1992. The staff of the permanent scientific stations of the TAAF (120 in 1998) is renewed every 6 or 12 months and forms the only population.

Administrateur Supérieur: François Garde.

Kerguelen Islands Situated 48–50° S. lat., 68–70° E. long.; consists of 1 large and 85 smaller islands, and over 200 islets and rocks, with a total area of 7,215 sq. km (2,786 sq. miles) of which Grande Terre occupies 6,675 sq. km (2,577 sq. miles). It was discovered in 1772 by Yves de Kerguelen, but was effectively occupied by France only in 1949. Port-aux-Français has several scientific research stations (56 members). Reindeer, trout and sheep have been acclimatized.

Crozet Islands Situated 46° S. lat., 50–52° E. long.; consists of 5 larger and 15 tiny islands, with a total area of 505 sq. km (195 sq. miles). The western group includes Apostles, Pigs and Penguins islands; the eastern group, Possession and Eastern islands. The archipelago was discovered in 1772 by Marion Dufresne, whose first mate, Crozet, annexed it for Louis XV. A meteorological and scientific station (17 members) at Base Alfred-Faure on Possession Island was built in 1964.

Amsterdam and Saint-Paul Islands Situated 38–39° S. lat., 77° E. long. Amsterdam, with an area of 54 sq. km (21 sq. miles) was discovered in 1522 by Magellan's companions; Saint-Paul, lying about 100 km to the south, with an area of 7 sq. km (2.7 sq. miles), was probably discovered in 1559 by Portuguese sailors. Both were first visited in 1633 by the Dutch explorer, Van Diemen, and were annexed by France in 1843. They are both extinct volcanoes. The only inhabitants are at Base Martin de Vivies (est. 1949 on Amsterdam Island), including several scientific research stations, a hospital, communication and other facilities (20 members). Crayfish are caught commercially on Amsterdam.

Terre Adélie Comprises that section of the Antarctic continent between 136° and 142° E. long., south of 60° S. lat. The ice-covered plateau has an area of about 432,000 sq. km (166,800 sq. miles), and was discovered in 1840 by Dumont d'Urville. A research station (27 members) is situated at Base Dumont d'Urville, which is maintained by the French Institute for Polar Research and Technology.

NEW CALEDONIA

KEY HISTORICAL EVENTS

New Caledonia was discovered by James Cook on 4 Sept. 1774. The first settlers (English Protestants and French Catholics) came in 1840. New Caledonia was annexed by France in 1853 and, together with most of its former dependencies, became an Overseas Territory in 1958.

Density, 10 per sq. km. In 1995 an estimated 62% of the population lived in urban areas. The estimated population for 2000 was 200,000. The capital, Nouméa, had 76,293 inhabitants in 1996.

Bélep Archipelago About 50 km northwest of New Caledonia, with an area of 70 sq. km and a population (1996) of 923.

The remaining islands are very small and have no permanent inhabitants. The largest are the Chesterfield Islands, a group of 11 well-wooded coral islets with a combined area of 10 sq. km, about 550 km west of the Bélep Archipelago. The Huon Islands, a group of 4 barren coral islets with a combined area of just 65 ha, are 225 km north of the Bélep Archipelago. Walpole, a limestone coral island of 1 sq. km, lies 150 km east of the Isle of Pines; Matthew Island (20 ha) and Hunter Island (2 sq. km), respectively 250 km and 330 km east of Walpole, are spasmodically active volcanic islands; and are also claimed by Vanuatu.

At the 1996 census there were 341 tribes (which have legal status under a high chief) living in 160 reserves, covering a surface area of 392,550 ha (21% of total land), and representing about 28.7% of the population. 80,443 Melanesians belong to a tribe.

In addition to French, New Caledonia has a remarkable diversity of Melanesian languages (29 vernacular), divided into 4 main groups (Northern, Central, Southern and Loyalty Islands). There were 53,556 speakers (1996). The 3 most spoken forms are Drehu (11,338), Nengone (6,377) and Paici (5,498). CONSTITUTION AND GOVERNMENT

Following constitutional changes introduced by the French government in 1985 and 1988, the Territory is administered by a High Commissioner assisted by a 4-member Consultative Committee, consisting of the President of the Territorial Congress (as President) and the Presidents of the 3 Provincial Assemblies. The French government is represented by the appointed High Commissioner.

There is a 54-member Territorial Congress consisting of the complete membership of the 3 Provincial Assemblies.

New Caledonia is represented in the French National Assembly by 2 deputies, in the Senate by 1 senator, in the Economic and Social Council by 1 councillor. The Territory is divided into 3 provinces, Nord, Sud and Îles Loyauté, each under a directly elected Regional Council. They are sub-divided into 32 communes administered by locally elected councils and mayors.

In Sept. 1987 the electorate voted in favour of remaining a French possession. Agreement was reached in June 1988 between the French government and representatives of both the European and Melanesian communities on New Caledonia, and confirmed in Nov. 1988 by plebiscites in both France and New Caledonia, under which the territory has been divided into 3 autonomous provinces.

On 5 May 1998 the Nouméa accords on limited autonomy were signed between the French government, the Rally for Caledonia in the Republic and the Kanak Socialist Front for National Liberation.

FRENCH POLYNESIA

KEY HISTORICAL EVENTS

French protectorates since 1843, these islands were annexed to France 1880–82 to form 'French Settlements in Oceania', which opted in Nov. 1958 for the status of an overseas territory within the French Community.

TERRITORY AND POPULATION

The total land area of these 5 archipelagoes comprising 130 volcanic islands and coral atolls (76 inhabited) scattered over a wide area in the eastern Pacific, is 4,167 sq. km. The population (1996 census) was 219,521 (105,587 females); density, 53 per sq. km. At Dec.1998 French forces stationed in Polynesia numbered 2,119 (based mostly on Tahiti and the Hao atoll) and employed 1,162 Polynesian citizens. In 1995 an estimated 56.4% of the population lived in urban areas.

The UN gives a projected population for 2010 of 282,000.

The official languages are French and Tahitian.

The islands are administratively divided into 5 *circonscriptions* as follows:

Windward Islands (Îles du Vent) (162,398 inhabitants, 1996) comprise Tahiti with an area of 1,042 sq. km and 150,707 inhabitants; Mooréa with an area of 132 sq. km and 11,682 inhabitants; Maiao (Tubuai Manu) with an area of 9 sq. km; and the smaller Mehetia and Tetiaroa. The capital is Papeete, Tahiti (79,024 inhabitants in 1996, including suburbs).

Leeward Islands (Îles sous le Vent) comprise the 5 volcanic islands of Raiatéa, Tahaa, Huahine, Bora-Bora and Maupiti, together with 4 small atolls (Tupai, Mopelia, Scilly, Bellinghausen), the group having a total land area of 404 sq. km and 26,838 inhabitants in 1996. The chief town is Uturoa on Raiatéa. The Windward and Leeward Islands together are called the Society Archipelago (Archipel de la Société). Tahitian, a Polynesian language, is spoken throughout the archipelago and used as a *lingua franca* in the rest of the territory.

Marquesas Islands 12 islands lying north of the Tuamotu Archipelago, with a total area of 1,049 sq. km and 8,064 inhabitants in 1996. There are 6 inhabited islands: Nuku Hiva, Ua Pou, Ua Uka, Hiva Oa, Tahuata, Fatu Hiva; and 6 smaller (uninhabited) ones; the chief centre is Taiohae on Nuku Hiva.

Austral or Tubuai Islands lying south of the Society Archipelago, comprise a 1,300 km chain of volcanic islands and reefs. There are 5 inhabited islands (Rimatarā, Rurutu, Tubuai, Raivavae and, 500 km to the south, Rapa), with a combined area of 148 sq. km (6,563 inhabitants in 1996); the chief centre is Mataura on Tubuai.

Tuamotu Archipelago consists of 2 parallel ranges of 76 atolls (53 inhabited) lying north and east of the Society Archipelago, and has a total area of 690 sq. km, with 15,370 inhabitants in 1996. The most populous atolls are Rangiroa (1,913 inhabitants), Hao (1,356) and Manihi (769).

The Mururoa and Fangataufa atolls in the southeast of the group were ceded to France in 1964 by the Territorial Assembly, and were used by France for nuclear tests from 1966–96. The cessation of nuclear testing marked the end of activities of the Pacific Testing Centre (CEP) in French Polynesia. The CEP was entirely dismantled during 1998. A small military presence remains to ensure permanent radiological control.

CONSTITUTION AND GOVERNMENT

Under the 1984 Constitution, the Territory is administered by a Council of Ministers, whose President is elected by the Territorial Assembly from among its own members; the President appoints a Vice-President and 14 other ministers (16 ministers in total in 1999). There is an advisory Economic and Social Committee. The French government is represented by a High Commissioner. The Territorial Assembly comprises 41 members elected every 5 years from 5 constituencies by universal suffrage, using the same proportional representation system as in metropolitan

French regional elections. To be elected a party must gain at least 5% of votes cast. The Assembly elects a head of local government.

A statute drafted at the end of 1995 proposes to create French Polynesia as an Autonomous Overseas Territory in which the President of the Council of Ministers will become the President of the territory.

ENERGY AND NATURAL RESOURCES

French Polynesia is heavily dependent on external sources for its energy. Since the early 1980s efforts have been made to reduce this, which have included the development of solar energy. By 1999 it was estimated that production of solar energy was in the region of 2,700 hours a year.

Electricity. Production (1998) was 360m. kWh, of which approximately 35% was hydro-electric. Consumption per capita (1995) was estimated to be 1,409 kWh. Between 1988 and 1997, 14,212 solar photovoltaic modules were installed in Polynesia.

Oil and Gas. In 1997 over 236,000 tonnes of combustible products were imported (with a value of 346m. French francs), mainly from Australia and Hawaii; 8,600 tonnes of gas was imported.

Agriculture. Agriculture used to be the primary economic sector but now accounts for only a modest 8% (1997) of GDP. An important product is copra (coconut trees cover the coastal plains of the mountainous islands and the greater part of the low-lying islands). A new and increasingly successful crop is the nono fruit, which has medicinal value. Production in 1,000 tonnes (1998 estimates): coconuts, 87; copra, 11; cassava, 6; potatoes, 5. Exports of the nono reached 15m. French francs in 1998. Tropical fruits, such as bananas, pineapples and oranges, are grown for local consumption.

KEY HISTORICAL EVENTS

Between the 16th and 18th centuries, the Fang and other peoples in the region of present-day Gabon were part of a federation of chiefdoms. The country's capital, Libreville, grew from a settlement of slaves who were rescued from captivity by the French in 1849. Colonized by France around this period, the territory was annexed to French Congo in 1888. There was resistance by the indigenous people between 1905 and 1911 to the depredations of colonial rule, but the country became a

separate colony in 1910 as one of the four territories of French Equatorial Africa. Gabon became an autonomous republic within the French Community on 28 Nov. 1958 and achieved independence on 17 Aug. 1960.

The UN gives a projected population for 2010 of 1.57m.

KEY HISTORICAL EVENTS

The independent Georgian Social Democratic Republic was declared on 26 May 1918 and was recognized by the Russian Soviet Federal Socialist Republic on 7 May 1920. In 1936 the Georgian Soviet Socialist Republic became one of the constituent republics of the USSR. Following nationalist successes at elections in Oct. 1990, the Supreme Soviet resolved on a transition to full independence and on 9 April 1991 unanimously declared the republic an independent state. President Zviad

Gamsakhurdia was deposed by armed insurrection on 6 Jan. 1992 and a military council took control. After elections in which he gained 95% of votes cast, Eduard Shevardnadze became *de facto* head of state in Oct. 1992. On 22 Oct. 1993 Georgia joined the CIS. Supporters of the deposed president Gamsakhurdia were in intermittent conflict with the government, mainly in Mingrelia, but suffered heavy defeats once Russian support became available via the CIS. Subsequently, Georgia moved closer to the West but economic reforms have been slow in coming and industry and agriculture are both in desperate need of investment.

TERRITORY AND POPULATION

Georgia is bounded in the west by the Black Sea and south by Turkey, Armenia and Azerbaijan. Area, 69,700 sq. km (26,900 sq. miles). Its population in mid-July 1997 was estimated to be 5,160,000 (2,450,000 male); density, 74 per sq. km.

The UN gives a projected population for 2010 of 5.48m.

In 1998, 59.7% of the population lived in urban areas. The capital is Tbilisi (1999 population estimate, 1.31m.). Other important towns are Kutaisi (240,000; 1997), Rustavi (158,000; 1997), Batumi (136,000; 1991), Sukhumi (121,000; 1991), Poti (54,000; 1991), Gori (59,000; 1991).

Georgians accounted for 70.1% of the 1989 census population of 5,400,841; others included 8.1% Armenians, 6.3% Russians, 5.7% Azerbaijanis, 3% Ossetians, 1.9% Greeks, 1.8% Abkhazians and 1% Ukrainians. ABKHAZIA

Area, 8,600 sq. km (3,320 sq. miles); population (Jan. 1990), 537,500. Capital Sukhumi (1990 population, 121,700). This area, the ancient Colchis, saw the establishment of a West Georgian kingdom in the 4th century and a Russian protectorate in 1810. In March 1921 a congress of local Soviets proclaimed it a Soviet Republic, and its status as an Autonomous Republic, within Georgia, was confirmed on 17 April 1930 and again by the Georgian Constitution of 1995.

Ethnic groups (1989 census) Georgians, 45.7%; Abkhazians, 17.8%; Armenians, 14.6%; and Russians, 14.3%.

In July 1992 the Abkhazian parliament declared sovereignty under the presidency of Vladislav Ardzinba and the restoration of its 1925 constitution. Fighting broke out as Georgian forces moved into Abkhazia. On 3 Sept. and on 19 Nov. ceasefires were agreed, but fighting continued into 1993 and by Sept. Georgian forces were driven out. On 15 May 1994 Georgian and Abkhazian delegates under Russian auspices signed an agreement on a ceasefire and deployment of 2,500 Russian troops as a peacekeeping force. On 26 Nov. 1994 parliament adopted a new Constitution proclaiming Abkhazian sovereignty. CIS economic sanctions were imposed in Jan. 1996. Parliamentary elections were held on 23 Nov. 1996. Neither the constitution nor the elections were recognized by the Georgian government or the international community. Fighting flared up between rival militia forces again in May 1998 after Abkhazian forces ejected thousands of ethnic Mingrelian and Georgian refugees who had returned to the southern Abkhazian region of Gali. After the fighting in 1998, the worst in 5 years, both sides declared a ceasefire. Up to 20,000 Georgians lost their homes. Abkhazia has expressed a desire to join the Russian Federation, but Russia is wary of the request.

SOUTH OSSETIA

Abkhazia, and notably Sukhumi, the capital, have seen living standards plunge dramatically. There are no Internet links, no mobile phones and no hotels. There is very little work and practically no money.

Head of the Separatist Government: Vladislav Ardzinba (elected by parliament on 26 Nov. 1994).

The republic has coal, electric power, building materials and light industries. In 1985 there were 89 collective farms and 56 state farms; main crops are tobacco, tea, grapes, oranges, tangerines and lemons. Crop area 43,900 ha.

Livestock, 1 Jan. 1987: 147,300 cattle, 127,900 pigs, 28,800 sheep and goats.

In 1990–91 there were 16,700 children attending pre-school institutions. There is a university at Sukhumi with 3,000 students and 270 academic staff in 1995–96. In 1990 there were 2,100 students at colleges and 7,700 students at other institutions of higher education.

In Jan. 1990 there were 2,500 doctors and 6,600 junior medical personnel.

ADJARIA

Area: 2,900 sq. km (1,160 sq. miles); population: 396,400. Capital, Batumi (1990 population, 137,300). Adjara fell under Turkish rule in the 17th century, and was annexed to Russia (rejoining Georgia) after the Berlin Treaty of 1878. On 16 July 1921 the territory was constituted as an Autonomous Republic within the Georgian SSR, a status confirmed by the Georgian Constitution of 1995.

Ethnic groups (1989 census): Georgians, 82.8%; Russians, 7.7%; and Armenians 4%.

Chairman of the Supreme Council of Adjara: Aslan Abashidze.

Elections were held in Sept. 1996. A coalition of the Citizens' Union of Georgia and the All-Georgian Union of Revival gained a majority of seats.

Adjara specializes in sub-tropical agricultural products. These include tea, citrus, bamboo, eucalyptus, tobacco, etc. Livestock (Jan. 1990): 112,300 cattle, 6,200 pigs, 7,000 sheep and goats. In 1980 there were 69 collective farms and 21 state farms.

SOUTH OSSETIA

Area, 3,900 sq. km (1,505 sq. miles); population (Jan. 1990), 99,800 (ethnic groups at the 1989 census; Ossetians 66.2% and Georgians 29%). Capital, Tskhinvali (34,000). This area was populated by Ossetians from across the Caucasus (North Ossetia), driven out by the Mongols in the 13th century. The region was set up within the Georgian SSR on 20 April 1922. Formerly an Autonomous Region, its administrative autonomy was abolished by the Georgian Supreme Soviet on 11 Dec. 1990, and it has been named the Tskhinvali Region.

Fighting broke out in 1990 between insurgents wishing to unite with North Ossetia (in the Russian Federation) and Georgian forces. By a Russo-Georgian agreement of July 1992 Russian peacekeeping forces moved into a 7-km buffer zone between South Ossetia and Georgia pending negotiations. An OSCE peacekeeping force has been deployed since 1992.

At elections not recognized by the Georgian government on 10 Nov. 1996, Lyudvig Chibirov (b. 1932) was elected *President*.

Though maintaining a commitment to independence, President Chibirov came to a political agreement with the Georgian government in 1996 that neither force nor sanctions should be applied.

KEY HISTORICAL EVENTS

At the outbreak of the Napoleonic wars Germany consisted of many small states, independent but loosely bound by a common allegiance to the Holy Roman Emperor, a title which for most of its history fell to the Austrian royal house of Hapsburg. In 1806 the Holy Roman Empire was destroyed by Napoleon who then combined 16 German states as the Confederation of the Rhine. Following Napoleon's defeat in 1815, a larger Confederation was formed with 38 members (39 after 1817). Austria remained the dominant power with a permanent right to the presidency. Prussia held the vice-presidency.

In 1848–50 attempts were made to draw up a constitution but the parliament which sat from 20 March to 29 April 1850 was neither recognized by Austria nor powerful enough to control the other dominant state, Prussia. The Federal Diet therefore resumed power and held it until 1866. In 1866 Prussia defeated Austria and formed the North German Confederation under her own control.

In 1870 Prussia went to war with France, rallied the German states in support and, following German victory, went on to the creation of the German Empire in 1871. The Empire included all German states except Austria and had, therefore, deep North-South, Protestant-Catholic divisions. It was dominated by Prussia, whose king became emperor. The imperial government led Germany into the First World War in 1914 and when defeated, national unity collapsed. The emperor abdicated on 28 Nov. 1918.

After an anarchic period a republican government attempted to restore the economy and political stability. But the onset of world depression and the loss of resources and territory through warfare were too much for the fledgling government to manage. In 1933 the National Socialist leader Adolf Hitler was appointed Chancellor. The National Socialist ('Nazi') party appealed to national pride and offered a return to self-respect after humiliation. Hitler became president of the Third Reich in 1934. Hitler's expansionism led to his annexation of Austria and of German-speaking Czechoslovakia (the Sudetenland) in 1938. In March 1939 he invaded Poland, attempting to restore the authority exercised there by Prussia before 1918. This precipitated the Second World War.

The War ended in German defeat in 1945. The Allied forces occupied Germany; the UK, the USA and France holding the west and the USSR the east. By the Berlin Declaration of 5 June 1945 these governments assumed authority; each was given a zone of occupation, and the zone commanders-in-chief together made up the Allied Control Council in Berlin. The area of Greater Berlin was also divided into 4 sectors.

By 1948 it had become clear that there would be no agreement between the occupying powers as to the future of Germany. Accordingly, the western allies united their zones into one unit. In protest, the USSR withdrew from the Allied Control Council, blockaded Berlin until May 1949, and consolidated control of eastern Germany, establishing the German Democratic Republic. A People's Council appointed in 1948 drew up a constitution which came into force in Oct. 1949, providing for a communist state of five Länder with a centrally-planned economy. In 1952 the government made a division between its own territory and that of the Federal Republic, with a three-mile cordon fenced and guarded along the frontier. Berlin was closed as a migration route by the construction of a concrete boundary wall in 1961. In 1954 the USSR ceased to collect reparation payments, and sovereignty was granted. The GDR signed the Warsaw Pact in 1955. Socialist policies were stepped up in 1958, leading to flight to the West of skilled workers. Meanwhile, a constituent assembly met in Bonn in Sept. 1948 to draft a Basic Law

which brought the Federal Republic of Germany into existence. The occupation forces retained some powers, however, and the Republic did not become a sovereign state until 1955.

Even before sovereignty the Republic had begun negotiations for a measure of European unity and joined in creating the European Coal and Steel Community in 1951 and the European Economic Community in 1957. In Jan. 1957 the Saarland was returned to full German control. In 1973 the Federal Republic entered the UN.

In the autumn of 1989 movements for political liberalization in the GDR and reunification with Federal Germany gathered strength. Erich Honecker and other long-serving Communist leaders were replaced in Oct.-Nov. The Berlin Wall was opened on 9 Nov. Following the reforms in the GDR in Nov. 1989 the Federal Chancellor Helmut Kohl issued a plan for German confederation. On 18 May 1990 Federal Germany and the GDR signed a treaty extending Federal Germany's currency, its economic, monetary and social legislation to the GDR as of 1 July. German reunification took place on 3 Oct. 1990.

The Federal Assembly (*Bundestag*) moved from Bonn to the renovated *Reichstag* in Berlin over several months in 1999.

Berlin: From a fishing village on the River Spree Berlin grew, and, in 1307, formed a union with its sister town of Cölln. After the founding of the German Empire in 1871 it became the capital of the new Germany. It had a turbulent history culminating in the building of the Wall dividing East and West in 1961. The Wall fell in 1989 and after re-unification of East and West in 1990, Berlin was declared the capital. Berlin was immortalized in Christopher Isherwood's novel *Goodbye To Berlin* about his experiences in the twenties and thirties and on which the film *Cabaret* was based.

The official language is German. Minor orthographical amendments were agreed in 1995. An agreement between German-speaking countries in Vienna on 1 July 1996 provided for minor orthographical changes and established a Commission for German Orthography in Mannheim. There have been considerable objections within

GERMANY

Germany, particularly in the North, and many Länder are to decide their own language programmes for schools. Generally, both old and new spellings are acceptable.

A UNICEF report published in 2000 showed that 10.7% of children in Germany live in poverty (in households with income below 50% of the national median). The report also showed that the poverty rate of children in lone-parent families was 51.2%, compared to 6.2% in two-parent families.

CLIMATE

Oceanic influences are only found in the northwest where winters are quite mild but stormy. Elsewhere a continental climate is general. To the east and south, winter temperatures are lower, with bright frosty weather and considerable snowfall. Summer temperatures are fairly uniform throughout. CONSTITUTION AND GOVERNMENT

The Basic Law (*Grundgesetz*) was approved by the parliaments of the participating Länder and came into force on 23 May 1949. It is to remain in force until 'a constitution adopted by a free decision of the German people comes into being'. The Federal Republic is a democratic and social constitutional state on a parliamentary basis. The federation is constituted by the 16 Länder (states). The Basic Law decrees that the general rules of international law form part of the federal law. The constitutions of the Länder must conform to the principles of a republican, democratic and social state based on the rule of law. Executive power is vested in the Länder, unless the Basic Law prescribes or permits otherwise. Federal law takes precedence over state law.

Legislative power is vested in the *Bundestag* (Federal Assembly) and the *Bundesrat* (Federal Council). The Bundestag is currently composed of 669 members and is elected in universal, free, equal and secret elections for a term of 4 years. A party must gain 5% of total votes cast in order to gain representation in the Bundestag, although if a party gets 3 candidates elected directly, they may take their seats even if the party obtains less than 5% of the national vote. The electoral system

combines relative-majority and proportional voting; each voter has 2 votes, the first for the direct constituency representative, the second for the competing party lists in the Länder. All directly elected constituency representatives enter parliament, but if a party receives more 'indirect' than 'direct' votes, the first name in order on the party list not to have a seat becomes a member—the number of seats is increased by the difference ('overhang votes'). Thus the number of seats in the Bundestag varies, but is usually around 670. The Bundesrat consists of 69 members appointed by the governments of the Länder in proportions determined by the number of inhabitants. Each *Land* has at least 3 votes.

The Head of State is the Federal *President*, who is elected for a 5-year term by a *Federal Convention* specially convened for this purpose. This Convention consists of all the members of the Bundestag and an equal number of members elected by the Länder parliaments in accordance with party strengths, but who need not themselves be members of the parliaments. No president may serve more than 2 terms. Executive power is vested in the Federal government, which consists of the Federal *Chancellor*, elected by the Bundestag on the proposal of the Federal President, and the Federal Ministers, who are appointed and dismissed by the Federal President upon the proposal of the Federal Chancellor.

The Federal Republic has exclusive legislation on: (1) foreign affairs; (2) federal citizenship; (3) freedom of movement, passports, immigration and emigration, and extradition; (4) currency, money and coinage, weights and measures, and regulation of time and calendar; (5) customs, commercial and navigation agreements, traffic in goods and payments with foreign countries, including customs and frontier protection; (6) federal railways and air traffic; (7) post and telecommunications; (8) the legal status of persons in the employment of the Federation and of public law corporations under direct supervision of the Federal government; (9) trade marks, copyright and publishing rights; (10) co-operation of the Federal Republic and the Länder in the criminal police and in matters concerning the protection of the constitution, the establishment of a Federal Office of Criminal Police, as well as the combating of international crime; (11) federal statistics.

In the field of finance the Federal Republic has exclusive legislation on customs and financial monopolies and concurrent legislation on: (1) excise taxes and taxes on transactions, in particular, taxes on real-estate acquisition, incremented value and on fire protection; (2) taxes on income, property, inheritance and donations; (3) real estate, industrial and trade taxes, with the exception of the determining of the tax rates. The Federal Republic can claim part of the income and corporation taxes to cover its expenditures not covered by other revenues. Financial jurisdiction is uniformly regulated by federal legislation.

Federal laws are passed by the Bundestag and after their adoption submitted to the Bundesrat, which has a limited veto. The Basic Law may be amended only upon the approval of two-thirds of the members of the Bundestag and two-thirds of the votes of the Bundesrat.

RECENT ELECTIONS

On 23 May 1999 Johannes Rau was elected President by the Federal Convention against 2 opponents, Dagmar Schipanski and Uta Ranke-Heinemann.

Bundestag elections were held on 27 Sept. 1998; the electorate was 60·5m. (31·75m. women; 28·75m. men) including 3·3m. first-time voters. There were a record 5,062 candidates competing for the 656 seats, 27·3% of them women. The age of the candidates ranged from 18 to 96. Turn-out was 80·2%. The Social Democratic Party (SPD) won 298 seats with 40·9% of votes cast (252 with 36·4% in 1994); the Christian Democratic Union/Christian Social Union (CDU/CSU); the CSU is a Bavarian party where the CDU does not stand) won 245 seats with 35·2% of

votes cast (294 with 41.4% in 1994); the Greens, 47 with 6.6% (49 with 7.3%); the Free Democratic Party (FDP), 44 seats with 6.2% (47 with 6.9%); the Party for Democratic Socialism (PDS; former Communists), 35 with 5.2% (30 with 4.4%). With the SPD forming an alliance with the Green party, the new government had a 21-seat majority. This was the first time in the Federal Republic's 49-year history that a government changed through the ballot box rather than through a reshuffling of coalition partners between elections. However, in 6 out of 7 state elections during the 12 months that followed the SPD was defeated. As a result the government has lost its majority in the 69-seat Bundersrat (the upper house of parliament).

European Parliament. Germany has 99 representatives. At the June 1999 elections turn-out was 45.2%. The CDU won 43 seats with 39.3% of votes cast (group in European Parliament: European People's Party); the SPD, 33 with 30.7% (Party of European Socialists); the CSU, 10 with 9.4% (European People's Party); the Greens, 7 with 6.4% (Greens); PDS, 6 with 5.8% (Confederal Group of the European United Left).

CURRENT ADMINISTRATION

Federal President: Johannes Rau; b. 1931 (SPD; sworn in 1 July 1999).

Speaker of the Bundestag: Wolfgang Thierse (elected Oct. 1998).

In Oct. 1998 an SPD-Green party coalition was formed, the first time that the Green party had entered national government in Germany. The government comprised in April 2001:

Chancellor: Gerhard Schröder; b. 1944 (SPD; sworn in 27 Oct. 1998).

Vice-Chancellor and Foreign Minister: Joschka Fischer (Greens). *Interior:* Otto Schily (SPD). *Justice:* Herta Däubler-Gmelin (SPD). *Finance:* Hans Eichel (SPD). *Economy:* Werner Müller (ind.). *Food, Agriculture and Forestry:* Renate Künast (Greens). *Labour and Social Affairs:* Walter Riester (SPD). *Defence:* Rudolf Scharping (SPD). *Family:* Christine Bergmann (SPD). *Health:* Ulla Schmidt (SPD). *Transport and Construction:* Kurt Bodewig (SPD). *Environment:* Jürgen Trittin (Greens). *Education and Research:* Edelgard Bulmahn (SPD). *Economic Co-operation and Development:* Heidemarie Wiecezorek-Zeul (SPD).

The leader of the opposition Christian Democratic Union (CDU) is Angela Merkel, an East German liberal, who was elected to succeed Wolfgang Schäuble in March 2000 in the wake of the financial scandal which had previously brought down Helmut Kohl.

DEFENCE

Russian (ex-Soviet) forces had withdrawn from the territory of the former GDR by 1994.

Conscription is for 10 months. In July 1994 the Constitutional Court ruled that German armed forces might be sent on peacekeeping missions abroad. Unlike most major European NATO powers Germany has made limited progress towards the professionalization of its armed forces. It has, however, enhanced the number of professionals available for military missions abroad. Since Jan. 2001 women have been allowed to serve in all branches of the military on the same basis as men.

In 1999 defence expenditure totalled US\$31,117m. (US\$379 per capita), representing 1.6% of GDP.

Army. The Army is organized in the Army Forces Command. The equipment of the former East German army is in store. Total strength was (1999) 228,300 (conscripts 112,000). There are Army reserves of 276,000.

The Territorial Army is organized into 5 Military Districts, under 3 Territorial Commands. Its main task is to defend rear areas and remains under national control even in wartime.

Navy. The Fleet Commander operates from a modern Maritime Headquarters at Glücksburg, close to the Danish border.

The fleet includes 14 diesel coastal submarines, 2 destroyers and 12 frigates. The main naval bases are at Wilhelmshaven, Bremerhaven, Kiel, Eckernförde and Warnemünde.

The Naval Air Arm, 4,500 strong, is organized into 3 wings and includes 52 combat aircraft (Tornados) and 39 armed helicopters.

Personnel in 1999 numbered 28,100, including 6,800 conscripts and 490 women.

Air Force. Since 1970 the *Luftwaffe* has comprised the following commands: German Air Force Tactical Command, German Air Force Support Command (including two German Air Force Regional Support Commands—North and South) and General Air Force Office. Personnel in 1999 was 76,400 (23,200 conscripts). There were 451 combat aircraft (plus a further 106 in store) including Tornados, F-4Fs and MiG-29s.

INTERNATIONAL RELATIONS

A treaty of friendship with Poland signed on 17 June 1991 recognized the Oder-Neisse border and guaranteed minorities' rights in both countries.

Germany is a member of the UN, WTO, NATO, BIS, OECD, EU, Council of Europe, WEU, OSCE, CERN, Council of the Baltic Sea States, Danube Commission, Inter-American Development Bank, Asian Development Bank, IOM and the Antarctic Treaty. Germany is a signatory to the Schengen Accord which abolishes border controls between Germany, Austria, Belgium, Denmark, Finland, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain and Sweden.

ECONOMY

Services accounted for 68.5% of GDP in 1999, industry 30.3% and agriculture 1.2%.

According to the anti-corruption organization *Transparency International*, Germany ranked 17th in the world in 2000 in a survey of the countries with the least corruption in business and government. It received 7.6 out of 10 in the annual index.

Performance. Real GDP growth was 1.9% in 1999 and 3.1% in 2000, the highest rate since reunification. Growth in the *Länder* of the former German Democratic Republic was estimated to be around 0.6% lower than the overall national average in both 1997 and 1998, and GDP per capita in the former GDR is only two-thirds of that in the former West Germany. Total GDP in 1998 was US\$2,134.2bn., the third highest behind the USA and Japan.

Germany was placed third in the world, behind Finland and the USA, in the Current Competitiveness Index Ranking in the World Economic Forum's *Global Competitiveness Report 2000*.

Budget. Tax reforms introduced by the Schröder government in 1998 mean the average working family will be 2,700 DM better off by 2002. The cost is to be borne by industry through the phasing out or tightening of tax reliefs. In July 2000 Chancellor Schröder pushed through the largest tax-cutting package in Germany's history. From 2001 corporation tax was to be cut from 40 to 25% and the top rate of income tax from 51 to 43%.

Since 1 Jan. 1979 tax revenues have been distributed as follows: *Federal government.* Income tax, 42.5%; capital yield and corporation tax, 50%; turnover tax, 67.5%; trade tax, 15%; capital gains, insurance and accounts taxes, 100%; excise duties (other than on beer), 100%. *Länder.* Income tax, 42.5%; capital yield and corporation tax, 50%; turnover tax, 32.5%; trade tax, 15%; other taxes, 100%. *Local authorities.* Income tax, 15%; trade tax, 70%; local taxes, 100%.

VAT is 16% (reduced rate, 7%).

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Germany; irrevocable conversion rate 1·95583 DM to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002—until then the national currency will be used for payment in cash. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking; by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and deutsche Marks until the deutsche Mark is withdrawn from circulation—which must be by 1 July 2002 and is scheduled for 31 Dec. 2001. Germany will be the first of the euro-12 countries to abolish its hitherto national currency and adopt the euro instead.

The *deutsche Mark* (DEM) consists of 100 *pfennig* (pf.). In Oct. 2000 gold reserves were 111·52m. troy oz (only the USA, with 261·61m. troy oz, had more), and foreign exchange reserves were US\$55,179m. Inflation was at a record low of 0·6% in 1999 (down from 1·9% in 1997), but rose to 1·9% in 2000. Total money in circulation at the end of 1999 was 289,972m. DM.

Banking and Finance. The Deutsche Bundesbank (German Federal Bank) is the central bank and bank of issue. Its duty is to protect the stability of the currency. It is independent of the government but obliged to support the government's general policy. Its Governor is appointed by the government for 8 years. The Governor is Ernst Welteke (b. 1943). Its assets were DM473,610m. at the end of 1999. Ranked by total assets it is the largest bank in the world. Its market capitalization in Oct. 1999 was US\$44bn. The largest private banks are the Deutsche Bank, HypoVereinsbank, Dresdner Bank and Commerzbank. The former GDR central bank Staatsbank has become a public commercial bank. In April 2001 Dresdner Bank accepted a takeover offer from Allianz, the country's largest insurance company. The new group was expected to retain the name Allianz.

In 1999 there were 2,999 credit institutes, including 290 banks, 578 savings banks, 32 mortgage lenders and 2,035 credit societies. They are represented in the wholesale market by the 13 public sector Länder banks. Total assets, 1999, 11,227,913m. DM. Savings deposits were 1,225,523m. DM in 1999. By Oct. 2000 approximately 6% of the German population were using e-banking.

A single stock exchange, the Deutsche Börse, was created in 1992, based on the former Frankfurt stock exchange in a union with the smaller exchanges in Berlin, Bremen, Düsseldorf, Hamburg, Hanover, Munich and Stuttgart. Share turnover on the Frankfurt stock exchange rose from 900bn. DM in 1992 to 2,200bn. DM in 1997, while trading on the other 7 exchanges only rose from 340bn. DM in 1992 to 430bn. DM in 1997.

Germany attracted a record amount of foreign capital in 1999. The total of 96.2bn. DM was more than twice the 1998 total. France was the largest investor in 1999, with 50.9bn. DM, followed by Luxembourg with 17.8bn. DM and the USA with 17.4bn. DM. Investment abroad from Germany in 1999 was also a record high, at 172.1bn. DM, up from 146bn. Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1998 was 119.15m. kW. In 2000 there were 19 nuclear reactors in operation. Production of electricity was 553.42bn. kWh in 1998, of which about 28% was nuclear. There is a moratorium on further nuclear plant construction. Consumption per capita was 6,630 kWh in 1997. In April 1998 the electricity market was liberalized, leading to huge cuts in bills for both industrial and residential customers. In June 2000 Veba and Viag merged to form E.ON, which became the world's largest private energy service provider. By 2010 it is hoped that renewable energy sources, which currently account for 6% of electric power, will constitute 10% of the total.

Oil and Gas. The chief oilfields are in Emsland (Lower Saxony). In 1999, 2.74m. tonnes of crude oil were produced. Natural gas production was 17.8bn. cu. metres in 1999. Natural gas reserves were 340bn. cu. metres in 1999 and crude petroleum reserves 385m. bbls in 1997.

Wind. Germany is the world's leading producer of wind-power. By the end of 2000 there were 9,369 wind turbines with a total rated power of 6,094.8 MW.

THE LÄNDER

BADEN-WÜRTTEMBERG

KEY HISTORICAL EVENTS

The *Land* is a combination of former states. Baden (the western part of the present *Land*) became a united margravate in 1771, after being divided as Baden-Baden and Baden-Durlach since 1535; Baden-Baden was predominantly Catholic and Baden-Durlach, Protestant.

The margrave became an ally of Napoleon, ceding land west of the Rhine and receiving northern and southern territory as compensation. In 1805 Baden became a grand duchy and in 1806 a member state of the Confederation of the Rhine, extending from the Main to Lake Constance. In 1815 it was a founder-state of the German Confederation. A constitution was granted by the grand duke in 1818, but later rulers were less liberal and there was revolution in 1848, put down with Prussian help. The grand Duchy was abolished and replaced by a *Land* in 1919.

GERMANY

In 1949 Baden was combined with Württemberg to form three states; the three were brought together as one in 1952.

Württemberg, having been a duchy since 1495, became a kingdom in 1805 and joined the Confederations as did Baden. A constitution was granted in 1819 and the state remained liberal. In 1866 the king allied himself with Austria against Prussia, but in 1870 joined Prussia in war against France. The liberal monarchy came to an end with the abdication of William II in 1918, and Württemberg became a state of the German Republic. In 1945 the state was divided between different Allied occupation authorities but the divisions ended in 1952.

TERRITORY AND POPULATION

Baden-Württemberg comprises 35,741 sq. km, with a population (at 31 Dec. 1999) of 10,475,932 (5,343,567 females, 5,132,365 males).

The *Land* is divided into 4 administrative regions, 9 urban and 35 rural districts, and numbers 1,111 communes. The capital is Stuttgart.

BAVARIA

Bayern

KEY HISTORICAL EVENTS

Bavaria was ruled by the Wittelsbach family from 1180. The duchy remained Catholic after the Reformation, which made it a natural ally of Austria and the Hapsburg Emperors.

The present boundaries were reached during the Napoleonic wars, and Bavaria became a kingdom in 1805. Despite the granting of a constitution and parliament, radical feeling forced the abdication of King Ludwig I in 1848. Maximilian II was followed by Ludwig II who allied himself with Austria against Prussia in 1866, but was reconciled with Prussia and entered the German Empire in 1871.

In 1918 the King Ludwig III abdicated. The first years of republican government were filled with unrest, attempts at the overthrow of the state by both communist and right-wing groups culminating in an unsuccessful coup by Adolf Hitler in 1923.

The state of Bavaria included the Palatinate from 1214 until 1945, when it was taken from Bavaria and added to the Rhineland. The present *Land* of Bavaria was formed in 1948.

Munich became capital of Bavaria in the reign of Albert IV (1467–1508) and remains capital of the *Land*.

BERLIN

KEY HISTORICAL EVENTS

After the end of World War II, Berlin was divided into 4 occupied sectors, each with a military governor from one of the victorious Allied Powers (the USA, the Soviet Union, Britain and France). On 30 Nov. 1948 a separate municipal government was set up in the Soviet sector which led to the political division of the city. In

contravention of the special Allied status agreed for the entire city, East Berlin became 'Capital of the GDR' in 1949 and thus increasingly integrated into the GDR as a whole. In West Berlin, the formal supreme authority of the western allies endured until 1990.

On 17 June 1953 the protest by workers in East Berlin against political oppression and economic hardship was suppressed by Soviet military forces. To stop refugees, the east German government erected the Berlin Wall to seal off West Berlin's borders on 13 Aug. 1961.

The Berlin Wall unexpectedly collapsed on 9 Nov. 1989 as the regime in the GDR bowed to the internal pressure which had been building for months. East and West Berlin were amalgamated on the re-unification of Germany in Oct. 1990. In April 1994 the *Land* governments of Berlin and Brandenburg agreed to merge the 2 *Länder* in 1999 or 2002, subject to the approval of their respective parliaments, and of their electorates in referendums held in May 1996. In Berlin 53.4% of votes were cast in favour, but in Brandenburg 62.8% were against. A further referendum on the proposed merger is likely to take place in the next few years.

With the move of the national government, the parliament (Bundestag), and the federal organ of the *Länder* (Budesrat) in 1999, Berlin is once again a capital city.

TERRITORY AND POPULATION

The area is 891.49 sq. km. Population, 31 Dec. 1999, 3,386,667 (51.4% female), including 433,562 foreign nationals; density, 3,799 per sq. km.

CONSTITUTION AND GOVERNMENT

According to the constitutions of Sept. 1950 and Oct. 1995, Berlin is simultaneously a *Land* of the Federal Republic and a city. It is governed by a House of Representatives (of at least 130 members); executive power is vested in a Senate, consisting of the Governing Mayor, 2 Mayors and not more than 8 senators. Since 1992 adherence to the constitution has been watched over by a Constitutional Court.

After a proposed merger was rejected by Brandenburg in the 1996 referendum, a Joint Berlin-Brandenburg Co-operation Council was set up.

Berlin has 4 seats in the Bundesrat.

The SPD thus suffered a 6th defeat in 7 state elections since the general election of Sept. 1998.

HESEN

KEY HISTORICAL EVENTS

The *Land* consists of the former states of Hesse-Darmstadt and Hesse-Kassel, and Nassau. Hesse-Darmstadt was ruled by the Landgrave Louis X from 1790. He became grand duke in 1806 with absolute power, having dismissed the parliament in 1803. However, he granted a constitution and bicameral parliament in 1820. Hesse-Darmstadt lost land to Prussia in the Seven Weeks' War of 1866, but retained its independence, both then and as a state of the German Empire after 1871. In 1918 the grand duke abdicated and the territory became a state of the German Republic. In 1945 areas west of the Rhine were incorporated into the new *Land* of Rhineland-Palatinate, areas east of the Rhine became part of the *Land* of Greater Hesse.

Hesse-Kassel was ruled by the Landgrave William IX from 1785 until he became Elector in 1805. In 1807 the Electorate was absorbed into the Kingdom of Westphalia (a Napoleonic creation), becoming independent again in 1815 as a state of the German Confederation. In 1831 a constitution and parliament were granted but the Electors remained strongly conservative.

In 1866 the Diet approved alliance with Prussia against Austria; the Elector nevertheless supported Austria. He was defeated by the Prussians and exiled and Hesse-Kassel was annexed to Prussia. In 1867 it was combined with Frankfurt and

some areas taken from Nassau and Hesse-Darmstadt to form a Prussian province (Hesse-Nassau). In 1801 Nassau west of the Rhine passed to France; Napoleon also took the northern state in 1806. The remnant of the southern states allied in 1803 and three years later they became a duchy. In 1866 the duke supported Austria against Prussia and the duchy was annexed by Prussia as a result. In 1944 the Prussian province of Hesse-Nassau was split in two: Nassau and Electoral Hesse, also called Kurhessen. The following year these were combined with Hesse-Darmstadt as the *Land* of Greater Hesse which became known as Hessen.

LOWER SAXONY

Niedersachsen

KEY HISTORICAL EVENTS

The *Land* consists of the former state of Hanover with Oldenburg, Schaumburg-Lippe and Brunswick. It does not include the cities of Bremen or Bremerhaven. Oldenburg, Danish from 1667, passed to the bishopric of Lübeck in 1773; the Holy Roman Emperor made it a duchy in 1777. As a small state of the Confederation after 1815 it supported Prussia, becoming a member of the Prussian Zollverein (1853) and North German Confederation (1867). The grand duke abdicated in 1918 and was replaced by an elected government.

Schaumburg-Lippe was a small sovereign principality. As such it became a member of the Confederation of the Rhine in 1807 and of the German Confederation in 1815. Surrounded by Prussian territory, it also joined the Prussian-led North German Confederation in 1866. Part of the Empire until 1918, it then became a state of the new republic.

Brunswick, a small duchy, was taken into the Kingdom of Westphalia by Napoleon in 1806 but restored to independence in 1814. In 1830 the duke, Charles II, was forced into exile and replaced in 1831 by his more liberal brother, William. The succession passed to a Hanoverian claimant in 1913 but the duchy ended in 1918 with the Empire.

As a state of the republican Germany, Brunswick was greatly reduced under the Third Reich. Its boundaries were restored by the British occupation forces in 1945.

Hanover was an autonomous Electorate of the Holy Roman Empire whose rulers were also kings of Great Britain from 1714 to 1837. From 1762 they ruled almost entirely from England. After Napoleonic invasions Hanover was restored in 1815. A constitution of 1819 made no radical change and had to be followed by more liberal versions in 1833 and 1848. Prussia annexed Hanover in 1866; it remained a Prussian province until 1946. On 1 Nov. 1946 all four states were combined by the British military administration to form the *Land* of Lower Saxony.

NORTH RHINE-WESTPHALIA

Nordrhein-Westfalen

KEY HISTORICAL EVENTS

Historical Westphalia consisted of many small political units, most of them absorbed by Prussia and Hanover before 1800. In 1807 Napoleon created a Kingdom of Westphalia for his brother Joseph. This included Hesse-Kassel, but was formed mainly from the Prussian and Hanoverian lands between the rivers Elbe and Weser.

In 1815 the kingdom ended with Napoleon's defeat. Most of the area was given to Prussia, with the small principalities of Lippe and Waldeck surviving as independent states. Both joined the North German Confederation in 1867. Lippe remained autonomous after the end of the Empire in 1918; Waldeck was absorbed into Prussia in 1929.

In 1946 the occupying forces combined Lippe with most of the Prussian province of Westphalia to form the *Land* of North Rhine-Westphalia. On 1 March 1947 the allied Control Council formally abolished Prussia.

RHINELAND-PALATINATE

Rheinland-Pfalz

KEY HISTORICAL EVENTS

The *Land* was formed from the Rhenisch Palatinate and the Rhine valley areas of Prussia, Hesse-Darmstadt, Hesse-Kassel and Bavaria.

From 1214 the Palatinate was ruled, by the Bavarian house of Wittelsbach, with its capital as Heidelberg. In 1797 the land west of the Rhine was taken into France, and Napoleon divided the eastern land between Baden and Hesse. In 1815 the territory taken by France was restored to Germany and allotted to Bavaria. The area and its neighbours formed the strategically important Bavarian Circle of the Rhine. The rule of the Wittelsbachs ended in 1918 but the Palatinate remained part of Bavaria until the American occupying forces detached it in 1946. The new *Land*, incorporating the Palatinate and other territory, received its constitution in April 1947.

SAARLAND

KEY HISTORICAL EVENTS

Long disputed between Germany and France, the area was occupied by France in 1792. Most of it was allotted to Prussia at the close of the Napoleonic wars in 1815. In 1870 Prussia defeated France and when, in 1871, the German Empire was founded under Prussian leadership, it was able to incorporate Lorraine. This part of France was the Saar territory's western neighbour so the Saar was no longer a vulnerable boundary state. It began to develop industrially, exploiting Lorraine coal and iron.

In 1919 the League of Nations took control of the Saar until a plebiscite of 1935 favoured return to Germany. In 1945 there was a French occupation, and in 1947 the Saar was made an international area, but in economic union with France. In 1954 France and Germany agreed that the Saar should be a separate and autonomous state, under an independent commissioner. This was rejected by referendum and France agreed to return Saarland to Germany; it became a *Land* of the Federal Republic on 1 Jan. 1957.

SCHLESWIG-HOLSTEIN

KEY HISTORICAL EVENTS

The *Land* is formed from two states formerly contested between Germany and Denmark.

Schleswig was a Danish dependency ruled since 1474 by the King of Denmark as Duke of Schleswig. He also ruled Holstein, its southern neighbour, as Duke of Holstein, but he did so recognizing that it was a fief of the Holy Roman Empire. As such, Holstein joined the German Confederation which replaced the Empire in 1815.

Disputes between Denmark and the powerful German states were accompanied by rising national feeling in the duchies, where the population was part-Danish and part-German. There was war in 1848–50 and in 1864, when Denmark surrendered its claims to Prussia and Austria. Following her defeat of Austria in 1866 Prussia annexed both duchies.

North Schleswig (predominately Danish) was awarded to Denmark in 1920. Prussian Holstein and south Schleswig became the present *Land* in 1946.

GDP per capita: (PPP\$) 1,735

HDI/world rank: 0.556/129

KEY HISTORICAL EVENTS

By the 17th century, strong chiefdoms and warrior states, notably the Ashanti, dominated the territory. The Ashanti state was strengthened by its collaboration with the slave trade but by 1874 it had been conquered by Britain and made a colony. The hinterland became a protectorate in 1901. British rule was challenged after the Second World War by Kwame Nkrumah and the Convention People's Party (CPP), formed in 1949. The state of Ghana came into existence on 6 March 1957 when the former Colony

of the Gold Coast with the Trusteeship Territory of Togoland attained Dominion status. The country was declared a Republic within the Commonwealth on 1 July 1960 with Dr Kwame Nkrumah as the first President.

In 1966 the Nkrumah regime was overthrown by the military who ruled until 1969 when they handed over to a civilian regime under a new constitution. On 13 Jan. 1972 the armed forces regained power. In 1979 the Supreme Military Council (SMC) was toppled in a coup led by Flight-Lieut. J. J. Rawlings. The new government permitted elections already scheduled and these resulted in a victory for Dr Hilla Limann and his People's National Party. However, on 31 Dec. 1981 another coup led by Flight-Lieut. Rawlings dismissed the government and Parliament, suspended the constitution and established a Provisional National Defence Council to exercise all government powers. A new pluralist democratic constitution was approved by referendum in April 1992. The Fourth Republic was proclaimed on 7 Jan. 1993.

INTERNATIONAL RELATIONS

In March 1998 the IMF removed barriers to the offer of financial support from aid donors totalling US\$1.6bn. in 1998 and 1999.

Ghana is a member of the UN, WTO, the Commonwealth, OAU, African Development Bank, ECOWAS and is an ACP member state of the ACP-EU relationship.

ECONOMY

Agriculture accounted for 10.4% of GDP in 1998, industry 6.9% and services 82.7%.

Policy. Ghana is committed to the reform programmes of the IMF and World Bank and is one of Africa's biggest borrowers. In 1996 aid amounted to 11% of GDP, or 4 times the value of Ghana's exports. A privatization programme was inaugurated in 1988. By April 2000, 132 state-owned enterprises had been sold off to become 232 privately-owned companies. A further 168 were due to be privatized. Privatization deals raised US\$804m. between 1990 and 1996, including the Ashanti Goldfields sell-off worth more than US\$400m. Only South Africa among sub-Saharan African nations has raised more from privatization. Building, tourism, technology and financial services account for more than 46% of national income. President Rawlings set a target date of 2020 for the country to achieve middle income status.

Performance. Average GDP growth in the 10 years to 1998 was 4.5%—almost twice the African average. Real GDP growth in 1999 was 4.2%, with a forecast for 2000 of 1.0%. During 2000 low gold and cocoa prices had a disastrous effect on the economy. In 1998 total GDP was US\$7.5bn.

Budget. The 1996 budget provided for (in C£1,000m.): revenue, 2,328.3; expenditure, 2,169.5.

Currency. The monetary unit is the *cedi* (GHC) of 100 *pesewas* (P). In 1996 inflation was an annualized 50%. It had declined to 28.0% in 1997 and by 1999 was down to 13.8%. Foreign exchange reserves were US\$454m. in Nov. 1997 and gold reserves were 280,000 troy oz in Dec. 1999. Total money supply in Dec. 1997 was C£1,724bn.

Banking and Finance. The Bank of Ghana (*Governor*, Kwabena Duffour) was established in 1957 as the central bank and bank of issue. At Dec. 1995 its total assets were C£3,272,946.6m. There are 3 large commercial banks, 7 secondary banks, 3 merchant banks and 100 rural banks. There are 2 discount houses. Banks are required to have a capital base of at least 6% of net assets. At Dec. 1995 assets of commercial banks totalled C£1,900,327.1m.

Foreign investment is actively encouraged with the Ghana Free Zone Scheme offering particular incentives such as full exemption of duties and levies on all imports for production and exports from the zones, full exemption on tax on profits for ten years, and no more than 8% after ten years. It is a condition of the scheme that at least 70% of goods made within the zones must be exported. Within 18 months of the scheme being set up in 1995, 50 projects had been registered.

Ghana's stock exchange, which opened in 1990, was one of the world's best performing stock markets in 1998.

ENERGY AND NATURAL RESOURCES

Ghana is facing an energy crisis, with power cuts of up to 12 hours a day because drought has caused the level of Lake Volta to drop to below the danger level.

Electricity. Installed capacity was 1m. kW in 1997. Production (1998) 6.21bn. kWh, mainly from 2 hydro-electric stations operated by the Volta River Authority, Akosombo (6 units) and Kpong (4 units). Consumption per capita was 344 kWh in 1997. A drought in 1998 caused power cuts, with over 99% of electricity being hydro-electric. It is planned that electricity production will become less dependent

on hydro-electric stations and more so on gas, with the construction of a 600 km pipeline forming part of the proposed West African Gas Pipeline Project.

Oil and Gas. Ghana is pursuing the development of its own gas fields and plans to harness gas at the North and South Tano fields located off the western coast. Natural gas reserves, 1997, totalled 6bn. cu. metres. Oil reserves in 1997 were 129.6m. bbls.

Minerals. Gold is one of the mainstays of the economy. Production in 1998 was 2.3m. troy oz (1997, 1.6m. troy oz; 1996, 1.5m. troy oz). In 1998 diamond production was 800,000 carats; bauxite (1998), 443,000 tonnes; manganese (1993), 362,000 tonnes.

Agriculture. The rural poor earn little and many small farmers have reverted to subsistence farming. Around 2.5m. households were engaged in the agricultural sector in 1998. There were 2.85m. ha of arable land in 1997 and 1.70m. ha of permanent crops. In southern and central Ghana main food crops are maize, rice, cassava, plantains, groundnuts, yam and taro, and in northern Ghana groundnuts, rice, maize, sorghum, millet and yams. Agriculture presently operates at only 20% of its potential and is an area that is to be a major focus of investment.

Production of main food crops, 1998 (in 1,000 tonnes): cassava, 7,172; yams, 2,703; plantains, 1,878; taro, 1,577; maize, 1,015; sorghum, 355; rice, 281; coconuts, 240; millet, 162.

Cocoa is the main cash crop. Production (1997–98), 395,000 tonnes. The government estimates that more than 40% of the population relies either directly or indirectly on cocoa as a source of income. It contributes approximately 13% of GDP. Ghana is the second largest cocoa bean producer in the world after Côte d'Ivoire.

Livestock, 1996: cattle, 1.2m.; sheep, 2.4m.; pigs, 440,000; goats, 2.34m.; chickens, 13m.

Forestry. There were 9.02m. ha of forest in 1995, or 39.7% of the total land area (down from 42.2% in 1990). Reserves account for some 30% of the total forest lands. Timber production in 1998 was 21.9m. cu. metres.

Environment. Ghana's carbon dioxide emissions in 1996 were the equivalent of 0.2 tonnes per capita according to the *World Bank Atlas*.

KEY HISTORICAL EVENTS

Greece broke away from the Ottoman Empire in the 1820s and was declared a kingdom under the protection of Great Britain, France and Russia. Many Greeks were left outside the new state but Greece's area increased by 70%, the population growing from 2·8m. to 4·8m., after the Treaty of Bucharest (1913) recognized Greek sovereignty over Crete.

King Constantine opted for neutrality in the First World War, while Prime Minister Venezelos favoured the Entente powers. This National Schism led to British and French intervention which deposed Constantine on 11 June 1917. When his son Alexander died on 25 Oct. 1920, he returned and reigned until 1922. He was forced to abdicate by a coup after defeat by Turkey and the loss of Smyrna. The Treaty of Lausanne (1923) recognized Smyrna as Turkish with Eastern Thrace and the islands of Imvros and Tenedos, all of which had been ceded to Greece by the 1920 Treaty of Sevres. An exchange of Christian and Muslim populations followed. Resistance to Italian demands brought Greece into the Second World War when Germany had to come to the aid of the hard-pressed Italians. Athens was occupied on 27 April 1940. The occupation lasted until 15 Oct. 1944.

A communist led insurrection in 1946–47 was put down with the help of British and, later, US troops. Peace came after 1949.

The late 1950s saw the emergence of the Left, capitalizing on the movement for union with Cyprus and unease over NATO membership (1952). A military coup in 1967 led to the authoritarian rule of the 'Colonels' headed by George Papadopoulos. A republic was declared on 29 July 1973. The dictatorship collapsed in 1974 giving way to a civilian government of national unity. The monarchy was abolished by a referendum on 8 Dec. 1974. The 1981 election brought Andreas Papandreou to power and the head of a socialist government. Earlier that year Greece had become the tenth member of the EU. Re-elected in 1985, Papandreou imposed economic austerity to combat inflation and soaring budgets but industrial unrest and evidence of widespread corruption led to his fall and a succession of weak governments. Papandreou returned to power in Oct. 1993 but ill-health forced his resignation two years later. His successor Constantinos Simitis took a more pro-European stance instituting economic reforms to prepare the way for entry into European Monetary Union (EMU).

TERRITORY AND POPULATION

Greece is bounded in the north by Albania, the Former Yugoslav Republic of Macedonia (FYROM) and Bulgaria, east by Turkey and the Aegean Sea, south by the Mediterranean and west by the Ionian Sea. The total area is 131,957 sq. km (50,949 sq. miles), of which the islands account for 25,042 sq. km (9,669 sq. miles).

The population was 10,259,900 (5,204,492 females) according to the census of March 1991. 1997 estimate: 10,511,000; density, 80 per sq. km.

The UN gives a projected population for 2010 of 10·56m.

In 1998, 59·7% of the population lived in urban areas. There were 166,031 resident foreign nationals in 1991. A further 5m. Greeks are estimated to live abroad.

In 1987 the territory of Greece was administratively reorganized into 13 *regions* comprising in all 51 *departments*. Areas and populations according to the 1991 census:

¹Attica is both region and department. ²Without Attica.

The largest cities (1991 census populations) are Athens (the capital), 772,072 (total conurbation of Greater Athens, 3,072,922; up to 3,112,000 in 1999); Thessaloniki, 749,048 (768,000 in 1995); Piraeus, 182,671; Patras, 170,452; Peristerion, 137,288; Heraklion, 126,907; Larissa, 112,777; Kallithea, 114,233. Greater Athens, composed of the capital city, the port of Piraeus and a number of suburbs, contains about one third of the Greek population. It also contains about 50% of the country's industry and is the principal commercial, financial and diplomatic centre. Efforts have, however, been made to decentralize the economy. The second city, Thessaloniki (Salonika, with 974,000 inhabitants), with its major port, has grown rapidly in population and industrial development. Other important towns are Patras (300,000 inhabitants), Larissa (271,000 inhabitants), Volos and Heraklion on the island of Crete.

The Monastic Republic of **Mount Athos** (or Agion Oros, i.e. 'Holy Mountain'), the easternmost of the three prongs of the peninsula of Chalcidice, is a self-governing community composed of 20 monasteries. The peninsula is administered by a Council of 4 members and an Assembly of 20 members, 1 deputy from each monastery. The Constitution of 1927 gives legal sanction to the Charter of Mount Athos, drawn up by representatives of the 20 monasteries on 20 May 1924, and its status is confirmed by the 1952 and 1975 Constitutions. Women are not permitted to enter. Population, 1997, 4,000.

The modern Greek language had 2 contesting literary standard forms, the archaizing *Katharevousa* ('purist'), and a version based on the spoken vernacular, 'Demotic'. In 1976 Standard Modern Greek was adopted as the official language, with Demotic as its core.

ECONOMY

Agriculture accounted for 10.6% of GDP in 1998, industry 17.7% and services 71.7%.

Policy. Greek economic policy is focused on meeting the convergence criteria for joining the European Monetary Union. The aim is to join EMU by 2001 at the latest. In the late 1990s Greek growth rates were among the highest in the EU. Besides a restrictive incomes policy, the government has announced a number of structural reforms, including measures to enhance the flexibility of the labour market, improve the social security system, restructure public sector enterprises and speed up privatization.

Performance. Growth rates have averaged 3.5% of GDP over the past 5 years. Real GDP growth was 3.7% in 1998 and 3.7% in 1999, with a forecast of 4.1% for 2000. Total GDP in 1998 was US\$120.7bn.

Budget. Estimated revenue 1999 (in 1,000m. drachmas): 11,090; expenditure: 13,489.

VAT is 18% (reduced rate, 8%).

Currency. In June 2000 EU leaders approved a recommendation for Greece to join the European single currency, the euro, and on 1 Jan. 2001 the euro (EUR) became the legal currency; irrevocable conversion rate 340·750 drachmas to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002—until then the national currency will be used for payment in cash. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking; by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and drachmas until the drachma is withdrawn from circulation—which must be by 1 July 2002 and is scheduled for 28 Feb. 2002.

The *drachma* (GRD) is notionally divided into 100 *lepta*. In March 1998 the *drachma* was admitted to the Exchange Rate Mechanism, two years' membership of which was one of the conditions for joining the euro. The admission came along with a 14% devaluation. Inflation, which had been 7·5% in Dec. 1996, was down to 2·6% in 1999. Foreign exchange reserves were US\$14,189m. in Feb. 1998 and gold reserves 4·23m. troy oz in Jan. 2000. Total money supply in Oct. 1997 was 4,588bn. drachmas. The Current account (US\$1m.) stood at -5,000 in 1997 (provisional) and -4,539 in 1996. Central government debt as percentage of GDP was 109% (provisional) at Dec. 1997 and 111·8% at Dec. 1996.

Ranked by size of assets the largest banks were National Bank of Greece, Alpha Bank, Agricultural Bank, Commercial Bank of Greece, EFG Eurobank and Piraeus Bank.

There is a stock exchange in Athens.

Weights and Measures. The metric system was made obligatory in 1959; the use of other systems is prohibited. The Gregorian calendar was adopted in Feb. 1923.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1997 was 9m. kW. 72% of power is supplied by lignite-fired power stations. A national grid supplies the mainland, and islands near its coast. Power is produced in remoter islands by local generators. Total production in 1998 was 43·68bn. kWh, with consumption per capita in 1997 being 4,836 kWh. Electricity supply is: domestic, 220v, 50 cycles AC; industrial, 280v, AC 3 phase.

Oil and Gas. Output of crude petroleum, 1996, 3m. bbls.; proven reserves, 1996, 12m. bbls. The oil sector plays a critical role in the Greek economy, accounting for more than 70% of total energy demand. Supply is mostly imported but oil prospecting is intensifying. Natural gas was introduced in Greece in 1997 through the recently built pipeline from Russia, and an additional source of supply is liquefied natural gas from Algeria. Demand for natural gas is in its infancy. The public monopoly in natural gas, DEPA, has developed only a few sales contracts to some large industrial groups, outside a large contract with DEH.

Minerals. Greece produces a variety of ores and minerals, including (with production, 1995, in tonnes) asbestos (4,920,650), nickel ore (2,069,466), bauxite (1,823,000 in 1998), magnesite (532,500 in 1996), caustic magnesia (206,532), iron-pyrites (18,737), chromite (5,650 in 1993), marble (white and coloured) and various other earths. There is little coal, and the lignite is of indifferent quality (59·78m. tonnes, 1996). Salt production (1997) 150,000 tonnes.

Agriculture. In 1997 there were 2·82m. ha of arable land and 1,100 ha of permanent crops.

GREECE

The Greek economy was traditionally based on agriculture, with small-scale farming predominating, except in a few areas in the north. There were 819,000 farms in 1998. However, there has been a steady shift towards industry and although agriculture still employs nearly 20% of the population, it accounted for only 9% of GDP in 1997. Nevertheless, Greece has a higher percentage of its population working in agriculture than any other EU member country. Agriculture accounts for 33.1% of exports (the highest proportion of any EU member country) and 17.9% of imports.

Production (1998, in 1,000 tonnes):

Tomatoes	2,085	Potatoes	876

The main products are canned vegetables and fruit, fruit juice, beer, wine, alcoholic beverages, cigarettes, textiles, yarn, leather, shoes, synthetic timber, paper, plastics, rubber products, chemical acids, pigments, pharmaceutical products, cosmetics, soap, disinfectants, fertilizers, glassware, porcelain sanitary items, wire and power coils and household instruments.

Although manufacturing accounts for 21.35% of GDP, Greece's performance is hampered by the proliferation of small, traditional, low-tech firms, often run as family businesses. Food, drink and tobacco processing are the most important sectors, but there are also some steel mills and several shipyards. Shipping is of prime importance to the economy. In addition, there are major programmes under way in the fields of power, irrigation and land reclamation.

In the private sector trade unions agreed to an 8% increase in 1995, 7.6% in 1996 and 7.5% in 1997. Since 1989 a statutory minimum of wage-bills must be spent on training (0.45%). Retirement age is 65 years for men and 60 for women. Unemployment was 12.5% in Jan. 2001.

Greeks work an average of 44.4 hours a week, a figure exceeded in the European Union only in the United Kingdom.

Trade Unions. The status of trade unions is regulated by the Associations Act 1914. Trade union liberties are guaranteed under the Constitution, and a law of June 1982 altered the unions' right to strike.

The national body of trade unions is the Greek General Confederation of Labour.

INTERNATIONAL TRADE

Following the normalization of their relations, Greece lifted its trade embargo (imposed in Feb. 1994) on Macedonia on 13 Oct. 1995. There are quarrels with Turkey over Cyprus, oil rights under the Aegean and ownership of uninhabited islands close to the Turkish coast.

In 1999 Germany was the leading export market (17.7% of the total), followed by Italy (11.4%), USA (4.5%) and France (4.4%). Italy was the principal supplier of imports (15.8% of the total), ahead of Germany (14.9%), France (8.5%) and USA (4.8%). KEY HISTORICAL EVENTS

From 1524 Guatemala was part of a Spanish captaincy-general, comprising the whole of Central America. It became independent in 1821 and formed part of the Confederation of Central America from 1823 to 1839. The overthrow of the right-wing dictator Jorge Ubico in 1944 opened a decade of left-wing activity which alarmed the USA. In 1954 the leftist regime of Jacob Arbenz Guzmán was overthrown by a CIA-supported coup. A series of right-wing governments failed to

produce stability while the toll on human life and the violation of human rights was such as to cause thousands of refugees to flee to Mexico. Elections to a National Constituent Assembly were held on 1 July 1984, and a new constitution was promulgated in May 1985. Amidst violence and assassinations, the presidential election was won by Marco Vinicio Cerezo Arévalo. On 14 Jan. 1986 Cerezo's civilian government was installed—the first for 16 years and only the second since 1954. Violence continued, however, and there were frequent reports of torture and killings by right-wing 'death squads'. The presidential and legislative elections of Nov. 1995 saw the return of open politics for the first time in over 40 years. Meanwhile the Guatemalan Revolutionary Unit (URNG) declared a ceasefire. On 6 May and 19 Sept. 1996 the government agreed reforms to military, internal security, judicial and agrarian institutions. A ceasefire was concluded in Oslo on 4 Dec. 1996 and a final peace treaty was signed on 29 Dec. 1996.

In Nov. 1999 the country's first presidential elections took place since the end of the 36-year-long civil war in 1996.

Guatemala is bounded on the north and west by Mexico, south by the Pacific ocean and east by El Salvador, Honduras and Belize, and the area is 108,889 sq. km (42,042 sq. miles). The population was 11,277,600 in July 1996. Estimate (1997) 11,685,700; density, 107 per sq. km.

The UN gives a projected population for 2010 of 15.83m. In 1998 the percentage of the population considered rural was 60.3%. In 1996, 44% were Amerindian, of 21 different groups descended from the Maya; 56% Mestizo (mixed Amerindian and Spanish). 60% speak Spanish, with the remainder speaking one or a combination of the 23 Indian dialects.

KEY HISTORICAL EVENTS

In 1888 Guinea became a French protectorate, in 1893 a colony and in 1904, a constituent territory of French West Africa. Forced labour and other colonial depredations ensued, although a form of representation was introduced in 1946. The independent Republic of Guinea was proclaimed on 2 Oct. 1958, after the territory of French Guinea had decided to leave the French community. Guinea became a single-party state. In 1980 the armed forces staged a coup and dissolved the

National Assembly. Following popular disturbances a multi-party system was introduced in April 1992.

In 2000 fierce fighting broke out between Guinean government troops and rebels, believed to be a mix of Guinean dissidents and mercenaries from Liberia and Sierra Leone. More than 250,000 refugees were caught up in what the United Nations High Commissioner for Refugees described as the world's worst refugee crisis.

TERRITORY AND POPULATION

Guinea is bounded in the northwest by Guinea-Bissau and Senegal, northeast by Mali, southeast by Côte d'Ivoire, south by Liberia and Sierra Leone, and west by the Atlantic Ocean.

The UN gives a projected population for 2010 of 10·43m.

The capital is Conakry. In 1998, 31·3% of the population were urban.

KEY HISTORICAL EVENTS

Portugal was the major power in the area throughout the colonial period. In 1974, after the Portuguese revolution, Portugal abandoned the struggle to keep Guinea-Bissau and independence was formally recognized on 10 Sept. 1974. In 1975 Cape Verde also became independent but the two countries remained separate sovereign states. On 14 Nov. 1980 a coup d'état was in part inspired by resentment in Guinea-Bissau over the privileges enjoyed by Cape Verdians.

Guineans obtained a more prominent role under the new government. On 16 May 1984 a new constitution was approved based on Marxist principles but after 1986 there was a return to private enterprise in an attempt to solve critical economic problems and to lift the country out of poverty. A year-long civil war broke out in 1998 between army rebels and the country's long-time ruler. Neighbouring Senegal and Guinea sent troops in to aid the government.

KEY HISTORICAL EVENTS

First settled by the Dutch West Indian Company about 1620, the territory was captured by Britain to whom it was ceded in 1814 and named British Guiana. To work the sugar plantations African slaves were transported here in the 18th century and East Indian and Chinese indentured labourers in the 19th century. From 1950 the anti-colonial struggle was spearheaded by the People's Progressive Party (PPP) led by Cheddi Jagan and Forbes Burnham. By the time internal autonomy was granted in

1961 Burnham had split with Jagan to form the more moderate People's National Congress (PNC). Guyana became an independent member of the Commonwealth in 1966 with Burnham as the first prime minister, later president. By the 1980s, desperate economic straits had forced Guyana to seek outside help which came on condition of restoring free elections. Dr Jagan returned to power in 1992. Following his death in March 1997 his wife, Janet Jagan, was sworn in as President.

Venezuela demanded the return of the Essequibo region in 1963. It was finally agreed in March 1983 that the UN Secretary-General should mediate. There was also an unresolved claim (1984) by Suriname for the return of an area between the New River and the Corentyne River.

KEY HISTORICAL EVENTS

In the 16th century, Spain imported large numbers of African slaves whose descendants now populate the country. The colony subsequently fell under French, and in the Napoleonic wars, British rule. The newly-named Haiti declared its independence on 1 Jan. 1804. Ruled by a succession of self-appointed monarchs, Haiti became a republic in the mid-19th century. From 1915 to 1934 Haiti was under United States occupation.

A corrupt regime was dominated by François Duvalier from 1957 to 1964 when he was succeeded by his son, Jean-Claude Duvalier. He fled the country on 7 Feb. 1986. After a period of military rule, Father Jean-Bertrand Aristide was elected president in Dec. 1990.

On 30 Sept. 1991 President Aristide was deposed by a military junta and went into exile. Under international pressure, parliament again recognized Aristide as president in June 1993. However, despite a UN led naval blockade, the junta showed no sign of stepping down. 20,000 US troops moved into Haiti on 19 Sept. in an uncontested occupation. President Aristide returned to office on 15 Oct. 1994 and on 1 April 1995 a UN peacekeeping force (MANUH) took over from the US military mission. Aristide was succeeded by René Préval who was generally assumed to be a stand-in for his predecessor. Jean-Bertrand Aristide subsequently won the presidential elections held in Nov. 2000. Violence and poverty prevail. An estimated 7% of cocaine sold in the USA passes through Haiti.

TERRITORY AND POPULATION

Haiti is bounded in the east by the Dominican Republic, to the north by the Atlantic and elsewhere by the Caribbean Sea. The area is 27,750 sq. km (10,714 sq. miles). The Île de la Gonave, some 40 miles long, lies in the gulf of the same name. Among other islands is La Tortue, off the north peninsula. Population (1996 est.), 7·3m. Population density, 263 per sq. km. In 1998, 66·4% of the population were rural.

The UN gives a projected population for 2010 of 9·42m.

Areas, populations (1995 estimates) and chief towns of the 9 departments:

<i>Department</i>	<i>Area (in sq. km)</i>	<i>Population</i>	<i>Chief town</i>
Artibonite	4,895	1,013,800	Gonaïves
Centre	3,597	460,800	Hinche
Grande Anse	3,100	641,400	Jérémie
Nord	2,175	759,300	Cap Haïtien
Nord-Est	1,698	248,800	Fort-Liberté
Nord-Ouest	2,094	421,000	Port-de-Paix
Ouest	4,595	2,494,900	Port-au-Prince
Sud	2,602	653,400	Les Cayes
Sud-Est	2,077	457,000	Jacmel

The capital is Port-au-Prince (1999 population, 1,699,000); other towns are Cap Haïtien (100,638 in 1995); Gonaïves (63,291 in 1992), Les Cayes (45,904 in 1992) and Jérémie (43,277 in 1992). Most of the population is of African or mixed origin.

The official languages are French and Créole. Créole is spoken by all Haitians; French by only a small minority.

SOCIAL STATISTICS

1995 births, 247,000; deaths, 92,000. Birth rate (per 1,000 population), 1995, 34·7; death rate, 12·9. Annual population growth rate, 1990–99, 1·8%. Expectation of life at birth, 1998, 51·5 years for males and 56·4 years for females. Infant mortality, 1998, 91 per 1,000 live births; fertility rate, 1999, 4·3 births per woman.

In the Human Development Index, or HDI (measuring progress in countries in longevity, knowledge and standard of living), Haiti is the lowest-ranked country outside of Africa.

CLIMATE

The annual temperature range is small. Port-au-Prince, Jan. 77°F (25°C), July 84°F (28.9°C). Annual rainfall 53" (1,321 mm).

CONSTITUTION AND GOVERNMENT

The 1987 Constitution, ratified by a referendum, provides for a bicameral legislature (an 83-member *Chamber of Deputies* and a 27-member *Senate*), and an executive *President*, directly elected for a 5-year term. The President can stand for a second term but only after a 5 year interval.

National Anthem. 'La Dessalinienne'; words by J. Lhérisson, tune by N. Geffrard.

RECENT ELECTIONS

Presidential elections were held on 26 Nov. 2000. There were 7 candidates. Jean-Bertrand Aristide was elected with 91.8% of votes cast.

The term of the 46th Legislature was ended in Jan. 1999 without prior elections for a new legislature. This effectively left no Chamber of Deputies and only a rump Senate, seriously hindering the country's legal system and economy. Much delayed elections were held on 21 May and 30 July 2000. In the vote for the Chamber of Deputies, Fanmi Lavalas (Water Fall Family/FL) won 72 of the available 82 seats, Mouvement Chrétien National (Christian National Movement/Mochrena) 3, Parti Louvri Baryé (Open the Gate Party/PLB), 2, Espace (Space/E) 2, Eskanp-Korega (EK) 1, Organisation de Peuple en Lutte (Organization of Struggling People/OPL) 1 and 1 seat went to a non-partisan. In elections for the Senate, FL claimed 18 of the 27 available seats, PLD took 1 and 9 seats were to be contested on 26 Nov. 2000.

Army. The Army has effectively, though not formally, been disbanded. An Interim Public Security Force of 3,000 has been formed.

Navy. A small Coast Guard, based at Port-au-Prince, is being developed.

Air Force. The air force was disbanded in 1995.

INTERNATIONAL RELATIONS

Although foreign aid has been promised, political infighting and corruption have held up US\$340m. worth of aid. However, EU aid continues to arrive.

Haiti is a member of the UN, WTO, OAS, Inter-American Development Bank, ACS, IOM, International Organization for Francophonie and is an ACP member state of the ACP-EU relationship.

Agriculture. There were 560,000 ha of arable land in 1997 and 350,000 ha of permanent crops. 65% of the workforce, mainly smallholders, make a living by agriculture carried on in 7 large plains, from 0.2m. to 25,000 acres, and in 15 smaller plains down to 2,000 acres. Irrigation is used in some areas. The main crops are (1998 production, in 1,000 tonnes): sugarcane, 1,000; cassava, 320; plantains, 290; bananas, 288; mangoes, 225; maize, 206; yams, 193; sweet potatoes, 170; rice, 101; sorghum, 95. Environment. According to the *World Bank Atlas* carbon dioxide emissions in 1996 were the equivalent of 0.1 tonnes per capita.

Fisheries. The total catch in 1998 was estimated to be 5,219 tonnes, of which 91% was from marine waters.

INDUSTRY

Manufacturing is largely based on the assembly of imported components: toys, sports equipment, clothing, electronic and electrical equipment. Textiles, steel, soap, chemicals, paint and shoes are also produced. Many jobs were lost to other Central American and Caribbean countries during the 1991–94 trade embargo, after President Aristide was deposed.

Labour. In 1996 the labour force was 3,209,000 (57% males). The unemployment rate in July 1998 was around 60%.

INTERNATIONAL TRADE

Foreign debt was US\$1,068.4m. in Aug. 1998.

Imports and Exports. In 1997 exports totalled US\$123m. and imports US\$706m. The leading imports are petroleum products, foodstuffs, textiles, machinery, animal

and vegetable oils, chemicals, pharmaceuticals, raw materials for transformation industries and vehicles. The USA is by far the leading trading partner, accounting for over 60% of both exports and imports. France, Germany and Italy are also important for exports and Japan, France and Germany for imports.

COMMUNICATIONS

Roads. Total length of roads was estimated at 4,160 km in 1996, of which 1,010 km were surfaced. There were 32,000 passenger cars in 1996 (4.4 per 1,000 inhabitants), plus 21,000 trucks and vans.

Services were provided in 1998 by Aerolíneas Santo Domingo, Air Canada, Air France, ALM, American Airlines, COPA, Société Nouvelle Air Guadeloupe and United Airlines, with flights to Aruba, Cayenne, Curaçao, Fort de France, Miami, Montreal, New York, Panama City, Paris, Pointe-à-Pitre, St Maarten, St Martin, San Juan and Santo Domingo. In 1996 Port-au-Prince handled 345,000 passengers and 22,100 tonnes of freight.

The legal system is basically French. In 1995 a new police force—Police Nationale d'Haïti (PNH)—was recruited from former military personnel and others not implicated in human rights violations. The PNH currently has about 5,000 members; there are plans to increase the size of the force in the near future.

The population in penal institutions in Feb. 1996 was 2,300 (30 per 100,000 of national population).

Religion. Since the Concordat of 1860 Roman Catholicism has been given special recognition, under an archbishop with 9 bishops. The Episcopal Church has one bishop. 90% of the population are nominally Roman Catholic, while other Christian churches number perhaps 10%. Probably two-thirds of the population to some extent adhere to African-derived traditional beliefs ('Voodoo'). Construction on a national Voodoo temple began in 1995.

Education. The adult literacy rate in 1998 was 47.8% (50.1% among males and 45.6% among females). Haiti has the lowest literacy rate among males outside of Africa. Education is divided into 9 years 'education fondamentale', followed by 4 years to 'Baccalaureate' and university/higher education. The school system is based on the French system and instruction is in French and Créole. About 20% of education is provided by state schools; the remaining 80% by private schools, including Church and Mission schools.

KEY HISTORICAL EVENTS

Discovered by Columbus in 1502, Honduras was ruled by Spain until independence in 1821. Political instability was endemic throughout the 19th and most of the 20th century. The end of military rule seemed to come in 1981 when a general election gave victory to the more liberal and non-military party, PLH (Partido Liberal de Honduras). Considerable power, however, remained with the armed forces. Internal unrest continued into the 1990s with politicians and military leaders at loggerheads, particularly over attempts to investigate violations of human rights. In Oct. 1998 Honduras was devastated by Hurricane Mitch, the worst natural disaster to hit the area in modern times.

TERRITORY AND POPULATION

Honduras is bounded in the north by the Caribbean, east and southeast by Nicaragua, west by Guatemala, southwest by El Salvador and south by the Pacific Ocean. The area is 112,492 sq. km (43,433 sq. miles). The estimated population in 1997 was 5,751,400 (2,870,700 female), giving a density of 51 per sq. km. In 1998, 54·3% of the population were rural.

The UN gives a projected population for 2010 of 8·2m.

The chief cities (populations in 1,000, 1994) were Tegucigalpa, the capital (919, in 1999), San Pedro Sula (368·5), El Progreso (81·2), Choluteca (72·8), Danlí (43·3) and the Atlantic coast ports of La Ceiba (86·0), Puerto Cortés (33·5) and Tela (24·8); other towns include Comayagua (52·3), Siguatepeque (37·5), Juticalpa (25·6), Santa Rosa de Copán (23·4) and Olanchito (17·9).

Areas and 1991 populations estimates of the 18 departments and the Central District (Tegucigalpa):

KEY HISTORICAL EVENTS

The Hungarians call themselves 'Magyars'; 'Hungarian' derives from the Turkic name ('On ogur', i.e. ten arrows) of the tribal federation on the Don which Árpád and his horde left in order to settle the sparsely inhabited middle Danubian basin in 896. As nomadism gave way to agriculture a feudal society developed led by nobility descended from the original conquerors. In 1301 Árpád's line died out. Henceforth, with two exceptions, the throne was held by foreigners, sometimes holding other thrones

simultaneously. In the 15th century the expansionist Ottoman empire reached the southern borders of Hungary. This first incursion was repelled but in 1526 the Turks annexed southern and central Hungary. The western rump came under Hapsburg rule which was extended to most of Hungary with the expulsion of the Turks in 1699. After a national rising in 1703, Emperor Charles IV restored the constitution and the Hungarian assembly recognized the Emperor's claim to the Hungarian throne. Nationalist sentiments supported the radical democracy of Lajos Kossuth who set up a breakaway government. Ruthless repression followed but Austria's military defeats in Italy (1859) and against Prussia (1866) forced the emperor to moderate his absolutism. Under the Compromise (*Ausgleich*) of 1867 a Dual Monarchy was constituted; Hungary gained internal autonomy while foreign affairs and defence became joint Austro-Hungarian responsibilities.

Hungary entered the First World War on Austria's side but after the armistice of 3 Nov. 1918 a National Council proclaimed an independent republic. Political and social unrest, however, were compounded by a Romanian invasion. After Béla Kun's Soviet republic antagonized most of the population, a counter-revolutionary government appointed Admiral Horthy as regent.

Hungary's desire to revise the Versailles peace settlements brought her into alignment with Germany in the 1930s. In 1940 Hungary adhered to the Tripartite pact and in June 1941 sent a force to join the German invaders of the Soviet Union. But pro-German sentiment was never wholehearted. In Oct. 1944 Horthy was forced to abdicate in favour of a fascist 'Arrow Cross' government but by then Soviet forces were well inside the frontiers. At the elections of Nov. 1945 the Communists polled only 17% of the vote; their way to power was to lie in their leader Rákosi's 'salami tactics' of divide and purge, backed up by their acquisition of key ministries under Soviet pressure. A Soviet-type constitution was adopted in Aug. 1949 and Rákosi embarked on a programme of ruthless collectivization. Removed from the premiership by the post-Stalin Soviet leadership, he intrigued against his successor Imre Nagy's more liberal 'new course'. In 1956 the attempted suppression of a student demonstration sparked off a 13-day revolution. Nagy became prime minister and János Kádár party leader. Nagy declared Hungary's neutrality and withdrawal from the Warsaw pact. The Soviet army crushed the revolt on 4 Nov. and installed Kádár in power. Nagy was arrested and later executed; the gains of the uprising were harshly suppressed. Cautious economic reforms were introduced in the mid-60s when liberalization brought higher living standards. A gathering reformist tendency within the Hungarian Socialist Workers' (i.e. Communist) Party culminated in its self-dissolution in Oct. 1989 and reconstitution as the Hungarian Socialist Party. The People's Republic was abolished on 23 Oct. 1989. The following year a multi-party democracy, committed to political and economic reforms, was instituted.

TERRITORY AND POPULATION

Hungary is bounded in the north by Slovakia, northeast by Ukraine, east by Romania, south by Croatia and Yugoslavia, southwest by Slovenia and west by

Austria. The peace treaty of 10 Feb. 1947 restored the frontiers as of 1 Jan. 1938. The area of Hungary is 93,036 sq. km (35,921 sq. miles).

At the census of 1 Jan. 1990 the population was 10,374,823 (5,389,919 females); estimate, 1996, 10,214,000 (5,330,000 females).

The UN gives a projected population for 2010 of 9.3m.

Hungary's population has been falling at such a steady rate since 1980 that its 1996 population was the same as that in the late 1960s.

66.0% of the population was urban (18.7% of the urban population lived in Budapest in 1996) in 1998; population density, 1996, 109.8 per sq. km. Ethnic minorities, 1995: Gypsies, 4%; Germans, 2.6%; Serbs, 2%; Slovaks, 0.8%; Romanians, 0.7%. A law of 1993 permits ethnic minorities to set up self-governing councils. There is a worldwide Hungarian diaspora of nearly 2.5m. (1.5m. in the USA; 200,000 in Israel; 140,000 in Canada; 140,000 in Germany), and Hungarian minorities (3.2m. in 1992) in Romania (1.7m.), Slovakia (0.6m.), Yugoslavia (0.35m., mainly in Vojvodina) and Ukraine (0.16m.).

Hungary is divided into 19 counties (*megyék*) and the capital, Budapest, which has county status.

CONSTITUTION AND GOVERNMENT

On 18 Oct. 1989 the National Assembly approved by an 88% majority a constitution which abolished the People's Republic, and established Hungary as an independent, democratic, law-based state.

The head of state is the *President*, who is elected for 5-year terms by the National Assembly.

The single-chamber *National Assembly* has 386 members, made up of 176 individual constituency winners, 152 allotted by proportional representation from county party lists and 58 from a national list. It is elected for 4-year terms. A *Constitutional Court* was established in Jan. 1990 to review laws under consideration.

National Anthem. 'Isten áldd meg a magyart' ('God bless the Hungarians'); words by Ferenc Kölcsey, tune by Ferenc Erkel.

RECENT ELECTIONS

Ferenc Mádl was elected President by the National Assembly on 6 June 2000 by 243 votes to 96. In two previous rounds he had failed to achieve the required two-thirds majority.

In the Hungarian parliamentary election on 10 and 24 May 1998 the centre-right Fidesz-Hungarian Civic Party (Fidesz-MPP) won 148 seats (20 in 1994) obtaining 28.2% of the votes against 134 seats (209 in 1994) and 32.3% for the ruling Socialist Party. Viktor Orbán, the Fidesz leader, became prime minister as a result and formed a coalition government with the support of the right-wing Independent Smallholders' Party (FKgP) who had won 48 seats and the Hungarian Democratic Forum (MDF) with 17 seats. The victory for the centre-right ended 4 years of socialist-led government.

The President of the Republic is C.-in-C. of the armed forces.

Men between the ages of 18 and 23 are liable for 9 months' conscription, or 2 years of civilian service.

Defence expenditure in 1999 totalled US\$745m., compared to US\$3,380m. in 1985. Per capita spending in 1999 was US\$74, down from US\$330 in 1985. The 1999 expenditure represented 1.6% of GDP, compared to 7.2% in 1985.

Army. Hungary is divided into 4 army districts: Budapest, Debrecen, Kiskunfélegyháza and Pécs. The strength of the Army was (1999) 23,500 (including 17,800 conscripts). There is an additional force of 12,000 border guards and 2,000 paramilitary police.

Navy. The Danube Flotilla, the maritime wing of the Army, consisted of some 290 personnel in 1999. It is based at Budapest.

Air Force. The Air Force is under the control of the Army General Staff, with a strength (1999) of 11,500 (5,100 conscripts). There were 136 combat aircraft including MiG-21s, MiG-23s, MiG-29s, Su-22s and 86 attack helicopters.

INTERNATIONAL RELATIONS

Hungary is a member of the UN, WTO, NATO, OECD, Council of Europe, OSCE, CEFTA, CERN, CEI, Danube Commission, IOM, Antarctic Treaty, and is an Associate Member of the EU and an Associate Partner of the WEU. In April 1994 Hungary applied to join the EU and is expected to become a member by 2004. A European Commission report endorsed in Dec. 1999 named Hungary (along with Poland) as the country from central and eastern Europe most likely to be the first to join the EU. Hungary became a member of NATO on 12 March 1999.

Hungary has had a long-standing dispute with Slovakia over the Gabčíkovo-Nagymaros Project, involving the building of dam structures in both countries for the production of electric power, flood control and improvement of navigation on the Danube as agreed in a treaty signed in 1977 between Hungary and Czechoslovakia. In late 1998 Slovakia and Hungary signed a protocol easing tensions between the 2 nations and settling differences over the dam.

ECONOMY

Agriculture accounted for 6% of GDP in 1997, industry 34% and services 60%. In 1999 an estimated 80% of economic output was being produced by the private sector.

Policy. Privatization based on free market principles has been at the centre of economic policy since 1990. In 1995 the State Property Agency and the State Holding Company were merged in a new body charged with extending the private sector's share of former state assets to 80%. Legislation of June 1991 provides for compensating former owners or their descendants for property nationalized after May 1939. A Small Shareholder Programme of Privatization was launched in April 1994. Growing debt and balance of payments gap forced a Stabilization Programme.

The OECD reported in 1998 that 'the extensive macroeconomic package introduced in 1995 (which included the adoption of a crawling-peg exchange rate regime, an impressive programme of privatization and a substantial fiscal tightening), as well as the deepening of structural reforms implemented earlier, created the conditions for the remarkable progress of the Hungarian economy over the past 2 years.'

Performance. Real GDP growth was 4.5% in 1999, with a forecast of growth in 2000 of 5.3%. Total GDP was US\$47.8bn. in 1998.

Budget. Government revenue and expenditure (in 1bn. forints):

	1995	1996	1997	1998	1999 ¹
Revenue	137.0	138.3	192.6	243.5	134.2
Expenditure	145.6	146.5	185.1	233.1	89.5

¹Estimate.

VAT is 25.0%.

Currency. A decree of 26 July 1946 instituted a new monetary unit, the *forint* (HUF) of 100 *fillér*. The forint was made fully convertible in Jan. 1991. In 1996–97 the forint was devalued at a crawling peg exchange rate of 1.2% a month. Inflation was 28% in 1995, but by 1999 had fallen below 10%. For 2000 a rate of 8.5% was forecast. In Feb. 1998 foreign exchange reserves were US\$8,601m. and in Jan. 2000 gold reserves 100,000 troy oz. Total money supply in Sept. 1996 was 1,092bn. forints.

Banking and Finance. In 1987 a two-tier system was established. The National Bank (*Director*, Zsigmond Jármai) remained the central state financial institution, responsible for the circulation of money and foreign currency exchange, but also became a central clearing bank, with general (but not operational) control over commercial banks and development banks. There are over 40 commercial banks and 20 insurance companies based in Budapest. The largest bank is OTP Bank Rt. (the National Savings and Commercial Bank of Hungary), with assets in 2000 of US\$5.8bn. A law of June 1991 sets capital and reserve requirements, and provides

for foreign investment in Hungarian banks. Permission is needed for investments of more than 10%. Privatization of the banking system is well under way.

The Hungarian International Trade Bank opened in London in 1973. In 1980 the Central European International Bank was set up in Budapest with 7 western banks holding 66% of the shares.

A stock exchange was opened in Budapest in Jan. 1989.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1997 was 8m. kW, about a quarter of which is nuclear. There is an 880 mW nuclear power station at Paks with 4 reactors. It produced an estimated 38% of total output in 1999. In 1998, 35.1bn. kWh of electricity were produced (approximately 40% by nuclear power); in 1995, 4,400m. kWh were imported. Consumption per capita in 1997 was 3,697 kWh.

Oil and Gas. Oil and natural gas are found in the Szeged basin and Zala county. Oil production in 1996 was 11m. bbls.; gas production in 1999 was 3.0bn. cu. metres with proven reserves of 80bn. cu. metres.

Minerals. Production in 1997 (in 1,000 tonnes): lignite, 14,684; hard coal, 924; bauxite (1998), 908.

Agriculture. Agricultural land was collectivized in 1950. It was announced in 1990 that land would be restored to its pre-collectivization owners if they wished to cultivate it. A law of April 1994 restricts the area of land that may be bought by individuals to 300 ha, and prohibits the sale of arable land and land in conservation zones to companies and foreign nationals. Today, although 90% of all cultivated land is in private hands, most farms are little more than smallholdings. Under the 1999 budget, funding for agriculture increased by 40%, with subsidies favouring small family farms. In 1998 agricultural exports totalled US\$3bn. (an increase of 10% on 1997), including grain exports of more than 4m. tonnes. 20,000 tonnes of sour cherry and 17,000 tonnes of plums were exported in 1998.

In 1996 the agricultural area was (in 1,000 ha) 6,179, of which 4,716 were arable, 1,148 meadows and pastures, 90 market gardens, and 225 orchards and vineyards.

Agricultural production has dropped drastically since 1989. Production figures (1998, in 1,000 tonnes): maize, 6,500 (6,747 in 1989); wheat, 4,974 (6,509 in 1989); sugarbeets, 3,200 (5,277 in 1989); barley, 1,336; potatoes, 1,012; sunflower seeds, 706; grapes, 669; apples, 500.

Livestock has also drastically decreased since 1989 from 7.7m. pigs to 5m. by the mid-1990s, from 1.6m. cattle to 1m., and from 2.1m. sheep to 1.5m. Thus the pig stock has declined to the 1938 level, the cattle stock to the 1945 level and the sheep stock to a level of the early 1930s.

The north shore of Lake Balaton and the Tokaj area are important wine-producing districts. Wine production in 1998 was 418,000 tonnes.

Forestry. The forest area in 1995 was 1,719,000 ha, or 18.6% of the land area (up from 1,675,000 ha and 18.1% in 1990). Timber production in 1998 was 4.17m. cu. metres.

Environment. According to the *World Bank Atlas* Hungary's carbon dioxide emissions in 1996 were the equivalent of 5.8 tonnes per capita.

Fisheries. There are fisheries in the rivers Danube and Tisza and Lake Balaton. In 1993 there were 27,100 ha of commercial fishponds. In 1998 total catch was 7,265 tonnes, exclusively freshwater fish.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in Hungary in April 2000 were Matav (market capitalization of US\$7,393.2m.), Mol Magyar (market capitalization of US\$1,849.2m.) and OTP Bank (market capitalization of US\$1,305.5m.).

In 1995 there were 18,921 limited liability companies, 1,475 co-operative societies and 81,433 individual businesses.

Important items include food and beverages, chemicals and chemical products, motor vehicles, refined petroleum products, base metals and computers. Output

growth in 1996 saw highly variable trends among the individual sectors of the manufacturing industry. The most dynamic sector continues to be the engineering industry. Its performance was driven by the 35.6% increase in exports. The manufacturing of non-ferrous mineral products went up by 1.2% (exports rose by 11.1%). With the exception of the engineering industry and manufacturing of non-ferrous mineral products the output of each sector of manufacturing industry declined: the textile and clothing industry by 4.2% and chemical industry by 0.6%. Within this, the domestic sales of the textile and clothing industry dropped by 8.5% and that of the chemical industry by 6.7%, while the exports of both sectors rose (by 3.7% and 35.6%, respectively).

Labour. In 1999 out of an economically active population of 4,096,000 there were 3,812,000 employed persons, of which 3,201,000 were employees. Among the employed persons, 58.9% worked in services, 34.0% in industry and construction, and 7.1% in agriculture. Average gross monthly wages in 1999: 77,187 forints. Minimum monthly wage, 2000, 25,500 forints. In 1999 there were 285,000 unemployed persons (40% females), giving an unemployment rate of 7.0%, down from 10% in 1996. Nearly half those people out of work had been unemployed for a year or over. Retirement age: men, 60; women, 55. Hungary is one of the few industrialized countries in which women put in longer hours than men. In 1996, 83% of women but only 80% of men put in more than 40 hours a week.

Trade Unions. The former official Communist organization (National Council of Trade Unions), renamed the Confederation of Hungarian Trade Unions (MSZOSZ), groups 70 organizations and claimed 1m. members in 1993. A law of 1991 abolished its obligatory levy on pay packets; its assets derived from this period are to be distributed to other unions. Other unions are grouped in 6 federations (with 1993 membership): the Association of Autonomous Trade Unions (ASZOK, 0.3m.); Coalition of Christian Trade Unions (KESZOSZ, 0.15m.); Co-operation Forum of Trade Unions (SZEFE, 0.5m.); Council of Intellectual Trade Unions (ÉSZT, 0.1m.); League of Independent Trade Unions (Liga, 0.25m.); Works Councils (60,000).

INTERNATIONAL TRADE

Hungary is a member of CEFTA, along with the Czech Republic, Poland, Slovakia and Slovenia. Foreign debt was US\$22,900m. in 1998. At the end of 1995, foreign investments totalled US\$11,500m. An import surcharge imposed in March 1995 was abolished in July 1997.

Imports and Exports. In 1999 the value of exports was US\$21.8bn. and that of imports US\$24.0bn. The trade deficit, including customs-free zones, totalled US\$2.6bn. in 1996. 75% of exports go to European Union member countries, the highest share of any of the central and eastern European countries hoping to join the EU. The share of CIS countries is only around 2%. In 1999, 38.4% of exports went to Germany and 29.2% of imports came from Germany. Italy was the second biggest supplier of imports in 1997 (8.9% of the total) and Austria the second biggest market for exports (9.6%). In 1999, 1.4% of exports went to Russia, down from 13.1% in 1992. An import surcharge which was imposed in March 1995 was abolished in July 1997.

The number of Internet users in March 2000 was 650,000.

Postal Services. In 1999 there were 2,543 post offices.

SOCIAL INSTITUTIONS

Justice. The administration of justice is the responsibility of the Procurator-General, elected by Parliament for 6 years. There are 111 local courts, 20 labour law courts, 20 county courts, 6 district courts and a Supreme Court. Criminal proceedings are dealt with by the regional courts through 3-member councils and by the county courts and the Supreme Court in 5-member councils. A new Civil Code was adopted in 1978 and a new Criminal Code in 1979.

Regional courts act as courts of first instance; county courts as either courts of first instance or of appeal. The Supreme Court acts normally as an appeal court, but may act as a court of first instance in cases submitted to it by the Public Prosecutor. All courts, when acting as courts of first instance, consist of 1 professional judge and 2 lay assessors, and, as courts of appeal, of 3 professional judges. Local government Executive Committees may try petty offences.

Regional and county judges and assessors are elected by the appropriate local councils; members of the Supreme Court by Parliament.

The Office of Ombudsman was instituted in 1993. He or she is elected by parliament for a 6-year term, renewable once.

There are also military courts of the first instance. Military cases of the second instance go before the Supreme Court.

The death penalty was abolished in Oct. 1990.

The population in penal institutions in Dec. 1997 was 13,405 (135 per 100,000 of national population). 88,436 sentences were imposed on adults in 1999, including 29,474 of imprisonment. There were 11,450 juvenile offenders and 2,250 juveniles were in prison in 1999.

Religion. Church-state affairs are regulated by a law of Feb. 1990 which guarantees freedom of conscience and religion and separates church and state by prohibiting state interference in church affairs. Religious matters are the concern of the Department for Church Relations, under the auspices of the Prime Minister's Office. State aid to all churches was 2,800m. forints in 1993.

In 1995, 67.5% of the population aged 14 and over were Roman Catholic, 20% Calvinist and 5% Lutheran.

KEY HISTORICAL EVENTS

The first settlers came to Iceland in 874. Between 930 and 1262 Iceland was an independent republic, but by the 'Old Treaty' of 1262 the country recognized the King of Norway. In 1380 Iceland, together with Norway, came under the Danish kings, but when Norway was separated from Denmark in 1814, Iceland remained with Denmark. The invention of motorized fishing boats in the late nineteenth century revolutionized the fishing industry and gave impetus to the campaign for self determination.

After 1 Dec. 1918 Iceland was acknowledged as a sovereign state. It was united with Denmark only through the common sovereign until it was proclaimed an independent republic on 17 June 1944 following a referendum favouring severance from the Danish crown.

COMMUNICATIONS

Roads. On 31 Dec. 1999 the length of the public roads (including roads in towns) was 12,682 km. Of these 8,203 km were main and secondary roads and 4,479 km were provincial roads. Total length of surfaced roads was 3,562 km. A ring road of 1,400 km runs just inland from much of the coast; about 80% of it is smooth-surfaced. Motor vehicles registered at the end of 1999 numbered 170,837, of which 153,030 were passenger cars and 17,807 trucks; there were also 1,508 motorcycles. There were 21 fatal road accidents in 1999 with 21 persons killed.

Civil Aviation. Icelandair is the national carrier. In 1998 it served 12 destinations in western Europe and 6 in north America as well as operating domestic services. In 1999 it carried 1.3m. passengers. The main international airport is at Keflavík (Leifstöd), with Reykjavík for flights to the Faroe Islands, Greenland and domestic services. Services were also provided in 1998 by Atlantic Airways (Faroe Islands), Islandsflug, Greenlandair and SAS. Keflavík handled 1,315,209 passengers in 1999 (of which 357,888 transport travellers) and 30,983 tonnes of freight.

Shipping. Total registered vessels, 1,014 (230,354 gross tonnage) on 31 Dec. 1999; of these, 841 were sea-going fishing vessels.

Telecommunications. In 1999 the number of telephone main lines was 160,900 (577 per 1,000 persons); mobile phone subscribers, 172,600. A survey conducted by EMC World Cellular Database in Sept. 2000 found that Iceland had overtaken Finland as the country with the largest number of mobile phones per capita (75.8 per 100 persons). The government is set to sell off at least 20% of Iceland Telecom during 2001 in what would be the country's largest privatization to date. In 1995 there were 80,000 fax machines and in 1999 there were 100,000 PCs (359 per 1,000 persons). There were 144,000 Internet users in July 2000, or around 51% of the total population.

Postal Services. At the end of 1999 the number of post offices was 86.

SOCIAL INSTITUTIONS

Justice. In 1992 jurisdiction in civil and criminal cases was transferred from the provincial magistrates to 8 new district courts, separating the judiciary from the prosecution. From the district courts there is an appeal to the Supreme Court in Reykjavík, which has 8 judges.

The population in penal institutions in 1995 was 113 (40 per 100,000 of national population).

Religion. The national church, the Evangelical Lutheran, is endowed by the state. There is complete religious liberty. The affairs of the national church are under the superintendence of a bishop. At 1 Dec. 1999, 247,245 (88.7%) of the population were members of it (93.2% in 1980). 10,622 persons (3.8%) belonged to Lutheran free churches. 9,820 persons (3.5%) belonged to other religious organizations and 5,979 persons (2.2%) did not belong to any religious community.

Education. Primary education is compulsory and free from 6–15 years of age. Optional secondary education from 16 to 19 is also free. In 1999–2000 there were about 43,030 pupils in primary schools, 20,388 in secondary schools (17,961 on day courses) and 10,064 tertiary-level students (9,280 on day courses). Some 16% of tertiary-level students study abroad.

There are 8 universities and specialized colleges at the tertiary level in Iceland. The largest is the University of Iceland in Reykjavík (founded 1911). There is also a university in Akureyri (founded 1987). Total enrolment of these 2 institutions was 6,100 students in 1997–98. In Reykjavík there are a teachers' university, a technical college, business colleges and an agricultural university.

In 1999 public sector spending on education was 5.8% of GNP.

The adult literacy rate in 1998 was at least 99%.

Health. On 31 Dec. 1994 there were 57 hospitals with 3,924 beds. In 1997 there were 884 doctors, 284 dentists, 2,075 nurses and 225 pharmacists. In 1997 there were 3.6 doctors per 1,000 inhabitants. Iceland has one of the lowest alcohol consumption rates in Europe, at 4.53 litres of alcohol per adult a year (1999), compared to a European Union average of 11.1 litres.

Iceland has one of the lowest rates of Aids in the EU with 11.2 cases per 100,000 population.

Welfare. The main body of social welfare legislation is consolidated in 6 acts:

(i) *The social security legislation* (a) health insurance, including sickness benefits; (b) social security pensions, mainly consisting of old age pension, disablement pension and widows' pension, and also children's pension; (c) employment injuries insurance.

(ii) *The unemployment insurance legislation*, where daily allowances are paid to those who have met certain conditions.

(iii) *The subsistence legislation*. This is controlled by municipal government, and social assistance is granted under special circumstances, when payments from other sources are not sufficient.

(iv) *The tax legislation*. Prior to 1988 children's support was included in the tax legislation, according to which a certain amount for each child in a family was subtracted from income taxes or paid out to the family. Since 1988 family allowances are paid directly to all children age 0–15 years. The amount is increased with the second child in the family, and children under the age of 7 get additional benefits. Single parents receive additional allowances. The amounts are linked to income.

(v) *The rehabilitation legislation*.

(vi) *Child and juvenile guidance*.

Health insurance covers the entire population. Citizenship is not demanded and there is a 6 month waiting period. Most hospitals are both municipally and state run, a few solely state run and all offer free medical help. Medical treatment out of hospitals is partly paid by the patient; the same applies to medicines, except medicines of lifelong necessary use, which are paid in full by the health insurance. Dental care is partly paid by the state for children under 17 years old and also for old age and disabled pensioners. Sickness benefits are paid to those who lose income because of periodical illness. The daily amount is fixed and paid from the 11th day of illness.

The pension system is composed of the public social security system and some 90 private pension funds. The social security system pays basic old age and disablement pensions of a fixed amount regardless of past or present income, as well as supplementary pensions to individuals with low present income. The pensions are index-linked, i.e. are changed in line with changes in wage and salary rates in the labour market. The private pension funds pay pensions that depend on past payments of premiums that are a fixed proportion of earnings. The payment of pension fund premiums is compulsory for all wage and salary earners. The pensions paid by the funds differ considerably between the individual funds, but are generally index-linked. In the public social security system, entitlement to old age and disablement pensions at the full rates is subject to the condition that the beneficiary has been resident in Iceland for 40 years at the age period of 16–67. For shorter period of residence, the benefits are reduced proportionally. Entitled to old age pension are all those who are 67 years old, and have been residents in Iceland for 3 years of the age period of 16–67. Entitled to disablement pension are those who have lost 75% of their working capacity and have been residents in Iceland for 3 years before application or have had full working capacity at the time when they became residents. Old age and disablement pension are of equally high amount; in the year 1999 the total sum was 198,645 kr. for an individual. Married pensioners are paid 90% of two individuals' pensions. In addition to the basic amount, supplementary allowances are paid according to social circumstances and income possibilities. Widows' pensions are the same amount as old age and disablement pension, provided the applicant is over 60 when she becomes widowed. Women in the age range 50–60 get a reduced pension. Women under 50 are not entitled to widows' pensions.

The employment injuries insurance covers medical care, daily allowances, disablement pension and survivors' pension and is applicable to practically all employees.

Social assistance is primarily municipal and granted in cases outside the social security legislation. Domestic assistance to old people and disabled is granted within this legislation, besides other services.

Child and juvenile guidance is performed by chosen committees according to special laws, such as home guidance and family assistance. In cases of parents' disablement the committees take over the guidance of the children involved.

KEY HISTORICAL EVENTS

The Moghul emperors held power over most of north India and the Deccan (the central plateau of the Indian peninsula) when, in 1712, the emperor Bahadur died and his sons weakened the dynasty by disputing the succession. The power of the states within the empire then revived. South of Hyderabad were the independent Hindu states of Mysore and Travancore, a number of small principalities and the territory around Madras where the British East India Company was the most powerful force. The Company had maintained a factory at Madras since 1639 and had since established other bases at Bombay (1668) and at Calcutta in Bengal.

In 1740 the Moghul governor (*nawab*) of Bengal rebelled successfully. In 1756, alarmed at the degree to which the Company (anticipating trouble with the French) was arming itself, he attacked and subdued the British base at Calcutta. In 1757 a large British force under Clive retaliated by defeating the Nawab at Plassey. The East India Company thus became the rising power in India at the very time when Moghul power was in decline. After a century of territorial expansion, the mass of the Hindu population felt threatened by European attitudes, laws and religion. In 1857–58 there was a general rebellion, beginning with a revolt of Indian troops in the Company's army. The immediate result was the India Act 1858, which transferred the Company's authority and territory to the Crown. The territory (excluding areas now forming Pakistan and Bangladesh) consisted of the Madras and Bombay presidencies; Bengal (which included Assam until 1874 when it became a separate province); the United Provinces and Oudh; the Central Provinces; the Punjab; Ajmere-Merwara; Coorg; and the Andaman Islands. The central government consisted of a viceroy and his executive, and an administrative council in England. This area under direct British rule (*British Raj*) co-existed with the independent states ruled by Indian princes; the viceroy claimed the right to interfere in the latter in emergency, and often did so.

In 1885 the Indian National Congress was founded by A. O. Hume and others, to work for more representative government. In 1892 the first Indian Councils Act added nominated Indian members to the central and provincial legislative councils. In 1905–11 the experimental partition of Bengal into Hindu and Muslim provinces aroused violent opposition among Hindu Bengalis. This brought to the fore the question of national identity as opposed to religious identity. In 1906 the All-India Muslim League was founded to protect Muslim interests. From 1909 there were further constitutional reforms but the Congress thought them insufficient and began, especially after 1917, to work for independence. The India Acts (1919 and 1935) defined and then revised the forms of parliamentary government. After 1930 Mohandas Gandhi led a campaign of civil disobedience for the end of British rule. In 1940, foreseeing a Hindu-dominated independent India, the Muslim League began to press for a separate Muslim state. In June 1947 the scheme for partition was announced, after negotiations in which Gandhi had taken part. In Aug. India became independent within the Commonwealth, as a federal union of the former British provinces and the native states. Of the latter, Hyderabad had to be incorporated by force and was later dismembered. Partition took place

(see Pakistan), with mass movement of Hindus, Muslims and Sikhs, much violence and many deaths. In 1950 India became a republic, within the Commonwealth. In 1951 the Congress leader Pandit Nehru became prime minister, establishing a Congress domination which has lasted for all but brief periods. In 1966 his daughter Indira Gandhi became prime minister. She governed by Emergency Rule from 1975 but was defeated in the 1977 election, and re-elected again in 1979. Her son, Rajiv, succeeded her after her assassination by Sikh extremists on 31 Oct. 1984.

In 1956 the States Reorganization Act created a new structure of States and Territories with boundaries based on ethnic and language divisions. There was an unresolved border war with China in 1962; but the status of Kashmir, disputed with Pakistan, has been the principal difficulty. The war of 1965, mediated at Tashkent by the USSR in 1966, left it divided between the two states. War again broke out when in Dec. 1971 India invaded East Pakistan and helped secure the independence of Bangladesh. The Union was augmented by the annexation of Goa (a surviving Portuguese colony) in 1961 and of Sikkim in 1975. In 1991 Rajiv Gandhi was assassinated by Tamil extremists after the government had imposed direct rule in Tamil Nadu. Throughout the early 1990s Hindu/Muslim violence was widespread.

India carried out 5 nuclear tests in May 1998. On 11 May 3 devices were exploded followed by 2 more on 13 May, as a result of which US President Bill Clinton imposed wide-ranging economic sanctions, subsequently lifted when India and Pakistan reached an accommodation on nuclear development.

Negotiations with Pakistan over the future of the disputed territory of Kashmir began in July 1999. The peace process has a long way to go, but the fact that talks are taking place is seen as an encouraging sign that a settlement will be reached eventually. Kashmiri leaders have stated that the war would only end when a settlement is reached involving Pakistan, India and Kashmiris. There have been 35,000 deaths since the outbreak of the Kashmir insurgency in 1988.

TERRITORY AND POPULATION

India is bounded in the northwest by Pakistan, north by China, Tibet, Nepal and Bhutan, east by Myanmar, and southeast, south and southwest by the Indian Ocean. The far eastern states and territories are almost separated from the rest by Bangladesh. The area (excluding the Pakistan and China-occupied parts of Jammu and Kashmir) is 3,165,596 sq. km. A Sino-Indian agreement of 7 Sept. 1993 settled frontier disputes dating from the war of 1962. Population (excluding occupied Jammu and Kashmir), 1991 census: 846,302,688 (407,072,230 females; 217m. urban). The latest census took place from 9–28 Feb. 2001. 27.7% of the population was urban in 1998 (in Maharashtra, 35%, 1991; in Arunachal Pradesh, 6.6%, 1991). By 1997 this had risen to 27.4%. 1996 estimate: 944m.; density, 299 per sq. km. The population is believed to have reached 1bn. in Aug. 1999 according to UN calculations.

The UN gives a projected population for 2010 of 1,152.3m.

By 2050 India is expected to have a population of 1.53bn. and is projected to have overtaken China as the world's most populous country.

¹Urban Agglomeration.

New Delhi: Delhi was named after Raj Dhilu of the Mauryan dynasty who reigned in the 1st century BC. It is India's third biggest city. It covers an area of 1,483 sq. km. and is located in the northern part of the country. Much of the part of the capital known as Old Delhi was built by the Mughals between 1526 and 1712. The capital was moved from Calcutta to Delhi in 1931. Sir Edwin Lutyens built much of the new city, characterized by its colonial arches, columns and wide tree lined avenues, in the 1920s.

Bombay: Officially renamed Mumbai in 1996, Bombay is India's biggest city and the third largest in the world. Located on the west coast of India, it comprises seven islands joined together by landfills. It became part of the British empire in 1661 and thrived on the cotton industry, quickly becoming one of the world's leading exporters. Now the centre of the country's film industry (Bollywood), Bombay generates around 35% of the country's GNP.

Calcutta: Officially known as Kolkata since 1996, Calcutta was founded in 1690 by the East India Company on the eastern bank of the Houghly river. Between 1772 and 1912 it was the capital of India. In 1947 it became the capital of West Bengal but this was not enough to stem the city's decline and it took government intervention in the 1980s to turn the economy around. Today the city is the second largest in India and the world's largest producer of jute.

SOCIAL STATISTICS

Many births and deaths go unregistered. The Registrar General's data suggests a birth rate for 1995-96 of 28.3 per 1,000 population and a death rate of 9.0, which would indicate in a year approximately 26,500,000 births (equivalent to the population of California in the mid 1980s) and 8,500,000 deaths. The growth rate is, however, slowing, and by the turn of the century had dropped below 1.6%, having been over 2% in 1991. Expectation of life at birth, 1998, 62.5 years for males and 63.3 years for females.

Marriages and divorces are not registered. The minimum age for a civil marriage is 18 for women and 21 for men; for a sacramental marriage, 14 for females and 18 for males. Annual population growth rate, 1990-99, 1.8%. Infant mortality, 1998, 69 per 1,000 live births; fertility rate, 1999, 3.0 births per woman. Child deaths (under the age of 5) were halved between 1980 and 1996, from 172 per 1,000 in 1980 to only 85 per 1,000 in 1996.

CLIMATE

India has a variety of climatic sub-divisions. In general, there are four seasons. The cool one lasts from Dec. to March, the hot season is in April and May, the rainy season is June to Sept., followed by a further dry season until Nov. Rainfall, however, varies considerably, from 4" (100 mm) in the N.W. desert to over 400" (10,000 mm) in parts of Assam.

Range of temperature and rainfall: New Delhi, Jan. 57°F (13.9°C), July 88°F (31.1°C). Annual rainfall 26" (640 mm). Bombay, Jan. 75°F (23.9°C), July 81°F (27.2°C). Annual rainfall 72" (1,809 mm). CONSTITUTION AND GOVERNMENT

The Constitution was passed by the Constituent Assembly on 26 Nov. 1949 and came into force on 26 Jan. 1950. It has since been amended 85 times.

India is a republic and comprises a Union of 28 States and 7 Union Territories. Each State is administered by a Governor appointed by the President for a term of 5 years while each Union Territory is administered by the President through a Lieut.-Governor or an administrator appointed by him. The head of the Union (head of state) is the *President* in whom all executive power is vested, to be exercised on the advice of ministers responsible to Parliament. The President, who must be an Indian citizen at least 35 years old and eligible for election to the House of the People, is elected by an electoral college of all the elected members of Parliament and of the state legislative assemblies, holds office for 5 years and is eligible for re-election. There is also a *Vice-President* who is *ex officio* chairman of the Council of States.

There is a *Council of Ministers* to aid and advise the President; this comprises Ministers who are members of the Cabinet and Ministers of State and deputy ministers who are not. A Minister who for any period of 6 consecutive months is not a member of either House of Parliament ceases to be a Minister at the expiration of that period. The *Prime Minister* is appointed by the President; other Ministers are appointed by the President on the Prime Minister's advice. The salary of each Minister is Rs 27,000 per annum.

Parliament consists of the President, the *Council of States (Rajya Sabha)* and the *House of the People (Lok Sabha)*. The Council of States, or the Upper House, consists of not more than 250 members; in March 2001 there were 230 elected members and 12 members nominated by the President. The election to this house is indirect; the representatives of each State are elected by the elected members of the Legislative Assembly of that State. The Council of States is a permanent body not liable to dissolution, but one-third of the members retire every second year. The House of the People, or the Lower House, consists of 545 members, 543 directly elected on the basis of adult suffrage from territorial constituencies in the States, and the Union territories; in March 2001 there were 543 elected members (499 males) and 2 vacancies. The House of the People unless sooner dissolved continues for a period of 5 years from the date appointed for its first meeting; in emergency, Parliament can extend the term by 1 year.

State Legislatures. For every State there is a legislature which consists of the Governor, and (a) 2 Houses, a Legislative Assembly and a Legislative Council, in the States of Bihar, Jammu and Kashmir, Karnataka, Madhya Pradesh (where it is provided for but not in operation), Maharashtra and Uttar Pradesh, and (b) 1 House, a Legislative Assembly, in the other States. Every Legislative Assembly, unless sooner dissolved, continues for 5 years from the date appointed for its first meeting. In emergency the term can be extended by 1 year. Every State Legislative Council is a permanent body and is not subject to dissolution, but one-third of the members retire every second year. Parliament can, however, abolish an existing Legislative Council or create a new one, if the proposal is supported by a resolution of the Legislative Assembly concerned.

Legislation. The various subjects of legislation are enumerated in three lists in the seventh schedule to the constitution. List I, the Union List, consists of 97 subjects (including defence, foreign affairs, communications, currency and coinage, banking and customs) with respect to which the Union Parliament has exclusive power to make laws. The State legislature has exclusive power to make laws with respect to the 66 subjects in list II, the State List; these include police and public order, agriculture and irrigation, education, public health and local government. The powers to make laws with respect to the 47 subjects (including economic and social planning, legal questions and labour and price control) in list III, the Concurrent List, are held by both Union and State governments, though the former prevails. But Parliament may legislate with respect to any subject in the State List in circumstances when the subject assumes national importance or during emergencies.

Other provisions deal with the administrative relations between the Union and the States, interstate trade and commerce, distribution of revenues between the States and the Union, official language, etc.

Fundamental Rights. Two chapters of the constitution deal with fundamental rights and 'Directive Principles of State Policy'. 'Untouchability' is abolished, and its

practice in any form is punishable. The fundamental rights can be enforced through the ordinary courts of law and through the Supreme Court of the Union. The directive principles cannot be enforced through the courts of law; they are nevertheless fundamental in the governance of the country.

Citizenship. Under the Constitution, every person who was on the 26 Jan. 1950 domiciled in India and (a) was born in India or (b) either of whose parents was born in India or (c) who has been ordinarily resident in the territory of India for not less than 5 years immediately preceding that date became a citizen of India. Special provision is made for migrants from Pakistan and for Indians resident abroad. Under the Citizenship Act, 1955, which supplemented the provisions of the Constitution, Indian citizenship is acquired by birth, by descent, by registration and by naturalization. The Act also provides for loss of citizenship by renunciation, termination and deprivation. The right to vote is granted to every person who is a citizen of India and who is not less than 18 years of age on a fixed date and is not otherwise disqualified.

Parliament. Parliament and the state legislatures are organized according to the following schedule (figures show distribution of seats in March 2001 for the Lok Sabha and the Rajya Sabha, and Dec. 1996 for the State Legislatures):

Language. The Constitution provides that the official language of the Union shall be Hindi in the Devanagari script. Hindi is spoken by over 30% of the population. It was originally provided that English should continue to be used for all official purposes until 1965. But the Official Languages Act 1963 provides that, after the expiry of this period of 15 years from the coming into force of the Constitution, English might continue to be used, in addition to Hindi, for all official purposes of the Union for which it was being used immediately before that day, and for the transaction of business in Parliament. According to the Official Languages (Use for official purposes of the Union) Rules 1976, an employee may record in Hindi or in English without being required to furnish a translation thereof in the other language and no employee possessing a working knowledge of Hindi may ask for an English translation of any document in Hindi except in the case of legal or technical documents.

The 58th amendment to the Constitution (26 Nov. 1987) authorized the preparation of a Constitution text in Hindi.

The following 18 languages are included in the Eighth Schedule to the Constitution (with 1994 estimate of speakers where over 5m.): Assamese (14.8m.), Bengali (68.3m.), Gujarati (44m.), Hindi (350.3m.), Kannada (35.7m.), Kashmiri, Konkani, Malayalam (34.4m.), Manipuri, Marathi (65.8m.), Nepali, Oriya (30.3m.), Punjabi (24.7m.), Sanskrit, Sindhi, Tamil (59.3m.), Telugu (71.9m.), Urdu (46.8m.).

DEFENCE

The Supreme Command of the Armed Forces is vested in the President. As well as armed forces of 1,173,000 personnel in 1999, there was an active paramilitary force of 1,090,000, including 185,000 members of the Border Security Force based mainly in the troubled Jammu and Kashmir region. Military service is voluntary but, under the amended constitution, it is regarded as a fundamental duty of every citizen to perform National Service when called upon. Defence Expenditure in 1999 was US\$14,991m. (US\$15 per capita and 3.4% of GDP), the highest in South Asia. Defence accounted for 13% of spending in 1998–99.

Nuclear Weapons. India's first nuclear test was in 1974. Its most recent tests were a series of 5 carried out in May 1998. According to the Stockholm International Peace Research Institute, the nuclear arsenal was estimated to have between 25 and 40 warheads in Jan. 2000. India is one of only 3 countries (the others being Pakistan and North Korea) not to have signed the Comprehensive Test Ban Treaty (intended to bring about a ban on any nuclear explosions) although recently the government has appeared to be reconsidering its position.

Army. The Army is organized into 5 commands each divided into areas, which in turn are subdivided into sub-areas.

The strength of the Army was (1999) 980,000. An Aviation Corps operates locally-built helicopters. Army reserves number 300,000 with a further 500,000 personnel available as a second-line reserve force. There is a volunteer Territorial Army of 33,400.

There are numerous paramilitary groups including the Ministry of Defence *Rashtriya Rifles* (numbering 40,000), the Indo-Tibetan Border Police (32,200), the State Armed Police (400,000), the Civil Defence (394,000), the Central Industrial Security Force (88,600) and the Ministry of Home Affairs Assam Rifles (52,500).

Navy. The Navy has 3 commands; Eastern, Western and Southern, the latter a training and support command. The fleet is divided into 2 elements, Eastern and Western; and well-trained, all-volunteer personnel operate a mix of Soviet and western vessels.

The principal ship is the light aircraft carrier, *Viraat*, formerly HMS *Hermes*, of 29,000 tonnes, completed in 1959 and transferred to the Indian Navy in 1987 after seeing service in the Falklands War.

The fleet includes 12 Soviet-built diesel submarines and 4 new German-designed boats. There are also 7 destroyers and 13 frigates. The Naval Air force, 5,000 strong, operates 79 combat aircraft (including 20 Sea Harriers) and 83 armed helicopters.

Main bases are at Bombay (HQ Western Fleet, and main dockyard), Goa, Visakhapatnam (HQ Eastern Fleet) and Calcutta on the sub-continent, Port Blair in the Andaman Islands and Lakhshadweep on the Laccadive Islands. HQ Southern Command is at Kochi.

Naval personnel in 1999 numbered 53,000 including 5,000 Naval Air Arm and 1,200 marines.

Air Force. Units of the IAF are organized into 5 operational commands—Western at Delhi, Central at Allahabad, Eastern at Shillong, Southern at Thiruvananthapuram and South-Western at Jodhpur.

Equipment includes 774 combat aircraft, in over 40 squadrons of aircraft, and 34 armed helicopters. Major combat types include Su-30s, MiG-21s, MiG-23s, MiG-27s, MiG-29s, *Jaguars* and Mirage 2000s. Air Force reserves numbered 140,000 in 1999.

INTERNATIONAL RELATIONS

India is a member of the UN, WTO, the Commonwealth, Asian Development Bank, Colombo Plan, SAARC and the Antarctic Treaty.

ECONOMY

Agriculture accounted for 29.3% of GDP in 1998, industry 24.8% and services 45.9%.

In the late 1990s there were ever-increasing signs of a divide between the south and west on the one hand, where a modern economy is booming in cities such as Bangalore, Hyderabad and Madras, and the poorer and politically volatile areas in the north and east on the other.

Policy. The highest economic decision-making body is the *National Development Council*, of which all state chief ministers are members. There is also a Planning Commission.

As a first step towards partial privatization of the 248 state-owned corporations, selected public sector enterprises are being allowed to raise funds through equity issues.

Requirements for government approval of investment decisions were reduced in 1990.

Performance. India has one of the fastest-growing economies in Asia. Real GDP growth for 1997–98 was 6.0%, indicating that India managed to avoid the worst of the Asian crisis. In 1998–99 a growth rate of 6.4% was recorded, followed by estimated growth of 5.8% in 1999–2000. Total GDP in 1998 was US\$430.0bn.

Budget. Revenue and expenditure (on revenue account) of the central government for years ending 31 March, in Rs 1m.:

	1995–96	1996–97 ¹	1997–98 ²
Revenue	1,685,713	1,983,536	2,310,756
Expenditure	1,983,023	2,265,590	2,613,409

¹Revised. ²Budget estimates.

Important items of revenue and expenditure on the revenue account of the central government for 1997–98 (estimates), in Rs 1m.:

	Revenue		Expenditure
Net tax revenue	1,379,568	General Services	1,167,096
Non-tax revenue	831,188	Defence	276,170
		Major subsidies	182,510

Total capital account receipts (1997–98 budget), Rs 2,774,893m.; capital account disbursements, Rs 2,777,284m. Total (revenue and capital) receipts, Rs 5,085,649m.; disbursements, Rs 5,390,693m.

Under the Constitution (Part XII and 7th Schedule), the power to raise funds has been divided between the central government and the states. Generally, the sources of revenue are mutually exclusive. Certain taxes are levied by the Union for the sake of uniformity and distributed to the states. The Finance Commission (Art. 280 of the Constitution) advises the President on the distribution of the taxes which are distributable between the centre and the states, and on the principles on which grants should be made out of Union revenues to the states. The main sources of central revenue are: customs duties; those excise duties levied by the central government; corporation, income and wealth taxes; estate and succession duties on non-agricultural assets and property, and revenues from the railways and posts and telegraphs. The main heads of revenue in the states are: taxes and duties levied by the state governments (including land revenues and agricultural income tax); civil administration and civil works; state undertakings; taxes shared with the centre; and grants received from the centre.

Currency. A decimal system of coinage was introduced in 1957. The Indian *rupee* (INR) is divided into 100 *paise*. The paper currency consists of Reserve Bank notes and Government of India currency notes.

Foreign exchange reserves in Feb. 1998 were US\$24,044m. and gold reserves in Jan. 2000 were 11.50m. troy oz. Inflation was 8.9% in 1998.

The official exchange rate was abolished on 1 March 1993; the rupee now has a single market exchange rate and is convertible. The pound sterling is the currency of intervention. Total money supply in Jan. 1998 was Rs 2,389bn.

Banking and Finance. The Reserve Bank, the central bank for India, was established in 1934 and started functioning on 1 April 1935 as a shareholder's bank; it became a nationalized institution on 1 Jan. 1949. It has the sole right of issuing currency notes. Its *Governor* is Dr Bimal Jalan. The Bank acts as adviser to the government on financial problems and is the banker for central and state governments, commercial banks and some other financial institutions. It manages the rupee public debt of central and state governments and is the custodian of the country's exchange reserve. The Bank has extensive powers of regulation of the banking system, directly under the Banking Regulation Act, 1949, and indirectly by the use of variations in Bank rate, variation in reserve ratios, selective credit controls and open market operations.

The commercial banking system consisted of 300 scheduled banks (*i.e.*, banks which are included in the 2nd schedule to the Reserve Bank Act) and 4 non-scheduled banks in Jan. 1993; scheduled banks included 196 Regional Rural Banks. Total deposits in commercial banks, March 1997, stood at Rs 5,035,960m. The business of non-scheduled banks forms less than 0.1% of commercial bank business. Of the 300 scheduled banks, 35 were foreign banks which specialize in financing foreign trade but also compete for domestic business. The State Bank of India acts as the agent of the Reserve Bank for transacting government business as well as undertaking commercial functions. The 27 public sector banks (which comprise the State Bank of India and its 7 associate banks and 19 nationalized banks) account for about 80.7% of deposits and about 78% of bank credit of all scheduled commercial banks.

There are stock exchanges in Ahmedabad, Bombay, Calcutta, Delhi, Madras and 18 other centres.

Weights and Measures. Uniform standards of weights and measures, based on the metric system, were established for the first time by the Standards of Weights and Measures Act, 1956.

A second Standards of Weights and Measures Act, 1976, recognizes the International System of Units and is in line with the recommendations of the International Organisation of Legal Metrology. This Act also protects consumers through proper indication of weight, quantity, identity, source, date and price on packaged goods.

While the Standards of Weights and Measures are laid down in the Central Act, enforcement of weights and measures laws is entrusted to the state governments; the central Directorate of Weights and Measures is responsible for co-ordinating activities so as to ensure national uniformity.

Calendar. The dates of the Saka era (named after the north Indian dynasty of the first century AD) are used alongside Gregorian dates in issues of the *Gazette* of India, news broadcasts by All-India Radio and government-issued calendars, from 22 March 1957, a date which corresponds with the first day of the year 1879 in the Saka era.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1997 was 100m. kW. In Nov. 1996, 502,721 villages out of 579,132 had electricity. Production of electricity in 1998–99 (estimated) was 448.6bn. kWh, of which approximately 79% came from thermal stations, 2% from nuclear stations and 19% from hydro-electric stations. In 2000 there were 12 nuclear reactors in use and 4 under construction. Electricity consumption per capita in 1997 was 482 kWh.

Oil and Gas. The Oil and Natural Gas Corporation Ltd and Oil India Ltd are the only producers of crude oil. Production 1996–97, 33.43m. tonnes, about 60% of consumption. The main fields are in Assam and Gujarat and offshore in the Gulf of Cambay (the Bombay High field). There were proven reserves of 4.8bn. bbls. in 1999. Natural gas production, 1999, 24.9bn. cu. metres with 650bn. cu. metres of proven reserves.

Water. 89-44m. ha (1995-96) irrigation potential had been created of which 79-89m. ha was utilized. Irrigation projects have formed an important part of all the Five-Year Plans. The possibilities of diverting rivers into canals being nearly exhausted, the emphasis is now on damming the monsoon surplus flow and diverting that. Ultimate potential of irrigation is assessed at 107m. ha, total cultivated land being 185m. ha.

A Ganges water-sharing accord was signed with Bangladesh in 1997, ending a 25-year dispute which had hindered and dominated relations between the two countries.

Minerals. The coal industry was nationalized in 1973. Production, 1997, 298m. tonnes; recoverable reserves were estimated at 77bn. tonnes (1997). Production of other minerals, 1996-97 (in 1,000 tonnes): iron ore, 66,672; lignite, 22,281 (1996); salt, 9,500 (1998); bauxite, 5,928; chromite, 1,664 (1995-96); copper ore, 3,900; manganese ore, 1,836; gold, 2,712 kg. Other important minerals are lead, zinc, limestone, apatite and phosphorite, dolomite, magnesite, uranium and silver. Value of mineral production, 1996-97, Rs 330,204.3m. of which mineral fuels produced Rs 275,053m., metallic minerals Rs 24,295m. and non-metallic Rs 11,392.4m.

Agriculture. About 70% of the people are dependent on the land for their living. The farming year runs from July to June through three crop seasons: kharif (monsoon); rabi (winter) and summer. In 1997, 161,950,000 ha were used for arable land and 7,900,000 ha for permanent crops. There were 1,450,000 tractors and 3,900 harvester-threshers in 1997.

Agricultural production, 1998 (in 1,000 tonnes): sugarcane, 265,000; rice, 122,244; wheat, 66,000; potatoes, 25,065; mangoes, 12,000; millet, 10,500; bananas, 10,200; coconuts, 10,000; maize, 10,000; sorghum, 9,000; groundnuts, 8,300; seed cotton, 7,720; soybeans, 6,100; aubergines, 6,000; cassava, 5,868; chick-peas, 5,754; tomatoes, 5,300; cauliflowers, 5,000; cottonseed, 5,000; rapeseed, 4,935; onions, 4,429; cabbages, 4,200; dry beans, 3,600; pumpkins and squash, 3,300. Jute is grown in West Bengal (70% of total yield), Bihar and Assam; total yield, 1,740,000 tonnes. The coffee industry is growing: the main cash varieties are Arabica and Robusta (main growing areas Karnataka, Kerala and Tamil Nadu). India is the world's leading producer of a number of agricultural crops, including mangoes, millet, bananas and chick-peas.

The tea industry is important, with production concentrated in Assam, West Bengal, Tamil Nadu and Kerala. India is the world's largest tea producer. The 1998 crop was a record high of 870,000 tonnes. Total crop in 1997, 810,600 tonnes; exports in 1997, 203,000 tonnes, valued at US\$432m.

Livestock (1996): cattle, 196m.; sheep, 45m.; pigs, 11.9m.; horses, 990,000; asses, 1.6m.; goats, 119.95m.; buffaloes, 90.1m.; chickens, 335m. There are more cattle and buffaloes in India than in any other country.

Fertilizer consumption in 1996-97 was 14.31m. tonnes.

Land Tenure. There are three main traditional systems of land tenure: *Ryotwari* tenure, where the individual holders, usually peasant proprietors, are responsible for the payment of land revenues; *zamindari* tenure, where one or more persons own large estates and are responsible for payment (in this system there may be a number of intermediary holders); and *mahalgari* tenure, where village communities jointly hold an estate and are jointly and severally responsible for payment.

Agrarian reform, initiated in the first Five-Year Plan, being undertaken by the state governments includes: (1) The abolition of intermediaries under *zamindari* tenure. (2) Tenancy legislation designed to scale down rents to $1/4-1/5$ of the value of the produce, to give permanent rights to tenants (subject to the landlord's right to resume a minimum holding for his personal cultivation), and to enable tenants to acquire ownership of their holdings (subject to the landlord's right of resumption for personal cultivation) on payment of compensation over a number of years. (3) Fixing of ceilings on existing holdings and on future acquisition; the holding of a family is between 4.05 and 7.28 ha if it has assured irrigation to produce two crops a year; 10.93 ha for land with irrigation facilities for only one crop a year; and 21.85 ha for all other categories of land. Tea, coffee, cocoa and cardamom plantations have been exempted. (4) The consolidation of holdings in community project areas and the prevention of fragmentation of holdings by reform of inheritance laws. (5) Promotion of farming by co-operative village management.

The average size of holding for the whole of India is 2.63 ha. Andhra Pradesh, 2.87; Assam, 1.46; Bihar, 1.53; Gujarat, 4.49; Jammu and Kashmir, 1.43; Karnataka, 4.11; Kerala, 0.75; Madhya Pradesh, 3.99; Maharashtra, 4.65; Orissa, 1.98; Punjab, 3.85; Rajasthan, 5.5; Tamil Nadu, 1.49; Uttar Pradesh, 1.78; West Bengal, 1.56.

Of the total 71m. rural households possessing operational holdings, 34% hold on the average less than 0.2 ha of land each.

Opium. By international agreement the poppy is cultivated under licence, and all raw opium is sold to the central government. Opium, other than for wholly medical use, is available only to registered addicts.

Forestry. The lands under the control of the state forest departments are classified as 'reserved forests' (forests intended to be permanently maintained for the supply of timber, etc., or for the protection of water supply, etc.), 'protected forests' and 'unclassified' forest land. In 1995 the total forest area was 650,050 sq. km (21.9% of the land area), up from 649,690 sq. km in 1990. India is one of only two developing countries to have increased its area under forests between 1990 and 1995, the other being Cape Verde. Main types are teak and sal. About 16% of the area is inaccessible, of which about 45% is potentially productive. In 1998, 299.49m. cu. metres of roundwood were produced, making India the second largest producer after the USA. India is the world's leading producer of fuelwood and charcoal. Most states have encouraged planting small areas around villages.

Environment. India's carbon dioxide emissions in 1996 accounted for 4.2% of the world total and according to the *World Bank Atlas* were equivalent to 1.1 tonnes per capita.

Fisheries. Total catch (1998) was 3,214,765 tonnes, of which Kerala, Tamil Nadu, and Maharashtra produced about half. Of the total catch, 2,564,602 tonnes were marine fish. There were 46,918 mechanized boats in 1994-95. There were also 31,726 motorized traditional crafts and 159,481 traditional crafts in 1994-95. There were 11,440 fishermen's co-operatives with 1,250,379 members in 1995-96; total sales, Rs 1,495m. (1994-95).

In a number of industries new units are set up only by the state. Industries reserved for the public sector are arms and ammunition and allied items of defence equipment, military aircraft and warships, nuclear energy, coal and lignite, mineral oils and minerals specified in nuclear energy and railway transport. In a further group of industries (road transport, manufacture of chemicals such as drugs, dyestuffs, plastics and fertilizers) the state established new undertakings, but private enterprise may develop either on its own or with state backing.

The information technology industry has become increasingly important, leading Prime Minister Atal Vajpayee to state in 1999 that 'I believe that IT is India's tomorrow'. In 1994-95 the software industry had been valued at just Rs 63.450m., but by 1998-99 it was worth Rs 247.815m., with a forecast for 1999-2000 of a further rapid expansion, making it worth Rs 361,000m. Technology industries have become increasingly important in recent years, with software exports having grown more than 50% annually each year during the 1990s. In 1998–99 software exports were worth Rs 109,400m. (US\$2,650m.), with 61% going to the USA and Canada, and 23% to Europe. Exports grew by 67.5% in 1998–99 compared to 1997–98.

In 1995–96 the main export markets (percentage of total trade) were: USA, 17.4%; Japan, 6.97%; UK, 6.3%; Germany, 6.22%. Main import suppliers: USA, 10.53%; Germany, 8.66%; Japan, 6.73%; Saudi Arabia, 5.5%; Belgium, 4.64%.

COMMUNICATIONS

Roads. In 1996 there were 3.32m. km of roads, of which 1.46m. km were surfaced. Roads are divided into 6 main administrative classes, namely: national highways, state highways, other public works department (PWD) roads, *Panchayati Raj* roads, urban roads and project roads. The national highways (34,508 km in 1996) connect capitals of states, major ports and foreign highways. The national highway system is linked with the UN Economic and Social Commission for Asia and the Pacific international highway system. The state highways are the main trunk roads of the states, while the other PWD roads and *Panchayati Raj* roads connect subsidiary areas of production and markets with distribution centres, and form the main link between headquarters and neighbouring districts.

There were (1996) 4,189,000 private cars, taxis and jeeps, 23,111,000 motorcycles and scooters, 449,000 buses and 1,785,000 goods vehicles.

Rail. The Indian railway system is government-owned (under the control of the Railway Board) and is divided into 9 zones; route-km 1995–96:

<i>Zone</i>	<i>Headquarters</i>	<i>Route-km</i>
Central	Bombay	7,047 km (2,892 km electrified)

A further 6 zones were proposed for creation in 1997.

The Konkan Railway (760 km of 1,676 mm gauge) linking Bombay and Mangalore opened in 1996. It is operated as a separate entity.

Principal gauges are 1,676 mm (40,620 km) and 1 metre (18,501 km), with networks also of 762 mm and 610 mm gauge (3,794 km).

Passengers carried in 1996-97 were 4,134m.; freight, 409.2m. tonnes. Revenue (1995-96) from passengers, Rs 61,244.9m.; from goods, Rs 152,904m.

Indian Railways pay to the central government a dividend on capital-at-charge at a rate fixed by the Convention Committee of Parliament. Railway finance in Rs 1m.:

Civil Aviation. The main international airports are at Bombay, Calcutta, Delhi (Indira Gandhi), Madras and Thiruvananthapuram, with some international flights from Ahmedabad, Amritsar, Bangalore, Calicut, Goa and Hyderabad. Air transport was nationalized in 1953 with the formation of 2 Air Corporations: Air India for long-distance international air services, and Indian Airlines for air services within India and to adjacent countries. A third airline, Vayudoot, formed in 1981 as an internal feeder, has been merged into Indian Airlines. SOCIAL INSTITUTIONS

Justice. All courts form a single hierarchy, with the Supreme Court at the head, which constitutes the highest court of appeal. Immediately below it are the High Courts and subordinate courts in each state. Every court in this chain administers the whole law of the country, whether made by Parliament or by the state legislatures.

The states of Andhra Pradesh, Assam (in common with Nagaland, Meghalaya, Manipur, Mizoram, Tripura and Arunachal Pradesh), Bihar, Gujarat, Himachal Pradesh, Jammu and Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra (in common with Goa and the Union Territories of Daman and Diu and Dadra and Nagar Haveli), Orissa, Punjab (in common with the state of Haryana and the Union Territory of Chandigarh), Rajasthan, Tamil Nadu (in common with the Union Territory of Pondicherry), Uttar Pradesh, West Bengal and Sikkim each have a High Court. There is a separate High Court for Delhi. For the Andaman and Nicobar Islands the Calcutta High Court, for Pondicherry the High Court of Madras and for Lakshadweep the High Court of Kerala are the highest judicial authorities. The Allahabad High Court has a Bench at Lucknow, the Bombay High Court has Benches at Nagpur, Aurangabad and Panaji, the Gauhati High Court has Benches at Kohima, Aizwal, Imphal and Agartala, the Madhya Pradesh High Court has Benches at Gwalior and Indore, the Patna High Court has a Bench at Ranchi and the Rajasthan High Court has a Bench at Jaipur. Judges and Division Courts of the Guwahati High Court also sit in Meghalaya. Similarly, judges and Division Courts of the Calcutta High Court also sit in the Andaman and Nicobar Islands. High Courts have also been established in the new states of Chhattisgarh, Jharkhand and Uttaranchal. Below the High Court each state is divided into a number of districts under the jurisdiction of district judges who preside over civil courts and courts of sessions. There are a number of judicial authorities subordinate to the district civil courts. On the criminal side magistrates of various classes act under the overall supervision of the High Court.

The Code of Criminal Procedure came into force with effect from 1 April 1974. It provides for complete separation of the Judiciary from the Executive throughout India.

In Oct. 1991 the Supreme Court upheld capital punishment by hanging.

The population in penal institutions in 1997 was 231,325 (25 per 100,000 of national population).

School Education. The school system has 4 stages: primary, middle, secondary and senior secondary.

Primary education is imparted either at independent primary (or junior basic) schools or primary classes attached to middle or secondary schools. The period of instruction varies from 4 to 5 years and the medium of instruction is in most cases the mother tongue of the child or the regional language. Free primary education is available for all children.

Legislation for compulsory education has been passed by some state governments and Union Territories but it is not practicable to enforce compulsion when the reasons for non-attendance are socio-economic. There are residential schools for country children.

The period for the middle stage varies from 2 to 3 years.

CHHATTISGARH

KEY HISTORICAL EVENTS

The state was carved from sixteen mainly tribal districts of Madhya Pradesh and became the twenty-sixth state of India on 1 Nov. 2000. Chhattisgarh has been under the administrative control of many different rulers during its history, which can be traced back to the 4th century. Originally known as South Kosala, archaeological excavations made in recent times indicate that the region was a hive of artistic and cultural experimentation in ancient times. During the Sarabhapuriyas, Nalas, Pandavamsis and Kalchuris dynasties between the 6th and 8th centuries vast numbers of brick temples were built in the area. The British took control of the area from the Mahrattas in the early 19th century. Despite possessing its own cultural identity Chhattisgarh was constantly swallowed up by other regions and in 1956, as a direct result of the Indian Union of 1949, it was made part of the new region of Madhya Pradesh. For several years locals in Chhattisgarh voiced the grievance that their region was effectively a 'colony' of Madhya Pradesh, maintaining that the revenue generated by their region, which was termed the 'rice bowl of Madhya Pradesh' and was also rich in minerals, was insufficiently re-invested in the area itself. In 2000 the National Democratic Alliance successfully negotiated the passage of a bill through both houses of the Indian parliament which carved out 3 new Indian states, Chhattisgarh among them.

TERRITORY AND POPULATION

Chhattisgarh is in central eastern India and is bounded by the new state of Jharkhand to the east, Orissa to the southeast, Andhra Pradesh to the south and Maharashtra and Madhya Pradesh to the west. Chhattisgarh has an area of 135,100 sq. km. Population (1991 census) 17,615,000. Density, 130 per sq. km. The principal languages are Hindi and Chhattisgarhi.

Cities with over 250,000 population, see INDIA: Territory and population. Other large cities (1991): Bilaspur, 192,396; Durg, 150,645; Rajnandgaon, 125,371; Korba, 124,501.

CONSTITUTION AND GOVERNMENT

Chhattisgarh is the twenty-sixth state of India. In creating Chhattisgarh it was decided that the 90 Members of the Madhya Pradesh Legislative Assembly from Chhattisgarhi districts would become the members of the new state's legislative assembly. For administrative purposes the region is divided into 16 districts. The council of ministers consists of 15 cabinet ministers and 8 ministers of state.

The capital and seat of government is at Raipur.

JHARKHAND

KEY HISTORICAL EVENTS

The state was carved from Bihar and became the twenty-eighth state of India on 15 Nov. 2000. Located in the plateau regions of eastern India, Jharkhand (literally meaning land of forests) is mentioned in ancient Indian texts as an area inaccessible to the rest of India owing to its unforgiving terrain and the warring nature of the tribes living in its forests. The Mughals attacked the region in 1385 and again in 1616, arresting the King of Jharkhand and imprisoning him while they collected money from local chieftains. During the 17th century Jharkhand was a part of the Mughal empire and spread over areas of present-day Madhya Pradesh and Bihar. The East India Company was granted revenue-collecting power of the area in 1765 and the permanent settlement of 1796 increased the company's grip on the area. In 1858 sovereignty was transferred to the English crown. From 1793 until 1915 there were periodic tribal rebellions throughout Jharkhand against the British. In 1912 Jharkhand was constituted as part of the province of Bihar and Orissa after the former was separated from West Bengal. The Jharkhand Party submitted a request for Jharkhand to become a separate state to the State Reorganisation Committee in 1955. In 2000 a separate Jharkhand state was finally formed after legislation initiated by the National Democratic Alliance passed through parliament. The new state comprised a large area of southern Bihar but not any parts of West Bengal or Orissa as had been originally proposed.

TERRITORY AND POPULATION

Jharkhand is in central eastern India and is bounded by Bihar to the north, West Bengal to the east, Orissa to the south and the new state of Chhattisgarh to the west. Jharkhand has an area of 74,677 sq. km. Population (1991 census) 27.5m. Density: 368 per sq. km. Cities with over 250,000 population, see INDIA: Territory and population. Other large cities (1991): Dhanbad, 151,789.

CONSTITUTION AND GOVERNMENT

Jharkhand is the twenty-eighth state of India. After the region was carved from Bihar it was decided that the 81 Members of the Legislative Assembly (MLAs) from Jharkhandi districts would become the members of the new state's legislative assembly. For administrative purposes the region is divided into 18 districts. The council of ministers consists of 16 cabinet ministers and 10 ministers of state.

The capital and seat of government is at Ranchi.

MADHYA PRADESH

KEY HISTORICAL EVENTS

The state was formed in 1956 to bring together the Hindi-speaking districts of the area including the 17 Hindi districts of the old Madhya Pradesh, most of the former state of Madhya Bharat, the former states of Bhopal and Vindhya Pradesh and a former Rajput enclave, Sironj. This was an area which the Mahrattas took from the Moghuls between 1712 and 1760. The British overcame Mahratta power in 1818 and established their own Central Provinces. Nagpur became the Province's capital and was also the capital of Madhya Pradesh until in 1956 boundary changes transferred it to Maharashtra. The present capital, Bhopal, was the centre of a Muslim princely state from 1723. An ally of the British against the Mahrattas, Bhopal (with neighbouring small states) became a British-protected agency in 1818. After independence Bhopal acceded to the Indian Union in 1949. The states of Madhya Bharat and Vindhya Pradesh were then formed as neighbours, and in 1956 were combined with Bhopal and Sironj and renamed Madhya Pradesh. In 2000 sixteen mainly tribal districts were carved from Madhya Pradesh to form the new state of Chhattisgarh.

TERRITORY AND POPULATION

The state is in central India and is bounded north by Uttar Pradesh, east by the new state of Chhattisgarh, south by Maharashtra, and west by Gujarat and Rajasthan. Owing to the creation of Chhattisgarh, Madhya Pradesh is no longer the largest Indian state in size. Its revised area is 308,346 sq. km (previously 443,446 sq. km), making it the second largest state in the country. Population (using 1991 census figures), 48,566,170 (previously 66,181,170). Density, 157 per sq. km (previously 149 per sq. km).

CONSTITUTION AND GOVERNMENT

Madhya Pradesh is one of the 9 states for which the Constitution provides a bicameral legislature, but the Vidhan Parishad or Upper House (to consist of 90 members) has yet to be formed. The Vidhan Sabha or Lower House has 320 elected members.

For administrative purposes the state has been split into several revenue divisions with a Commissioner at the head of each; the headquarters of these are located at Bhopal, Gwalior, Hoshangabad, Indore, Jabalpur, Jagdalpur, Morena, Rewa, Sagar and Ujjain. There are 45 districts, following the creation of 16 new districts in administrative reforms of 1999 and the creation of Chhattisgarh in 2000.

UTTARANCHAL

KEY HISTORICAL EVENTS

The state was carved from Uttar Pradesh and became the twenty-seventh state of India on 9 Nov. 2000. It is located in the hilly and mountainous region of the northern border of the Indian subcontinent. The regions of Kumaon and Garhwal contained in the new state were referred to as Uttarakhand in ancient Hindu scriptures. The Chinese suppression of revolt in Tibet in 1959 saw a rapid influx of Tibetan exiles to the region and the Indo-Chinese conflict of 1962 persuaded the Indian government to initiate a modernization programme throughout the Indian Himalayas that resulted in the development of roads and communication networks in the previously backward region. From the 1970s the hill people began to agitate for their districts to be separated from Uttar Pradesh, which had been established in 1950. On 1 Aug. 2000 the Uttar Pradesh Reorganisation bill was passed, allowing for a separate state, called Uttaranchal, to incorporate 12 hill districts and, controversially, the lowland area of Udham Singh Nagar.

TERRITORY AND POPULATION

Uttaranchal is located in northern India and is bounded in the northeast by China and in the east by Nepal. The state of Uttar Pradesh is to the southwest, Haryana to the west and Himachal Pradesh to the northwest. Uttaranchal has an area of 63,157 sq. km. Population (1991 census) 18m. Density, 285 per sq. km. The principal languages are the Hindi dialects of Garhwali and Kumaoni. Cities with over 250,000 population, see INDIA: Territory and population. Other large cities (1991): Hardwar (147,305).

CONSTITUTION AND GOVERNMENT

Uttaranchal is the twenty-seventh state of India. After the region was carved from Uttar Pradesh it was decided that the 22 Members of the Legislative Assembly (MLAs) from Uttaranchali districts would become the members of the new state's Legislative Assembly. For administrative purposes the region is divided into 13

districts. The council of ministers consists of 7 cabinet ministers and 5 ministers of state.

The interim capital and seat of government is at Dehra Dun.

RECENT ELECTIONS

On the formation of the new state the Bharatiya Janata Party was the single largest party with 17 seats, enabling them to form a majority administration in the 23-seat assembly with Nityanand Swamy becoming the state's first chief minister.

CURRENT ADMINISTRATION

Governor: Surjit Singh Barnala.

Chief Minister: Nityanand Swamy.

ENERGY AND NATURAL RESOURCES

Electricity. The state has a potential hydroelectric capacity of 40,000 MW. Government figures claim that more than 75% of the state's 17,000 villages have electricity.

Water. Uttarakhand suffers from an acute shortage of water for drinking and irrigation. Only 10% of the water potential is currently utilized.

Minerals. There are deposits of limestone, gypsum, iron ore, graphite and copper.

Agriculture. Agriculture is the occupation for approximately 50% of the population. Subsistence farming is the norm, as only 9% of the land in the state is cultivable.

Forestry. Approximately 65%–70% of the state's area is covered in forest.

INDUSTRY

Tourism is by far the most important industry. The state can offer ski resorts, adventure tourism, mountaineering, hiking and several areas of religious interest. Other industries include: horticulture, floriculture, fruit-processing and medicine production. In the Terai region there are around 350 industrial units and 130 in the Doon Valley.

COMMUNICATIONS

Roads. There are 23 km of roads for every 100 sq. km of land in the state. State highways link Uttarakhand to the neighbouring states of Himachal Pradesh, Haryana and Uttar Pradesh. The state remains very inaccessible in parts.

Rail. 4 main railway lines in the south of the state link several districts to Uttar Pradesh and Himachal Pradesh. Railways along the foothills connect Dehra Dun, Haridwar, Rishikesh, Roorkee, Kotdwar, Ram Nagar, Kathgodam and Tanakpur. The rest of the state is not connected to the rail network.

Civil Aviation. There are airports at Dehra Dun and Udham Singh Nagar.

WEST BENGAL

KEY HISTORICAL EVENTS

Bengal was under the overlordship of the Moghul emperor and ruled by a Moghul governor (*nawab*) who declared himself independent in 1740. The British East India Company based at Calcutta was in conflict with the *nawab* from 1756 until 1757 when British forces defeated him at Plassey and installed their own *nawab* in 1760. The French were also in Bengal; the British captured their trading settlement at Chandernagore in 1757 and in 1794, restoring it to France in 1815.

The area of British Bengal included modern Orissa and Bihar, Bangladesh and (until 1833) Uttar Pradesh. Calcutta was the capital of British India from 1772 until 1912.

The first division into East and West took place in 1905–11 and was not popular. However, at Partition in 1947 the East (Muslim) chose to join what was then East Pakistan (now Bangladesh), leaving West Bengal as an Indian frontier state and promoting a steady flow of non-Muslim Bengali immigrants from the East. In 1950 West Bengal received the former princely state of Cooch Behar and, in 1954, Chandernagore. Small areas were transferred from Bihar in 1956.

TERRITORY AND POPULATION

West Bengal is in northeast India and is bounded north by Sikkim and Bhutan, east by Assam and Bangladesh, south by the Bay of Bengal, southwest by Orissa, west by Jharkhand and Bihar and northwest by Nepal. The total area of West Bengal is 88,752 sq. km. Its population in 1996 was estimated at 74.5m.; density, 839 per sq. km. The capital is Calcutta. Population of chief cities, *see* INDIA: Territory and Population. Other major towns (1991): Bardhaman (245,079), South Dum Dum (232,811), Baranagar (224,821), Siliguri (216,950), Bally (181,978), Burnpur (174,933), Uluberia (155,172), Hugli-Chinsura (151,806), Raiganj (151,045), North Dum Dum (149,965), Dabgram (147,217), English Bazar (139,204), Serampur (137,028), Barrackpur (133,265), Naihati (132,701), Medinipur (125,498), Nabadwip (125,037), Krishnanagar (121,110), Chandannagar (120,378), Balurghat (119,796), Baharampur (115,144), Bankura (114,876), Titagarh (114,085), Halisahar (114,028), Santipur (109,956), Kulti-Barakar (108,518), Basirhat (101,409), Haldia (100,347), Habra (100,223), Kanchrapara (100,194). The principal language is Bengali.

CONSTITUTION AND GOVERNMENT

The state of West Bengal came into existence as a result of the Indian Independence Act, 1947. The territory of Cooch-Bihar State was merged with West Bengal on 1 Jan. 1950, and the former French possession of Chandernagore became part of the state on 2 Oct. 1954. Under the States Reorganization Act, 1956, certain portions of Bihar State (an area of 3,157 sq. miles with a population of 1,446,385) were transferred to West Bengal.

The Legislative Assembly has 295 seats (294 elected and 1 nominated).

For administrative purposes there are 3 divisions (Jalpaiguri, Burdwan and Presidency), under which there are 18 districts, including Calcutta. The Calcutta Metropolitan Development Authority has been set up to co-ordinate development in the metropolitan area (1,350 sq. km). For the purposes of local self-government there are 16 *zilla parishads* (district boards) excluding Darjeeling, 328 *panchayat samities* (regional boards), 1 *siliguri mahakuma parishad* and 3,247 *gram* (village) *panchayats*. KEY HISTORICAL EVENTS

In the 16th century Portuguese traders settled in some of the islands which now comprise Indonesia but were ejected by the British who in turn were ousted by the Dutch in 1595. From 1602 the Netherlands East India Company controlled the area until the dissolution of the Company in 1798. The Netherlands government then ruled the colony from 1816 until 1941 when it was occupied by the Japanese until 1945. On 17 Aug. 1945 nationalist leaders proclaimed an independent republic.

On 27 Dec. 1949 the Netherlands conceded unconditional sovereignty.

In 1960 President Sukarno assumed power to control and dissolve political parties. He also set up a mass organization, the National Front, and a supreme state body called the Provisional People's Consultative Assembly. On 11–12 March 1966 the military commanders under the leadership of Lieut.-Gen. Suharto took over executive power while leaving President Sukarno as the head of state. The Communist party, which had twice attempted to overthrow the government, was outlawed. On 22 Feb. 1967 Sukarno handed over all his powers to Gen. Suharto. Re-elected president at five-year intervals, most recently on 10 March 1998, Suharto presided over a booming economy but one which was characterized by corruption and cronyism. The weaknesses became apparent when, in 1997, a failure of economic confidence spread from Japan across Asia. By May 1998 Indonesia had regressed to the verge of civil war. As food prices doubled, then trebled, riots broke out in Jakarta destroying homes and shops. The risk of society fragmenting along ethnic and religious lines was emphasized by the particular sufferings of the Chinese community. President Suharto was forced to stand down on 21 May 1998 and was succeeded by his Vice-President, Bacharuddin Jusuf Habibie, who promised political and economic reforms. Continuing protest centred on the Suharto family which until recently exercised control over large parts of the Indonesian economy. Several of the country's discontented regions are wanting to break free.

In Aug. 1999 East Timor, the former Portuguese colony which Indonesia invaded in 1975, voted for independence, a move that was eventually approved by the Indonesian parliament after violent clashes between independence supporters and pro-Indonesian militia groups.

In Nov. 1999 up to 1m. people took to the streets in the province of Aceh, in the far west of the country, seeking a referendum on independence. As one of the founder provinces of the Republic of Indonesia, Aceh's secession could threaten the breakup of the country. More than 5,000 people were killed there during the 1990s.

TERRITORY AND POPULATION

Indonesia, with a land area of 741,098 sq. miles (1,919,443 sq. km), consists of 17,508 islands (6,000 of which are inhabited) extending about 3,200 miles east to west through three time-zones (East, Central and West Indonesian Standard time) and 1,250 miles north to south. The largest islands are Sumatra, Java, Kalimantan (Indonesian Borneo), Sulawesi (Celebes) and West Papua, formerly Irian Jaya (the western part of New Guinea). Most of the smaller islands except Madura and Bali are grouped together. The two largest groups of islands are Maluku (the Moluccas) and Nusa Tenggara (the Lesser Sundas).

Population at the 1990 census was 179,378,946. Estimate, 1995, 194.75m. (38.3% urban in 1998); density, 101 per sq. km.

The UN gives a projected population for 2010 of 239.38m.

The capital, Jakarta, had a population of 10.62m. in 1999. Other major cities (1995 estimates in 1m.): Surabaya, 2.70; Bandung, 2.37; Medan, 1.91; Semarang, 1.37; Palembang, 1.35.

The principal ethnic groups are the Acehnese, Bataks and Minangkabaus in Sumatra, the Javanese and Sundanese in Java, the Madurese in Madura, the Balinese in Bali, the Sasaks in Lombok, the Menadonese, Minahasans, Torajas and Buginese in Sulawesi, the Dayaks in Kalimantan, Irianese in West Papua (formerly Irian Jaya), the Ambonese in the Moluccas and Timorese in Timor Timur. There were some 6m. Chinese resident in 1991.

Bahasa Indonesia is the official language; Dutch is spoken as a colonial inheritance.

Jakarta: Indonesia's capital is the country's largest city. It lies on the western tip of the island of Java and covers an area of 590 sq. km. It was captured by the Dutch in 1619 and named Batavia until Indonesia gained full independence in 1949 when it was renamed Jakarta. Since then, Jakarta has undergone huge growth in population and industry and is now one of the most important urban agglomerations in Asia.

East Timor. Portugal abandoned its former colony, whose population is largely Roman Catholic, in 1975, when it was occupied by Indonesia and claimed as the province of Timor Timur. The UN did not recognize Indonesian sovereignty over

the territory. An independence movement, FRETILIN, has maintained a guerrilla resistance to the Indonesian government which resulted in large-scale casualties and alleged atrocities. On 24 July 1998 Indonesia announced a withdrawal of troops from East Timor and an amnesty for some political prisoners, although no indication was given of how many of the estimated 12,000 troops and police would pull out. On 5 Aug. Indonesia and Portugal reached agreement on the outlines of an autonomy plan which would give the Timorese the right to self-government except in foreign affairs and defence. In a referendum on the future of East Timor held on 30 Aug. 1999 the electorate was some 450,000 and turn-out was nearly 99%. 78.5% of voters opted for independence, but pro-Indonesian militia gangs wreaked havoc both before and after the referendum. The militias accused the UN of rigging the poll. There was widespread violence in and around Dili, the provincial capital, with heavy loss of life, and thousands of people were forced to take to the hills after intimidation. Much of Dili was burnt to the ground.

The population estimate for 2000 was 884,000.

CONSTITUTION AND GOVERNMENT

The political system is based on *pancasila*, in which deliberations lead to a consensus. 425 members of the *House of People's Representatives* are elected every 5 years, and the remaining 75 are appointed from the armed forces. Together with 500 government appointees they make up the *People's Consultative Assembly* which meets every 5 years to choose a president. There is no limit to the number of presidential terms. The military perform a dual function enshrined in law, combining conventional defence duties with participation in all areas of political and social life. Golkar is a 'functional group'. There are 2 officially-sanctioned parties also in the House of People's Representatives: the United Development Party (UDP, largely Muslim), and the Indonesian Democratic Party (IDP nationalist Christian). Although predominantly a Muslim country, the constitution protects the religious beliefs of non-Muslims.

Indonesia is a member of the UN, WTO, OPEC, Asian Development Bank, Colombo Plan, APEC, ASEAN, Mekong Group and OIC.

ECONOMY

Agriculture accounted for 19.5% of GDP in 1998, industry 45.3% and services 35.2%.

Policy. The government's plan for growth has been hit by financial instability in the Asian money markets and international concern about corruption, a shaky banking

system and the slow pace of deregulation and privatization; but this is not to deny the economic successes which were achieved by the Suharto administration. Since 1970 the economy has grown, on average, by more than 6% a year.

Performance. Economic growth was 7.8% in 1996 and 4.7% in 1997 but declined dramatically in 1998 to -13.2%. There was a slight recovery in 1999, with growth of 0.2%, and for 2000 a rate of 4.5% was forecast. The Asian crisis and the economic collapse affected Indonesia more than any other country. In 1998 total GDP was US\$94.2bn.

Budget. By law the budget must balance. The fiscal year starts 1 April. Revenue and expenditure for 1999-2000 were 218,204bn. rupiahs. Routine revenue (in 1bn. rupiahs), 1999-2000, 140,804; routine expenditure, 134,556; development revenue, 77,400; development expenditure, 83,648.

Currency. The monetary unit is the *rupiah* (IDR) notionally of 100 *sen*. Annual inflation was running at about 77.63% in 1998, up from 11.05% in the previous year. In 1999 inflation stood at 2.01%. In March 1998 Indonesia's official hard currency reserves were US\$16.33bn., although usable reserves were just under US\$10bn. Gold reserves were 3.1m. troy oz in Jan. 2000. Total money supply in Nov. 1997 was 61,563bn. rupiahs.

Banking and Finance. The Bank Indonesia, successor to De Javasche Bank established by the Dutch in 1828, was made the central bank of Indonesia on 1 July 1953. Its *Governor* is Dr Syahril Sabirin. It had an original capital of 25m. rupiahs; a reserve fund of 18m. rupiahs and a special reserve of 84m. rupiahs. In Jan. 2000 independent auditors declared that the bank was technically bankrupt. In response the IMF stated that future loans would probably depend on recapitalization and an internal reorganization.

There are 117 commercial banks, 28 development banks and other financial institutions, 8 development finance companies and 9 joint venture merchant banks. Commercial banking is dominated by 7 state-owned banks: Bank Rakyat Indonesia provides services to smallholder agriculture and rural development; Bank Bumi Daya, estate agriculture and forestry; Bank Negara Indonesia 1946, industry; Bank Dagang Negara, mining; and Bank Ekspor-Impor Indonesia, export commodity sector. All state banks are authorized to deal in foreign exchange.

There are 70 private commercial banks owned and operated by Indonesians. The 11 foreign banks specialize in foreign exchange transactions and direct lending operations to foreign joint ventures. The government owns 1 Savings Bank, Bank Tabungan Negara, and 1,000 Post Office Savings Banks. There are also over 3,500 rural and village savings bank and credit co-operatives. At least 16 banks closed in the wake of the 1997 financial crisis.

The World Bank board agreed to resume lending in Indonesia in June 1998 by approving a US\$225m. loan to reduce poverty. Also in June 1998 Indonesia reached agreement with foreign banks on a comprehensive private-sector debt restructuring programme, involving the rescheduling of some US\$60bn. of Indonesian corporate debt over 8 years and the extension by up to 4 years of Indonesian bank liabilities totalling US\$9.2bn. The most important element of the deal was the creation of the Indonesian Debt Restructuring Agency which provided protection against foreign exchange risk covering up to US\$60bn. in corporate debt.

There is a stock exchange in Jakarta.

Weights and Measures. The metric system is in use.

The following are the old weights and measures: *Pikol* = 136.16 lb avoirdupois; *Katti* = 1.36 lb avoirdupois; *Bau* = 1.7536 acres; *Square Pal* = 227 hectares = 561.16 acres; *Jengkal* = 4 yd; *Pal* (Java) = 1,506 metres; *Pal* (Sumatra) = 1,852 metres.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1998 was 18.37m. kW. Production was 82.10bn. kWh in 1999. Consumption per capita was 413 kWh in 1997. There were 7 hydro-electric plants in 1989. 68,045 villages were supplied with electricity in 1999.

Oil and Gas. The importance of oil in the economy is declining. The 1996 output of crude oil was 553m. bbls. Proven reserves in 1999 totalled 5.0bn. bbls. Natural gas production, 1999, was 67,677m. cu. metres with 2,050bn. cu. metres of proven

reserves. In Jan. 2001 a 640-km gas pipeline linking Indonesia's West Natuna field with Singapore came on stream. It is expected to provide Singapore with US\$8bn. worth of natural gas over a 20-year period.

Minerals. The high cost of extraction means that little of the large mineral resources outside Java is exploited; however, there is copper mining in West Papua, nickel mining and processing on Sulawesi, aluminium smelting in northern Sumatra. Open-cast coal mining has been conducted since the 1890s, but since the 1970s coal production has been developed as an alternative to oil. Reserves are estimated at 28,000m. tonnes. Coal production (1997), 54.4m. tonnes. Other minerals: salt (1998 estimate), 650,000 tonnes; bauxite (1998), 513,000 tonnes; iron ore (1994), 334,900 tonnes; copper concentrate (1998), 2.9m. tonnes; silver (1998), 348,730 kg; gold (1998), 138,110 kg; nickel ore (1998), 2.7m. tonnes; tin (1998), 50,833 tonnes.

Agriculture. There were 17.94m. ha of arable land in 1997 and 13.05m. ha of permanent crops. Production (1999, in 1,000 tonnes): rice, 40,318; sugarcane (1998), 27,500; coconuts (1998), 14,710; cassava, 10,580; maize, 7,215; bananas (1998), 3,012; palm oil, 2,530; natural rubber (1998), 1,564; soybeans, 1,369; sweet potatoes, 1,317; cabbages (1998), 1,156; copra (1998), 1,120; dry beans (1998), 870; potatoes (1998), 840; peanuts, 658; oranges (1998), 614; mangoes (1998), 605; palm kernels, 575; coffee (1998), 455; onions (1998), 442; cocoa beans (1998), 370; pineapples (1998), 349; papayas (1998), 336; cucumbers and gherkins (1998), 310; chillies and green peppers (1998), 274. In 1991, 6,750 tonnes of nutmeg were produced, about 75% of world production. Indonesia is the world's largest producer of coconuts.

Livestock (1999): goats, 14.12m.; cattle, 12.10m.; pigs, 9.35m.; sheep, 7.50m.; buffaloes, 2.86m.; horses, 579,000; chickens (1996), 980m.

Forestry. In 1995 the area under forests was 109.79m. ha, or 60.6% of the total land area (115.21m. ha and 63.6% in 1990). Approximately 46% of the forested area is scheduled for selective logging, 33% for preservation for national parks and watersheds and 21% for removal for agriculture, industry and settlement. The loss of 5.42m. ha between 1990 and 1995 was exceeded during the same period only in Brazil. In 1998, 193.22m. cu. metres of roundwood were cut, most of it fuelwood and charcoal.

Environment. According to the *World Bank Atlas* Indonesia's carbon dioxide emissions in 1996 were the equivalent of 1.2 tonnes per capita.

Fisheries. In 1998 total catch was 4,765,000 tonnes, of which 3,616,000 tonnes were sea fish. In 1997 there were 191,270 motorized and 371,007 other fishing vessels.

INDUSTRY

There are shipyards at Jakarta Raya, Surabaya, Semarang and Amboina. There are textile factories, large paper factories, match factories, automobile and bicycle assembly works, large construction works, tyre factories, glass factories, a caustic soda and other chemical factories. KEY HISTORICAL EVENTS

Persia was ruled by the Shahs as an absolute monarchy from the 16th century until 1906, when the first constitution was granted and a national assembly established. After a coup in 1921, Reza Khan began his rise to power. He was declared Shah on 12 Dec. 1925 and as closer relations with Europe were developed in the mid-1930s so the name Iran began to be used in the west instead of Persia. When in the Second World War Iran supported Germany, the Allies occupied the country and

forced Reza Shah to abdicate in favour of his son. Iran's oil industry was nationalized in March 1951 in line with the policy of the National Front Party whose leader, Dr Muhammad Mussadeq, became prime minister in April 1951. He was opposed by the Shah who fled the country until Aug. 1953 when the monarchists staged a coup which led to Mussadeq being deposed. The Shah's policy, which included the redistribution of land to small farmers and the enfranchisement of women, was opposed by the Shia religious scholars who considered it to be contrary to Islamic teaching. Despite economic growth, unrest was caused by the Shah's harsh repressive measures and his extensive use of the Savak, the secret police. The opposition led by Ayatollah Ruhollah Khomeini, the Shia Muslim spiritual leader who had been exiled in 1965, was particularly successful. Following intense civil unrest in Tehran, the Shah left Iran with his family on 17 Jan. 1979 (and died in Egypt on 27 July 1980). The Ayatollah Khomeini returned from exile on 1 Feb. 1979, the Shah's government resigned and parliament dissolved itself on 11 Feb. Following a referendum in March, an Islamic Republic was proclaimed. The constitution gave supreme authority to a religious leader (*wali faqih*), a position held by Ayatollah Khomeini for the rest of his life. In Sept. 1980 border fighting with Iraq escalated into full-scale war. A UN-arranged ceasefire took place on 20 Aug. 1988, and in Aug. 1990, following Iraq's invasion of Kuwait, Iraq offered peace terms and began the withdrawal of troops from Iranian soil. Approximately 30,000 political opponents of the regime are believed to have been executed shortly after the end of the war.

In 1997 the election of Mohammad Khatami as president signalled a shift away from Islamic extremism. A clampdown on Islamic vigilantes who wage a violent campaign against western 'decadence' is the latest sign of a cautiously liberal integration of the constitution. But the conservative faction led by the spiritual leader Ayatollah Ali Khamenei retains huge power including the final say on defence and foreign policy.

In July 1999 riot police fought pitched battles with pro-democracy students in Tehran in the worst unrest since the revolution in 1979. Since then there have been further cautious moves towards a more liberal society, though the Islamic leaders remain bitterly divided on the degree of overlap between politics and religion.

TERRITORY AND POPULATION

Iran is bounded in the north by Armenia, Azerbaijan, the Caspian Sea and Turkmenistan, east by Afghanistan and Pakistan, south by the Gulf of Oman and the Persian Gulf, and west by Iraq and Turkey. It has an area of 1,629,807 sq. km (634,293 sq. miles), but a vast portion is desert. Population (1996 census): 60,055,488 (1998, 60.6% urban). Population density: 36 per sq. km.

The UN gives a projected population for 2010 of 98.27m.

By 1992 there were 2m. refugees from Afghanistan in Iran; repatriation began in 1993, but in 1998 Iran still had 1.40m. Afghan refugees. It has more refugees than any other country.

Despite economic and political difficulties arising from the establishment of the Islamic Republic in Iran, Tehran is today the country's administrative, commercial and industrial centre.

Mainly a desert climate, but with more temperate conditions on the shores of the Caspian Sea. Seasonal range of temperature is considerable, as is rain (ranging from 2" in the southeast to 78" in the Caspian region). Winter is normally the rainy season for the whole country. Abadan, Jan. 54°F (12.2°C), July 97°F (36.1°C). Annual rainfall 8" (204 mm). Tehran, Jan. 36°F (2.2°C), July 85°F (29.4°C). Annual rainfall 10" (246 mm).

CONSTITUTION AND GOVERNMENT

The Constitution of the Islamic Republic was approved by a national referendum in Dec. 1979. It gives supreme authority to the *Spiritual Leader* (*wali faqih*), which position was held by Ayatollah Khomeini until his death on 3 June 1989. Ayatollah Seyed Ali Khamenei was elected to succeed him on 4 June 1989. Following the death of the previous incumbent, Ayatollah Ali Khamenei was proclaimed the *Source of Knowledge* (*Marja e Taghlid*) at the head of all Shia Muslims in Dec. 1994.

The 83-member *Assembly of Experts* was established in 1982. It is popularly elected every 8 years. Its mandate is to interpret the constitution and select the Spiritual Leader. Candidates for election are examined by the *Council of Guardians*.

The *Islamic Consultative Assembly* has 290 members, elected for a 4-year term in single-seat constituencies. All candidates have to be approved by the *Council of Guardians*.

The *President* of the Republic is popularly elected for not more than two 4-year terms and is head of the executive; he appoints Ministers subject to approval by the *Islamic Consultative Assembly* (*Majlis*).

Legislative power is held by the 290-member Islamic Consultative Assembly, directly elected on a non-party basis for a 4-year term by all citizens aged 17 or over. A new law passed in Oct. 1999 raised the voting age from 16 to 17, thus depriving an estimated 1.5m. young people from voting. Two-thirds of the electorate is under 30. Voting is secret but ballot papers are not printed; electors must write the name of their preferred candidate themselves. 5 seats are reserved for religious minorities. All legislation is subject to approval by a 12-member *Council of Guardians* who ensure it is in accordance with the Islamic code and with the Constitution. The Spiritual Leader appoints 6 members, as does the judiciary.

National Anthem. 'Sar zad az ofogh mehr-e khavaran' ('Rose from the horizon the affectionate sun of the East'); words by a group of poets; tune by Dr Riahi.

Strength (1999) estimated at 50,000 personnel (about 12,000 air defence).

INTERNATIONAL RELATIONS

Iran's foreign policy has been much less doctrinaire since the election to the presidency in May 1997 of Mohammad Khatami. Although his speeches often contain traditional anti-western themes, in Sept. 1999 he expressed admiration for Western technological advance during a speech to students.

Iran is a member of the UN, OPEC, ECO, OIC and the Colombo Plan.

ECONOMY

Policy. A 5-year plan, the Third Five-Year Development Plan, has been running since 2000. At the beginning of 1991 about 70% of industry was state-owned, much of it nationalized after the 1979 revolution, but the government is now committed to partial privatization. Strategic heavy industry will remain in the public sector.

Performance. Real GDP growth was 5.5% in 1999 (2.5% in 1998). Total GDP in 1998 was US\$113.1bn.

Budget. Total revenue and expenditure for 1998–99 was put at 230,440bn. rials, an increase of 20% over the 1997–98 budget. The estimated total revenue and expenditure for 1999–2000 was 276,215bn. rials. The accuracy of budget figures is questionable given the policy of dividing the budget into 2 parts: the first covering ministerial expenditure, the second dealing with state banks and industries, which receive allocations by the expediency of printing money.

Currency. The unit of currency is the *rial* (IRR) of which 10 = 1 *toman*. The value of the rial has fallen from IRR 70 to the US\$ in 1979 to a low of IRR 4,630 in 1997. Gold reserves were 5.42m. troy oz in March 1996. Inflation in Aug. 1998 was running at 20%. Total money supply in Oct. 1997 was 60,706m. rials.

Banking and Finance. The Central Bank is the note issuing authority and government bank. Its *Governor* is Moshen Nurbakhach. All other banks and insurance companies were nationalized in 1979, and re-organized into new state banking corporations, of which there were 5 in 1994. Private banks were permitted to operate from 1994; their initial capital must be at least 5,000m. rials. The 'Law for Usury-Free Banking' dates from 1983. In 1985 interest on accounts was abolished.

A stock exchange re-opened in Tehran in 1992.

Weights and Measures. The metric system is in force.

Calendar. The Iranian year is a solar year starting on varying dates between 19 and 22 March. The current solar year is 1380 (20 March 2001 to 20 March 2002). The Islamic *hegira* (622 AD, when Mohammed left Mecca for Medina) year 1422 corresponds to 26 March 2001–14 March 2002, and is the current lunar year.

ENERGY AND NATURAL RESOURCES

Electricity. Total installed capacity in 1997: 27m. kW; production (1998), 95.31bn. kWh (approximately 69% from steam, 20% from gas and combined, 10% from hydro-electricity and 1% from diesel). Consumption per capita in 1997 was 1,512 kWh.

Oil and Gas. Iran has 8.9% of proven global oil reserves. Oil is its chief source of revenue. The main oilfields are in the Zagros Mountains where oil was first discovered in 1908. Oil companies were nationalized in 1979 and operations of crude oil and natural gas exploitation are now run by the National Iranian Oil Company. Refining operations of crude oil are run by the National Company for Refining and Distribution of Oil Products. Iran produced 5.1% of the world total oil output in 1999, and had reserves amounting to 89.7bn. bbls. In 1999 the most important discovery in more than 30 years was made, with the Azadegan oilfield in the southwest of the country being found to have reserves of approximately 26bn. bbls. In 1998 revenue from oil amounted to US\$10bn. (compared to US\$22bn. in 1976). Iran depends on oil for some 80% of its export earnings.

Crude petroleum production (1998): 1,341m. bbls. (3,664,000 bbls. a day). Refining capacity (1997): 1,242,000 bbls. a day.

Iran has nearly one fifth of proven global gas reserves. A deal reached in Nov. 1997 between Gazprom, the Russian gas company, and Total, the French energy group, involves the investment of US\$2,000m. into the development of a gas field.

In Dec. 1997 the first natural gas pipeline linking Iran with the Caspian Sea via Turkmenistan was opened. The 200-km line links gas fields in western Turkmenistan to industrial markets in northern Iran. Natural gas production (1999): 54,815m. cu. metres. Manufactured gas represented 9.6% of total gas consumption. Natural gas reserves in 2000 were 23,000bn. cu. metres, the second largest behind Russia.

Minerals. Production, after dressing (1996, in tonnes): iron ore, 5,236,259; coal, 1,211,403; zinc and lead, 321,766; copper, 370,234; manganese, 82,694; chromite, 322,367; salt, 1,410,644; bauxite, 230,420; decorative stone, 6,120,071.

Agriculture. Agriculture accounted for approximately 25% of GDP in 1997. In 1998 cultivable land totalled 14,002,469 ha; 12,336,701 ha were under annual crops (of which 6,022,285 ha were irrigated). In 1998 there were 1,848,488 ha and 120,637 ha of productive and non-productive orchards and nurseries respectively.

IRAN

Crop production (1998, in 1,000 tonnes): wheat, 11,955; sugarbeet, 4,987; barley, 3,301; rice (paddy), 2,771; onions, 1,540. 1997 figures (in 1,000 tonnes): potatoes, 3,284; tomatoes, 2,547; watermelons, 2,174; grapes, 2,125; sugarcane, 2,059; cucumbers and gherkins, 1,038; maize, 1,000; dates, 877. Iran's annual production of dates is the highest in the world and that of watermelons the second highest.

Livestock (1996): 50.9m. sheep; 27.7m. goats; 8.3m. cattle; 447,000 buffaloes; 1.4m. asses; 416m. chickens (1996–1997 totals).

Forestry. Approximately 11% of Iran is forested, much of it in the Caspian region. Timber production in 1998 was 6.9m. cu. metres.

Environment. According to the *World Bank Atlas* carbon dioxide emissions were the equivalent of 4.4 tonnes per capita in 1996.

Fisheries. In 1998 total catch was 366,853 tonnes (226,500 tonnes from sea fishing).

INDUSTRY

Major industries: petrochemical, automotive, food, beverages and tobacco, textiles, clothing and leather, wood and fibre, paper and cardboard, chemical products, non-metal mining products, basic materials, machinery and equipment, copper, steel and aluminium. The textile industry uses local cotton and silk; carpet manufacture is an important industry. The country's steel industry is the largest in the Middle East.

Production of selected commodities in large-scale manufacturing establishments with 50 workers and more (1996): sugar, 831,888 tonnes; stockings, 9.7m. pairs; machine-made bricks, 1,792m.; cement, 16,441,701 tonnes. In 1996 there were 2,433 large-scale manufacturing establishments and the number of workers was 647,661.

Labour. The economically active population numbered 16m. in 1996–97, of which 14.6m. were employed. In Nov. 1999 it was estimated that 15% of the workforce was unemployed. Approximately 800,000 Iranians enter the workforce every year, but 50% of university graduates are unable to obtain employment.

INTERNATIONAL TRADE

There had been a limit on foreign investment, but legislation of 1995 permits foreign nationals to hold more than 50% of the equity of joint ventures with the consent of the Foreign Investment Board. Foreign debt was US\$14,391m. in 1998.

Imports and Exports. Imports and exports for calendar years in US\$1m.:

Main imports: machinery and motor vehicles, iron and steel, chemicals, pharmaceuticals, food. Main exports: oil, carpets, pistachios, leather and caviar. Petroleum and crude oil exports (1996): 2,620,000 bbls. a day. Crude oil exports account for 85% of hard currency earnings. Carpet exports are the second largest hard currency earner. Iran's main trading partners (US\$1m, 1996) were Germany (2,100), Belgium (926.3), Japan (844.0) for imports; and the UK (3,907.6), Japan (3,816.0), and Italy (1,821.9) for exports.

KEY HISTORICAL EVENTS

Iraq, formerly Mesopotamia, was part of the Ottoman Empire from 1534 until it was captured by British forces in 1916. Under a League of Nations mandate, administered by Britain, Amir Faisal Ibn Hussain was crowned king in 1921. On 3 Oct. 1932 Britain's mandate expired, and Iraq became an independent country. The ruling Hashemite dynasty was overthrown by a military coup on 14 July 1958. King Faisal II and Nuri al Said, the prime minister, were killed. A republic was established, controlled by a military-led Council of Sovereignty under Gen. Qassim. In 1963 Qassim was overthrown, and Gen. Abdul Salam Aref became president, with a partial return to a civilian government, but on 17 July 1968 a successful coup was mounted by the Ba'ath Party. Gen. Ahmed Al Bakr became president, prime minister, and chairman of a newly established ruling 9-member Revolutionary Command Council. In July 1979 Saddam Hussein, the vice-president, became president in a peaceful transfer of power.

In Sept. 1980 Iraq invaded Iran in a dispute over territorial rights in the Shatt-al-Arab waterway which developed into a full-scale war. A UN-arranged ceasefire took place on 20 Aug. 1988 and UN-sponsored peace talks continued in 1989. On 15 Aug. 1990 Iraq offered peace terms and began the withdrawal of troops from Iranian soil.

Early on 2 Aug. 1990 Iraqi forces invaded and rapidly overran Kuwait, meeting little resistance. On 6 Aug. the UN Security Council voted to impose total economic sanctions on Iraq until it withdrew from Kuwait. On 7 Aug. the USA announced it was sending a large military force to Saudi Arabia. Further Security Council resolutions included authorization for the use of military force if Iraq did not withdraw by 15 Jan. 1991. On the night of 16–17 Jan. coalition forces began an air attack on strategic targets in Iraq. A land offensive followed on 24 Feb. The Iraqi army was routed. Kuwait City was liberated on 27 Feb. and on 28 Feb. Iraq agreed to the conditions of a provisional ceasefire, including withdrawal from Kuwait.

In Sept. a UN Security Council resolution permitted Iraq to sell oil worth US\$1,600m. to pay for food and medical supplies and start a reparations fund. In Oct. the Security Council voted unanimously to prohibit Iraq from all nuclear activities. Imports of materials used in the manufacture of nuclear, biological or chemical weapons are banned, and UN inspectors received wide powers to examine and retain data throughout Iraq.

In Aug. 1992 the USA, UK and France began to enforce an air exclusion zone over southern Iraq in response to the government's persecution of Shi'ite Muslims. Following Iraqi violations of this zone, and incursions over the Kuwaiti border, US, British and French forces made air and missile attacks on Iraqi military targets in Jan. 1993. On 27 June 1993 US forces made a missile attack on an intelligence centre in Baghdad in retaliation for an attempt on former US President Bush's life while he was visiting Kuwait in April. On 10 Nov. 1994 Iraq recognized the independence and boundaries of Kuwait. In the first half of 1995 UN weapons inspectors secured information on an extensive biological weapons programme. At the beginning of Sept. 1996 Iraqi troops occupied the town of Arbol in a Kurdish safe haven in support of the Kurdish Democratic Party faction which was at odds with another Kurdish faction, the Patriotic Union of Kurdistan. On 3 Sept. 1996 US forces fired missiles at targets in southern Iraq and extended the no-fly area northwards to the southern suburbs of Baghdad.

Relations with the USA deteriorated still further in 1997 when Iraq refused co-operation with UN weapons inspectors. On 29 Oct. the Iraqi Revolutionary

Command Council announced that it had 'postponed' a decision to stop working with UNSCOM, the UN commission responsible for the destruction of Iraq's ballistic, chemical and biological weapons programmes, but it went on to demand that there should be no American nationals among the UN inspectors. The UN team suspended its operations in Iraq and the Security Council warned Saddam Hussein of 'serious consequences' if he carried out his threat to expel the Americans.

While the USA and the UK threatened retaliatory action, the larger Arab countries with Russia, China and France urged compromise. However, a renewal of hostilities looked probable until late Feb. 1998 when Kofi Annan, the UN Secretary General, forged an agreement in Baghdad allowing for 'immediate, unconditional and unrestricted access' to all suspected weapons sites. Then, in Aug. 1998, Saddam Hussein engineered another stand-off with the UN arms inspectors, demanding a declaration that Iraq had rid itself of all weapons of mass destruction. This the UN chief inspector refused to do. In Nov., all UN personnel left Iraq as the USA threatened air strikes unless Iraq complied with UN resolutions. Russia and France urged further diplomatic efforts, but on 16 Dec. the USA and Britain launched air and missile attacks aimed at destroying Saddam Hussein's arsenal of nuclear, chemical and biological weapons. In all, 97 targets were destroyed. In the aftermath, the USA and Britain continued attacks on selected military and communication targets while encouraging the Iraqi opposition and tightening the trade embargo.

In Feb. 2000 the UN Security Council nominated Sweden's Hans Blix to head the new arms inspectorate to Iraq, but Iraq immediately announced that he would not be allowed into the country. Sanctions have undoubtedly harmed Iraq. But Saddam Hussain remains strong while the population at large suffers increasing deprivations. An oil-for-food scheme, which came into force in 1996 in an effort to alleviate suffering, is administered by the UN. In Feb. 2001 the USA and Britain launched a further series of air attacks on military targets in and around Baghdad.

TERRITORY AND POPULATION

Iraq is bounded in the north by Turkey, east by Iran, southeast by the Persian (Arabian) Gulf, south by Kuwait and Saudi Arabia, and west by Jordan and Syria. In April 1992 the UN Boundary Commission redefined Iraq's border with Kuwait, moving it slightly northwards in line with an agreement of 1932. Area, 438,317 sq. km. Population, 1987 census, 16,335,198; 1997 estimate, 22·22m.; density, 50·7 per sq. km. In 1998, 75·9% of the population lived in urban areas.

The UN gives a projected population for 2010 of 30·42m.

CONSTITUTION AND GOVERNMENT

The Provisional Constitution was promulgated on 16 July 1970. The highest state authority is the Revolutionary Command Council (RCC) but some legislative power has now been given to the 220-member *National Assembly*. National Assembly elections were held on 24 March 1996. There were 689 candidates. The Ba'ath Party gained a majority of seats.

The only legal political grouping was the National Progressive Front (founded 1973) comprising the Arab Socialist Renaissance (Ba'ath) Party and various Kurdish groups, but a law of Aug. 1991 legalized political parties provided they are not based on religion, racism or ethnicity.

The President and Vice-President are elected by the RCC; the President appoints and leads a Council of Ministers responsible for administration.

KEY HISTORICAL EVENTS

With the collapse of the Roman empire, Ireland developed its own Gaelic culture and language. But from the 12th century, the English dominated. Vast tracts of land were granted to English settlers and English law was introduced. In 1541 Henry VIII was recognized as King of Ireland. Most Irish remained Roman Catholic and in the reign of Elizabeth insurrection broke out against the Protestant overlords. In the early 17th century Scottish settlers in the north of Ireland established a strong Protestant enclave which led to rebellion in 1640. After 1649 Cromwell restored English domination. Irish resistance was brought to a bloody conclusion by the Battle of the Boyne (1690).

For over a century, the Roman Catholic majority had no share in government. The 1801 Act of Union gave Ireland representation at Westminster but opposition to British rule was reinforced in 1846 when the failure of the potato harvest and the apparent unwillingness of Britain to provide aid led to widespread famine. The subsequent mass emigration, chiefly to the United States, further damaged the Irish economy and intensified demands for Home Rule. In the north, however, Home Rule was bitterly opposed by the Protestant interest. In 1898 the Ulster Unionist party was set up to campaign for the right to remain part of the UK.

In April 1916 an insurrection against British rule took place and a republic was proclaimed. The armed struggle was renewed in 1919 and continued until 1921. In 1920 an Act was passed by the British Parliament, under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Unionists of the 6 counties accepted this scheme, and a Northern Parliament was duly elected on 24 May 1921. The rest of Ireland, however, ignored the Act. On 6 Dec. 1921 a treaty was signed between Great Britain and Ireland by which Ireland accepted dominion status subject to the right of Northern Ireland to opt out. This right was exercised, and the border between the Irish Free State (26 counties) and Northern Ireland (6 counties) was fixed in Dec. 1925 as the outcome of an agreement between Great Britain, Ireland and Northern Ireland. Subsequently the constitutional links between Ireland and the UK were gradually removed by the *Dáil*. The remaining formal association with the British Commonwealth by virtue of the External Relations Act, 1936 was severed when the Republic of Ireland Act, 1948 came into operation on 18 April 1949.

In the mid-1950s the Irish Republican Army, which had led a violent campaign for Irish unity in the 1920s, re-emerged as a fighting force with a bombing campaign in Northern Ireland. Differences between the two religious communities intensified to the point, in 1969, when British troops had to be deployed to keep the peace. In 1972 the Unionist government in Belfast resigned and direct rule from London was imposed. Between July 1969 and Dec. 1998, around 1,800 civilians, 1,100 security forces personnel and 500 paramilitaries were killed in the troubles.

On 22 Feb. 1995 the Irish and British Prime Ministers (John Bruton and John Major) announced joint proposals for a settlement in Northern Ireland. Under the chairmanship of former US Senator George Mitchell, a marathon negotiating struggle on 9–10 April 1998 led to a framework for sharing power designed to satisfy Protestant demands for a reaffirmation of their national identity as British, Catholic desires for a closer relationship with the predominantly Catholic Republic of Ireland and Britain's wish to return to Northern Ireland the powers London assumed in 1972. In the referendum on 22 May 1998, 94.4% of votes in the Republic and 71.12% in Northern Ireland were cast in favour of the Good Friday peace agreement.

IRELAND

On 2 Dec. 1999 the Irish constitution was amended to remove the articles laying claim to Northern Ireland.

Dublin: An east-coast city with a population of nearly 1m. and once the second largest city in the British Empire, Dublin underwent, after a period of decline, a renaissance in the second half of the 20th century. Not only the Republic of Ireland's capital city but the focal point for Ireland's commercial and cultural life, Dublin is the manufacturing centre of the country and possesses the biggest brewery in the world.

The official languages are Irish (the national language) and English; according to the National Survey of Languages of 1994, Irish is spoken as a mother tongue only by 2% of the population, in certain western areas (Gaeltacht), and is no longer a compulsory subject at school.

CONSTITUTION AND GOVERNMENT

Ireland is a sovereign independent, democratic republic. Its parliament exercises jurisdiction in 26 of the 32 counties of the island of Ireland. The first Constitution of the Irish Free State came into operation on 6 Dec. 1922. Certain provisions which were regarded as contrary to the national sentiments were gradually removed by successive amendments, with the result that at the end of 1936 the text differed considerably from the original document. On 14 June 1937 a new Constitution was approved by Parliament and enacted by a plebiscite on 1 July 1937. This Constitution came into operation on 29 Dec. 1937. Under it the name Ireland (Éire) was restored. It states that the whole island of Ireland is the national territory, but that, pending its reintegration, laws enacted by Parliament have the same area and extent of application as those of the former Irish Free State.

The head of state is the *President*, whose role is largely ceremonial, but who has the power to refer proposed legislation which might infringe the Constitution to the Supreme Court.

The *Oireachtas* or National Parliament consists of the President, a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). The *Dáil*, consisting of 166 members, is elected by adult suffrage on the Single Transferable Vote system in constituencies of 3, 4 or 5 members. Of the 60 members of the Senate, 11 are nominated by the *Taoiseach* (Prime Minister), 6 are elected by the universities and the remaining 43 are elected from 5 panels of candidates established on a vocational basis, representing the following public services and interests: (1) national language and culture, literature, art, education and such professional interests as may be defined by law for the purpose of this panel; (2) agricultural and allied interests, and fisheries; (3) labour, whether organized or unorganized; (4) industry and commerce, including banking, finance, accountancy, engineering and architecture; (5) public administration and social services, including voluntary social activities. The electing body comprises members of the *Dáil*, Senate, county boroughs and county councils.

A maximum period of 90 days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the *Dáil*, but the Senate has no power to veto legislative proposals.

No amendment of the Constitution can be effected except with the approval of the people given at a referendum.

DEFENCE

Supreme command of the Defence Forces is vested in the President. Exercise of the supreme command is regulated by law (Defence Act 1954). Military Command is exercised by the government through the Minister for Defence who is the overall commander of the Defence Forces.

The Defence Forces comprise the Permanent Defence Force (the regular Army, the Air Corps and the Naval Service) and the Reserve Defence Force (comprising a First Line Reserve of members who have served in the Permanent Defence Force, a second-line Territorial Army Reserve and a second-line Naval Reserve).

A review of the Reserve Forces is currently being carried out. The total strength of the Permanent Defence Force in Sept. 2000 was 10,845 (including 430 women). The total strength of the Reserve was 14,189. The Defence Forces had some 867 personnel involved with 15 different peace-support missions throughout the world in Dec. 2000.

Defence expenditure in 1999 totalled US\$745m. (US\$202 per capita), representing 0.9% of GDP.

Army. The army strength in Dec. 2000 was 10,618 personnel with 13,446 reserves. There is a Training Centre at the Curragh, Co. Kildare and a Logistics Base, with elements located at the Curragh and Dublin for force level logistical support.

Navy. The Naval Service is based at Haulbowline in Co. Cork. The strength in Dec. 2000 was 962 with 416 reserves. It operates 8 patrol craft.

Air Corps. The Air Corps has its headquarters at Casement Aerodrome, Baldonnell, Co. Dublin and has 2 other bases. A review of the Naval Service and Air Corps was completed in mid-1998 and Implementation Plans for the re-organization of both have recently been finalized. The Air Corps is a stand-alone Corps which does not form an intrinsic part of the new Army Brigade structure. The Air Corps strength in Dec. 2000 was 815 personnel with 81 reserves. It operates 17 fixed-wing aircraft and 13 helicopters.

INTERNATIONAL RELATIONS

Ireland is a member of the UN, WTO, OECD, EU, the Council of Europe and the OSCE.

ECONOMY

Agriculture accounted for 4% of GDP in 1999, industry 38% and services 57%.

According to the anti-corruption organization *Transparency International*, Ireland ranked 19th in the world in 2000 in a survey of the countries with the least corruption in business and government. It received 7.2 out of 10 in the annual index.

Performance. Ireland has the fastest-growing economy in the European Union, with real GDP growth in 2000 of 10.7% and a forecast for 2001 of growth of 8.8%. From having a GDP per head in 1986 which was only 61% of the EU average, it was estimated to have risen to approximately 117% of the EU average by 2000. GNP in Ireland is much lower than GDP due to profit repatriations of the multi-national sector and foreign debt servicing costs resulting in Ireland's GNP per head amounting to about 97% of the EU average. Total GDP in 1998 was US\$81.9bn.

VAT at 1 Jan. 2001 was 20% (reduced rate 12.5%).

Total Public Capital Programme Expenditure amounted to IR£5,534m. in 2000, with provision for IR£6,066m. in 2001. The general government debt at the end of 1999 was IR£34.6bn., 50% of GDP (compared to 120% in 1986). Ireland is one of the largest recipients of EU aid per head of population. It is also one of the largest recipients of US direct investment.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Ireland; irrevocable conversion rate 0.787564 Irish pounds to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002—until then the national currency will be used for payment in cash. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking, by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and Irish pounds until the Irish pound is withdrawn from circulation which will occur by 9 Feb. 2002.

The *Irish pound* (IEP) or *punt Éireannach* consists of 100 *pence*. From 10 Sept. 1928 when the first Irish legal-tender notes were issued, the Irish currency was linked to Sterling on a one-for-one basis. This relationship was discontinued on 30 March 1979 when, following Ireland's adherence to the EMS (which it had joined on its inception on 13 March 1979), it became inconsistent with Ireland's obligations. The Irish pound was realigned within the ERM on 30 Jan. 1993 with bilateral central rates of the IR£ against other ERM currencies being reduced by 10% effective 1 Feb. The Irish currency was revalued by 3% within ERM on 15 Mar. 1998. Inflation was only 1.6% in 1999 but rose steadily to 6.2% in July 2000, the highest for 15 years. This combined with excess domestic demand is bringing fears that the Irish economy is in danger of overheating. The Central Bank has the sole right of issuing legal tender notes; token coinage is issued by the Minister for Finance through the Bank. The volume of legal-tender notes outstanding on 30 Sept. 2000 was IR£3,406m. Gold reserves were 176,147 troy oz in Dec. 2000 and foreign exchange reserves were US\$5,446m. in Nov. 2000.

Banking and Finance. The Central Bank (founded in 1943), replaced the Currency Commission as the note-issuing authority. The Central Bank has the power of receiving deposits from banks and public authorities, of rediscounting Exchequer bills and bills of exchange, of making advances to banks against such bills or against government securities, of fixing and publishing rates of interest for rediscounting bills, or buying and selling certain government securities and securities of any international bank or financial institution formed wholly or mainly by governments. The Bank also collects and publishes information relating to monetary and credit matters. The Central Bank Acts, 1971, 1989 and 1997, together with the Building Societies Act, 1989, the Investment Intermediaries Act, 1995 and the Stock Exchange Act, 1995, give further powers to the Central Bank in the regulation and supervision of financial institutions and payment systems. The capital of the Bank is IR£40,000, of which IR£24,000 has been paid up and is held by the Minister for Finance.

The Board of Directors of the Central Bank consists of a Governor, appointed for a 7-year term by the President on the advice of the government, and 9 directors, all appointed by the Minister for Finance. The *Governor* is Maurice O'Connell (b. 1937; appointed 1994). The Bank's net profit in 1998 was IR£177.022m., of which IR£152.351m. was paid to the Exchequer.

At 31 Dec. 1996 there were 42 credit institutions authorized to carry on banking business in the State: 5 building societies; and 3 State banks, ICC Bank, ACC Bank and the Trustee Savings Bank. In addition there were 13 credit institutions authorized in another Member State of the European Union operating in Ireland.

At 31 Dec. 1996 total assets of within-the-State offices of all credit institutions amounted to IR£67bn.

The Dublin stock exchange has been affiliated to the London exchange since 1973.

Weights and Measures. Conversion to the metric system is in progress; with some exceptions which are confined to the domestic market, all imperial units of measurement ceased to be legal, for general use, after 31 Dec. 1994.

ENERGY AND NATURAL RESOURCES

Electricity. The total generating capacity was (1998) 4,297 MW. In 1998 the total sales of electricity amounted to 17,440m. units supplied to 1,528,359 customers. Production in 1998 totalled 20·55bn. kWh; consumption per capita was 11·4MWh.

Oil and Gas. Over 0·6m. sq. km of the Irish continental shelf has been designated an exploration area for oil and gas; at the furthest point the limit of jurisdiction is 520 nautical miles from the coast. It has been established that there is potential for discoveries both offshore and onshore. In the offshore there is a vast Continental Shelf in which 13 major basins and troughs have been identified. Much of the shelf remains unexplored but from 1971 to date 129 exploration wells have been drilled, and since 1965 a total of 348 separate surveys have been carried out from which approximately 316,000 line km of seismic data has been produced since 1985.

A number of encouraging oil and gas flows have been recorded, including the Corrib North Prospect in the Slyne/Erris Trough and '7 Heads' and 'Helvick' fields which are located in the Celtic Sea. In Nov. 1992 revised licensing terms were issued which allowed for a range of generous allowances against tax. In 1994 a Frontier Licensing Round in the Erris and Slyne Troughs resulted in the award of five licences over 28 blocks. A further 8 licences over 32 blocks were awarded under the Porcupine Basin Frontier Licensing Round in 1995.

Eleven licences were awarded over 58 full and part blocks under the Petroleum Exploration round in the Rockall Trough in June 1997. The area in the Round covered 615 full and 35 part blocks in an area of almost 150,000 sq. km. The Rockall Trough lies some 100 to 650 km west of Ireland with water depths ranging from 500 metres to 2,500 metres.

Comprehensive work programmes will be undertaken that will ensure licensed areas are fully explored. Up to 18,000 km of new 2D seismic, and up to 2,000 sq. km of 3D seismic data will be acquired and assessed by the end of the first four years of the licences.

An invitation was issued to interested petroleum companies to apply for a Lease Undertaking over the 'Seven Heads' oil and gas accumulation in the Celtic Sea. The area which covers almost 520 sq. km has been closed to the granting of authorizations since March 1997.

At the same time details of a Petroleum Licensing Round in the South Porcupine Basin were also announced. The acreage on offer covers 156 blocks in the Irish offshore—an area of over 5,000 sq. km. Owing to the special difficulties created by the physical environment of the area, it has been designated as a Frontier Area. Long term licences for a period of 15 years will be granted.

The South Porcupine Basin lies off the southwest coast of Ireland. Water depths vary from 200 metres in the east to over 2,500 metres in the southwest.

An Onshore Petroleum Prospecting Licence was issued for a three-year period from 1 Dec. 1997 covering 1,960 km of the Northwest Carboniferous Basin in counties Sligo, Leitrim, Roscommon, Cavan and Monaghan.

These steps in conjunction with the maintenance of Ireland's 'open door' approach to licensing, its favourable environment and existing tax regime achieves a risk/reward balance which reflects Ireland's circumstances and acknowledges the realities of competition for internationally mobile exploration and production investment.

Natural gas reserves in 1997 totalled 11,000m. cu. metres. In 1997 consumption of natural gas was 3,400m. cu. metres, of which 70% came from the Kinsale Head

gas field, 50 km off the south coast, and the smaller Ballycoiton field about 16 km northwest of Kinsale Head field, which was discovered in 1989 and which went into production in July 1991. These gas reserves are expected to be exhausted by the year 2003. Gas transmission and distribution is carried out by Bord Gais Éireann (Irish Gas Board). A gas pipeline from County Dublin to southwest Scotland was completed in 1994. 30% of gas used in 1997 was imported via the Interconnector. At Dec. 1997 there were 290,000 gas consumers in Ireland.

Peat. The country has very little indigenous coal, but possesses large reserves of peat, the development of which is handled largely by Bord na Mona (Peat Board). To date, the Board has acquired and developed 85,000 ha of bog and has 20 locations around the country. In the year ending 31 March 2000 the Board sold 26,000 tonnes of sod peat and 2.7m. tonnes of milled peat for use in 4 milled peat electricity generating stations. 317,000 tonnes of briquettes were produced for sale to the domestic heating market. The Board also sold 1.6m. cu. metres of horticultural peat. It is estimated that some 1.2m. tonnes of privately-produced turf was consumed in the same period.

Minerals. Lead and zinc concentrates are important. In 1997 mineable resources stood at over 6m. tonnes of zinc and over 1m. tonnes of lead. Metal content of concentrates production, 1999: zinc, 199,264 tonnes; lead, 44,103 tonnes. Gypsum, limestone and aggregates are important, and there is some production of silver (contained in lead) and dolomite. About 50 companies are involved in exploration, which is centred on base metals, but with interest also in gold, gem minerals, industrial minerals and coal. There is a thriving sand, gravel and aggregate extraction industry, employing some 7,500 people.

Agriculture. The CSO's Quarterly National Household Survey shows in the quarter of March–May 2000 there were 130,900 people whose primary source of income was from agriculture. A total of 279,000 people worked on farms on a regular basis, working the equivalent of 191,700 full-time jobs. There were 143,000 farm holdings in Ireland, almost all of which were family farms. Average farm size was 29.3 ha. 47% of farms were under 20 ha. 11% of farmers were under 35 and 45% were over 55.

Agriculture, fisheries and forestry represented 4% of GDP in 1999. The total area used for agricultural and forestry purposes is almost 5m. ha. Over 90% of the agricultural area is devoted to grass, and beef and milk production currently account for two-thirds of gross agricultural output.

Provisional figures at June 2000: wheat accounted (in ha) for 84,300; oats, 17,600; barley, 180,600; other cereals, 9,500 (1999); potatoes, 13,800. Production figures (1999, in 1,000 tonnes): sugarbeets, 1,712; barley, 1,278; wheat, 597; potatoes, 559; oats, 136; cabbages, 52 (1999); carrots, 22 (1999).

Gross agricultural output (including changes in stock) for the year 1999 was estimated at IR£3.6bn.; aggregate income (operating surplus) was IR£1.7bn. Direct income payments, financed or co-financed by the EU, amounted to IR£915m. or 53% of aggregate income. Livestock (June 2000 provisional): cattle, 7,232,000; sheep, 7,638,000; pigs, 1,786,900 (1999); poultry, 12,697,400 (1999). Ireland has been affected by BSE more than any other country apart from the UK, with over 500 cases since 1989.

Forestry. Total forest area by the end of 1999 was 634,117 ha (9% of total land area). Timber production in 1999 was 2.77m. cu. metres.

Environment. According to the *World Bank Atlas* Ireland's carbon dioxide emissions in 1996 were the equivalent of 9.6 tonnes per capita.

Fisheries. In 1999 approximately 17,600 people were engaged full- or part-time in the sea fishing industry; the fishing fleet consisted of 1,177 vessels. The quantities and values of fish landed during 1999 were: wetfish, 253,245.8 tonnes, value IR£105,870,387.16; shellfish, 53,801.0 tonnes, value IR£59,822,930.48. Total quantity: 307,046.8 tonnes; total value, IR£165,693,317.64. The main types of fish caught were mackerel (58,201.2 tonnes), horse mackerel (59,609.0 tonnes), herring (45,334.2 tonnes) and blue whiting (35,880.0 tonnes). More than 98% of fish caught is from sea fishing.

INDUSTRY

Enterprise Ireland. Enterprise Ireland was established in 1998 to provide an integrated development package specifically for indigenous firms. Its mission is 'to help client companies develop a sustainable competitive advantage leading to profitable sales, exports and employment'. Enterprise Ireland brings together the key marketing, technology, enterprise development, business training and science and innovation initiatives through which the Government supports the growth of Irish manufacturing and internationally traded sectors.

County Enterprise Boards. The 35 City and County Enterprise Boards (CEB's), which were established in Oct. 1993, are locally controlled enterprise development companies established in each county and local urban authority area in Ireland. The function of the Boards is to develop indigenous enterprise potential and to stimulate economic activity at a local level. This is primarily achieved through the provision of financial support for the development of micro enterprise (10 employees or less).

IDA Ireland. The IDA was established by the Irish government in 1969 but its remit was altered in 1993 when responsibility for development of indigenous industry was moved to Enterprise Ireland. The objective of IDA Ireland is to stimulate and support regional and economic development in Ireland by attracting and expanding foreign investment in key business sectors.

Today, Ireland is recognized as a base for a wide range of activities, from software development, business and information technology to international services and pharmaceuticals. Over 1,300 foreign-owned enterprises have established businesses in Ireland.

Shannon Development. Shannon Development, which was established in 1959, is the regional economic development company responsible for industrial, tourism and rural development in the Shannon region. Its regional mandate covers Counties Clare, Limerick, North Tipperary, South Offaly and North Kerry.

Forfás. Forfás is the policy advisory and co-ordination board for industrial development and science and technology. It is the statutory agency through which powers are delegated to Enterprise Ireland for the promotion of indigenous enterprise and to IDA Ireland for the promotion of inward investment.

The main functions of Forfás are to advise the Minister on matters relating to industrial policy, to advise on the development and co-ordination of policy for Enterprise Ireland, and IDA Ireland, and encourage the development of industry, technology, marketing and human resources.

The Chairman of Forfás is Peter Cassells and its Chief Executive is John Travers.

The census of industrial production for 1998 gives the following details of the values (in IR£1m.) of gross and net output for the principal manufacturing industries.

	<i>Gross output</i>	<i>Net output</i>

Total (all industries)	50,818.7	27,812.5

In 1998 gross output was IR£38,456m. and net output IR£19,483m. In 1998 foreign companies in Ireland generated three-quarters of the country's

manufacturing exports, over half of manufacturing output and more than two-thirds of manufacturing employment.

Labour. The total labour force for 2000 was estimated to be 1,745,600, of which 74,900 were out of work. With the birth rate having peaked around 1980 there is currently a marked increase in the numbers entering the workforce. The unemployment rate in Oct. 2000 was 4.3%, down from nearly 16% in 1993. Of those at work, 130,000 were employed in the agricultural sector in 2000, 476,200 in the industrial sector and 1,063,600 in the services sector. By the end of the 1990s a labour shortage in many fields meant that workers from abroad were being sought to fill vacancies and many Irish who had emigrated in search of work in the past began to return home. FAS, the training agency, is aiming to attract 200,000 workers to Ireland between 2000 and 2005—more than a tenth of the present workforce. Employment rose by approximately 43% during the 1990s—nearly twice as much as any other industrialized country. In 1999 alone 100,000 new jobs were created. The retirement age is 65 years.

Trade Unions. The number of trade unions in Dec. 1999 was 46; total membership, 523,624. The 6 largest unions accounted for 66% of total membership. There were 11 employees' associations holding negotiation licences, with membership of 10,320. A series of three-year social pacts, which, in addition to covering a range of economic and social policy measures, include provision for pay increases, have been negotiated between the government, trade unions and employees' organizations since 1987. The fifth such agreement concluded in Feb. 2000, the Programme for Prosperity and Fairness, provided pay increases of 15% of basic pay in the public and private sectors of the economy over the period of the agreement, 2000–02. The third phase increase (4%) in the public service will not be paid earlier than Oct. 2002 and will be dependent on the establishment of performance indicators by April 2001 and the achievement of sectoral targets by April 2002.

INTERNATIONAL TRADE

The trade balance in 1999 was an estimated US\$24.2bn. (IR£19.0bn.).

Exports	30,407.0	35,336.4	44,777.3	52,529.7

The values of the chief imports and total exports are shown in the following table (in IR£1m.):

Ireland is one of the most trade-dependent countries in the world. Exports constitute an increasing share of the economy's output of goods and services. In 1999 the total value of merchandise exports amounted to just over IR£52.5bn. (the highest ever level) and generated a trade surplus of IR£17.9bn. In employment terms, taking the economy as a whole, one job in four is directly dependent on exports. When indirect influences are taken into account, almost one job in two depends on exports. Exports of goods and services in 1999 as a percentage of GDP totalled over 88%. In 1999, 65% of exports went to other European Union countries and 55.1% of imports were from within the EU. Information technology has become increasingly important, and by 1999 Ireland had become the the largest exporter of software products in the world. Ireland accounts for a third of all personal computers sold across Europe.

Civil Aviation. Aer Lingus was incorporated in 1936 as a State-owned enterprise. Its principal business is the provision of passenger and cargo services to a range of points in the UK, Europe and the USA. In 1993 the company was restructured into the present Aer Lingus Group plc. Within the group there are three airline operating companies: Aer Lingus, which operates services to London and Europe; Aer Lingus Shannon, which operates services between Ireland and the USA; and Aer Lingus Commuter, which operates domestic services within Ireland and to UK provincial points. During the year ended Dec. 1999 Aer Lingus carried almost 6.5m. passengers and 45,000 tonnes of cargo.

The Aer Lingus Group will be the subject of an Initial Public Offering of shares in a flotation planned for 2001.

In addition to Aer Lingus, there are 16 independent air transport operators.

In 2000 services provided to and from Ireland included those operated by Aeroflot, Air Malta, Continental Airlines, Delta Airlines, Jersey European Airways, KLM, Ryanair and Singapore Airlines.

The principal airports (Dublin, Shannon and Cork) are operated by the state owned Aer Rianta Teo; there are also 6 privately-owned regional airports. The government part funds scheduled services to 5 of these airports and the City of Derry Airport in Northern Ireland to ensure efficient and speedy access to the more isolated regions of the state for both business and tourist travellers. In 2000 Ireland's 3 state airports catered for 17,492,169 passengers, up 9% on the previous year. The Dublin-London air route is the busiest in Europe.

Shipping. The merchant fleet totalled 168,081 GRT in 2000. Total cargo traffic passing through the country's ports amounted to 42,928,000 tonnes in 1999.

Inland Waterways. The principal inland waterways open to navigation are the Shannon Navigation (270 km), which includes the Shannon-Erne Waterway (Ballinamore/Ballyconnell Canal), and the Grand Canal and Barrow Navigation

(249 km). The Waterways Service of the Department of Arts, Culture and the Gaeltacht is responsible for the waterways system as a public amenity. Merchandise traffic has now ceased and navigation is confined to pleasure craft operated either privately or commercially. The Royal Canal (146 km) from Dublin to Mullingar (53 km) was reopened for navigation in 1995.

Telecommunications. The Minister for Public Enterprise, a member of the government, has overall policy responsibility for the development of the sector. Among the key elements of the government's policy is the objective of creating a fully open and competitive telecommunications market that will stimulate investment in advanced information infrastructure and services in Ireland and develop Ireland as a global leader in the growth of Internet-based industries and electronic commerce.

The Director of Telecommunications Regulation, established by legislation as an independent officer with a separate office and staff in June 1997, is responsible for licensing of operators, allocation of numbers and radio frequency spectrum, supervision of network interconnection arrangements and other regulatory functions.

Ireland's telecommunications sector has been fully liberalized with effect from 1 Dec. 1998 when the last remaining elements of Telecom Éireann's (now called Eircom) exclusive privilege were removed. All elements of the market are now open to competition from other licensed operators and, as of 28 Nov. 2000, 47 general, 29 basic and 3 mobile licences had been issued by the Director of Telecommunications Regulation. The 3 licensed mobile telephone operators are Eircell (a subsidiary of Telecom Éireann) with both TACS and GSM networks, Esat Digifone, operating a GSM network, and Meteor Mobile Communications Ltd who were awarded a combined GSM and DCS 1800 licence in June 2000. Meteor intends to commence the provision of services in 2001.

The Government has also sold the state's entire remaining stake of 50.1% in Eircom by way of an initial public offering of shares in the company. The sale took place in July 1999 and was the 2nd largest European privatization in that year.

eircom plc—Operational Information. The dominant operator in the telecommunications sector eircom plc (previously Telecom Éireann). Telecom Éireann was a statutory body set up under the Postal and Telecommunications Services Act, 1983. In 1996, 20% of the State's holding was sold to KPN/Telia, a Dutch-Swedish consortium, who had an option of a further 15%, which was taken up in July 1999. In 1998 the government concluded an Employee Share Ownership Scheme under which 14.9% of the company was to be made available to employees and also held an Initial Public Offer (IPO) of shares in the company in July 1999. In Oct. 1999 the newly-privatized Telecom Éireann became eircom plc.

In Jan. 2000 the level of network digitalization was 100%. In Sept. 2000 there were around 1.7m. phone lines (477.7 per 1,000 persons), 1.7m. data lines, 12,000 public payphones and 2.1m. mobile phone customers (Nov. 2000). The number of Internet users in Nov. 2000 was 1.04m. In 1999 there were 1.2m. PCs in use (324 per 1,000 persons).

Postal Services. Postal services are provided by An Post, a statutory body established under the Postal and Telecommunications Services Act, 1983. Number of Post Offices as of 31 Dec. 1996, 1,921; delivery points, 1,261,000. Number of items delivered in the year ended 31 Dec. 1996, 578.0m. An Post also offers a range of services to the business community through a dedicated unit, Special Delivery Services, subsidiaries PostGEM, Printpost and Precision Marketing Information. A range of services are provided through the Post Office network including Savings and Investments, passport applications, bill payments, National Lottery products and the payment of Social Welfare benefits on an agency basis for the State.

SOCIAL INSTITUTIONS

Justice. The Constitution provides that justice shall be administered in public in Courts established by law by Judges appointed by the President on the advice of the government. The jurisdiction and organization of the Courts are dealt with in the Courts (Establishment and Constitution) Act, 1961, the Courts (Supplemental Provisions) Acts, 1961-91, and the Courts and Court Officers Act, 1995. These

Courts consist of Courts of First Instance and a Court of Final Appeal, called the Supreme Court. The Courts of First Instance are the High Court with full original jurisdiction and the Circuit and the District Courts with local and limited jurisdictions. A judge may not be removed from office except for stated misbehaviour or incapacity and then only on resolutions passed by both Houses of the Oireachtas. Judges of the Supreme Court are appointed from among practising barristers or serving Circuit Court judges. High Court judges are appointed from among practising barristers or serving Circuit Court judges. Judges of the Circuit Court are appointed from among practising barristers, solicitors or serving District Court judges.

The Supreme Court, which consists of the Chief Justice (who is ex officio an additional judge of the High Court) and 7 ordinary judges, may sit in two Divisions and has appellate jurisdiction from all decisions of the High Court. The President may, after consultation with the Council of State, refer a Bill, which has been passed by both Houses of the Oireachtas (other than a money bill and certain other bills), to the Supreme Court for a decision on the question as to whether such Bill or any provision thereof is repugnant to the Constitution.

The High Court, which consists of a President (who is ex officio an additional Judge of the Supreme Court) and 26 ordinary judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise concerning the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The High Court on Circuit acts as an appeal court from the Circuit Court.

The Court of Criminal Appeal consists of the Chief Justice or an ordinary Judge of the Supreme Court, together with either 2 ordinary judges of the High Court or the President and one ordinary judge of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial judge that the case is a fit one for appeal, or, in case such certificate is refused, where the court itself, on appeal from such refusal, grants leave to appeal. The decision of the Court of Criminal Appeal is final, unless that court, the Attorney-General or the Director of Public Prosecutions certifies that the decision involves a point of law of exceptional public importance, in which case an appeal is taken to the Supreme Court.

The Offences against the State Act, 1939 provides in Part V for the establishment of Special Criminal Courts. A Special Criminal Court sits without a jury. The rules of evidence that apply in proceedings before a Special Criminal Court are the same as those applicable in trials in the Central Criminal Court. A Special Criminal Court is authorized by the 1939 Act to make rules governing its own practice and procedure. An appeal against conviction or sentence by a Special Criminal Court may be taken to the Court of Criminal Appeal. On 30 May 1972 Orders were made establishing a Special Criminal Court and declaring that offences of a particular class or kind (as set out) were to be scheduled offences for the purposes of Part V of the Act, the effect of which was to give the Special Criminal Court jurisdiction to try persons charged with those offences.

The High Court exercising criminal jurisdiction is known as the Central Criminal Court. It consists of a judge or judges of the High Court, nominated by the President of the High Court. The Court sits in Dublin and tries criminal cases which are outside the jurisdiction of the Circuit Court.

The Circuit Court consists of a President (who is ex officio an additional judge of the High Court) and 27 ordinary judges. The country is divided into 8 circuits. The jurisdiction of the court in civil proceedings is subject to a financial ceiling, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters it has jurisdiction in all cases except murder, treason, piracy, rape, serious and aggravated sexual assault and allied offences. The Circuit Court acts as an appeal court from the District Court.

The District Court, which consists of a President and 50 ordinary judges, has summary jurisdiction in a large number of criminal cases where the offence is not of a serious nature. In civil matters the Court has jurisdiction in contract and tort (except slander, libel, seduction, slander of title and false imprisonment) where the claim does not exceed IR£5,000; in proceedings founded on hire-purchase and credit-sale agreements, the jurisdiction is IR£5,000.

All criminal cases, except those of a minor nature, and those tried in the Special Criminal Court, are tried by a judge and a jury of 12. Generally, a verdict need not be unanimous in a case where there are not fewer than 11 jurors if 10 of them agree on the verdict.

The Courts Service Act, 1998, provided for the transfer of responsibility for the day to day management of the Courts from the Minister of Justice, Equality and Law Reform to a new body known as the Courts Service. The board of the Courts Service consists of 17 members including members of the judiciary, the legal profession, staff and trade union representatives, a representative of court users, a person with commercial/financial experience and a chief executive officer. The Courts Service was formally established on 9 Nov. 1999. While the minister retains political responsibility to the Oireachtas, the courts are now administered independently by the board and CEO.

At 31 Dec. 1999 the police force, the Garda, had a total staff of 11,458. There were 81,274 indictable crimes reported, of which 34,309 were solved, and 432,696 non-indictable crimes resulted in proceedings. 235,416 persons were convicted in total. There were 1.05 murders per 100,000 population and 7,844 individual juvenile offenders were cautioned. The population in penal institutions in Sept. 1997 was 2,424 (65 per 100,000 of national population).

Religion. In 1997 there were an estimated 3.34m. Roman Catholics and 300,000 members of other religions. According to the census of population taken in 1991 the principal religious professions were as follows:

	<i>Leinster</i>	<i>Munster</i>	<i>Connacht</i>	<i>Ulster (part of)</i>	<i>Total</i>

Seán Brady (b. 1939) is the Roman Catholic Cardinal of Armagh and Primate of All Ireland.

In May 1990 the General Synod of the Church of Ireland voted to ordain women.

Education. In 1999 net total expenditure on education came to 4.7% of GNP. The adult literacy rate in 1998 was at least 99%.

Elementary. Elementary education is free and was given in about 3,293 national schools (including 121 special schools) in 1999–2000. The total number of pupils on rolls in 1999–2000 was 444,310, including pupils in special schools and classes; the number of teachers of all classes was about 21,500 in 1999–2000, including remedial teachers and teachers of special classes. The total expenditure for first level education during the financial year ended 31 Dec. 1999 was IR£897,000,000. The total salaries for teachers for 1998, including superannuation etc., was IR£724,000,000.

Special. Special provision is made for children with disabilities in special schools which are recognized on the same basis as primary schools, in special classes attached to ordinary schools and in certain voluntary centres where educational services appropriate to the needs of the children are provided. Integration of children with disabilities in ordinary schools and classes is encouraged wherever possible, if necessary with special additional support. There are also part-time teaching facilities in hospitals, child guidance clinics, rehabilitation workshops, special 'Saturday-morning' centres and home teaching schemes. Special schools (1999–2000) numbered 121 with approximately 7,200 pupils. There were also some 8,743 pupils enrolled in about 824 special classes, and 2,115 remedial, resource and home/school liaison teachers were employed for pupils in ordinary national schools in 1999–2000. There is a National Education Officer for travelling children.

Secondary. Voluntary secondary schools are under private control and are conducted in most cases by religious orders. These schools receive grants from the State and are open to inspection by the Department of Education. The number of recognized

secondary schools during the school year 1999–2000 was 424, and the number of pupils in attendance was 211,369. There were 12,180 teachers in 1998–99.

Vocational Education Committee schools provide courses of general and technical education. Pupils are prepared for State examinations and for entrance to universities and institutes of further education. The number of vocational schools during the school year 1999–2000 was 245, the number of full-time students in attendance was 97,998 and the number of teachers 5,497. These schools are controlled by the local Vocational Education Committees; they are financed mainly by State grants and also by contributions from local rating authorities and Vocational Education Committee receipts. These schools also provide adult education facilities for their own areas.

Comprehensive and Community Schools. Comprehensive schools which are financed by the State combine academic and technical subjects in one broad curriculum so that each pupil may be offered educational options suited to his needs, abilities and interests. Pupils are prepared for State examinations and for entrance to universities and institutes of further education. The number of comprehensive and community schools during the school year 1999–2000 was 83 and the number of students in attendance was 51,991. These schools also provide adult education facilities for their own areas and make facilities available to voluntary organizations and to the adult community generally.

The total current expenditure from public funds for second level and further education for 1999 was IR£1,053,700,000.

Education Third-Level. Traditionally, the third-level education system in Ireland has comprised the university sector, the technical and technological colleges and the colleges of education, all of which are substantially funded by the State and are autonomous. In the mid- and late 1990s a number of independent private colleges came into existence, offering a range of mainly business-related courses conferring professional qualifications and, in some instances, recognized diplomas and certificates. Numbers in third-level education have expanded dramatically over the last 25 years, from 21,000 full-time students in 1965 to over 103,000 in 1997–98.

University education is provided by the National University of Ireland, founded in Dublin in 1908, by the University of Dublin (Trinity College), founded in 1592, and by the Dublin City University and the University of Limerick established in 1989. The National University comprises 4 constituent universities—NUI Dublin, NUI Cork, NUI Galway and NUI Maynooth.

St Patrick's College, Maynooth, Co. Kildare is a national seminary for Catholic priests and a pontifical university with the power to confer degrees up to doctoral level in philosophy, theology and canon law.

Besides the University medical schools, the Royal College of Surgeons in Ireland (a long-established independent medical school) provides medical qualifications which are internationally recognized. Courses to degree level are available at the National College of Art and Design, Dublin.

There are 5 Colleges of Education for training primary school teachers. For degree awarding purposes, 3 of these colleges are associated with Trinity College, 1 with Dublin City University and 1 with the University of Limerick. There are also 2 Home Economics Colleges for teacher training, 1 associated with Trinity College and the other with the National University of Ireland, Galway.

Institutes of Technology in 12 centres (Athlone, Carlow, Cork, Dundalk, Dun Laoghaire, Limerick, Tallaght, Galway, Letterkenny, Sligo, Tralee and Waterford) provide vocational and technical education and training for trade and industry from craft to professional level through certificate, diploma and some degree courses. These colleges (with the exception of Dun Laoghaire) were established on a statutory basis on 1 Jan. 1993. Prior to this they operated under the aegis of the Vocational Education Committees (VECs) for their areas. Dun Laoghaire College of Art and Design was designated under the RTC Act 1992, from 1 April 1997. The Dublin Institute of Technology (DIT) was also established on a statutory basis on 1 Jan. 1993. Prior to this it operated under the aegis of City of Dublin VEC. The DIT provides certificate, degree and diploma level courses in engineering, architecture, business studies, catering, music, etc. The Hotel and Catering College in Killybegs continues to operate under the aegis of Co. Donegal VEC.

Total full-time enrolments in the Institutes of Technology/Other Technological Colleges in the 1998–99 academic year were approximately 43,476. The National Council for Educational Awards, established on a statutory basis in 1979, is the validating and awarding authority for courses in the third-level sector outside the universities.

The total full-time enrolment at third-level in institutions aided by the Department of Education and Science in 1998–99 was 108,509. Whereas in the late 1970s only 1 in 5 school leavers went on to university, now 1 out of 2 are doing so.

The total current expenditure from public funds on third-level education during the financial year ended 31 Dec. 1999 was approximately IR£673,000,000.

Agricultural. Teagasc, the Agriculture and Food Development Authority, is the State agency responsible for providing advisory, training, research and development services for the agriculture and food industries. Full-time instruction in agriculture is provided for all sections of the farming community. There are 4 agricultural colleges, administered by Teagasc, and 7 private Teagasc-aided agricultural colleges. Courses in commercial horticulture are also offered, and short courses for adults already farming.

Health. Everybody ordinarily resident in Ireland has either full or limited eligibility for the public health services.

A person who satisfies the criteria of a means test receives a medical card which confers Category 1 or full eligibility on them and their dependants. This entitles the holder to the full range of public health and hospital services, free of charge, i.e. family doctor, drugs and medicines, hospital and specialist services as well as dental, aural and optical services. Maternity care and infant welfare services are also provided.

The remainder of the population have Category 2 or limited eligibility. Category 2 patients receive public consultant and public hospital services subject to certain charges. Persons in Category 2 are liable for a hospital in-patient charge of IR£26 per night up to a maximum of IR£260 in any 12 consecutive months (with effect from 1 Jan. 2000). There is no charge for out-patient services. However, persons in Category 2 are liable for a charge of IR£25 if they attend the Accident and Emergency Department of a hospital without a letter of referral from a General Practitioner.

The Long Term Illness Scheme entitles persons to free drugs and medicines which are prescribed in respect of 15 specific illnesses. The needs of individuals with significant or ongoing medical expenses are met by a range of other schemes which provide assistance towards the cost of prescribed drugs and medicines. The new *Drug Payment Scheme*, with a threshold of IR£42 per month per individual or family, was introduced on 1 July 1999 and replaced the Drug Cost Subsidisation Scheme (DCSS) and the Drug Refund Scheme (DRS). Under the new scheme no individual or family will have to pay more than IR£42 in any calendar month for approved prescribed drugs, medicines and appliances for use by that person or his/her family in that month.

Where an individual or a family is subjected to a significant level of ongoing expenditure on medical expenses, such as general practitioner fees or prescribed drugs due to a long term medical condition, these expenses may be reckoned in determining eligibility for a medical card. Eligibility for a medical card is solely a matter for the Chief Executive Officer of the relevant health board to decide.

Services for Children: Health boards provide, with the co-operation of a wide range of voluntary organizations, comprehensive child welfare and protection services including adoption, fostering, residential care, day care, social work and family support services.

Spending Allowance for Persons in Long-Stay Institutions—provides basic spending money for people with disabilities and other eligible people in long stay institutions (e.g. residential accommodation) who have no other source of income to help them meet the cost of basic necessities. The current maximum rate is IR£13·00 per week (3 May 2000).

Health Contributions—A health contribution of 2% of income is payable by those with Category 2 eligibility. Employers meet the levy in respect of those employees who have a medical card.

In 1998 there were 60 publicly funded acute hospitals in operation with an 84·2% occupancy rate. The average number of in-patient beds available for use over the year was 11,788. There were 69,727 whole-time equivalent numbers employed in health board and voluntary/joint board hospitals and homes for the mentally handicapped at 31 Dec. 1998. Of these 5,153 were medical/dental staff, 6,423 were para-medical and 26,695 were nursing staff.

Welfare. Social Welfare Services (SWS) is the executive arm of the Department of Social, Community and Family Affairs and is responsible for the day to day administration and delivery of social welfare schemes and services through a network of local, regional and decentralized offices. The Department's local delivery of services is structured on a regional basis. There are a total of 10 regions, with offices in Waterford, Cork, Limerick, Galway, Longford, Sligo, Dundalk and three in Dublin.

Social Welfare Schemes. The social welfare supports can be divided into three categories:

—*Social Insurance (Contributory)* payments made on the basis of a Pay Related Social Insurance (PRSI) record. Such payments are funded by employers, employees and the self-employed. Any deficit in the fund is met by Exchequer subvention.

—*Social Assistance (Non Contributory)* payments made on the basis of satisfying a means test. These payments are financed entirely by the Exchequer.

—*Universal services* such as Child Benefit or Free Travel which do not depend on PRSI or a means test.

The Social Welfare Appeals Office (SWAO) is an independent office responsible for determining appeals against decisions on social welfare entitlements.

There are, in addition, three statutory agencies under the aegis of the Department: —*the Combat Poverty Agency* which has responsibilities in the areas of advice to the Minister, research, action programmes and public information in relation to poverty. It also initiates and evaluates pilot schemes aimed at overcoming poverty and examines the nature, causes and extent of poverty in the state.

—*the Pensions Board* which has the function of promoting the security of occupational pensions, their development and the general issue of pensions coverage.

—*Comhairle* which has the function of ensuring that all citizens have easy access to the highest quality of information, advice and advocacy on social services.

In 1999 social welfare expenditure accounted for 8.5% of GNP.

CULTURE

Broadcasting. Public service broadcasting is provided by Radio Telefís Éireann (RTÉ), a statutory body established under the Broadcasting Authority Acts 1960–93. RTÉ is financed principally by TV licence and advertising. In 1996 a total of 972,069 TV licences were issued. Legislation enacted in 1988 provided for the establishment of the Independent Radio and Television Commission to arrange provision of independent commercial radio stations and an independent TV service. There were (1996) 21 local commercial radio stations, 10 community radio stations, 2 special interest Irish language radio stations, 1 independent national radio station and 4 hospital radio stations. There were 2.55m. radio receivers and 1.65m. TV receivers (colour by PAL) in 1997. The IRTC awarded the contract for the first independent TV service which was due to come on air in Sept. 1998. An Irish-language TV channel, TG4, broadcasts for 19 hours a day.

KEY HISTORICAL EVENTS

The area once designated as Palestine, of which Israel forms part, was formerly part of Turkey's Ottoman Empire. During the First World War the Arabs under Ottoman rule rebelled and Palestine was occupied by British forces. In 1917 the British Government issued the Balfour Declaration, stating that it viewed 'with favour the establishment in Palestine of a national home for the Jewish people'. In 1922 the League of Nations recognized 'the historical connection of the Jewish people with Palestine' and 'the grounds for reconstituting their national home in that country', and Britain assumed a mandate over Palestine, pending the establishment there of such a national home. In Nov. 1947 the UN General Assembly passed a resolution calling for the establishment of a Jewish and an Arab state in Palestine. On 14 May 1948 the British Government terminated its mandate and the Jewish leaders proclaimed the State of Israel. No independent Arab state was established in Palestine. Instead the neighbouring Arab states invaded Israel on 15 May 1948. The Jewish state defended itself successfully, and the ceasefire in Jan. 1949 left Israel with one-third more land than had been originally assigned by the UN.

In 1967, following some years of uneasy peace, local clashes on the Israeli-Syrian border were followed by Egyptian mass concentration of forces on the borders of Israel. Israel struck out at Egypt on land and in the air on 5-9 June 1967. Jordan joined in the conflict which spread to the Syrian borders. By 11 June the Israelis had occupied the Gaza Strip and the Sinai peninsula as far as the Suez Canal in Egypt, West Jordan as far as the Jordan valley and the heights east of the Sea of Galilee, including Quneitra in Syria.

A further war broke out on 6 Oct. 1973 when Egyptian and Syrian offensives were launched. Following UN Security Council resolutions a ceasefire finally came into being on 24 Oct. In Sept. 1978 Egypt and Israel agreed on frameworks for peace in the Middle East. A treaty was signed in Washington on 26 March 1979 whereby Israel withdrew from the Sinai Desert in two phases; part was achieved on 26 Jan. 1980 and the final withdrawal by 26 April 1982.

In June 1982 Israeli forces invaded the Lebanon. On 16 Feb. 1985 the Israeli forces started a withdrawal, leaving behind an Israeli trained and equipped Christian Lebanese force to act as a control over and buffer against Muslim Shi'a or Palestinian guerrilla attacks.

In 1993 following declarations by the Prime Minister, Yitzhak Rabin, recognizing the Palestine Liberation Organization (PLO) as representative of the Palestinian people, and by Yasser Arafat, leader of the PLO, renouncing terrorism and recognizing the State of Israel, an agreement was signed in Washington providing for limited Palestinian self-rule in the Gaza Strip and Jericho. Negotiations on the permanent status of the West Bank and Gaza began in 1996. On 4 Nov. 1995 Yitzhak Rabin was assassinated by a Jewish religious extremist. In the subsequent election, a right-wing coalition led by Binyamin Netanyahu took office. Peace talks with the Palestinians then stalled. In Oct. 1998 Israel accepted partial withdrawal from the West Bank on condition that the Palestinians cracked down on terrorism. The following month, 2% of the West Bank was handed over to Palestinian control. Further moves were put on hold after the collapse of the Netanyahu coalition and the announcement of early elections.

In Sept. 1999 Ehud Barak provided the first evidence that the Middle East peace process was back on track by releasing nearly 200 Palestinian prisoners and by handing over 430 sq. km of land on the West Bank. In May 2000 Israel completed its withdrawal from south Lebanon, 22 years after the first invasion. By Oct. 2000

violence had broken out again between Israelis and Palestinians, fueled by the conflict over control of Jerusalem, with terrorist acts a daily occurrence, leading to heavy casualties on both sides. With peace talks stalled once again, Barak called for a nationwide vote of confidence by putting himself up for re-election as Prime Minister. Defeated by the right-wing Ariel Sharon in Feb. 2001, he retired from politics.

CONSTITUTION AND GOVERNMENT

Israel is an independent sovereign republic, established by proclamation on 14 May 1948.

In 1950 the Knesset (*Parliament*), which in 1949 had passed the Transition Law dealing in general terms with the powers of the Knesset, President and Cabinet,

resolved to enact from time to time fundamental laws, which eventually, taken together, would form the Constitution. The 9 fundamental laws that have been passed: the Knesset (1958), Israel Lands (1960), the President (1964), the Government (1968), the State Economy (1975), the Army (1976), Jerusalem, capital of Israel (1980), the Judicature (1984) and the Electoral System (1996).

The *President* (head of state) is elected by the Knesset by secret ballot by a simple majority; his term of office is 5 years. He may be re-elected once.

The Knesset, a one-chamber Parliament, consists of 120 members. It is elected for a 4-year term by secret ballot and universal direct suffrage. Under the system of election introduced in 1996, electors vote once for a party and once for a candidate for Prime Minister. To be elected Prime Minister, a candidate must gain more than half the votes cast, and be elected to the Knesset. If there are more than 2 candidates and none gain half the vote, a second round is held 15 days later. The Prime Minister forms a cabinet (no fewer than 8 members and no more than 18) with the approval of the Knesset.

(target, US\$5,000m.). In 1996 the Prime Minister inaugurated an acceleration of the privatization process, and took over privatization powers from the Ministry of Finance. Efforts to generate some 0.5m. jobs are being made to cope with the influx of Soviet immigrants.

Performance. The economy grew by 2.3% in 1999, up on 1997 and 1998 but down from an average of 6% between 1991 and 1995. For 2000 growth of 5.4% was forecast. Total GDP was US\$100.5bn. in 1998. The current account deficit in 1997 stood at US\$–5,014m.

There are 26 commercial banks headed by Bank Leumi Le Israel, Bank Hapoalim and Israel Discount Bank, 2 merchant banks, 1 foreign bank, 15 mortgage banks and 9 lending institutions specifically set up to aid industry and agriculture. The government holds a majority stake in the 4 largest banks, but these are now (1997) in process of privatization.

Oil and Gas. The only significant hydrocarbon is oil shale. Crude petroleum reserves in 1997 were 4m. bbls.

Water. In the northern Negev farming has been aided by the Yarkon-Negev water pipeline. This has become part of the overall project of the 'National Water Carrier', which is to take water from the Sea of Galilee (Lake Kinnereth) to the south. The plan includes a number of regional projects such as the Lake Kinnereth-Negev pipeline which came into operation in 1964; it has an annual capacity of 320m. cu. metres. Total water production in 1997 amounted to 2,188m. cu. metres, of which 1,959m. cu. metres was consumed.

Minerals. The most valuable natural resources are the potash, bromine and other salt deposits of the Dead Sea. Potash production in 1996 was 2,500,000 tonnes; phosphate rock production was 2,450,000 tonnes. Annual salt production averages 800,000 tonnes.

Agriculture. In the coastal plain mixed farming, poultry raising, citriculture and vineyards are the main agricultural activities. The Emek (the Valley of Jezreel) is the main agricultural centre of Israel. Mixed farming is to be found throughout the valleys; the sub-tropical Beisan and Jordan plainlands are also centres of banana plantations and fish breeding. In Galilee mixed farming, olive and tobacco plantations prevail. The Hills of Ephraim are a vineyard centre; many parts of the hill country are under afforestation.

(124,600 people lived in 269 *Kibbutzim* in 1995.) (2) The *Moshav* (workers' co-operative smallholders' settlement) which is founded on the principles of mutual aid and equality of opportunity between the members, all farms being equal in size (160,000 in 411). (3) The *Moshav Shitufi* (co-operative settlement), which is based on collective ownership and economy as in the *Kibbutz*, but with each family having its own house and being responsible for its own domestic services (13,100 in 43). (4) Other rural settlements in which land and property are privately owned and every resident is responsible for his own well-being. In 1996 there were 233 villages with a population of 141,500.

Forestry. In 1995 forests covered 102,000 ha or 4·9% of the total land area. Timber production was 124,000 cu. metres in 1998.

Of the total labour force 29.0% worked in education, health, social and personal services, 18.0% in manufacturing and mining, and 15.3% in trade. A 'social-economic pact' between government, employers and trade unions in May 1991 aimed to create some 32,000 new jobs to lessen the impact of increased immigration. Unemployment was 9.3% in May 1998, up from 6.4% in 1996.

In 1995 there were 140,000 fax machines. There were approximately 1m. Internet users in July 2000.

Postal Services. The Ministry of Communications supervises the postal service. In 1995 there were 662 post offices and postal agencies, and 48 mobile post offices.

SOCIAL INSTITUTIONS

Justice. *Law.* Under the Law and Administration Ordinance, 5708/1948, the first law passed by the Provisional Council of State, the law of Israel is the law which was obtaining in Palestine on 14 May 1948 in so far as it is not in conflict with that Ordinance or any other law passed by the Israel legislature and with such modifications as result from the establishment of the State and its authorities.

Capital punishment was abolished in 1954, except for support given to the Nazis and for high treason.

The law of Palestine was derived from Ottoman law, English law (Common Law and Equity) and the law enacted by the Palestine legislature, which to a great extent was modelled on English law.

Civil Courts. Municipal courts, established in certain municipal areas, have criminal jurisdiction over offences against municipal regulations and bylaws and certain specified offences committed within a municipal area. Magistrates courts, established in each district and sub-district, have limited jurisdiction in both civil and criminal matters. District courts, sitting at Jerusalem, Tel Aviv and Haifa, have jurisdiction, as courts of first instance, in all civil matters not within the jurisdiction of magistrates courts, and in all criminal matters, and as appellate courts from magistrates courts and municipal courts. The 14-member Supreme Court has jurisdiction as a court of first instance (sitting as a High Court of Justice dealing mainly with administrative matters) and as an appellate court from the district courts (sitting as a Court of Civil or of Criminal Appeal).

In addition, there are various tribunals for special classes of cases. Settlement Officers deal with disputes with regard to the ownership or possession of land in settlement areas constituted under the Land (Settlement of Title) Ordinance.

Religious Courts. The rabbinical courts of the Jewish community have exclusive jurisdiction in matters of marriage and divorce, alimony and confirmation of wills of members of their community and concurrent jurisdiction with the civil courts in all other matters of personal status of all members of their community with the consent of all parties to the action.

The courts of the several recognized Christian communities have a similar jurisdiction over members of their respective communities.

The Muslim religious courts have exclusive jurisdiction in all matters of personal status over Muslims who are not foreigners, and over Muslims who are foreigners, if under the law of their nationality they are subject in such matters to the jurisdiction of Muslim religious courts.

Where any action of personal status involves persons of different religious communities, the President of the Supreme Court will decide which court shall have jurisdiction, and whenever a question arises as to whether or not a case is one of personal status within the exclusive jurisdiction of a religious court, the matter must be referred to a special tribunal composed of 2 judges of the Supreme Court and the president of the highest court of the religious community concerned in Israel.

In 1996 government expenditure on public order and safety totalled 4,481m. shekels.

Religion. Religious affairs are under the supervision of a special Ministry, with departments for the Christian and Muslim communities. The religious affairs of each community remain under the full control of the ecclesiastical authorities concerned: in the case of the Jews, the Sephardi and Ashkenazi Chief Rabbis, in the case of the Christians, the heads of the various communities, and in the case of the Muslims, the Qadis. The Druze were officially recognized in 1957 as an autonomous religious community.

In 1997 there were: Jews, 4,701,600; Muslims, 867,900; Christians, 126,100; Druze, 96,700.

The Chief Rabbi is Israel Meir Lau.

Education. The adult literacy rate in 1998 was 95.7% (male, 97.7%; female, 93.7%). There is free and compulsory education from 5 to 16 years and optional free education until 18. There is a unified state-controlled elementary school system with a provision for special religious schools. The standard curriculum for all elementary schools is issued by the Ministry with a possibility of adding supplementary subjects

comprising not more than 25% of the total syllabus. Most schools in towns are maintained by municipalities, a number are private and some are administered by teachers' co-operatives or trustees.

Statistics relating to schools under government supervision, 1995–96:

There are also a number of private schools maintained by religious foundations—Jewish, Christian and Muslim—and also by private societies.

PALESTINIAN-ADMINISTERED TERRITORIES

KEY HISTORICAL EVENTS

Under the Israeli-Palestinian agreement of 28 Sept. 1995 the Israeli army re-deployed from 6 of the 7 largest Palestinian towns in the West Bank and from 460 smaller towns and villages. Following this in April 1996 an 82-member *Palestinian Council* was elected and also a head (*Rais*) of the executive authority of the Council. The rest of the West Bank stayed under Israeli army control with some progressive redeployments at 6-month intervals, although Palestinian civil affairs here too were administered by the Palestinian Council. Negotiations on the permanent status of the West Bank and Gaza began in May 1996. Issues to be resolved include the position of 0.17m. Israelis in the West Bank and 0.18m. in East Jerusalem, the status of Jerusalem, military locations and water supplies.

Following the opening of an archaeological tunnel in Jerusalem, armed clashes broke out at the end of Sept. 1996 between demonstrators and Palestinian police on the one hand and Israeli troops. On 18 Nov. 1996 the Israeli Minister of Defence approved plans for an expansion of Jewish settlement in the West Bank. Under an agreement brokered by King Hussein of Jordan and signed by the Prime Minister of Israel and the President of the Palestinian Authority on 15 Jan. 1997 Israeli troop

withdrawals from 80% of Hebron and all rural areas of the West Bank were scheduled to take place in 3 phases between 28 Feb. 1996 and 31 Aug. 1998.

The Israeli decision in Feb. 1997 to continue to promote Jewish settlement in the Jerusalem suburb of Har Homa was perceived by the Palestinian authorities as a hostile move and caused a setback to peace negotiations. In 1998 an American proposal that Israel should withdraw from 13.1% of the West Bank was not agreed on, but at a meeting in the USA in Oct. Israel accepted partial withdrawal on condition that the Palestinians cracked down on terrorism.

President Netanyahu's defeat by Ehud Barak in Israel's 1999 elections led to improved relations with the Palestinian Liberation Organization. Israel and the PLO signed the Sharm el-Shakh Memorandum in Sept. 1999 which established a time-frame for the implementation of outstanding commitments from earlier Palestinian-Israeli agreements. Israel conducted 2 more phases of redeployment from the West Bank in Sept. 1999 and Jan. 2000. The permanent status negotiations, having commenced in May 1996, began in earnest in Nov. 1999. In March 2000 Yasser Arafat accepted Israel's plan for a further expansion of self-rule in the West Bank, involving the transfer of another 6.1% of the West Bank to the control of the Palestinian Authority. As a result, 39.8% of the West Bank is under full or partial Palestinian control.

TERRITORY AND POPULATION

The **West Bank** (preferred Palestinian term, Northern District) has an area of 5,651 sq. km and a projected population for 2000 of 2,012,000, including 180,000 Jewish settlers and 10,000 troops deployed there. 97% of the population in 1988 were Palestinian Arabs of whom some 85% were Muslims, 7.4% Jewish and 8% Christian. In 1995 there was a Palestinian diaspora of 3.3m. The birth rate in 1999 was estimated at 39.5 per 1,000 population and the death rate 4.6 per 1,000. In 1995 the infant mortality rate was 25.5 per 1,000 live births. The fertility rate in 1997 was 5.61 births per woman. In 1994 there were 77,604 private cars and 21,714 commercial vehicles and trucks registered. There were (1998-99) 447,369 pupils in basic stage education and 38,121 in secondary stage, plus 36,224 students in institutions of higher education. In 1998 there were 43 hospitals.

The **Gaza Strip** (preferred Palestinian term, Gaza District) has an area of 370 sq. km and a population of 792,000 in 1995. The population doubled between 1975 and 1995. The UN gives a projected population for 2010 of 1.44m. Crude birth rate in 1999 was 44.73 per 1,000 population. The death rate was estimated at 4.39 per 1,000 population. The fertility rate in 1997 was 6.91 births per woman. Infant mortality, 1995, 30.2 per 1,000 live births. Agricultural production, 1998 estimates, in 1,000 tonnes: oranges, 105; tomatoes, 48; potatoes, 35; cucumbers and gherkins, 18; grapefruit and pomelos, 10. In 1998-99 there were 299,545 students in basic stage education, 27,687 in secondary stage and 30,058 students in higher education. In 1998 there were 11 hospitals.

The chief town is Gaza itself. In 1984, over 98% of the population were Arabic-speaking Muslims. In 1995 an estimated 94.2% of the population lived in urban areas. Citrus fruits, wheat and olives are grown, with farm land covering 193 sq. km (1980) and occupying most of the active workforce. In 1993 there were 20,434 private cars and 4,518 commercial vehicles and trucks registered. Gaza International Airport, at the southern edge of the Gaza Strip, opened in Nov. 1998. Telecommunications development has been rapid, the number of fixed line telephone subscribers more than trebling between 1997 and 2000. In March 2000 there were 230,000 subscribers. In 1998 life expectancy at birth was 71.8 years.

CONSTITUTION AND GOVERNMENT

In April 1996 the Palestinian Council removed from its Charter all clauses contrary to its recognition by Israel, including references to armed struggle as the only means of liberating Palestine, and the elimination of Zionism from Palestine. The *President* is directly elected and heads the executive organ, the Palestinian National Authority, one fifth of whose members he appoints, while four fifths are elected by the *National Council*. The latter comprises 88 members and is directly elected by the first-past-the-post system from 16 electoral districts. The Palestinian Authority was created by agreement of the PLO and Israel as an interim instrument of self-rule for Palestinians living on the West Bank and Gaza Strip. The failure of the PLO and

Israel to strike a permanent status agreement has resulted in the Authority retaining its powers. It is entitled to establish ministries and subordinate bodies, as required to fulfil its obligations and responsibilities. It possesses legislative and executive powers within the functional areas transferred to it in the 1995 Interim Agreement. Its territorial jurisdiction is restricted to Areas A and B in the West Bank and approximately two-thirds of the Gaza Strip.

Following an Israeli-Palestinian agreement on customs duties and VAT in Aug. 1994 the Palestinians set up their own customs and immigration points into Gaza and Jericho. Israel collects customs dues on Palestinian imports through Israeli entry points and transfers these to the Palestinian treasury.

There is a Palestinian *Council for Reconstruction and Development*.

RECENT ELECTIONS

Elections for *President* and *National Council* were held on 20 Jan. 1996. The electorate was 1,013,200; turn-out was 84%. 672 candidates stood for the Council. Yasser Arafat was elected *President* against 1 opponent by 88.1% of votes cast, and was sworn in on 12 Feb. 1996. In the *National Council* elections, 55 seats went to the Liberation Movement of Palestine, 15 to independents, 7 to Independent Fatah, 4 to Independent Islamists, 3 to Independent Christians, 1 to Samaritans and 1 other, with 2 vacant.

KEY HISTORICAL EVENTS

A part of the Roman Empire and the Holy Roman Empire that succeeded it, Italy was divided into several states including a number of city states such as Venice, Florence and Genoa. Much of the territory was under the rule of the Pope while France, Spain and Austria had possessions at various times. From 1815 a strong movement grew throughout the Italian states for *risorgimento* (unification) and for freedom from Austrian control. Victor Emmanuel II, King of Sardinia-Piedmont

from 1849, his prime minister from 1852, Count Cavour, and Giuseppe Garibaldi, an Italian soldier, together achieved success for the movement. The first Italian parliament assembled in Feb. 1861, and on 17 March declared Victor Emmanuel King of Italy.

Fascism spread rapidly after 1918 and in 1922 Benito Mussolini, leader of the Fascist Party, was appointed prime minister. In 1924 he established himself as dictator with the title *Duce*. His internal policy, with a programme of public works, greater efficiency and better law and order, was successful. In 1929 the Lateran Treaties with the Papacy ended over a century of tension between Church and State. However, his aggressive foreign policy as evinced by the invasion of Ethiopia in 1935 and his alliance with Nazi Germany in 1936 was eventually to lead to his downfall. During the Second World War (1939–45) British forces captured much of Italy's colonial empire and in 1942 occupied Libya. The allies conquered Sicily and Mussolini was compelled to resign in July 1943. In 1945 he was captured and killed by Italian partisans. On 10 June 1946 Italy became a republic.

In the post war years the ruling Christian Democrat Party resisted the challenge of the Communists and pursued a strongly pro-West and European policy. But no single government was able to reform an ailing economy or face up to lawlessness and corruption. Changes of administration were frequent. From 1947 to the early 1990s, Italy had no less than 57 governments. In 1992, in the wake of Italy's humiliating exit from Europe's Exchange Rate Mechanism (ERM), the old political establishment was driven out of office. Several prominent politicians were accused of links to organized crime and some went to prison. A new era for Italian politics opened the way for a radical modernization of the country's economic and social structure.

Rome: Built among seven hills, Rome is situated in the central area of Italy. Founded in 753 BC, according to legend Rome gets its name from the twins Romulus and Remus who were suckled by a she-wolf after being abandoned on the banks of the River Tiber. Known as the Eternal City, its wealth of ancient monuments and churches and its rich artistic heritage make it one of the most visited cities in Europe.

The official language is Italian, spoken by 94.1% of the population in 1991. There are 0.3m. German-speakers in Bolzano and 30,000 French-speakers in Valle d'Aosta.

In addition to Sicily and Sardinia, there are a number of other Italian islands, the largest being Elba (363 sq. km), and the most distant Lampedusa, which is 205 km from Sicily but only 113 km from Tunisia.

The climate varies considerably with latitude. In the south, it is warm temperate, with little rain in the summer months, but the north is cool temperate with rainfall more evenly distributed over the year. Florence, Jan. 47.7°F (8.7°C), July 79.5°F (26.4°C). Annual rainfall 38" (725.8 mm). Milan, Jan. 38.7°F (3.7°C), July 73.4°F (23.0°C). Annual rainfall 32" (819 mm). CONSTITUTION AND GOVERNMENT

The Constitution dates from 1948. Italy is 'a democratic republic founded on work'. Parliament consists of the *Chamber of Deputies* and the *Senate*. The Chamber is elected for 5 years by universal and direct suffrage and consists of 630 deputies. The Senate is elected for 5 years on a regional basis by electors over the age of 25, each Region having at least 7 senators. The total number of senators is 315. The Valle d'Aosta is represented by 1 senator only, the Molise by 2. The President of the Republic can nominate 11 senators for life from eminent persons in the social, scientific, artistic and literary spheres. The President may become a senator for life. The *President* is elected in a joint session of Chamber and Senate, to which are added 3 delegates from each Regional Council (1 from the Valle d'Aosta). A two-thirds majority is required for the election, but after a third indecisive scrutiny the absolute majority of votes is sufficient. The President must be 50 years or over; term of office, 7 years. The Speaker of the Senate acts as the deputy President. The President can dissolve the chambers of parliament, except during the last 6 months of the presidential term. An attempt to create a new constitution, which had been under consideration for 18 months, collapsed in June 1998.

A *Constitutional Court*, consisting of 15 judges who are appointed, 5 each by the President, Parliament (in joint session) and the highest law and administrative courts, can decide on the constitutionality of laws and decrees, define the powers of the State and Regions, judge conflicts between the State and Regions and between the Regions, and try the President and Ministers.

The revival of the Fascist Party is forbidden. Direct male descendants of King Victor Emmanuel are excluded from all public offices, have no right to vote or to be elected, and are banned from Italian territory; their estates are forfeit to the State. Titles of nobility are no longer recognized, but those existing before 28 Oct. 1922 are retained as part of the name.

A referendum was held in June 1991 to decide whether the system of preferential voting by indicating 4 candidates by their listed number should be changed to a simpler system, less open to abuse, of indicating a single candidate by name. The electorate was 46m. Turn-out was 62.5% (there was a 50% quorum). 95.6% of votes cast were in favour of the change. As a result, an electoral reform of 1993 provides

for the replacement of proportional representation by a system in which 475 seats in the Chamber of Deputies are elected by a first-past-the-post single-round vote and 155 seats by proportional representation in a separate single-round vote on the same day. There are 27 electoral regions. There is a 4% threshold for entry to the Chamber of Deputies.

At a further referendum in April 1993, turn-out was 77%. Voters favoured the 8 reforms proposed, including a new system of election to the Senate and the abolition of some ministries. 75% of the Senate is now elected by a first-past-the-post system, the remainder by proportional representation; no party may present more than 1 candidate in each constituency. In July 1997 an all-party parliamentary commission on constitutional reform proposed a directly elected president with responsibility for defence and foreign policy, the devolving of powers to the regions, a reduction in the number of seats in the Senate and in the lower house and the creation of a third chamber to speak on behalf of the regions.

INTERNATIONAL RELATIONS

Italy is a member of the UN, WTO, NATO, BIS, OECD, EU, Council of Europe, WEU, OSCE, CERN, CEI, Inter-American Development Bank, Asian Development Bank, IOM and the Antarctic Treaty. Italy is a signatory to the Schengen Accord of June 1990 which abolishes border controls between Italy, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Luxembourg, the Netherlands, Norway, Portugal, Spain and Sweden.

Italy has played an important role in bringing Iran back into the international community, with President Mohammad Khatami visiting Rome in March 1999, in the process becoming the first Iranian leader to visit the west since the 1979 revolution. Foreign minister Lamberto Dini was also quick to re-establish relations with Col. Qadhafi of Libya following the transfer of the Lockerbie suspects for trial in the Netherlands.

ECONOMY

Services account for 65.8% of GDP, industry 31.6% and agriculture 2.6% in 1998.

Policy. The government is committed to a reduction in borrowing, a strong currency and low inflation. It has embarked on an ambitious privatization programme to reduce radically its presence in industry and banking. In 1997 the government completed its biggest privatization to date with the 26,000bn. lire flotation of Telecom Italia. It also sold a third tranche in the ENI oil and gas group, privatized the Banca di Roma, Italy's second largest banking group, and pursued this programme with further sell-offs in 1998, including the sale of a fourth tranche in ENI. Privatization proceeds in 1998 amounted to US\$13.6bn.—between 1992 and 1998 total privatization proceeds came to US\$63bn.

In May 1998 Italy became one of the 11 founder members of the EMU. The OECD reports that with this primary political objective achieved, the tasks of economic policy are to consolidate the progress made on the macroeconomic front, and implement the structural reforms needed for faster employment growth.

Performance. Total GDP was US\$1,185bn. in 1998. Real GDP growth in 1998 was 1.43% but only 1.0% in 1999, the lowest of any of the euro-11 economies. Growth of 2.7% was forecast for 2000. With the terms of trade improving and import growth decelerating, the trade surplus is expected to grow despite the adverse affects of

currency depreciation in Asian countries. The OECD commented that this, together with the projected disappearance of the deficit on the invisible account, may keep the current account surplus close to 3.5% in 1999, reinforcing Italy's newly-achieved position as a net creditor *vis-à-vis* the rest of the world.

Budget. Total revenue and expenditure for calendar years, in 1,000bn. lire:

	<i>Revenue</i>	<i>Expenditure</i>		<i>Revenue</i>	<i>Expenditure</i>
1994	664,920	818,824	1997	879,382	941,079
1995	736,061	860,181	1998	840,722	905,614
1996	801,855	927,504	1999	867,788	899,709

Budgets for 1998 (and 1997) in 1,000,000m. lire: revenue, 581,188 (591,161) of which tax 546,188 (554,194); expenditure, 673,182 (690,737) of which capital expenditure 68,598 (67,070) and interest payments 181,121 (193,002).

The 1998 budget provided for an increase in value-added tax. Some reforms due to take place in 1998 were meant to reallocate the existing tax burden in a more business-friendly way. The rate of corporation tax was to come down from 53.2% to 37%. Other measures include reducing social security contributions, and a new two-tier income tax, brought in to encourage entrepreneurs to reinvest in profits and issue equity. Accompanying the tax reform was the devolution of substantial taxing powers from the central government to the regions. The budget deficit in both 1997 and 1998 was 2.7% of GDP.

The current account balance in 1998 was US\$20.4bn.

VAT is 20% (reduced rate, 10%).

The public debt at 31 Dec. 1997 totalled 2,100,686,000m. lire. Between 1992 and 1997 the public deficit came down from more than 10% to 3%, or possibly less, of gross domestic product. Interest rates have also declined significantly.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Italy; irrevocable conversion rate 1,936.27 lire to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002—until then the national currency will be used for payment in cash. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking; by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and lire until the lira is withdrawn from circulation—which must be by 1 July 2002 and is scheduled for 28 Feb. 2002.

The *lira* (ITL) notionally consists of 100 *centesimi*. Inflation was 1.7% in 1997 (the lowest rate in 30 years) and 1.8% in 1998, with a forecast of 1.5% in 1999. The Economic Bulletin reported that 'professional forecasters expect inflation to decline to just above 1% in line with the forecast for the euro area as a whole'. The lira left the ERM in Sept. 1993 and rejoined in Nov. 1996. Gold reserves were 78.82m. troy oz and foreign exchange reserves were US\$51,542m. in Feb. 1998. Total money supply in Dec. 1997 was 646,000bn. lire.

Banking and Finance. The bank of issue is the Bank of Italy (founded 1893). It is owned by public-sector banks. Its *Governor* (Antonio Fazio, b. 1936) is selected without fixed term by the 13 directors of the Bank's non-executive board. In 1991 it received increased responsibility for the supervision of banking and stock exchange affairs, and in 1993 greater independence from the government. Its gold reserve amounted to 40,929bn. lire in Dec. 1998; the foreign credit reserves of the Exchange Bureau (*Ufficio Italiano Cambi*) amounted to 88,611bn. lire.

The number of banks has gradually been declining in recent years, from 1,176 in 1990 to 862 in 2000. Of the 921 banks in 1998, 562 were co-operative banks. Italy's largest bank is Banca Intesa, following its merger with Banca Commerciale Italiana in 1999. In June 2000 it had assets of 643,000bn. lire. Other major banks are San Paolo-IMI and UniCredito Italiano.

The 'Amato' law of July 1990 gave public sector banks the right to become joint stock companies and permitted the placing of up to 49% of their equity with private shareholders.

On 31 Dec. 1997 the post office savings banks had deposits and current accounts of 307,481,000m. lire. On 31 Dec. 1998 credit institutions had deposits of 892,091bn. lire.

Legislation reforming stock markets came into effect in Dec. 1990. In 1996 local stock exchanges, relics of pre-unification Italy, were closed, and stock exchange activities concentrated in Milan.

Weights and Measures. The metric system is in use. 1 quintal = 100 kg.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 64m. kW in 1997 and the total power generated in 1998 was 243.08bn. kWh (18% hydro-electric). Consumption in 1997 was 253,673m. kWh, of which 58,507m. kWh was for domestic use. Consumption per capita was 4,407 kWh in 1997. Italy has four nuclear reactors in permanent shutdown, the last having closed in 1990.

Oil and Gas. Oil production, 1998, 1,815,684 tonnes. Proven oil reserves in 1999 were 0.6bn. bbls. In 1999 natural gas production was 17.6bn. cu. metres with proven reserves of 230bn. cu. metres.

Minerals. Fuel and mineral resources fail to meet needs. Only sulphur and mercury yield a substantial surplus for exports.

Production of metals and minerals (in tonnes) was as follows:

In 1997 there were 18,605 sq. km of agricultural and forest lands, distributed as follows (in 1,000 ha): forage and pasture, 3,860; woods, 3,771; cereals, 3,137; olive trees, 1,147; vines, 837; garden produce, 597; leguminous plants, 65.

At the 1991 census agricultural holdings numbered 3,023,344 and covered 22,702,356 ha. 2,893,145 owners (95.7%) farmed directly 15,961,093 ha (70.3%); 118,020 owners (3.9%) worked with hired labour on 6,603,522 ha (29.1%); 95,045 share-croppers (3.1%) tilled 1,208,337 ha (5.3%); the remaining 12,179 holdings (0.4%) of 137,740 ha (0.6%) were operated in other ways. By 1997 agricultural and forest lands covered 20,156,050 ha, of which 14,833,050 sq. km was in active agricultural use. There were 2.5m. farms in 1998. Agriculture accounted for 7.1% of exports and 15.3% of imports in 1998. Figures compiled by the Soil Association, a British organization, show that in 1999 Italy set aside 900,000 ha (5.3% of its agricultural land) for the growth of organic crops.

Italy's annual grape crop is the highest in the world.

Wine production in 1998 totalled 5,691,000 tonnes. Italy and France are by far the largest wine producers in the world. France was the leading producer in 1997, but Italy produced more in 1998. Wine consumption in Italy has declined dramatically in recent times, from more than 110 litres per person in 1966 to 50 litres per person in 1997.

Livestock, 1996: cattle, 7,174,000; sheep, 10,668,000; pigs, 8,171,000; goats, 1,099,000; horses, 323,000; donkeys, 30,000; mules, 16,000; chickens, 138,000,000.

Environment. According to the *World Bank Atlas* Italy's carbon dioxide emissions in 1996 were the equivalent of 7.0 tonnes per capita.

Fisheries. The fishing fleet comprised, in 1994, 15,798 motor boats of 245,637 gross tonnes. The catch in 1998 was 315,593 tonnes, of which more than 98% were from marine waters.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in Italy in April 2000 were Telecom Italia (market capitalization of US\$78,795.3m.), T.I.M. (market capitalization of US\$69,710.7m.) and Enel (market capitalization of US\$53,840.1m.).

The main branches of industry are: (% of industrial value added at factor cost in 1996) textiles, clothing, leather and footwear (11.2%), food, beverages and tobacco (8.0%), energy products (11.8%), agricultural and industrial machines (9.2%), metal products except machines and means of transport (8.9%), mineral and non-metallic mineral products (5.8%), timber and wooden furniture (4.5%), electric plants and equipment (6.7%), chemicals and pharmaceuticals (8.2%), means of transport (5.4%).

In Jan. 2001 the seasonally adjusted unemployment rate fell to 9.9%, its lowest level for eight years. In 1998, 60.9% of the workforce were in services, 33.0% in industry and 6.2% in agriculture. There are strong indications of labour markets having become less rigid, especially in the north. In the centre and north unemployment was 5.9% in July 1999; in the relatively poor south, it was 22%. In 1996 the difference in the unemployment rates in the north and in the south was 12%, compared to a difference of just 2% in the 1960s. Over 60% of Italy's jobless have been out of work for more than a year. Pensionable retirement age was 60 for men and 55 for women in 1991, but this is being progressively raised to 65 for both sexes. In 1998 the rate of employment among people aged 55–64 was just 27%. There are plans to introduce a 35-hour week during 2001.

In 1997 parliament approved the so-called 'Treu Package', which involves a large number of institutional changes regarding working hours and apprenticeships, mainly for young people from the south, and the introduction of employment agencies. As a consequence, the share of temporary workers over total employees had grown from 6.2% in 1993 to 8.6% in 1998.

Trade Unions. There are 3 main groups: the Confederazione Generale Italiana del Lavoro (CGIL; no longer Communist-dominated), the Confederazione Italiana Sindacati Lavoratori (CISL; Catholic), and the Unione Italiana del Lavoro (UIL). Membership: CGIL (1994), 5.2m. (2.7m. retired); CISL (1999), 4.0m. (2.0m. retired); UIL (1994), 1.7m. (0.5m. retired). In referendums held in June 1995 the electorate voted to remove some restrictions on trade union representation, end government involvement in public sector trade unions and end the automatic deduction of trade union dues from wage packets.

JAMAICA

Capital: Kingston

Population estimate, 2000: 2.59m.

GDP per capita: (PPP\$) 3,389

HDI/world rank: 0.735/83

KEY HISTORICAL EVENTS

Jamaica was discovered by Columbus in 1494 and was occupied by the Spaniards from 1509 until 1655 when the island was captured by the English. In 1661 a representative constitution was established consisting of a governor, privy council, legislative council and legislative assembly. The slavery introduced by the Spanish was augmented as sugar production increased in value and extent in the 18th century. The plantation economy collapsed with the abolition of the slave trade

in the late 1830s. The 1866 Crown Colony government was introduced with a legislative council. In 1884 a partially elective legislative council was instituted. Women were enfranchised in 1919. By the late 1930s, demands for self-government increased and the constitution of Nov. 1944 stated that the governor was to be assisted by a freely-elected house of representatives of 32 members, a legislative council (the upper house) of 15 members, and an executive council. In 1958 Jamaica joined with Trinidad, Barbados, the Leeward Islands and the Windward Islands to create the West Indies Federation; but Jamaica withdrew in 1961. In 1959 internal self-government was achieved and in 1962 Jamaica became an independent state within the British Commonwealth.

TERRITORY AND POPULATION

Jamaica is an island which lies in the Caribbean Sea about 150 km south of Cuba. The area is 4,411 sq. miles (11,425 sq. km). The population at the census of 7 April 1991 was 2,374,193. Estimated population in 1995 was 2,500,025, distributed on the basis of the 13 parishes of the island as follows: Kingston and St Andrew, 683,700; St Thomas, 88,600; Portland, 78,300; St Mary, 111,200; St Ann, 155,800; Trelawny, 72,100; St James, 167,100; Hanover, 67,600; Westmoreland, 133,800; St Elizabeth, 148,200; Manchester, 173,500; St Catherine, 398,600; Clarendon, 221,500. 1995 density; 219 per sq. km.

The UN gives a projected population for 2010 of 2.76m.

Chief towns: Kingston, 655,000 (in 1999), metropolitan area; (1995 figures) Spanish Town, 110,400; Portmore, 93,800; Montego Bay, 82,000; May Pen, 45,900; Mandeville, 39,900.

Annual population growth rate, 1990-99, 0.9%; infant mortality, 1998, 10 per 1,000 live births; fertility rate, 1999, 2.4 births per woman.

CLIMATE

A tropical climate but with considerable variation. High temperatures on the coast are usually mitigated by sea breezes, while upland areas enjoy cooler and less humid conditions. Rainfall is plentiful over most of Jamaica, being heaviest in May and from Aug. to Nov. The island lies in the hurricane zone. Kingston, Jan. 76°F (24.4°C), July 81°F (27.2°C). Annual rainfall 32" (800 mm).

CONSTITUTION AND GOVERNMENT

Under the Constitution of Aug. 1962 the Crown is represented by a Governor-General appointed by the Crown on the advice of the Prime Minister. The Governor-General is assisted by a Privy Council of 6 appointed members. The Legislature

comprises the *House of Representatives* and the *Senate*. The Senate consists of 21 senators appointed by the Governor-General, 13 on the advice of the Prime Minister, 8 on the advice of the Leader of the Opposition. The House of Representatives (60 members) is elected by universal adult suffrage for a period not exceeding 5 years. Electors and elected must be Jamaican or Commonwealth citizens resident in Jamaica for at least 12 months before registration. It is likely that Jamaica will become a republic in the early part of the 21st century, with Queen Elizabeth II being replaced as head of state by a ceremonial president.

KEY HISTORICAL EVENTS

The present imperial family are the direct descendants of the house of Yamato which united the nation in about 200 AD. From 1186 until 1867 successive families of the military Shoguns exercised the temporal power. For centuries Japan followed a policy of national isolation. The 16th century marked the beginning of foreign trade but in the 17th century all exchange with Europeans and all trade, except with the Dutch, was proscribed. Not until 1859 was the country opened to foreign trade and residence. In 1867 the Emperor Meiji recovered the imperial power after the abdication on 14 Oct. 1867 of the fifteenth and last Tokugawa Shogun Keiko.

In 1871 the feudal system (*Hōken Seido*) was abolished and in the early 1890s constitutional government was introduced by the Emperor. Japan's victory over Russia in the war of 1904 prevented Russian expansion into Korea and consolidated Japan's position as the strongest military power in Asia. Japan used the pretext of the Anglo-Japanese alliance to attack Chinese territory during the First World War. Bad feelings over the terms of the subsequent peace treaty led to continuing hostility between the two countries.

Economic distress, population growth (from 30m. in 1868 to 65m. in 1930) and a sense of dissatisfaction with the 'unjapanese' system of constitutional government led to the emergence between the wars of extremist nationalist and militarist movements. Plots among the young army officers, a revolt in Manchuria and the assassination of two prime ministers highlighted the weaknesses of central government. In 1936 a military revolt in Tokyo gave the premiership to Konoe Fumimaro, a popular but ineffective figure, who failed to prevent further militarization of the country. In 1938 a national mobilization law was passed and in 1940 all political parties merged into the Imperial Rule Assistance Association. On 27 Sept. 1940 Germany, Italy and Japan signed a 10 year pact to assure their mutual co-operation in the establishment of a 'new world order', with Japanese leadership recognized in Asia. In 1940 Japan invaded North Indochina and on 7 Dec. 1941 attacked the United States (principally at Pearl Harbour) and British bases in the Pacific, and then declared war on these two countries. Japanese forces eventually surrendered in Aug. 1945 after the dropping of atomic bombs on Hiroshima and Nagasaki. The country was placed under US military occupation and in a new constitution in 1947 the Japanese people renounced the war and pledged themselves to uphold democracy and peace. The Emperor became a constitutional monarch instead of a divine ruler.

At San Francisco on 8 Sept. 1951 a Treaty of Peace was signed by Japan and representatives of 48 countries. A security treaty with the USA provided for the stationing of American troops in Japan until the latter was able to undertake its own defence. The peace treaty came into force on 28 April 1952, when Japan regained her sovereignty. Confidence in what had been a world beating economy fell drastically after 1997 causing the government to cut taxes, provide financial support for small companies and to begin the reform of the heavily indebted banking system.

The Tokyo conurbation, with a population in 1999 of 26.36m., is the largest in the world, having overtaken New York around 1970. It is projected to relinquish its status to Mumbai (Bombay) in around 2015.

Tokyo: Situated in Tokyo Bay in east central Honshu on the Pacific coast, Tokyo is the largest city in Japan and its capital. It was founded in the 12th century as Edo and its name was changed to Tokyo in 1868. It is the administrative, financial and cultural centre of Japan. Tokyo State covers an area of 2,166 sq. km. The Tokyo Tower, offering views of the city, was modelled on the Eiffel Tower in Paris and was completed in 1958.

SOCIAL STATISTICS

Statistics (in 1,000) for calendar years:

	1993	1994	1995	1996	1997	1998	1999
Births	1,204	1,229	1,221	1,203	1,209	1,215	1,197
Deaths	882	877	924	896	921	933	985

Crude birth rate of Japanese nationals in present area, 1998, was 9.6 per 1,000 population (1947: 34.3); crude death rate, 7.5; crude marriage rate, 6.3. In 1998 the most popular age range for marrying was 30.0 for males and 27.7 for females. The infant mortality rate per 1,000 live births, 3.6 in 1998, is one of the lowest in the world. Expectation of life was 77.16 years for men and 84.01 years for women in 1998. A World Health Organization report published in June 2000 put the Japanese in first place in a 'healthy life expectancy' list, with an expected 74.5 years of healthy life for babies born in 1999. Japan has over 13,000 centenarians. Japan has a very fast ageing population, stemming from a sharply declined fertility rate and the highest life expectancy in the world for both males and females. Annual population growth rate, 1990-99, 0.3%.

In 2000 the average number of children a Japanese woman bears in her life reached a record low of 1.34.

There were a record 33,048 suicides in 1999, largely attributable to the worst economic recession since the Second World War.

CLIMATE

The islands of Japan lie in the temperate zone, northeast of the main monsoon region of South-East Asia. The climate is temperate with warm, humid summers and relatively mild winters except in the island of Hokkaido and northern parts of Honshu facing the Japan Sea. There is a month's rainy season in June-July, but the best seasons are spring and autumn, though Sept. may bring typhoons. There is a summer rainfall maximum. Tokyo, Jan. 5.2°C, July 25.2°C. Annual rainfall 1,405 mm. Hiroshima, Jan. 4°C, July 25.7°C. Annual rainfall 1,555 mm. Nagasaki, Jan. 6.4°C, July 26.6°C. Annual rainfall 1,945 mm. Osaka, Jan. 5.5°C, July 27°C. Annual rainfall 1,318 mm. Sapporo, Jan. -4.6°C, July 20.2°C. Annual rainfall 1,130 mm.

CONSTITUTION AND GOVERNMENT

The Emperor is Akihito (b. 23 Dec. 1933), who succeeded his father, Hirohito on 7 Jan. 1989 (enthroned, 12 Nov. 1990); married 10 April 1959, to Michiko Shoda (b. 20 Oct. 1934). *Offspring*: Crown Prince Naruhito (Hironomiya; b. 23 Feb. 1960), married Masako Owada (b. 9 Dec. 1963) 9 June 1993; Prince Fumihito (Akishinomiya; b. 30 Nov. 1965); Princess Sayako (Norinomiya; b. 18 April 1969). The succession to the throne is fixed upon the male descendants. The 1947 constitution supersedes the Meiji constitution of 1889. In it the Japanese people pledge themselves to uphold the ideas of democracy and peace. The Emperor is the symbol of the States and of the unity of the people. Sovereign power rests with the people. The Emperor has no powers related to government. Fundamental human rights are guaranteed.

Legislative power rests with the *Diet*, which consists of the *House of Deputies*, elected by men and women over 20 years of age for a 4-year term, and an upper house, the *House of Councillors* of 252 members (100 elected by party list system with proportional representation according to the d'Hondt method and 152 from prefectural districts), one-half of its members being elected every 3 years.

In Nov. 1994 the Diet adopted electoral reforms changing the number of members in the House of Deputies from 511 to 500, of whom 300 are to be elected from single-seat constituencies, and 200 by proportional representation on a base of 11 regions. There is a 2% threshold to gain one of the latter seats. Donations to political politicians are to be supplanted over 5 years by state subsidies to parties.

A new electoral law passed in Oct. 2000 gives voters a choice between individual candidates and parties when casting ballots for the proportional representation seats in the *House of Councillors*. The bill also reduced the number of upper house seats by 10, from 252 to 242, the first time that the number of seats in the upper chamber has been reduced. In the next upper house election, which were scheduled to be held in July 2001, 121 seats were to be contested instead of 126, comprising 48 seats

under proportional representation and 73 under the constituency system. The number of seats elected under the proportional representation system was to be reduced from 100 to 96.

National Anthem. 'Kimigayo' ('The Reign of Our Emperor'); words 9th century, tune by Hiromori Hayashi. On 9 Aug. 1999 a law on the national flag and the national anthem was enacted. The law designates the Hinomaru and 'Kimigayo' as the national flag and national anthem of Japan. The 'Kimi' in 'Kimigayo' indicates the Emperor who is the symbol of the State and of the unity of the people, deriving his position from the will of the people with whom resides sovereign power; 'kimigayo' depicts the state of being of the country as a whole.

DEFENCE

Japan has renounced war as a sovereign right and the threat or the use of force as a means of settling disputes with other nations. Its troops had not previously been able to serve abroad, but in 1992 the House of Representatives voted to allow up to 2,000 troops to take part in UN peacekeeping missions. A law of Nov. 1994 authorizes the Self-Defence Force to send aircraft abroad in rescue operations where Japanese citizens are involved.

In Jan. 1991 Japan and the USA signed a renewal agreement under which Japan pays 40% of the costs of stationing US forces and 100% of the associated labour costs. US forces in Japan totalled 40,100 in 1999, of whom 19,200 were on Okinawa. A US-Japanese agreement of Dec. 1996 stipulates that one fifth of the territory on Okinawa occupied by the US military is to be returned to local landowners by 2008.

Defence expenditure in 1999 totalled US\$40,383m. (US\$319 per capita), representing 0.9% of GDP.

Army. The 'Ground Self-Defence Force' is organized in 5 regional commands and in 1999 had an authorized strength of 145,900 (5,200 women) and a reserve of 48,000 men. The USA maintains a combined force of 40,000 in Japan including an army force of 1,800.

Navy. The 'Maritime Self-Defence Force' is tasked with coastal protection and defence of the sea lanes to 1,000 nautical miles range from Japan. Personnel in 1999 numbered 43,800 including the Naval Air Arm.

The combatant fleet, all home-built, includes 16 diesel submarines, 9 destroyers and 46 frigates.

The Air Arm operated 90 combat aircraft and 90 armed helicopters. Air Arm personnel was estimated at 12,000 in 1999.

The main elements of the fleet are organized into 4 escort flotillas based at Yokosuka (2), Sasebo and Maizuru. The submarines are based at Sasebo and Kure.

Air Force. An 'Air Self-Defence Force' was inaugurated on 1 July 1954. Its equipment includes (1999) F-15 *Eagles*, F-4E Phantoms and Mitsubishi F-1 fighters. Strength (1999) 45,200 operating 330 combat aircraft.

INTERNATIONAL RELATIONS

In terms of total aid given, Japan was the most generous country in the world in 1999, donating US\$15.3bn. in international aid in the course of the year. This represented 0.35% of its GDP.

Japan is a member of the UN, BIS, OECD, Inter-American Development Bank, Asian Development Bank, Colombo Plan, APEC, IOM and the Antarctic Treaty.

ECONOMY

In 1997 agriculture accounted for 1.7% of GDP, industry 37.2% and services 61.1%.

Policy. In Dec. 1996 the government adopted a 5-year economic and financial reform plan centred on the relaxing of state controls and the creation of jobs. Its implementation is co-ordinated by the Ministry of International Trade and Industry. In late 1997 the economy was thrown off course by the collapse of three leading financial institutions which had been saddled with bad debts following the stock market and property crash in 1990. Following a period of recession, this raised fears of another but more severe downturn.

A series of packages of measures aimed at reviving the Japanese economy were introduced in late 1997 and early 1998. Key measures included proposals to stabilize the financial sector, deregulate share buy-backs, promote discussion of US-style pension plans and allow companies to change the way they value land assets. However, the ruling Liberal Democratic Party remained strictly opposed to income tax cuts, which many of Japan's trading partners wanted to see introduced to boost domestic demand.

Performance. The real growth rate for 2000 was 1.2%. Bankruptcies have been running at record levels. Yet, for all the financial blues, Japan remains one of the world's strongest economies with a highly trained workforce and the talent to exploit profitable export markets. In 1998 Japan's total GDP was US\$3,780.0bn., the second highest in the world after the USA.

Budget. Ordinary revenue and expenditure for fiscal year ending 31 March 2001 balanced at 84,987,100m. yen.

Of the proposed revenue (in yen) in 2000, 48,659,000m. was to come from taxes and stamps, 32,610,000m. from public bonds. Main items of expenditure: social security, 16,766,600m.; public works, 9,430,700m.; local government, 14,016,300m.; education, 6,522,200m.; defence, 4,935,800m.

The outstanding national debt incurred by public bonds was estimated in March 1999 to be 310,740,000m. yen.

The estimated 2000 budgets of the prefectures and other local authorities forecast a total revenue of 88,930,000m. yen, to be made up partly by local taxes and partly by government grants and local loans.

Currency. The unit of currency is the *yen* (JPY). Inflation in 1997 was 1.8% slowing to 0.7% in 1998. Deflation in 1999 was 0.5%, estimated to remain at 0.5% in 2000 and be 0.2% in 2001. Japan's foreign exchange reserves totalled US\$288.080m. in Dec. 1999 (the highest of any country). Gold reserves in Jan. 2000 were 24.23m. troy oz. In Dec. 1999 the currency in circulation consisted of 65,405,000m. yen Bank of Japan notes and 4,187,000m. yen subsidiary coins.

Banking and Finance. The Nippon Ginko (Bank of Japan), founded 1882, finances the government and the banks, its function being similar to that of a central bank in other countries. The Bank undertakes the management of Treasury funds and foreign exchange control. Its *Governor* is Masaru Hayami (b. 1925; appointed March 1998 for a 5-year term). Its gold bullion and cash holdings at 31 Dec. 1999 stood at 623,000m. yen.

There were on 31 Dec. 1999, 9 city banks, 64 regional banks, 33 trust banks, 3 long-term credit banks, 60 member banks of the second association of regional banks, 392 Shinkin banks (credit associations), 298 credit co-operatives and 84 foreign banks. There are also various governmental financial institutions, including postal savings which amounted to 258,246,900m. yen in Sept. 2000. Total savings by individuals, including insurance and securities, stood at 1,278,016,700m. yen on 30 Sept. 2000, and about 56% of these savings were deposited in banks and the post office. During 1999 a number of important mergers were announced in the banking sector, most notably the proposed merger of the Industrial Bank of Japan, Dai-ichi Kangyo and Fuji Bank, which would create the world's biggest bank in terms of assets, at over 140,000bn. yen (US\$1,259bn.). Sumitomo and Sakura Bank also announced plans to merge. Their joint assets would be nearly 99,000bn. yen (US\$925bn.), making the new bank the second largest in the world behind that created by the merger of Industrial Bank of Japan, Dai-ichi Kangyo and Fuji Bank. 1997 saw the disappearance of Yamaichi Securities, Japan's fourth largest stockholder; also Sanyo Securities and the Hokkaido Takushoku bank.

Japan's banks are in a situation where many of them would be insolvent if they admitted the market value of the loans, shares and property they hold. At 31 March 2000 it was estimated that the banking system's bad loans amounted to 17,830bn. yen.

There are 8 stock exchanges, the largest being in Tokyo, Osaka and Nagoya.

KEY HISTORICAL EVENTS

During the first World War (1914–18) the Arabs of Transjordan and Palestine rebelled against the suzerainty of Turkey, which had become an ally of Germany. Britain supported the rebellion, occupied the areas and in 1920 was given a League of Nations mandate for Transjordan and Palestine. In April 1921 the Amir Abdullah Ibn Hussein (brother of King Feisal of Iraq) became the ruler of Transjordan, which was officially separated from Palestine in 1923. By a treaty signed in London on 22 March 1946 Britain recognized Transjordan as a sovereign independent state. On 25 May 1946 the Amir Abdullah assumed the title of king and the name of the territory was changed to that of the Hashemite Kingdom of Jordan. The part of Palestine remaining to the Arabs under the armistice with Israel on 3 April 1949, with the exception of the Gaza Strip on the Mediterranean coast, was placed under Jordanian rule and formally incorporated in Jordan on 24 April 1950. In June 1967 this territory ('the West Bank') was occupied by Israel. On 31 July 1988 King Hussein announced the dissolution of Jordan's legal and administrative ties with the West Bank. King Hussein, who became king in 1953 at the age of 17 after his father was declared mentally unfit to rule, remained in executive control in the face of attempted assassinations and frequent changes of prime ministers for 35 years until his death on 7 Feb. 1999.

The legislature consists of a *Senate* of 40 members appointed by the King and a *Chamber of Deputies* of 80 members elected by universal suffrage. 9 seats are reserved for Christians, 6 for Bedouin and 3 for Circassians. A law of 1993 restricts each elector to a single vote, replacing a system in which electors had several votes depending on the number of seats in the constituency.

The lower house was dissolved in 1976 and elections postponed because no elections could be held in the West Bank under Israeli occupation. Parliament was reconvened on 9 Jan. 1984. By-elections were held in March 1984 and 6 members were nominated for the West Bank, bringing Parliament to 60 members. Women voted for the first time in 1984. On 9 June 1991 the King and the main political movements endorsed a national charter which legalized political parties in return for the acceptance of the constitution and monarchy. KEY HISTORICAL EVENTS

Turkestan (by which name part of this territory was then known) was conquered by the Russians in the 1860s. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, with the emir—by an agreement of 1873—recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided

politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan. In the summer of 1919 the authority of the Soviet Government was established in these regions. The Khan of Khiva was deposed in Feb. 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925, when the new states of Uzbekistan, Turkmenistan and Tajikistan were accepted into the USSR as Union Republics. The remaining districts of Turkestan populated by Kazakhs were united with Kazakhstan which was established as an Autonomous Soviet Republic in 1925 and became a constituent republic in 1936. Independence was declared on 16 Dec. 1991 when Kazakhstan joined the CIS.

TERRITORY AND POPULATION

Kazakhstan is bounded in the west by the Caspian Sea and Russia, in the north by Russia, in the east by China and in the south by Uzbekistan and Kyrgyzstan. The area is 2,724,900 sq. km (1,052,100 sq. miles). The 1999 census population was 14,953,000 (density of 5·5 per sq. km), of whom Kazakhs accounted for 53·4% and Russians 30·0%. There are also Germans, Ukrainians, Uzbeks, Tatars, Kurds, Dungans and Uigurs. In 1997 the population was 51·4% female; it was 60·8% urban in 1998. During the 1990s some 1·5m. people left Kazakhstan—mostly Russians and Germans returning to their homelands. Approximately 4·5m. Kazakhs live abroad.

The UN gives a projected population for 2010 of 17·92m.

CONSTITUTION AND GOVERNMENT

Relying on a judgement of the Constitutional Court that the 1994 parliamentary elections were invalid, President Nazarbaev dissolved parliament on 11 March 1995 and began to rule by decree. A referendum on the adoption of a new constitution was held on 30 Aug. 1995. The electorate was 8.8m.; turn-out was 80%. 89% of votes cast were in favour. The Constitution thus adopted allows the President to rule by decree and to dissolve parliament if it holds a no-confidence vote or twice rejects his nominee for Prime Minister. It establishes a parliament consisting of a 47-member Senate, 40 senators being elected by some 4,000 representatives of local authorities and 7 appointed by the President; and a lower house of 67, directly elected, though heads of families may cast votes for all of their family members. Candidates must gain an absolute majority of votes to be elected, and are not permitted to disclose their political affiliation.

A Constitutional Court was set up in Dec. 1991 and a new Constitution adopted on 28 Jan. 1993, but President Nazarbaev abolished the Constitutional Court in 1995. In June 2000 a bill to provide President Nazarbaev with life-long powers and privileges was passed into law.

National Anthem. A competition for a new anthem had no result, and the old Soviet anthem is retained.

KAZAKHSTAN

Defence expenditure in 1999 totalled US\$504m. (US\$34 per capita), representing 3.5% of GDP.

Army. Personnel, 1999, 46,800. Paramilitary units: Republican Guard (2,500), Ministry of the Interior Security Troops (20,000), Frontier Guards (12,000).

Navy. Formally constituted in Aug. 1996, a force of 250 personnel (1999) operates on the Caspian Sea.

Air Force. In 1999 there was an Air Force division with about 19,000 personnel with some 131 combat aircraft, including MiG-29 and Su-27 interceptors and MiG-27 and Su-24 strike aircraft.

INTERNATIONAL RELATIONS

In Jan. 1995 agreements were reached for closer integration with Russia, including the combining of military forces, currency convertibility and a customs union.

Kazakhstan is a member of the UN, CIS, OSCE, Asian Development Bank, ECO, OIC and the NATO Partnership for Peace. Sandwiched between Russia and China, in 1998 President Nazarbaev signed major treaties with both countries in the hope of improving relations with both.

ECONOMY

Agriculture accounted for 9.2% of GDP in 1998, industry 31.2% and services 59.6%.

Policy. A National Council for Economic Reform was instituted in Jan. 1993. A privatization programme for 1993–95 envisaged the sale of most state enterprises with more than 200 employees by a combination of cash and vouchers. Enterprises of national importance remain controlled by the government through holding companies. Economic reform embraces a process of wholesale privatization, the reform of financial and credit systems, the liberalization of prices for goods and services, the adoption of a system of free trade and the attraction of foreign investment. A privatization programme started in April 1994 involving the auctioning of 3,500 medium-sized enterprises. Coupons are issued to citizens to be exchanged for shares in investment funds. Foreign nationals may participate in trading after the auctions. Large (i.e. with over 2,000 employees) and small (i.e. with fewer than 500) enterprises are being sold for cash.

Performance. The break-up of the Soviet Union triggered an economic collapse, as orders from Russian factories for Kazakhstan's metals and phosphates, 2 mainstays of the economy, dried up. Low oil and commodity prices cut revenues by a third in 1998. Real GDP growth was –2.5% in 1998 but there was a slight recovery in 1999, with growth of 1.7%. Total GDP in 1998 was US\$22.0bn.

Budget. Government revenue and expenditure (in 1m. tenge):

	1997	1998	1999
Revenue	292,567	262,916	207,765
Expenditure	332,507	318,253	304,150

The government was forced to withdraw the 1999 budget in order to recalculate the effect of lower commodity prices on GDP.

Currency. The unit of currency is the *tenge* of 100 *tiyn*, which was introduced on 15 Nov. 1993 at 1 tenge = 500 roubles. It became the sole legal tender on 25 Nov. 1993. Inflation was running at 1,250% in 1994, but dropped dramatically and was only 4.9% in 1998. In Jan. 1997 foreign exchange reserves were US\$2,700m. Total money supply in Sept. 1997 was 102,541m. tenge.

Banking and Finance. The central bank and bank of issue is the National Bank (*Governor*, Grigory Marchenko). In 1998 there were 90 banks, compared to 240 in 1993.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity is 17m. kW. Output in 1998 was 49.3bn. kWh. There is 1 nuclear power station. Consumption per capita was 3,585 kWh in 1997.

Oil and Gas. Proven oil reserves in 1999 were 8bn. bbls. The onshore Tengiz field has estimated oil reserves between 6bn. and 9bn. bbls.; the onshore Karachaganak

field has oil reserves of 2bn. bbls., and gas reserves of 600,000m. cu. metres. Output of crude oil (including gas concentrates), 1996, 22.9m. tonnes (1997 estimate, 26.2m. tonnes); natural gas, 1999, 9.2bn. cu. metres with proven reserves of 1,840bn. cu. metres. The first major pipeline for the export of oil from the Tengiz field was opened in March 2001, linking the Caspian port of Atyraū with the Russian Black Sea port of Novorossiisk. In Sept. 1997 Kazakhstan signed oil agreements with China worth US\$9.5bn.; these include a 3,000 km pipeline to Xinjiang province in western China. Oil and gas investment by foreign companies is now driving the economy. In 1997 oil production sharing deals were concluded with 2 international consortia to explore the North Caspian basin and to develop the Karachaganak gas field. A huge new offshore oilfield in the far north of the Caspian Sea, known as East Kashagan, was discovered in early 2000. The field could prove to be the largest find in the last 30 years, and estimates suggest that it may contain 50bn. bbls. of oil. However, tangible results are unlikely to be achieved until 2005 at the earliest. The various recent discoveries have meant that by 2010 Kazakhstan aims to have become the world's sixth largest oil producer.

It is hoped that by 2003 exploitation of the oil reserves of the Caspian shelf will start. Initially production is expected to amount to 100,000 bbls. per day, possibly rising to as much as 1.2m. bbls. per day by 2013. It is believed that there may be as much as 14bn. tonnes of oil and gas reserves under Kazakhstan's portion of the Caspian Sea.

Minerals. Kazakhstan is extremely rich in mineral resources, including coal, bauxite, cobalt, vanadium, iron ores, chromium, phosphates, borates and other salts, copper, lead, manganese, molybdenum, nickel, tin, gold, silver tungsten and zinc. Coal production (1997 estimate, in tonnes), 72.6m.; iron ore (1998), 9m.; lignite (1996), 3.57m.; bauxite (1998), 3.44m.; steel (1996), 3.22m.; copper (1998) 337,000; gold (1997), 12. Uranium production, 1998, 1,250 tonnes.

Agriculture. Kazakh agriculture has changed from primarily nomad cattle breeding to production of grain, cotton and other industrial crops. In 1997 agriculture accounted for 12% of GDP. In 1993, 181.3m. ha were under cultivation, of which private subsidiary agriculture accounted for 0.3m. ha and commercial farming 6.3m. ha in 16,300 farms. Private and commercial agriculture accounted for 35% of output by value in 1992; agricultural output was valued at 13,700m. roubles (in constant 1983 prices) in 1993, 97% of the 1992 figure. Around 60,000 private farms have emerged since independence.

Tobacco, rubber plants and mustard are also cultivated. Kazakhstan has rich orchards and vineyards, which accounted for 95,000 ha of cultivated land in 1985. Kazakhstan is noted for its livestock, particularly its sheep, from which excellent quality wool is obtained. Livestock (1996): 6.86m. cattle (down from 9.57m. in 1993), 18.72m. sheep (down from 33.63m. in 1993), 1.7m. horses and 21m. chickens.

Output of main agricultural products (in 1,000 tonnes) in 1998: wheat, 4,746; potatoes, 1,263; barley, 1,093; watermelons, 306; tomatoes, 249; rice, 236; sugarbeets, 225; onions, 206; maize, 167; cabbages, 165; seed cotton, 162. Dairy products, 1998 (in 1,000 tonnes): milk, 3,393; meat, 646; eggs, 70. About half of the grain is exported, mainly to Russia (around 5.5m. tonnes annually), Ukraine and Turkmenistan.

Forestry. Forests covered 10.50m. ha in 1995, or 3.9% of the land area (up from 9.54m. ha and 3.6% in 1990). Only the USA and Uzbekistan exceeded the 0.96m. ha afforested in Kazakhstan between 1990 and 1995. In 1998, 315,000 cu. metres of timber were cut.

Environment. According to the *World Bank Atlas* carbon dioxide emissions in 1996 were the equivalent of 10.9 tonnes per capita.

Fisheries. Catches in 1998 totalled 23,089 tonnes, exclusively freshwater fish.

INDUSTRY

Kazakhstan was heavily industrialized in the Soviet period, with non-ferrous metallurgy, heavy engineering and the chemical industries prominent. Output was valued at 30,000m. tenge in current prices in 1996 and 35,000m. tenge in 1997. Production (1997 estimate, in tonnes) included ferroalloy, 680,000; cement,

KAZAKHSTAN

661,000; mineral fertilizer, 200,000; chemical fibre, 1,900 (1993); cardboard, 7,400 (1996); lead, 85,000; fabrics, 24.6m. sq. metres; leather footwear, 0.8m. pairs; forge-press machines, 180; tractors, 3,100; radio sets, 600; refrigerators and freezers, 12,900 (1993); washing machines, 23,200.

INTERNATIONAL TRADE

In Jan. 1994 an agreement to create a single economic zone was signed with Kyrgyzstan and Uzbekistan. Since Jan. 1992 individuals and enterprises have been able to engage in foreign trade without needing government permission, except for goods 'of national interest' (fuel, minerals, mineral fertilizers, grain, cotton, wool, caviar and pharmaceutical products) which may be exported only by state organizations. Foreign nationals may be licensed to purchase Kazakh assets for privatization. Foreign debt was US\$5,714m. in 1998.

Imports and Exports. In 1998 imports were valued at US\$6,672m. and exports at US\$5,871m. In 1999, 36.7% of imports came from Russia, 25.3% from the EU (Germany being the largest source) and 9.5% from the USA. KEY HISTORICAL EVENTS

Prior to colonialism, the area comprised African farming communities, notably the Kikuyu and the Masai. From the 16th century through to the 19th, they were loosely controlled by the Arabic rulers of Oman. In 1895 the British declared part of the region the East Africa Protectorate, which from 1920 was known as the Colony of Kenya. The influx of European settlers was resented by Africans not only for the whites' land holdings but also for their exclusive political representation in the colonial Legislative Council. A state of emergency existed between Oct. 1952 and Jan. 1960 during the period of the Mau Mau uprising. Over 13,000 Africans and 100 Europeans were killed. The Kenya African Union was banned and its president, Jomo Kenyatta, imprisoned. The state of emergency ended in 1960. Full internal self-government was achieved in 1962 and in Dec. 1963 Kenya became an independent member of the Commonwealth. In 1982 Kenya became a one-party state and in 1986 party preliminary elections were instituted to reduce the number of parliamentary candidates at general elections. Only those candidates obtaining over 30% of the preliminary vote were eligible to stand. On the death of Kenyatta in Aug. 1978 Daniel T. arap Moi, the vice-president, became acting president and was elected in 1979, and then re-elected in 1983, 1988, 1992 and 1997. An attempted coup in 1982 was unsuccessful. A multi-party election was permitted in 1992 and again in 1997, the first genuinely competitive elections since 1963.

TERRITORY AND POPULATION

Kenya is bounded by Sudan and Ethiopia in the north, Uganda in the west, Tanzania in the south and Somalia and the Indian Ocean in the east. The total area is 582,646 sq. km, of which 571,416 sq. km is land area. In the 1989 census the population was 21,443,636 (19% urban; up to 31.3% by 1998). Provisional results of the 1999 census give a population of 28.7m.

The UN gives a projected population for 2010 of 38.87m.

The land areas, populations and capitals of the provinces are:

Province	Sq. km	Census 1989	Estimate 1993	Capital	Census 1989
Rift Valley	182,413	4,981,613	6,107,900	Nakuru	163,927
Eastern	154,354	3,768,677	4,940,900	Embu	26,525
Nyanza	12,507	3,507,162	4,804,500	Kisumu	192,733
Central	13,236	3,116,703	4,152,600	Nyeri	91,258
Western	8,285	2,544,329	3,176,000	Kakamega	58,862
Coast	84,113	1,829,191	2,430,700	Mombasa	461,753

North-Eastern	126,186	371,391	741,400	Garissa	31,319

In 1999 Nairobi had a population of 2,205,000. Other towns (1989): Machakos (116,293), Eldoret (111,882), Meru (94,947), Thika (57,603).

Most of Kenya's 26.44m. people belong to 13 tribes, the main ones including Kikuyu (about 22% of the population), Luhya (14%), Luo (13%), Kalenjin (12%), Kamba (11%), Gusii (6%), Meru (5%) and Mijikenda (5%).

Swahili is the official language, but people belonging to the different tribes have their own language as their mother tongue. English is spoken in commercial centres.

SOCIAL STATISTICS

1995 births, 1,013,000; deaths, 312,000. Birth rate (per 1,000 population), 1995, 37.3; death rate, 11.5. Annual population growth rate, 1990-99, 2.6%. Expectation of life at birth, 1998, 50.5 years for males and 52.2 years for females. Infant

mortality, 1998, 75 per 1,000 live births. Fertility rate, 1999, 4.2 births per woman, down from 6.1 in 1990. In 2000 more than half of Kenyans lived below the poverty line, up by over 10% in the space of 10 years.

CLIMATE

The climate is tropical, with wet and dry seasons, but considerable differences in altitude make for varied conditions between the hot, coastal lowlands and the plateau, where temperatures are very much cooler. Heaviest rains occur in April and May, but in some parts there is a second wet season in Nov. and Dec. Nairobi, Jan. 65°F (18.3°C), July 60°F (15.6°C). Annual rainfall 39" (958 mm). Mombasa, Jan. 81°F (27.2°C), July 76°F (24.4°C). Annual rainfall 47" (1,201 mm).

CONSTITUTION AND GOVERNMENT

There is a unicameral *National Assembly*, which until the Dec. 1997 elections had 200 members, comprising 188 elected by universal suffrage for a 5-year term, 10 members appointed by the President, and the Speaker and Attorney-General ex officio. Following a review of constituency boundaries, the National Assembly now has 210 elected members, 12 members appointed and the two ex officio members, making 224 in total. The President is also directly elected for 5 years; he appoints a Vice-President and other Ministers to a Cabinet over which he presides. A constitutional amendment of Aug. 1992 stipulates that the winning presidential candidate must receive a nationwide majority and also the vote of 25% of electors in at least 5 of the 8 provinces. The sole legal political party had been the Kenya African National Union (KANU), but after demonstrations by the pro-reform lobby which led to extreme violence, KANU agreed to legalize opposition parties.

National Anthem. 'Ee Mungu nguvu yetu' ('Oh God of all creation'); words by a collective, tune traditional.

RECENT ELECTIONS

The most recent presidential and parliamentary elections were held on 29 Dec. 1997. In the presidential election Daniel T. arap Moi was opposed by 14 candidates including Charity Ngilu for the Social Democratic Party (SDP), who was aiming to become Africa's first elected female head of state. In the event, Daniel T. arap Moi benefited from an opposition split along tribal lines and won comfortably, with a 40.4% show of the vote, passing the 25% threshold in 5 out of 8 provinces. Mwai Kibaki (Democratic Party) came next with 30.9% and Raila Odinga (National Development Party) third, with 10.8%.

At the National Assembly elections of 29 Dec. 1997, KANU gained 107 seats, the Democratic Party (DP) 39, the National Development Party 21, the Forum for the Restoration of Democracy (FORD)-Kenya 17, the Social Democratic Party 15; and 5 other parties won 11 seats between them. Of the 12 members appointed by the president, 6 were from KANU and 2 from DP, plus 1 each from 4 other parties.

In Nov. 1999 a treaty was signed between Kenya, Tanzania and Uganda to create a new East African Community as a means of developing East African trade, tourism and industry and laying the foundations for a future common market and political federation.

ECONOMY

Services contributed 57.7% of GDP in 1998, agriculture 26.1% and industry 16.2%.

Kenya used to have one of the strongest economies in Africa, but years of mismanagement and corruption have had a detrimental effect, made much worse in 2000 by one of the worst droughts in living memory.

Policy. Since a privatization programme was launched in 1992, the government has completed the sale of the majority of the 207 enterprises originally targeted. In 1996 a Presidential Economic Commission was set up to implement reforms to public companies over 1996–98. A US\$215m. IMF loan agreement signed in April 1995 was suspended in 1997 while the government considered measures against corruption. However, in July 2000 the IMF decided to release US\$198m. and the World Bank announced in Aug. 2000 that it would lend a further US\$150m.

Performance. Real GDP growth was 1.4% in 1999 following growth of 1.8% in 1998, down from 2.3% in 1997 and 4.6% in 1996. Total GDP in 1998 was US\$11.6bn.

Budget. The fiscal year ends on 30 June.

Government revenue and expenditure (in 1m. shillings):

	1993	1994	1995	1996
Revenue	67,379	100,489	120,792	143,088
Expenditure	86,000	129,640	132,374	152,832

Currency. The monetary unit is the *Kenya shilling* (KES) of 100 *cents*. The currency became convertible in May 1994. The shilling was devalued by 23% in April 1993. The annual rate of inflation was 5.0% in March 2000. Foreign exchange reserves were US\$580m. in Feb. 1998. In Feb. 1998 total money supply was 90,490m. shillings.

Banking and Finance. The central bank and bank of issue is the Central Bank of Kenya (*Governor*, Nahashon Ngige Nyagah). There are 50 banks, 40 non-banking financial institutions and a couple of building societies. In March 1995 their combined assets totalled KSh.£268,811m. In 1998 the government offloaded 25% of its stake in the Kenya Commercial Bank, which lowered its shareholding to 35%. The remaining 35% is also set to be sold off.

There is a stock exchange in Nairobi.

ENERGY AND NATURAL RESOURCES

Electricity. Installed generating capacity was 1m. kW in 1997; mostly provided by hydropower from power stations on the Tana river, with some from oil-fired power stations and by geothermal power. Production (1998) 4.23bn. kWh, with consumption per capita (1997) being 109 kWh. In 1999 it was decided to encourage the private sector to take part in electricity generation alongside the state-owned Kenya Electricity Generating Company as a means of bringing to an end the

shortage of power and the frequent blackouts. In June 2000 a rationing scheme was introduced in much of the country restricting the power supply to 12 hours a day, and sometimes less.

Oil and Gas. Kenya signed an oil and gas exploration deal in 1997 with Canada's Tornado Resources Ltd, who pledged to commit a minimum of US\$7m. over a 3-year period.

Minerals. Production, 1995 (in 1,000 tonnes): soda ash, 218; fluorite, 80; salt, 71. Other minerals included gold, raw soda, lime and limestone, diatomite, garnets and vermiculite.

Agriculture. As agriculture is possible from sea-level to altitudes of over 2,500 metres, tropical, sub-tropical and temperate crops can be grown and mixed farming is pursued. In 1997 there were 4m. ha of arable land and 520,000 ha of permanent crop land. Four-fifths of the country is range-land which produces mainly livestock products and the wild game which is a major tourist attraction.

Tea and coffee are two of the big foreign exchange earners, along with tourism. Horticultural products, particularly flowers, are in fourth position.

Kenya has about 110,000 ha under tea production, and is the world's third largest producer and largest exporter of tea. The production is high quality tea, raised in near-perfect agronomic conditions. It is plucked the whole year round, and almost exclusively by hand. In 1998 production reached a record 295m. kg (244.5m. kg in 1995). In 1996 exports were worth US\$350m.

Coffee production in 1998-99 was 66,000 tonnes (97,500 tonnes in 1995-96), but a rise was expected for the 1999-2000 season. Arabica coffee covers 176,500 ha of land under coffee in Kenya. Some 70% of the total hectareage under coffee is cultivated by 335,000 smallholders, although their production has been in decline in recent years.

Other major agricultural products (1998, in 1,000 tonnes): sugarcane, 4,900; maize, 2,450; cassava, 910; sweet potatoes, 730; plantains, 390; potatoes, 380; pineapples, 300; wheat, 250; bananas, 230; sorghum, 130.

Fresh horticultural exports were 84,824 tonnes in 1996, up 18% on the 71,758 tonnes in 1995, earning about US\$340m. By 2000 Kenyan horticultural exports were expected to pass the 100,000 tonne mark, with increases in pre-packed vegetables, salads, cut flowers, avocados, passion fruit and mangoes. The biggest growth has been in cut flowers, up 20% from 29,374 tonnes in 1995 to 35,212 tonnes in 1996. Around two-thirds of the flowers are destined for the Netherlands, largely for re-export. 1996 vegetable exports totalled 32,742 tonnes and fruit 16,869 tonnes, both up on 1995.

Maize is Kenya's most important food crop with about 1.4m. ha under cultivation and annual production in excess of 2m. tonnes. Sisal, pyrethrum, maize and wheat are crops of major importance in the Highlands, while coconuts, cashew nuts, cotton, sugar, sisal and maize are the principal crops grown at the lower altitudes.

Livestock (1996): cattle, 13.84m.; sheep, 5.6m.; goats, 7.5m.; camels, 820,000; chickens, 27m.

More than half the agricultural labour force is employed in the livestock sector, accounting for 10% of GDP.

Forestry. Forests covered 1.29m. ha in 1995 (2.3% of the land area), mainly between 1,800 and 3,300 metres above sea-level. There are coniferous, broad-leaved, hardwood and bamboo forests. Timber production was 29.38m. cu. metres in 1998.

Environment. According to the *World Bank Atlas* Kenya's carbon dioxide emissions in 1996 were the equivalent of 0.2 tonnes per capita.

Fisheries. Catches in 1998 totalled 172,592 tonnes, of which 165,992 tonnes were freshwater fish. While the aggregate landings from Kenya's inland waters (more than 90% from Lake Victoria) have grown over the past 20 years, marine fishing has not reached its full potential, despite a coastline of 680 km. Fish landed from the sea totals between 5,000 and 7,000 tonnes annually, but there is an estimated potential of 200,000 tonnes in tuna and similar species.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in Kenya in Jan. 2000 were Barclays Bank Kenya (market

capitalization of US\$218.3m.) and Bamburi Cement (market capitalization of US\$140.8m.).

In 1994 there were 648 manufacturing firms employing more than 50 persons. The main products are textiles, chemicals, vehicle assembly and transport equipment, leather and footwear, printing and publishing, food and tobacco processing and oil refining. Production included (in tonnes): cement (1997), 1,506,000; sugar (1998), 488,187; maize meal (1994), 233,200; wheat flour (1994), 191,400; animal feed (1988), 184,266; cotton (1996), 28m. sq. metres.

Labour. The labour force in 1996 was 13,953,000 (54% males). In 1997 the unemployment level was close to 3m.

INTERNATIONAL TRADE

Foreign debt was US\$7,010m. in 1998. Foreign investment on the stock exchange has been permitted since 1 Jan. 1995. Export Processing Zones were introduced in 1990, offering foreign companies exemption from taxes and duties for 10 years.

Imports and Exports. Imports and exports for calendar years in US\$1m.:

	1993	1994	1995	1996	1997
Imports	1,492	1,761	2,639	2,568	2,921
Exports	1,185	1,481	1,875	2,039	2,008

Principal exports (in 1,000m. shillings) 1994: tea, 16.9; coffee, 13; horticultural produce, 8.3. Imports: petroleum, 18.6; machinery and transport equipment, 31.8; chemicals (1993), 19.9; manufactures, 14.7.

Main import suppliers, 1996: UK, 13.2%; United Arab Emirates, 8.2%; Japan, 7.4%; Germany, 6.1%. Main export markets, 1996: Uganda, 15.4%; Tanzania, 12.0%; UK, 10.8%; Germany, 7.7%.

The UK is the largest foreign investor in Kenya with over US\$1,500m. in more than 60 enterprises.

COMMUNICATIONS

Roads. Of some 63,800 km of roads in 1996, only about 8,900 km, or 14%, have been surfaced. More than 80,000 km of roads are unclassified. The network has seriously deteriorated since the mid 1980s through poor maintenance. Urban roads comprise around 7,000 km, or about 5% of the total road network, but less than half of them are classified as 'good' or in 'fair' condition. Yet more than 70% of all vehicles in the country use urban roads because of the heavy concentration of economic activities in urban areas. Overall, more than 80% of passengers and freight are carried on the roads. There were, in 1996, 278,000 passenger cars, 32,000 motorcycles, 62,000 vans and trucks and 19,200 buses and coaches. There were 11,785 road accidents in 1994 (2,424 fatal).

Rail. In 1994 route length was 2,506 km of metre-gauge. Passenger-km travelled in 1998 came to 432m. and freight tonne-km to 1,111m. Kenya Railways Corporation is restructuring in preparation for privatization, which is likely to take place in 2002.

Civil Aviation. There are international airports at Mombasa (Moi International) and Nairobi (Jomo Kenyatta International). The national carrier is the now privatized Kenya Airways. KLM has a 26% share of Kenya Airways. In 1998 services were also provided by Aero Zambia, Aeroflot, Air Austral, Air Djibouti, Air France, Air Gabon, Air India, Air Madagascar, Air Malawi, Air Mauritius, Air Seychelles, Air Tanzania Corporation, Air Zimbabwe, Airkenya Aviation, Alitalia, Alliance Air, British Airways, Cameroon Airlines, Delta Air Lines, Eagle Aviation, Egyptair, El Al, Emirates, Ethiopian Airlines, Gulf Air, Iran Air, K.D. Air Corporation, KLM, Lufthansa, Olympic Airways, Pakistan International Airlines, Royal Swazi National Airways Corporation, SABENA, SAS, Saudia, South African Airways, Swissair, Uganda Airlines, United Airlines and Yemenia Yemen Airways. In 1997 Kenya Airways flew 17.7m. km and carried 786,200 passengers. In 1990 Jomo Kenyatta International handled 2,444,780 passengers and 125,556 tonnes of freight, and Moi International 839,664 passengers and 2,350 tonnes of freight.

Shipping. The main port is Mombasa, which handled 8.5m. tonnes of cargo in 1998. Container traffic has nearly doubled since 1990 to 217,028 TEUs (twenty-foot equivalent units) in 1996. The merchant marine totalled 21,000 GRT in 1998,

including oil tankers, 5,000 GRT. In 1998 vessels totalling 8,413,000 NRT entered ports.

Telecommunications. Kenya had 288,300 main telephone lines in 1998, or 9.9 per 1,000 persons. The government aims to improve telephone availability in rural areas from 0.16 lines per 100 persons in 1997 to 1 line per 100 by 2015, and in urban areas from 4 lines to 20 lines per 100 persons. There were 125,000 PCs in 1999 (4.2 per 1,000 persons) and 3,800 fax machines in 1995. In May 1999 there were 45,000 Internet users, and in Nov. 1999 some 9,000 mobile phone subscribers.

The government has a 49% stake in Telkom Kenya, but it was announced in 1999 that this would be sold off.

Postal Services. In 1995 there were 1,061 post offices, or 1 for every 26,000 persons.

SOCIAL INSTITUTIONS

Justice. The courts of Justice comprises the court of Appeal, the High Court and a large number of subsidiary courts. The court of Appeal is the final Appellate court in the country and is based in Nairobi. It comprises 7 Judges of Appeal. In the course of its Appellate duties the court of Appeal visits Mombasa, Kisumu, Nakuru and Nyeri. The High court with full jurisdiction in both civil and criminal matters comprises a total of 28 puisne Judges. Puisne Judges sit in Nairobi (16), Mombasa (2), Nakuru, Kisumu, Nyeri, Eldoret, Meru and Kisii (1 each).

The Magistracy consists of approximately 300 magistrates of various cadres based in all provincial, district and some divisional centres. In addition to the above there are the Kadhi courts established in areas of concentrated Muslim populations: Mombasa, Nairobi, Malindi, Lamu, Garissa, Kisumu and Marsabit. They exercise limited jurisdiction in matters governed by Islamic Law.

There were 17,589 criminal convictions in 1993; the prison population was 41,064 in 1996 (140 per 100,000 of national population).

In 1995 there were also 632,388 pupils and 41,484 teachers in secondary schools; 20 teacher training schools with 16,461 students; 20 technical training institutes with 8,148 students. There were 3 polytechnics with 10,836 students, and 5 universities (Nairobi, Moi, Kenyatta, Egerton and Jomo Kenyatta University College of Agriculture and Technology) with 39,340 students.

Health. In 1994 there were 4,558 doctors and 630 dentists. There were 324 hospitals (with 37,271 beds), 522 health centres and 2,868 sub-centres and dispensaries. Free medical service for all children and adult out-patients was launched in 1965.

CULTURE

Broadcasting. Broadcasting is the responsibility of KBC, which transmits the following services: National (in Swahili), General (English), Central (4 languages), Western (6 languages), North-Eastern and Coastal (4 languages). KBC also provides television programmes, mainly in English and Swahili (colour by PAL). There are several private broadcasting stations, including Kenya Television Network (which broadcasts CNN), Stellavision (which broadcasts Sky News), Capital Radio and Metro FM. A European Union grant is helping to revive the industry. In 1998 tourism employed approximately 200,000 people and contributed 11% of GDP.

KIRIBATI

Ribaberikin Kiribati
(Republic of Kiribati)

Capital: Bairiki (Tarawa)
Population estimate, 2000: 87,000
Estimated GDP: \$62m.

KEY HISTORICAL EVENTS

The islands that now constitute Kiribati were first settled by early Austronesian-speaking peoples long before the 1st century AD. Fijians and Tongans arrived about the 14th century and subsequently merged with the older groups to form the traditional I-Kiribati Micronesian society and culture. The Gilbert and Ellice Islands were proclaimed a British protectorate in 1892 and annexed at the request of the native governments as the Gilbert and Ellice Islands Colony on 10 Nov. 1915. On 1 Oct. 1975

the Ellice Islands severed constitutional links with the Gilbert Islands and took on a new name, Tuvalu. The Gilberts achieved full independence as Kiribati in 1979. Internal self-government was obtained on 1 Nov. 1976 and independence on 12 July 1979 as the Republic of Kiribati.

TERRITORY AND POPULATION

Kiribati (pronounced Kiribahss) consists of 3 groups of coral atolls and one isolated volcanic island, spread over a large expanse of the Central Pacific with a total land area of 717.1 sq. km (276.9 sq. miles). It comprises **Banaba** or Ocean Island (5 sq. km), the 16 **Gilbert Islands** (295 sq. km), the 8 **Phoenix Islands** (55 sq. km), and 8 of the 11 **Line Islands** (329 sq. km), the other 3 Line Islands (Jarvis, Palmyra and Kingman Reef) being uninhabited dependencies of the USA. The capital is the island of Bairiki in Tarawa. The gradual rise in sea levels in recent years is slowly reducing the area of the islands.

Population, 1990 census, 77,658; density, 108 per sq. km. The most recent census took place in Nov. 2000.

In 1995 an estimated 64.3% of the population lived in rural areas. Between 1988 and 1993, 4,700 people were resettled on Teraina and Tabuaeran atolls because the main island group was overcrowded. Banaba, all 16 Gilbert Islands, Kanton (or Abariringa) in the Phoenix Islands and 3 atolls in the Line Islands (Teraina, Tabuaeran and Kiritimati—formerly Washington, Fanning and Christmas Islands respectively) are inhabited; their populations in 1990 (census) were as follows:

Banaba (Ocean Is.)	284	Abemama	3,218	Nikunau	2,048
Makin	1,762	Kuria	985	Onotoa	2,112
Butaritari	3,786	Aranuka	1,002	Tamana	1,396
Marakei	2,863	Nonouti	2,766	Arorae	1,440
Abaiang	5,314	Tabiteuea	4,600	Kanton	45
Tarawa	28,802	North Tabiteuea	3,275	Teraina	936
North Tarawa	3,648	South Tabiteuea	1,325	Tabuaeran	1,309
South Tarawa	25,154	Beru	2,909	Kiritimati	2,537
Maiana	2,184				

The remaining 12 atolls have no permanent population; the 7 Phoenix Islands comprise Birnie, Rawaki (formerly Phoenix), Enderbury, Manra (formerly Sydney), Orona (formerly Hull), McKean and Nikumaroro (formerly Gardner), while the others are Malden and Starbuck in the Central Line Islands, and Millennium Island (formerly Caroline), Flint and Vostok in the Southern Line Islands. The population is almost entirely Micronesian.

English is the official language; Gilbertese is also spoken.

SOCIAL STATISTICS

KEY HISTORICAL EVENTS

Korea was united in a single kingdom under the Silla dynasty from 668. China, which claimed a vague suzerainty over Korea, recognized the latter's independence in 1895. After the Russo-Japanese war of 1904–05, Korea was virtually a Japanese protectorate. It was formally annexed on 29 Aug. 1910. Following the collapse of Japan in 1945, American and Soviet forces entered Korea dividing the country into portions separated by the 38th parallel of latitude. Negotiations between the Americans and the Russians regarding the future of Korea broke down in May 1946. In 1948 two separate states were proclaimed. In the

south, Syngman Rhee, former president of the Korean government in exile, was elected president of the Republic of Korea, while in the north, Kim Il-sung, a major in the Red Army who had marched back into Korea with the Soviet forces, was proclaimed premier of the Democratic People's Republic of Korea. The US occupation forces withdrew from South Korea in June 1949. Military equipment promised by the USA as part of their aid programme was still on its way to Korea when the North Koreans launched, in June 1950, a full-scale invasion across the 38th parallel. The war, in which North Korea received support from the Chinese army and South Korea from the UN forces and the USA, lasted for three years, killed some 5m. people and destroyed an estimated 43% of Korea's industrial plants and 33% of her homes. It was concluded by an armistice signed on 27 July 1953 which implicitly recognized the 38th parallel and the *de facto* boundary between North and South Korea.

Syngman Rhee's authoritarian rule collapsed after student demonstrations brought the country to the brink of civil war in April 1960. A military coup in May 1961 led to the dissolution of the National Assembly, the introduction of martial law and the establishment of Gen. Park Chung Hee as president for the next 17 years. Park's assassination in Oct. 1979 threw the country into a state of crisis. A new, more democratic, constitution, approved by both ruling and opposition parties, came into force in 1988. Since then, Korea has created a lively free market economy which has largely avoided East Asia's recent financial troubles.

On 13 June 2000 South Korea's President Kim Dae-jung flew to North Korea to meet the North Korean leader, Kim Jong Il, in the first ever meeting between the heads of state of the 2 countries. During the 3-day summit South Korea agreed to help to rebuild the economy of North Korea in exchange for an end to the threat of war, the opportunity for families to be reunited and the reconnection of the railway link severed since the division of the Korean peninsula in 1945.

TERRITORY AND POPULATION

South Korea is bounded in the north by the demilitarized zone (separating it from North Korea), east by the East Sea (Sea of Japan), south by the Korea Strait (separating it from Japan) and west by the Yellow Sea. The area is 99,392 sq. km. The population (census, 1 Nov. 2000) was 46,125,000 (urban, 46.3%). Results of an official survey in Nov. 1995, 44,608,726 (22,219,402 females); density, 454.3 per sq. km. Population density (1998), 467.2 per sq. km (one of the highest in the world).

The UN gives a projected population for 2010 of 50.03m.

The official language is Korean. In July 2000 the Korean government introduced a new Romanization System for the Korean Language to romanize Korean words into English.

After Korea was annexed by Japan in 1910, Seoul became the centre for Japanese rule until 1945. The Korean War proved devastating for the city but since then it has expanded rapidly and is now a modern metropolis with one of the highest population densities in the world.

DEFENCE

Peacetime operational control, which had been transferred to the United Nations Command (UNC) under a US general in July 1950 after the outbreak of the Korean War, was restored to South Korea on 1 Dec. 1994. In the event of a new crisis, operational control over the Korean armed forces will revert to CFC. Conscription is 26 months in the Army, 28 months in the Navy and 30 months in the Air Force. Conscripts may choose or be required to exchange military service for civilian work. There were 36,388 US personnel based in South Korea in 1999.

Defence expenditure in 1999 totalled US\$12,088m. (US\$257 per capita), representing 3.0% of GDP.

Army. Strength (1999) 560,000 (140,000 conscripts). Paramilitary Civilian Defence Corps, 3.5m. In addition the majority of South Korea's 4.5m. armed forces reserves were in army divisions.

Navy. A substantial force of 60,000 (19,000 conscripts), including 25,000 marines (1999), continues its steady modernization programme. Current strength includes 19 diesel submarines, 6 destroyers, and 33 ocean-going frigates and corvettes.

The main bases are at Jinhae, Incheon and Busan.

Air Force. In 1999 the Air Force had a strength of 52,000 men and 488 combat aircraft including F-16C/D Fighting Falcons, F-4D/E Phantoms and F-5E/F tactical fighters.

INTERNATIONAL RELATIONS

Defections to South Korea from North Korea totalled 148 in 1999, up from 40 in 1995 and 8 in 1993.

South Korea is a member of the UN, WTO, OECD, Asian Development Bank, Colombo Plan, APEC, IOM and the Antarctic Treaty.

The aim of Korea's foreign policy is to secure international support for peace and stability in Northeast Asia, including a means to reunify the Korean Peninsula without confrontation.

ECONOMY

Agriculture accounted for 5% of GDP in 1999, industry 44% and services 51%.

Policy. The seventh 5-year social and economic development plan (1993–97) was aimed at stabilizing growth and strengthening national competitiveness. Part of the

plan ('the core industrial sector system') was to make the powerful family-owned conglomerates (*chaebol*) more competitive by restricting the industrial areas in which they may engage. Results so far have been mixed. Samsung and the SK Group have restructured but others in the top 5 are resisting change.

After thirty years of impressive economic growth, South Korea was hit by financial crisis in 1997 when it became clear that the *chaebol* had been allowed to borrow too heavily against inadequate returns. During 1997 and 1998 more than a dozen of the 64 *chaebol* went bankrupt. In Dec. 1997 Korea's international debts were estimated at US\$200,000m. An IMF and World Bank rescue was tied to undertakings to transform the economy into one based on market principles instead of state directives. Korea's lack of foreign reserves was also identified as a major problem, thus assistance was secured from the IMF and other global financial institutions totalling US\$58.3bn. Reforms so far approved by the National Assembly include greater monetary policy independence for the central bank, a new structure for financial negotiations and the lifting of the 50% ceiling on foreign ownership of listed Korean companies. During 1998 the government tightened accounting rules to make business more open, gave minority shareholders and institutional investors more say in corporate affairs and opened South Korea's capital markets. A genuine attempt is also being made to welcome foreign investors; foreign investment, which stood at US\$8.9bn. in 1998, rose to a record high of US\$15.69bn. in 2000.

A schedule for privatization was announced in July 1998, whereby out of 24 non-financial state owned enterprises (parent companies), 11 would be privatized in stages by 2002. In addition, the 61 subsidiaries of these 24 parent companies would also be privatized immediately or in stages. It was hoped this scheme would raise US\$10bn. from foreign investors by 2002.

Performance. Total GDP in 1998 was US\$320.7bn. GDP growth rate was 5.0% in 1997 (6.8% in 1996 and 8.9% in 1995), but fell to -6.7% for 1998. It was 10.7% in 1999, the highest rate of any of the southeast Asian economies, and 9.2% in 2000. The 1998 economic performance was the worst since the 1960s. Between 1990 and 1996 the average annual real growth in GNP per capita was 6.2%.

Budget. Revenue and expenditure (in 1,000,000m. won), including bond insurance, at the 1999 budget: 84.9 and 84.9. Sources of revenue: national tax, 61.9; non-tax, 18.2. Expenditure includes: defence, 13.7; infrastructure, 12.2; education, 17.4; agriculture and fisheries, 8.1; technology, 3.8; environment, 1.8.

External liabilities in Dec. 1999 were US\$136.4bn.

Currency. The unit of currency is the *won* (KRW). Inflation was 0.8% in 1999, but rose to 2.3% in 2000. Usable foreign exchange reserves were US\$90.35bn. in July 2000. Gold reserves were 440,000 troy oz in Jan. 2000. Total money supply in Jan. 1998 was 34,891bn. won.

Banking and Finance. The central bank and bank of issue is the Bank of Korea (*Governor*, Chon Chol-hwan). In Dec. 1999 bank deposits totalled 323,400,000m. won, of which 281,300,000m. won were savings and time deposits.

There are 22 national and provincial commercial banks. The largest bank is Kookmin Bank, with assets in Sept. 2000 of 79,800,000m. won (US\$71.5bn.). Other major banks are Hanvit Bank, Cho Hung, Housing & Commercial, and Korea Exchange. In Dec. 2000 Kookmin Bank and Housing & Commercial announced that they would be merging in 2001. There were 73 foreign banks in Dec. 1998. These are granted parity of treatment with domestic banks.

In addition, there are non-bank financial institutions including 45 insurance companies such as the Land Bank of Korea, the Credit Guarantee Fund, and 14 merchant banks. The use of real names in financial dealings has been required since 1994.

South Korea has started to open up once protected industries to foreign ownership, and in 1998 attracted US\$8.9bn. in direct foreign investment.

There is a stock exchange in Seoul.

NORTH KOREA

Chosun Minchu-chui

Inmin Konghwa-guk

(Democratic People's Republic
of Korea)

Capital: Pyongyang

Population estimate, 2000: 22.17m.

Estimated GDP: \$21.8m.

KEY HISTORICAL EVENTS

Following the collapse of Japan in 1945 Soviet forces arrived in North Korea, one month ahead of the Americans, and established a Communist-led provisional government. A Democratic People's Republic was proclaimed on 9 Sept. 1948 and Kim Il-sung became premier, purging all rivals. On 25 June 1950 North Korea invaded the south; its advance was stopped with the aid of UN forces. Chinese Communist 'volunteers' joined the war in Oct. 1950. Truce negotiations were begun in 1951 and concluded on 27 July 1953. A demilitarized zone was set up along the final battle line between North and South Korea. On 13 Dec. 1991 the prime

ministers of North and South Korea signed a declaration of non-aggression, agreeing not to interfere in each other's internal affairs. 3 agreements were reached between the North and South Korean prime ministers in 1992 on proposals for military, economic, political and social co-operation. Kim Il-sung, head of state, Communist Party and the military since 1948, died on 8 July 1994, and was succeeded by his son, Kim Jong Il. On 21 Oct. 1994 an agreement to restrict nuclear power to peaceful purposes in Korea was signed by North Korea and the USA. Since then, negotiations have foundered on evidence of continuing nuclear activity. As the last refuge of Stalinism, North Korea needs a radical economic shake-up to survive but fears the consequences of reform.

Although food aid has been stepped up, the UN World Food Programme estimated in 1997 that 2m. North Koreans face starvation. Good Friends, a Buddhist aid group in Seoul, claims that up to 3.5m. North Koreans have died of starvation since 1995. Recent talks about talks with South Korea holds out the prospect of economic aid in return for a verifiable commitment to arms control.

On 13 June 2000 South Korea's President Kim Dae-jung flew to North Korea to meet the North Korean leader, Kim Jong Il, in the first ever meeting between the heads of state of the 2 countries. During the 3-day summit South Korea agreed to help to rebuild the economy of North Korea in exchange for an end to the threat of war, the opportunity for families to be reunited and the reconnection of the railway link severed since the division of the Korean peninsula in 1945.

TERRITORY AND POPULATION

North Korea is bounded in the north by China, east by the sea of Japan, west by the Yellow Sea and south by South Korea, from which it is separated by a demilitarized zone of 1,262 sq. km. Its area is 122,762 sq. km.

The UN gives a projected population for 2010 of 26.57m.

In the elections to the Supreme People's Assembly held on 26 July 1998, 687 deputies were elected, as was the case in 1990. The South Korean weekly NEWSREVIEW stated that North Korea has made it a rule that there should be one deputy per 30,000 people, suggesting that the population has remained stable since 1990. 30,000 multiplied by 687 would give a population of 20.61m., more than 1.5m. less than official estimates.

The area, 1987 population (in 1,000) and chief towns of the provinces and cities with provincial status:

	<i>Area in sq. km</i>	<i>Population</i>	<i>Chief Town</i>
North Hamgyong	17,570	2,003	Chongjin
South Hamgyong	18,970	2,547	Hamhung

NORTH KOREA

	<i>Area in sq. km</i>	<i>Population</i>	<i>Chief Town</i>
Yanggang	14,317	628	Hyesan
Chagang	16,968	1,156	Kanggye
North Pyongan	12,191	2,408	Shinuiju
South Pyongan	11,577	2,653	Pyongsan

Pyongyang, the capital, had a 1999 population of 3,136,000. Other large towns (estimate, 1987): Hamhung (701,000); Chongjin (520,000); Nampo (370,000); Sunchon (356,000).

The official language is Korean.

SOCIAL STATISTICS

1995 births, 477,000; deaths, 122,000. 1995 birth rate, 21.6 per 1,000 population; death rate, 5.5. Annual population growth rate, 1990–99, 1.6%. Marriage is discouraged before the age of 32 for men and 29 for women. Life expectancy at birth, 1997, was 59.8 years for males and 64.5 years for females. Infant mortality, 1990–95, 24 per 1,000 live births; fertility rate, 1999, 2.0 births per woman. It was estimated in 1999 that up to 300,000 North Korean food-seeking refugees had gone to China to escape the famine. 27% of the population is classified as ‘hostile’ by the regime and 45% as ‘unstable’.

CLIMATE

There is a warm temperate climate, though winters can be very cold in the north. Rainfall is concentrated in the summer months. Pyongyang, Jan. 18°F (–7.8°C), July 75°F (23.9°C). Annual rainfall 37" (916 mm).

CONSTITUTION AND GOVERNMENT

The political structure is based upon the Constitution of 27 Dec. 1972. Constitutional amendments of April 1992 delete references to Marxism-Leninism but retain the Communist Party’s monopoly of rule. The Constitution provides for a *Supreme People’s Assembly* elected every 5 years by universal suffrage. Citizens of 17 years and over can vote and be elected. The government consists of the *Administration Council* directed by the Central People’s Committee (*Secretary*, Chi Chang Ik).

The head of state is the *President*, elected for 4-year terms. On the death of Kim Il-sung on 8 July 1994 his son and designated successor, Kim Jong Il (b. 1942), assumed all his father’s posts. On 5 Sept. 1998 he took over as President and ‘Supreme Leader’.

Party membership was 2m. in 1995. There are also the puppet religious Chongu and Korean Social Democratic Parties and various organizations combined in a Fatherland Front.

National Anthem. ‘A chi mun bin na ra i gang san’ (‘Shine bright, o dawn, on this land so fair’); words by Pak Se Yong, tune by Kim Won Gyun.

RECENT ELECTIONS

Elections to the Supreme People’s Assembly were held on 26 July 1998, the first ones since 1990. Only the list of the Democratic Front for the Reunification of the Fatherland was allowed to participate. 687 deputies were elected. 443 out of the 687, or 64%, were elected to the Assembly for the first time. In 1990 only 31.4% of the deputies were elected for the first time.

In practice the country is ruled by the Korean Workers' (i.e., Communist) Party which elects a Central Committee which in turn appoints a Politburo.

DEFENCE

The Supreme Commander of the Armed Forces is Kim Jong Il. Military service is compulsory at the age of 16 for periods of 5–8 years in the Army, 5–10 years in the Navy and 3–4 years in the Air Force, followed by obligatory part-time service in the Pacification Corps to age 40. Total armed forces troops were estimated to number 1,055,000 in 1999, up from 840,000 in 1986 although down from 1,160,000 in 1997.

Defence expenditure in 1999 totalled US\$2,100m. (US\$98 per capita), and represented 14.3% of GDP.

Nuclear Weapons. North Korea is suspected of having a secret nuclear-weapons programme, and perhaps has enough material to build 2 warheads. North Korea is one of only 3 countries (the others being India and Pakistan) not to have signed the Comprehensive Test Ban Treaty, which is intended to bring about a ban on any nuclear explosions.

Army. One of the world's biggest, the Army was estimated at 950,000 personnel in 1999 with around 600,000 reserves. There is also a paramilitary worker-peasant Red Guard of some 3.5m. and a Ministry of Public Security force of 189,000 including border guards.

Equipment includes some 3,500 T-34, T-54/55, T-62 and Type-59 main battle tanks, chemical weapons and possibly nuclear warheads.

Navy. The Navy, principally tasked to coastal patrol and defence, comprises 26 diesel submarines, 3 small frigates and 5 corvettes. Personnel in 1999 totalled about 46,000 with 65,000 reserves.

Air Force. The Air Force had a total of 593 combat aircraft and 86,000 personnel in 1999. Combat aircraft include J-5/6/7s (Chinese built versions of MiG-17/19/23s), MiG-29s, Su-7s and Su-25s.

INTERNATIONAL RELATIONS

In Sept. 1999 following negotiations between Pyongyang and Washington in Berlin, Pyongyang agreed to put off its plan to test-fire an advanced long-range missile whilst the USA agreed gradually to lift economic sanctions imposed in 1950. The gesture on the part of the USA was the most significant since the end of the Korean War.

In 2000 North Korea received US\$220m. in foreign aid, of which US\$114m. came from South Korea.

North Korea is a member of the UN and the Antarctic Treaty.

ECONOMY

Agriculture is estimated to account for approximately 25% of GDP, industry 60% and services 15%.

Policy. In Dec. 1993 it was officially admitted that the third 7-year plan had failed to achieve its industrial targets owing to the disappearance of Communist markets and aid. Policy now concentrates on the development of agriculture, light industry and foreign trade, but progress is impeded by an all-powerful bureaucracy and a reluctance to depart from the Marxist-Stalinist line.

Performance. GDP growth rate was 6.2% in 1999 following a decade of negative growth. GDP per head was put at US\$741 in 1997, or about a thirteenth of that of South Korea.

Budget. Estimated revenue, 1994, 41,525.2m. won; expenditure, 41,525.2m. won.

Currency. The monetary unit is the *won* (KPW) of 100 *chon*. Banknotes were replaced by a new issue in July 1992. Exchanges of new for old notes were limited to 500 won. Inflation was an estimated 5% in 1998.

Banking and Finance. The bank of issue is the Central Bank of Korea (*Governor*, Kim Wan-su).

Weights and Measures. While the metric system is in force traditional measures are in frequent use. The *jungbo* = 1 ha; the *ri* = 3,927 metres. A new yearly calendar was announced on 9 July 1997 based on Kim Il-sung's birthday on 15 April 1912. Thus 15 April 2001–14 April 2002 is Year 90.

ENERGY AND NATURAL RESOURCES

Electricity. There are 3 thermal power stations and 4 hydro-electric plants. A nuclear power plant is being built. Installed capacity was 10m. kW in 1997. Production in 1998 was 31.97bn. kWh. Consumption per capita was an estimated 1,394 kWh in 1995. Hydro-electric potential exceeds 8m. kW. A hydro-electric plant and dam under construction on the Pukhan near Mount Kumgang has been denounced as a flood threat by the South Koreans, who constructed a defensive 'Peace Dam' in retaliation. American aid to increase energy supply slowed after evidence that North Korea had broken its promise to freeze its nuclear weapons programme. But in Oct. 1998 Japan agreed to contribute US\$1bn. towards building 2 nuclear power stations and the US Congress agreed to funds to supply fuel oil on condition that North Korea abandons its nuclear ambitions.

Oil and Gas. Oil wells went into production in 1957. An oil pipeline from China came on stream in 1976. Crude oil refining capacity was 70,000 bbls. a day in 1990.

Minerals. North Korea is rich in minerals. Estimated reserves in tonnes: iron ore, 3,300m.; copper, 2.15m.; lead, 6m.; zinc, 12m.; coal, 11,990m.; uranium, 26m.; manganese, 6,500m. 62m. tonnes of coal were mined in 1997, 11m. tonnes of iron ore in 1996 and 16,000 tonnes of copper ore in 1995. 1997 production of gold was 5,000 kg; silver, 50 tonnes; salt (1997 estimate), 590,000 tonnes.

Agriculture. In 1997 there were 1.7m. ha of arable land and 300,000 ha of permanent crop land. In 1995 there were 0.65m. ha of paddy fields. In 1995, 4.09m. persons were economically active in agriculture.

Collectivization took place between 1954 and 1958. 90% of the cultivated land is farmed by co-operatives. Land belongs either to the State or to co-operatives, and it is intended gradually to transform the latter into the former, but small individually-tended plots producing for 'farmers' markets' are tolerated as a 'transition measure'. Livestock farming is mainly carried on by large state farms.

There is a large-scale tideland reclamation project. In 1997, 1.46m. ha were under irrigation, making possible 2 rice harvests a year. There were 75,000 tractors in 1997. The technical revolution in agriculture (nearly 95% of ploughing, etc., is mechanized) has considerably increased the yield of wheat (sown on 90,000 ha). Production (1998, in 1,000 tonnes): rice, 2,063; maize, 1,765; cabbages, 600; potatoes, 510; soybeans, 420; dry beans, 270; wheat, 165; pears, 120.

Livestock, 1996: cattle, 1.35m.; pigs, 3.35m.; sheep, 395,000; goats, 713,000; 9m. chickens.

NORTH KOREA

A chronic food shortage has led to repeated efforts by UN agencies to stave off famine. In Jan. 1998 the UN launched an appeal for US\$378m. for food for North Korea, the largest ever relief effort mounted by its World Food Programme.

Forestry. Forest area in 1995 was 6.17m. ha (51.2% of the land area). Timber production was 7m. cu. metres in 1998.

Environment. According to the *World Bank Atlas* carbon dioxide emissions in 1996 were the equivalent of 11.3 tonnes per capita.

Fisheries. In 1998 total catch was approximately 220,000 tonnes, of which 91% were sea fish.

INDUSTRY

Industries were intensively developed by the Japanese occupiers, notably cotton spinning, hydro-electric power, cotton, silk and rayon weaving, and chemical fertilizers. Production in 1995: cement, 17m. tonnes; crude steel (1997), 8.1m. tonnes; pig iron (1997), 6.6m. tonnes; textile fabrics (1994), 350m. metres; motor cars (1993), 10,000; TV sets, 240,000; ships, 50,000 GRT. Annual steel production capacity was 4.3m. tonnes in 1987. Industrial production is estimated to have halved between 1990 and 2000.

Labour. The labour force totalled 11,881,000 (55% males) in 1996. Nearly 35% of the economically active population in 1995 were engaged in agriculture, fisheries and forestry.

INTERNATIONAL TRADE

Joint ventures with foreign firms have been permitted since 1984. A law of Oct. 1992 revised the 1984 rules: foreign investors may now set up wholly-owned facilities in special economic zones, repatriate part of profits and enjoy tax concessions. Economic zones have been set up at the ports of Sonbong and Najin. In 1996 foreign debt was estimated at US\$11,830m. The USA imposed sanctions in Jan. 1988 for alleged terrorist activities. KEY HISTORICAL EVENTS

The ruling dynasty was founded by Shaikh Sabah al-Awwal, who ruled from 1756 to 1772. In 1899 Shaikh Mubarak concluded a treaty with Great Britain wherein, in return for the assurance of British protection, he undertook to support British interests. In 1914 the British Government recognized Kuwait as an independent government under British protection. On 19 June 1961 an agreement reaffirmed the independence and sovereignty of Kuwait and recognized the Government of Kuwait's

responsibility for the conduct of internal and external affairs. On 2 Aug. 1990 Iraqi forces invaded the country. Following the expiry of the date set by the UN for the withdrawal of Iraqi forces, an air offensive was launched by coalition forces, followed by a land attack on 24 Feb. 1991. Iraqi forces were routed and Kuwait City was liberated on 26 Feb. On 10 Nov. 1994 Iraq recognized the independence and boundaries of Kuwait.

TERRITORY AND POPULATION

Kuwait is bounded in the east by the Arabian (Persian) Gulf, north and west by Iraq and south and southwest by Saudi Arabia, with an area of 17,818 sq. km. In 1992–93 the UN Boundary Commission redefined Kuwait's border with Iraq, moving it slightly northwards in conformity with an agreement of 1932. The population at the census of 1995 was 1,590,013 (97.4% urban in 1998), of whom about 56% were non-Kuwaitis. Population density, 89 per sq. km.

The UN gives a projected population for 2010 of 2:39m.

Following the Iraqi occupation of 1990–91, the government announced plans to reduce its population to about 1m. to ensure that Kuwaitis formed a majority at about 0:55m.

The country is divided into 5 governorates: the capital (comprising Kuwait City, Kuwait's 9 islands and territorial and shared territorial waters) (population 305,964, 1998 estimate); Hawalli (496,245); Ahmadi (313,424); Jahra (252,157) and Farwaniya (498,584).

The capital city is Kuwait, with a population in 1995 of 28,559. Other major cities are (1995 populations): as-Salimiya (130,215), Jahra (111,222), Qalib ash-Shuyukh (102,178), Hawalli (82,238), Hitan-al-Janubiyah (63,628).

The Neutral Zone (Kuwait's share, 2,590 sq. km), jointly owned and administered by Kuwait and Saudi Arabia from 1922 to 1966, was partitioned between the two countries in May 1966, but the exploitation of the oil and other natural resources continues to be shared.

In Dec. 1936 Kyrgyzstan was proclaimed one of the constituent Soviet Socialist Republics of the USSR. With the collapse of the Soviet Empire, the

KEY HISTORICAL EVENTS

The Kingdom of Laos, once called Lanxang (the Land of a Million Elephants), was founded in the 14th century. In 1893 Laos became a French protectorate and in 1907 acquired its present frontiers. In 1945, after French authority had been suppressed by the Japanese, an independence movement known as Lao Issara (Free Laos) set up a government which collapsed with the return of the French in 1946. Under a new constitution of 1947 Laos became a constitutional monarchy under the Luang

Prabang dynasty and in 1949 became an independent sovereign state within the French Union. An almost continuous state of war began in 1953 between the Royal Lao Government, supported by American bombing and Thai mercenaries, and the Patriotic Front Pathet Lao, supported by North Vietnamese troops. Peace talks resulted in an agreement on 21 Feb. 1973 providing for the formation of a provisional government of national union and the withdrawal of foreign troops. A provisional coalition government was duly formed in 1974. However, after the Communist victories in neighbouring Vietnam and Cambodia in April 1975, the Pathet Lao took over the running of the whole country, maintaining only a façade of a coalition. On 29 Nov. 1975 HM King Savang Vatthana abdicated and the People's Congress proclaimed a People's Democratic Republic of Laos on 2 Dec. 1975. Since then the country has been run by a regime with zero tolerance for dissent and a fierce distrust of foreigners.

The population (1995 census) was 4,581,258 (2,315,931 females); density, 19 per sq. km. Population, 1997 estimate; 5,117,000. In 1998, 77·7% of the population lived in rural areas.

KEY HISTORICAL EVENTS

The territory that is now Latvia was controlled by crusaders, primarily the German Order of Livonian Knights, until 1561 when Latvia fell into Polish and Swedish hands. Between 1721 and 1795 Latvia was absorbed into the Russian empire. Soviet power was proclaimed in Dec. 1917, but was overthrown when the Germans occupied all Latvia (Feb. 1918). Restored when they withdrew (Dec. 1918), it was overthrown once more by combined British naval and German military forces (May–Dec. 1919), and a democratic government set up. This regime was in turn replaced when a coup took place in May 1934. The secret protocol of the Soviet–German agreement of 23 Aug. 1939 assigned Latvia to the Soviet sphere of interest. On 4 May 1990 the Latvian Supreme Soviet declared, by 138 votes to nil with 58 abstentions, that the Soviet occupation of Latvia on 17 June 1940 was illegal, and resolved to re-establish the authority of the Constitution of 1922. In a referendum in March 1991 the principle of independence was supported by 73.6% of votes cast. A fully independent status was conceded by the USSR State Council in Sept. 1991.

TERRITORY AND POPULATION

Latvia is situated in northeastern Europe. It is bordered by Estonia on the north and by Lithuania on the southwest, while on the east there is a frontier with the Russian Federation and to the southeast with Belarus. Territory, 64,600 sq. km (larger than Denmark, the Netherlands, Belgium and Switzerland). Population (1996), 2,479,870; density, 38 per sq. km.

The UN gives a projected population for 2010 of 2.24m.

In 1998, 73.7% of the population were urban. Nationalities: Latvians 55.3%, Russians 32.5%, Belarussians 4%, Ukrainians 2.9%, Poles 2.2%, Lithuanians 1.3%, Jews 0.4%, Gypsies 0.3%, Estonians 0.1%, Germans 0.1%.

In 1998, 72.72% of the population were Latvian citizens. There was a population of over 700,000 ethnic Russians in 1998.

There are 26 districts, 56 towns and 37 urban settlements. The capital is Riga (805,977 in Jan. 1998); other principal towns, with Jan. 1998 populations, are Daugavpils (116,530), Liepāja (96,268), Jelgava (71,004), Jūrmala (58,975) and Ventspils (46,600).

The official language is Latvian.

Latvia has one of the highest suicide rates in the world (59.5 per 100,000 among males and 11.8 per 100,000 among females in 1998). In 1995 there were 2,799 immigrants and 13,346 emigrants.

CLIMATE

Owing to the influence of maritime factors, the climate is relatively temperate but changeable. Average temperatures in Jan. range from –2.8°C in the western coastal town of Liepāja to –6.6°C in the inland town of Daugavpils. The average summer temperature is 20°C.

CONSTITUTION AND GOVERNMENT

The Declaration of the Renewal of the Independence of the Republic of Latvia dated 4 May 1990, and the 21 Aug. 1991 declaration re-establishing *de facto* independence, proclaimed the authority of the Constitution (*Satversme*). The Constitution was fully re-instituted as of 6 July 1993, when the 5th Parliament (*Saeima*) was elected.

The head of state in Latvia is the *President*, elected by parliament for a period of 4 years.

The highest legislative body is the one-chamber parliament comprised of 100 deputies and elected in direct, proportional elections by citizens 18 years of age and over. Deputies serve for 4 years and parties must receive at least 5% of the national vote to gain seats in parliament.

In a referendum on 3 Oct. 1998, 53% of votes cast were in favour of liberalizing laws on citizenship, which would simplify the naturalization of the Russian-speakers who make up nearly a third of the total population and who were not granted automatic citizenship when Latvia regained its independence from the former Soviet Union in 1991.

Executive power is held by the *Cabinet of Ministers*.

National Anthem. 'Dievs, svēti Latviju' ('God bless Latvia'); words and tune by Kārlis Baumanis.

DEFENCE

Since Latvia gained its independence in Aug. 1991, a renewal process for Latvia's armed forces, including the National Armed forces, the Home Guard and Border Guard, has been under way. Military service is compulsory for male citizens from the age of 19 (women and men 18 years and older can join the national defence forces voluntarily) and the duration of military service is 18 months. Conscientious objectors have the option of serving in non-military service. Latvia has signed a defence co-operation treaty with Lithuania and Estonia to co-ordinate Baltic States'

defence and security activities. A joint Baltic peacekeeping force has been established (BALTBAT) as well as a joint navy fleet (BALTRON), and a joint air control system (BALNET) was introduced in 1998. A sub-unit of Latvia's National Armed Forces is participating in the NATO led IFOR operations in the former Yugoslavia as a part of a joint Latvian-Danish military battalion.

In 1999 military expenditure totalled US\$58m. (US\$24 per capita), representing 1.0% of GDP.

INTERNATIONAL RELATIONS

Latvia is a member of the UN, WTO, OSCE, Council of Europe, Council of the Baltic Sea States, IOM and the NATO Partnership for Peace (and is looking for full NATO membership by 2002), an Associate Partner in WEU, and an Associate Member of the EU. At the European Union's Helsinki Summit in Dec. 1999 Latvia, along with 5 other countries, was invited to begin full negotiations for membership in Feb. 2000.

ECONOMY

Services accounted for 70.5% of GDP in 2000, industry 25% and agriculture 4.5%.

The Latvian Privatization Agency, established in 1994 to oversee the entire privatization process, has adopted a case-by-case approach in determining the privatization method for each entity earmarked for privatization. 97% of all state enterprises have been assigned for privatization. The private sector constitutes approximately 66% of GDP and 70% of employment. The private sector contributes about 90% in the key industries of construction, agriculture and manufacturing. Latvian citizens, local and state authorities and legal entities, which are either majority owned by Latvian citizens or foreign nationals from countries with which Latvia has mutual investment protection agreements, can freely purchase both industrial and agricultural land that has been entered in the Land Book.

Policy. By 1994, 70% of industrial capacity was still in state ownership, and a Privatization Agency was set up to accelerate the transfer to private hands. By Jan. 1995, 86.9% of residents had taken out privatization vouchers. 230 state enterprises were privatized in 1995, realising 37.3m. lats, of which 21.8m. lats were provided by vouchers. A number of large and economically significant enterprises such as Lattelekom (telecommunications sector), Ventspils Nafta (energy sector) and Latvijas Kugniecība are still to be privatized but may well be during 2001. There have been successful privatizations in banking, transport and gas.

Performance. GDP growth of 5.1% was recorded in 2000 (the highest among the Baltic states) after 0.1% growth in 1999. Total GDP was US\$6.4bn. in 1998.

Budget. The financial year is the calendar year. The fiscal deficit in 2000, according to the law 'On State Budget', was projected to be 2% of GDP, declining in 2001 to 1.7% of GDP. In 1999 the fiscal deficit was 4.0% of GDP, mostly as a consequence of the Russian financial crisis.

Government revenue and expenditure (in 1m. lats):

	1996	1997	1998	1999
Revenue	845.2	1,088.5	1,245.6	1,232.8
Expenditure	877.3	1,028.4	1,246.5	1,379.9

Currency. The unit of currency is the *lats* (LVL) of 100 *santims*. The lats has been pledged to the SDR basket. Inflation in the first 9 months of 2000 was 0.1%; the target level for 2000 was 3%. In 1999 inflation was 3.2%, down from 4.7% in 1998. Gold reserves were 250,000 troy oz in Jan. 2000. Total money supply in Feb. 1998 was 550m. lats.

Banking and Finance. The Bank of Latvia both legally and practically is a completely independent institution. Governor of the Bank and Council members are appointed by Parliament for office for 6 years (present *Governor*, Einārs Repše). In

1999 there were 24 banks in Latvia, including the Riga branches of Société Générale and Vereinsbank. 19 banks out of 24 ended 1999 with a profit. In 1999 the transitional period which had been given for banks to ensure they have capital of 5m. euros ended with 14 banks fulfilling the requirement. The only bank fully owned by the state is Latvijas Hipoteku un Zemes Banka.

There is a stock exchange in Riga.

Oil and Gas. Nearly 29% of the Latvian energy resources come from gas. 60% of gas is used for heat generation, 25% in industry and the remaining 15% by other consumers.

The market share of oil products is about 38%, including heavy fuel oil. 70% of oil is used for heat generation, 20% in industry and the remaining 10% in transport.

In 1998 it operated scheduled services to Copenhagen, Frankfurt, Hamburg, Helsinki, Kyiv, London, Minsk, Munich, Stockholm, Tallinn,

Ventspils can handle up to 100,000 containers a year and it is estimated that it will be able to handle 250,000 a year when the second stage of a US\$70m. development project is completed early in the 21st century. This project will change Ventspils from a port principally designed for the export of oil and other products from Russia to one which is also a major import centre.

Telecommunications. Telecommunications are conducted by companies in which the government has a 51% stake, under the aegis of the state-controlled Lattelekom. KEY HISTORICAL EVENTS

The Ottomans invaded Lebanon, then part of Syria, in 1516–17 and held nominal control until 1918. After 20 years' French mandatory regime, Lebanon was proclaimed independent on 26 Nov. 1941. In early May 1958 the Muslim opposition to President Chamoun rose in insurrection and for 5 months the Muslim quarters of Beirut, Tripoli, Sidon and the northern Bekaa were in insurgent hands. On 15 July the US Government landed army and marines who re-established Government authority. Internal problems were exacerbated by the Palestinian problem. An attempt to regulate the activities of Palestinian fighters through the secret Cairo agreement of 1969 was frustrated both by the inability of the Government to enforce its provisions and by an influx of battle-hardened fighters expelled from Jordan in Sept. 1970. From March 1975 Lebanon was beset by civil disorder by which the economy was brought to a virtual standstill.

By Nov. 1976 large-scale fighting had been brought to an end by the intervention of the Syrian-dominated Arab Deterrent Force. Large areas of the country, however, remained outside governmental control, including West Beirut, which was the scene of frequent conflict between opposing militia groups. In March 1978 there was an Israeli invasion following a Palestinian attack inside Israel. Israeli troops eventually withdrew in June, but instead of handing over all their positions to UN Peacekeeping Forces, they installed Israeli-controlled Christian Lebanese militia forces in border areas. In June 1982 Israeli forces once again invaded, this time in massive strength, and swept through the country, eventually laying siege to and bombing Beirut. In Sept. Palestinian forces, together with the PLO leadership, evacuated Beirut. Israeli forces started a withdrawal on 16 Feb. 1985 but it was not until the end of 1990 that the various militias which had held sway in Beirut withdrew. A new Government of National Reconciliation was announced on 24 Dec. 1990. The dissolution of all militias was decreed by the National Assembly in April 1991, but the Shia Muslim militia Hizbollah was allowed to remain active. Following a 17-day Israeli bombardment of Hizbollah positions in April 1996, a US-brokered unsigned 'understanding' of 26 April 1996 guaranteed that Hizbollah guerrillas and Palestinian radical groups would cease attacks on civilians in northern Israel and granted Israel the right to self-defence. Hizbollah maintained the right to resist Israel's occupation of Lebanese soil. In May 2000 Israel completed its withdrawal from south Lebanon, 22 years after the first invasion.

TERRITORY AND POPULATION

Lebanon is mountainous, bounded on the north and east by Syria, on the west by the Mediterranean and on the south by Israel. The area is 10,452 sq. km (4,036 sq. miles). Population (1991 estimate), 2.84m.; density, 265 per sq. km. In 1998, 88.9% of the population were urban.

The UN gives a projected population for 2010 of 3.74m.

The principal towns, with estimated population (1998), are: Beirut (the capital), 1.5m.; Tripoli, 160,000; Zahlé, 45,000; Saida (Sidon), 38,000.

The official language is Arabic. French and, increasingly, English are widely spoken in official and commercial circles. Armenian is spoken by a minority group.

SOCIAL STATISTICS

1995 births, 77,000; deaths, 20,000. Birth rate per 1,000 population, 1995, 25.6; death rate, 6.8. Infant mortality was 29 per 1,000 live births in 1998; expectation of life, 68.1 years for males and 71.7 for females. CONSTITUTION AND GOVERNMENT

The first Constitution was established under the French Mandate on 23 May 1926. It has since been amended in 1927, 1929, 1943 (twice), 1947 and 1990. It is based on a separation of powers, with a President, a single-chamber *National Assembly* elected by universal suffrage at age 21 in 12 electoral constituencies, and an independent judiciary. In Oct. 1995 the National Assembly extended the President's term of office from 6 to 9 years. The executive consists of the President and a Prime Minister and Cabinet appointed after consultation between the President and the National Assembly. The system is adapted to the communal balance on which Lebanese political life depends by an electoral law which allocates deputies according to the religious distribution of the population, and by a series of constitutional conventions whereby, e.g., the President is always a Maronite Christian, the Prime Minister a Sunni Muslim and the Speaker of the Assembly a Shia Muslim. There is no party system. In Aug. 1990, and again in July 1992, the National Assembly voted to increase its membership, and now has 128 deputies with equal numbers of Christians and Muslims.

On 21 Sept. 1990 President Hrawi established the Second Republic by signing constitutional amendments which had been negotiated at Taif (Saudi Arabia) in Oct. 1989. These institute an executive collegium between the President, Prime Minister and Speaker, and remove from the President the right to recall the Prime Minister, dissolve the Assembly and vote in the Council of Ministers.

KEY HISTORICAL EVENTS

The Basotho nation was constituted in the 19th century under the leadership of Moshoeshoe I, bringing together refugees from disparate tribes scattered by Zulu expansionism in southern Africa. After war with land-hungry Boer settlers in 1856 (and again in 1886), Moshoeshoe appealed for British protection. This was granted in 1868, and in 1871 the territory was annexed to the Cape Colony (now Republic of South Africa), but in 1883 it was restored to the direct control of the British government through the High Commissioner for South

Africa. In 1965 full internal self-government was achieved under King Moshoeshoe II. On 4 Oct. 1966 Basutoland became an independent and sovereign member of the British Commonwealth as the Kingdom of Lesotho. Chief Leabua Jonathan, leader of the Basotho National Party and prime minister from 1965, suspended the constitution when the elections of 1970 were declared invalid. On 20 Jan. 1986, after a border blockade by the Republic of South Africa, Chief Jonathan was deposed in a bloodless military coup led by Maj.-Gen. Justin Lekhanya who granted significant powers to the king. King Moshoeshoe II was deposed in Nov. 1990 and replaced by King Letsie III. Maj.-Gen. Lekhanya was deposed in May 1991. A democratic constitution was promulgated in April 1993. The elections in May 1998 were won by the ruling Lesotho Congress for Democracy. In Sept. 1998 an army mutiny prompted intervention from South Africa to support the government.

LIBERIA

Republic of Liberia

Capital: Monrovia
Population estimate, 2000: 3.26m.
Estimated GDP: \$2.8bn.

KEY HISTORICAL EVENTS

The Republic of Liberia had its origin in efforts to establish freed American slaves in a colony on the West African coast. In 1822 a settlement was formed near the spot where Monrovia now stands. On 26 July 1847 the State was constituted as the Free and Independent Republic of Liberia.

On 12 April 1980 President Tolbert was assassinated and his government overthrown in a coup led by Master-Sergeant Samuel Doe, who was later installed as Head of

State. At the beginning of 1990 rebel forces entered Liberia from the north and fought their way successfully southwards to confront President Doe's forces in Monrovia. The rebels comprised the National Patriotic Front of Liberia (NPFL) led by Charles Taylor, and the hostile breakaway Independent National Patriotic Front led by Prince Johnson. A peacekeeping force dispatched by the Economic Community of West African States (ECOWAS) disembarked at Monrovia on 25 Aug. 1990, and attempts to form a new provisional government were made. On 9 Sept. 1990 President Doe was assassinated by Prince Johnson's rebels. ECOWAS installed a provisional government led by Amos Sawyer. Charles Taylor also declared himself president, as did the former vice-president, Harry Moniba. A succession of ceasefires was negotiated and broken. A peace agreement was signed on 17 Aug. 1996 under the auspices of ECOWAS in Abuja which provided for the disarmament of all factions by the end of Jan. 1997 and the election of a president on 31 May 1997. By the end of Jan. 1997 some 20,000 out of perhaps 60,000 insurgents had surrendered their arms. Possession of arms after that date became a criminal offence. The civil war is reckoned to have killed up to 200,000 people and made 1m. homeless. A presidential election was held in July 1997. Charles Taylor was elected by an overwhelming majority.

TERRITORY AND POPULATION

Liberia is bounded in the northwest by Sierra Leone, north by Guinea, east by Côte d'Ivoire and southwest by the Atlantic ocean. The total area is 99,067 sq. km. The UN gives a projected population for 2010 of 4.44m.

In 1995 an estimated 55% of the population were rural. English is the official language spoken by 15% of the population. KEY HISTORICAL EVENTS

Tripoli fell under Ottoman domination in the 16th century and although in 1711 the Arab population secured some measure of independence, the country came under the direct rule of Turkey in 1835. In 1911 Italy occupied Tripoli and in 1912, by the Treaty of Ouchy, Turkey recognized the sovereignty of Italy in Tripoli. During the Second World War, the British army expelled the Italians and their German allies, and Tripolitania and Cyrenaica were placed under British,

and Fezzan under French, military administration. This continued until 1950 under a UN directive. Libya became an independent, sovereign kingdom with the former Amir of Cyrenaica, Muhammad Idris al Senussi, as king on 24 Dec. 1951. King Idris was deposed in Sept. 1969 by a group of army officers, 12 of whom formed the Revolutionary Command Council which, chaired by Col. Muammar Qadhafi, proclaimed the Libyan Arab Republic. In 1977 the Revolutionary Command Council was superseded by a more democratic People's Congress. Qadhafi remained head of state. Throughout the 1980s Libya had constant disagreements with its neighbours and its relations with the USA and other Western countries deteriorated, culminating in the US bombing of the capital in April 1987 to punish Qadhafi for his alleged support of international terrorism. A US trade embargo was enforced in 1986. In 1992 the UN imposed sanctions after Libya refused to surrender suspects in the 1988 bombing of a Pan Am flight over Lockerbie in Scotland. In April 1999 Libya handed over the 2 suspects to be tried in the Netherlands but under Scottish law. In Jan. 2001 Abdelbaset Ali Mohmed al Megrahi was sentenced to life imprisonment after being found guilty of murder. The UN has responded to Libya's disavowal of terrorism with a promise to lift sanctions but a US trade embargo remains in place.

CONSTITUTION AND GOVERNMENT

In 1977 a new form of direct democracy, the state of the masses, was promulgated and the name of the country was changed to Great Socialist People's Libyan Arab Jamahiriya. Under this system, every adult is supposed to share in policy making through the Basic People's Congresses of which there are some 2,000. These Congresses appoint People's Committees to execute policy. Provincial and urban affairs are handled by People's Committees responsible to Municipality People's Congresses, of which there are 26, now called *Shabiyat*. Officials of these Congresses and Committees form at national level the 3,000-member General People's Congress which normally meets for about a week early each year (usually in March). This is the highest policy-making body in the country. The General People's Congress appoints its own General Secretariat and the General People's Committee, whose members (the equivalents of ministers elsewhere) head the government departments which execute policy at national level.

Until 1977 Libya was ruled by a Revolutionary Command Council (RCC) headed by Col. Muammar Qadhafi. Upon its abolition in that year the 5 surviving members of the RCC became the General Secretariat of the General People's Congress, still under Qadhafi's direction. In 1979 they stood down to be replaced by officials elected by the Congress. Since then, Col. Qadhafi has retained his position as Leader of the Revolution. Neither he nor his former RCC colleagues have any formal posts in the present administration, although they continue to wield considerable authority.

KEY HISTORICAL EVENTS

At the time of Tatar-Mongol domination of Russia, Lithuania annexed Russian lands until by the middle of the 15th century Belorussia, parts of Russia and Ukraine as far as the Black Sea were under its rule. Lithuania united with Poland dynastically in 1385 and politically in 1569. During the partitions of the Polish-Lithuanian Commonwealth by Russia, Prussia and Austria in the 18th century, Lithuania yielded its Russian territories and was absorbed into the Russian empire in 1795.

Following the German occupation during the First World War and the Russian revolution on 16 Feb. 1918, heavy fighting occurred between the Soviet, German, Polish and Lithuanian forces. In April 1919 the Soviets withdrew and the re-formed Lithuanian government established a democratic republic. Lithuanian independence was recognized by the Treaty of Versailles. In Dec. 1926 the democratic regime was overthrown by a coup. The secret protocol of the Soviet-German frontier treaty of 23 Sept. 1939 assigned the greater part of Lithuania to the Soviet sphere of influence. Lithuania became a Soviet Socialist Republic of the USSR on 3 Aug. 1940.

On 11 March 1990 the newly-elected Lithuanian Supreme Soviet proclaimed independence. This decision was not accepted by the USSR government. Initially dispatched to Vilnius to enforce conscription, Soviet army units occupied key buildings in the face of mounting popular unrest. On 13 Jan. the army fired on demonstrators and there were fatal casualties. A referendum on independence was held in Feb. 1991 at which 90.5% voted in favour. A fully independent status was conceded by the USSR on 6 Sept. 1991.

The parliament's 70 other seats are distributed according to the proportional popularity of the political parties at the ballot box.

The *Constitutional Court* is empowered to rule on whether proposed laws conflict with the constitution or existing legislation. It comprises 9 judges who serve 9-year terms, one third rotating every 3 years.

KEY HISTORICAL EVENTS

Lying at the heart of Western Europe between Belgium, France and Germany, the Grand-Duchy of Luxembourg has been an independent State ever since the Treaty of London of 19 April 1839. The origins of Luxembourg stretch back to 963 AD when Count Sigfried founded the castle of Lützelinburhurch. The House of Luxembourg was most prominent on the European scene during the 14th and 15th centuries, when four Counts of the House of Luxembourg became Emperors of the Holy Roman

Empire and Kings of Bohemia. The House of Luxembourg subsequently went into decline and was successively occupied by Burgundy, Spain, Austria and finally by revolutionary France. In 1815 the Vienna Treaty decided that the Grand Duchy of Luxembourg would come under the Netherlands ruling house of Orange-Nassau. In 1839 the Walloon-speaking area was joined to Belgium. The union with the Netherlands ended in 1890. In both world wars (1914–18 and 1939–45) Luxembourg, a neutral country, was invaded and occupied by German forces. In June 1942 Luxembourg became the only Nazi-occupied country to stage a general strike against the occupation. In 1948 a Benelux customs union formed by Belgium, the Netherlands and Luxembourg allowed for standardization of prices, taxes and wages and the free movement of labour among the three countries. Luxembourg was a founder member of the European Union.

TERRITORY AND POPULATION

Luxembourg has an area of 2,586 sq. km (999 sq. miles) and is bounded on the west by Belgium, south by France, east by Germany. The population (2000) was 435,700 (including 159,400 foreigners); density, 168 per sq. km. A census took place on 15 Feb. 2001. The percentage of foreigners living in Luxembourg has increased dramatically in recent years, from 26% in 1986 to 36% in 2000. The main countries of origin of foreigners living in Luxembourg are Portugal (57,000 in Jan. 2000), Italy (20,100) and France (18,800).

In 1998 an estimated 89.2% of the population were urban. The capital, Luxembourg, had (2000) 80,700 inhabitants; Esch-sur-Alzette, the centre of the mining district, 25,200; Differdange, 17,300; Dudelange, 17,100, and Pétange, 13,700.

The UN gives a projected population for 2010 of 456,000.

Letzebuergesch is spoken by most of the population, and since 1985 has been an official language with French and German.

CONSTITUTION AND GOVERNMENT

The Grand Duchy of Luxembourg is a constitutional monarchy.

The reigning Grand Duke is **Henri**, b. 16 April 1955, son of the former Grand Duke Jean and Princess Joséphine-Charlotte of Belgium; succeeded 7 Oct. 2000 on the abdication of his father; married Maria Teresa Mestre 14 Feb. 1981 (*Offspring*: Prince Guillaume, b. 11 Nov. 1981; Prince Felix, b. 3 June 1984; Prince Louis, b. 3 Aug. 1986; Princess Alexandra, b. 16 Feb. 1991; Prince Sebastian, b. 16 April 1992).

The constitution of 17 Oct. 1868 was revised in 1919, 1948, 1956, 1972, 1983, 1988, 1989, 1994, 1996 and 1998.

The separation of powers is not clearly defined between the legislature and the executive, resulting in much interaction between the two bodies. Only the judiciary is completely independent.

The 12 cantons are divided into 4 electoral districts: the South, the East, the Centre and the North. Voters choose between party lists of candidates in multi-member constituencies. The parliament is the *Chamber of Deputies*, which consists of a maximum of 60 members elected for 5 years. Voting is compulsory and there is universal suffrage. Seats are allocated according to the rules of proportional representation and the principle of the smallest electoral quote. There is a *Council of State* of 21 members appointed by the Sovereign. Membership is for a maximum period of 15 years, with retirement compulsory at the age of 72. It advises on proposed laws and any other question referred to it.

The head of state takes part in the legislative power, exercises executive power and has a part in the judicial power. The constitution leaves to the sovereign the right to organize the government, which consists of a Minister of State, who is Prime Minister, and of at least 3 Ministers. Direct consultation by referendum is provided for in the Constitution.

National Anthem. 'Ons Hemecht' ('Our Homeland'); words by M. Lentz, tune by J. A. Zinnen.

There is a volunteer light infantry battalion of (2000) 788, of which only the career officers are professionals. In recent years Luxembourg soldiers and officers have been actively participating in peacekeeping missions, mainly in the former Yugoslavia. There is also a Gendarmerie of 612. In 2000 the Gendarmerie and the police force merged. NATO maintains a squadron of E-3A *Sentries*.

In 1999 military expenditure totalled US\$138m. (US\$331 per capita), representing 0.8% of GDP.

INTERNATIONAL RELATIONS

Luxembourg is a member of the UN, WTO, NATO, Benelux, the EU, OECD, the Council of Europe, WEU, OSCE, IOM and the International Organization for Francophonie. The Schengen Accord of June 1990 abolished border controls between Luxembourg, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, the Netherlands, Norway, Portugal, Spain and Sweden.

ECONOMY

Services accounted for 81.0% of GDP in 1999, industry 18.3% and agriculture 0.7%.

According to the anti-corruption organization *Transparency International*, Luxembourg ranked equal 11th in the world in 2000 in a survey of the countries with the least corruption in business and government. It received 8.6 out of 10 in the annual index.

Policy. The world economic crisis of 1973–74 hit the then monolithic Luxembourg economy very hard. The previously strong steel sector had to be thoroughly restructured and this, along with industrial diversification and the emergence of the new service sector, helped to consolidate Luxembourg's economic indicators. The service sector employs the most people, including 23,985 employees in more than 200 banks (1999). Companies dealing with insurance, reinsurance and pension funds are the next biggest employers. Other prospering sectors of the Luxembourg economy include telecommunications, audio-visual and multimedia, and industrial plastics.

Performance. In terms of GDP per head, Luxembourg is the richest sovereign country in the world, with a per capita PPP (purchasing power parity) GDP of US\$33,505 in 1998.

Real GDP growth was 7.5% in 1999 and 5.5% in 2000. Total GDP in 2000 was LUF732bn. (US\$17.1bn.).

The OECD Economic Survey of 1999 reports: 'The Luxembourg economy has continued to perform well... Exports have been a major driving force, underpinned by buoyant export markets and a strong export performance of the financial and communication sectors. Private consumption has strengthened due to higher wage increases and robust employment growth. Investment has also been buoyant, partly due to special factors such as the purchase of some aircraft.'

Luxembourg was third behind the USA and Singapore in the Growth Competitiveness Ranking in the World Economic Forum's *Global Competitiveness Report 2000*.

Budget. Revenue and expenditure (including extraordinary) for years ending 30 April (in 1m. francs):

	1997	1998	1999	2000
Revenue	182.1	170.3	180.0	194.2
Expenditure	176.9	170.4	179.8	194.1

Public debt in June 2000 was LUF28·1bn., of which LUF26·4bn. was domestic. VAT is 15%, with reduced rates of 6% and 3% (for books).

According to government projections, the general government surplus was expected to be 1·6% of GDP in 1999. Income taxes and business taxes have been reduced to preserve competitiveness in the international environment. The normal tax rate for companies came down to 37·45% in 1998, compared with 40·3% in 1996.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Luxembourg; irrevocable conversion rate 40·3399 Luxembourg francs to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002—until then the national currency will be used for payment in cash. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002, the euro can be used in banking, by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and Luxembourg francs until the Luxembourg franc is withdrawn from circulation—which must be by 1 July 2002 and is scheduled for 28 Feb. 2002. As a result of the adoption of the euro, monetary union with Belgium has been terminated.

The *Luxembourg franc* (LUF) notionally consists of 100 *centimes*. Inflation in 1999 was an estimated 1·7%. Foreign exchange reserves (excluding gold) were US\$75,000m. in 1995. Gold reserves were 80,000 troy oz in Jan. 2000.

Banking and Finance. Luxembourg's Central Bank (formerly the Monetary Institute) was established in July 1998 (*Director-General*, Yves Mersch). In 1999 there were 210 banks and, in 1997, 75 other credit institutions established in Luxembourg, which has become an international financial centre. Luxembourg has more credit institutions in proportion to the population than any other country. German banks make up nearly a third of all the banks. Total deposits in 1998 were 8,262·9m. euros; net assets in unit trusts, LUF10,926·3bn.; net assets in investment companies, LUF8,482·9bn. There is a stock exchange.

The financial sector accounted for 18·9% of GDP in 1997 and the banks showed a net profit of LUF76·5bn. The total number of approved insurance companies in 1999 was 94, with reinsurance companies numbering 257; the amount of premiums due was LUF233,169·0m.

According to the OECD Economic Survey of 1999: 'Tax advantages in comparison with neighbouring countries, strict bank secrecy rules, a liberal regulatory environment and the rapid implementation of EU directives in Luxembourg law, combined with a favourable geographical location at the heart of Europe and a qualified and multilingual labour force, have been central in creating competitive advantages in financial services.'

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Electricity. Apart from hydro-electricity and electricity generated from fossil fuels, Luxembourg has no national energy resources. Installed capacity in 1997 was 1·2m. kW. Net electricity production was 990m. kWh in 1999. Consumption per capita in 1999 was 13,073 kWh.

Minerals. The national steel industry mainly relies on imported ore. In 1999 production (in tonnes) of steel, 2,600,324; of pig-iron (1997), 438,030.

Agriculture. The contribution of agriculture, viticulture and forestry to the economy has been gradually declining over the years, accounting for only 0·7% of GDP in 1999. However, the actual output of this sector has nearly tripled during the past 30 years, a trend common to many EU countries. Agriculture accounts for 11·9% of exports and 12·9% of imports. There were 5,738 workers engaged in agricultural work (including wine-growing and forestry) in 1999 (1,841 wage-earners), and 2,813 farms with an average area of 51·65 ha; 127,405 ha were under cultivation in 1999.

LUXEMBOURG

Production, 1999 (in tonnes) of main crops: grassland and pasturage, 383,625; maize, 311,200; forage crops, 252,298; bread crops, 49,914; potatoes, 25,700; colza, 13,570. Production, 1999 (in 1,000 tonnes) of meat, 30.3; milk, 259.4; butter, 3.1 (1996); cheese, 3.0 (1996). In 1999–2000, 184,277 hectolitres of wine were produced. In 1999 there were 7,508 tractors, 785 harvester-threshers, 1,697 manure spreaders and 1,857 gatherer-presses.

Livestock (1999): 2,818 horses, 207,862 cattle, 85,830 pigs, 8,220 sheep.

Forestry. In 1997 there were 88,620 ha of forests, which in 1999 produced 162.625 cu. metres of broadleaved and 142,877 cu. metres of coniferous wood.

Environment. According to the *World Bank Atlas* carbon dioxide emissions in 1996 were the equivalent of 19.9 tonnes per capita.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest company in Luxembourg in April 2000 was Audiofina (market capitalization of US\$8,336.3m.).

In 1998 there were 2,600 industrial enterprises, of which 1,621 were in the building industry. Production, 1999 (in 1,000 tonnes): steel, 2,600; rolled steel products, 4,239.

Labour. In 1999 the estimated total workforce was 248,300. The government fixes a legal minimum wage. Retirement is at 65. Employment creation averaged 3.3% every year between 1985 and 1997, with a total increase in jobs of 47.8% over the period. In 1997 the unemployment rate was 3.6%, but by Sept. 1998 it had dropped to 3.0%. By the end of 1999 it had declined to 2.9%. Luxembourg has the lowest rate of unemployment for any EU nation.

The OECD reports that Luxembourg has one of the lowest unemployment rates among OECD members, but 'a broader concept of labour under-utilization ('broad unemployment'), which adds people of working age in benefit schemes and labour market programmes to registered unemployment, shows a less favourable development, with broad unemployment exceeding 13% of the broad labour force in 1997, compared with less than 12% in 1995.'

Between 1989 and 1998 strikes cost Luxembourg an average of just 6 days per 1,000 employees a year (the second-lowest in the European Union, with Austria having 4 per 1,000), compared to the EU average of 85 per 1,000.

There was a 5.3% increase in employment in 1999—the largest since 1985. Of the 11,500 net new jobs created, around two-thirds went to so-called *frontaliers*, workers living in surrounding countries who commute into Luxembourg to work.

Trade Unions. The main trade unions are the O-GBL (Socialist) and the LCGB (Christian-Social). Other sectorial unions include ALEBA (the banking sector), FNCTLL (railworkers), and FEP (private employers). In Oct. 1998 union representatives were elected in both the private and public sectors.

INTERNATIONAL TRADE

Luxembourg is in the process of turning itself into a centre for electronic commerce, the world's fastest-growing industry.

Imports and Exports. Exports in 1999 (provisional figures) totalled LUF299,584m., and imports LUF408,962m. Luxembourg exports 90% of GDP, of which 75% goes to Germany, Belgium and France. In 1999, 85.4% of exports were from other EU member countries and 84.2% of imports went to other EU member countries.

In 1998 services were also provided by Aeroflot, Air France, Austrian Airlines, British Airways, Condor Flugdienst, Delta Air Lines, Hapag Lloyd, KLM, Lufthansa, Malév, SABENA, SAS, Swissair, TAP, Tunis Air and Tyrolean Airways. Cargolux has developed into one of the major international freight carriers.

Shipping. A shipping register was set up in 1990. In 1999 merchant shipping totalled 1,481,339 tonnes, including oil tankers, 244,000 GRT. 139 vessels were registered at 25 June 2000.

Telecommunications. Luxembourg had 310,893 main telephone lines in 1999, or 718.8 for every 1,000 population (the highest rate for any sovereign country). In 1999 there were 209,000 mobile phones and 170,000 PCs in use (396 per 1,000 persons), in 1997 there were 17,000 fax machines, and in 2000 there were some 95,000 Internet users.

Postal Services. In 1999 there were 106 post offices. In 1999 a total of 170m. items of mail were processed (394 items per person).

SOCIAL INSTITUTIONS

Justice. The Constitution makes the Courts of Law independent in performing their functions, restricting their sphere of activity, defining their limit of jurisdiction and providing a number of procedural guarantees. The Constitution has additionally laid down a number of provisions designed to ensure judges remain independent of persons under their jurisdiction, and to ensure no interference from the executive and legislative organs. All judges are appointed by Grand-Ducal order and are irremovable.

The judicial organization comprises 3 Justices of the Peace (conciliation and police courts). The country is, in addition, divided into 2 judicial districts, i.e. Luxembourg and Diekirch. District courts deal with matters such as civic and commercial cases. Offences which are punishable under the Penal Code or by specific laws with imprisonment or hard labour fall within the jurisdiction of the criminal chambers of District Courts, as the Assize Court was repealed by law in 1987. The High Court of Justice consists of a Supreme Court of Appeal and a Court of Appeal.

The judicial organization of the Grand-Duchy does not include the jury system. A division of votes between the judges on the issue of guilt/innocence may lead to

acquittal. Society before the Courts of Law is represented by the Public Prosecutor Department, composed of members of the judiciary directly answerable to the government.

In 1999 a new Administrative Tribunal, Administrative Court and Constitutional Court were established.

The population in penal institutions in 1996 was 431 (105 per 100,000 of national population).

Religion. The population is mostly Roman Catholic. There are small Protestant, Jewish, Greek and Russian Orthodox and Muslim communities as well.

Education. The adult literacy rate in 1998 was at least 99%. Education is compulsory for all children between the ages of 6 and 15. In 1998–99 there were 10,349 children in pre-primary school with 625 teachers; 29,302 pupils in primary schools; 30,324 pupils in secondary schools (including vocational training). In higher education (1999–2000) the Higher Institute of Technology had 278 students. In 1999–2000 there were 385 students in teacher training. In 1999–2000 the University Centre of Luxembourg had 1,409 students. Luxembourg does not have a full-time university, so many students have to go abroad, predominantly to France, Germany and Belgium. In 1998–99, 4,273 students pursued university studies abroad.

In 1996 total expenditure on education came to 4.0% of GNP.

Health. In 1999 there were 1,095 doctors (364 GPs and 731 specialists) and 269 dentists. There were 34 hospitals and 4,493 hospital beds in 1994. Total health spending accounted for 5.9% of GDP in 1998, with public spending amounting to 92.3% of the total.

Welfare. In Luxembourg the social security system was built in several stages. It has been extended with regard to both the socio-professional categories and the risk groups covered. The law of 26 July 1986 introduced the minimum wage, a mechanism to guarantee private means. It consists of a supplementary benefit paid up to a set threshold determined according to the composition of the household. This benefit is awarded irrespective of the causes of the need.

Public contributions play a growing role in financing the system. In 1995 they accounted for 40% of the resources, with employees' and employers' contributions forming just over half. Around 50% of social security benefits goes towards pension schemes, and around 25% goes to health insurance. Nearly half the ordinary budget is absorbed by social security.

CULTURE

Broadcasting. The major broadcaster of TV and radio programmes is CLT (*Compagnie Luxembourgeoise de Télédiffusion*), along with local and regional radio stations that have emerged since the 1991 Law on Electronic Media. CLT was set up in 1929 and started broadcasting in 1932. In the same year Radio Luxembourg started broadcasting its multilingual programmes. In 1954 CLT received an exclusive licence for broadcasting radio and TV in the Grand-Duchy, which was extended until the end of 2010 in 1995.

In 1995, 12 TV channels and 12 radio stations belonged to the CLT group. It also broadcast 4 TV channels and 3 radio stations via the ASTRA satellite system. The 1991 Law on Electronic Media allowed the creation of 4 new radio networks and 15 local radio stations, and thus ended the CLT monopoly.

The commercial *Radio-Télé-Luxembourg* broadcasts 1 programme in Letzebuergesch on FM. There are commercial and religious programmes in French, German, English, Italian, Portuguese and Spanish. More than 40 international TV programmes are broadcast by cable and satellite. In 1997 there were 163,000 TV sets in use and 285,000 radio receivers. Satellite and cable TV is widespread (colour by SECAM V).

Cinema. In 1999 there were 21 cinemas throughout the country. Cinema attendances in 1999 totalled 1,314,000.

Press. There were 5 daily newspapers in 1999 with a circulation of 152,000, equivalent to 352 per 1,000 inhabitants. 4 of these papers are published in the Grand-Duchy, and 1 in neighbouring France. There are a number of weekly titles

with a circulation of 97,595. LUF65m. of direct government aid is granted to the Luxembourg press.

Tourism. In 1999 there were 780,000 tourists, and 7,561 hotel rooms and 1,203,000 overnight stays. Tourists spent US\$297m. in 1997. Camping is widespread, and weekend and short-stay tourism accounts for many tourists. There were 1,174,000 overnight stays at campsites in 1999.

Festivals. Every year there is Echternach-Luxembourg (May–June) and Wiltz (June–July). Both feature a variety of classical music, jazz, theatre and recitals.

Libraries. In 1997 there were 5 public libraries, 2 National libraries and 1 Higher Education library; they held a combined 1,411,000 volumes. There were 1,977,100 visits to the libraries in 1997.

Theatre and Opera. There are several theatres in Luxembourg City, including *Théâtre Municipal*, *Théâtre des Capucins* and *Théâtre du Centaure*. There are also a number of smaller theatres elsewhere, notably in Esch/Alzette and Echternach.

Museums and Galleries. The main museums in Luxembourg City are the *Musée d'Histoire de la Ville*, the *Villa Vauban*, the *Musée National d'Histoire Naturelle* and the *Musée National d'Histoire et d'Art*. There are smaller museums in the rest of the country.

KEY HISTORICAL EVENTS

The history of Macedonia can be traced to the reign of King Karan (808–778 BC), but the country was at its most powerful at the time of Philip II (359–336 BC) and Alexander the Great (336–323 BC). At the end of the 6th century AD Slavs began to settle in Macedonia. There followed a long period of internal fighting but the spread of Christianity led to consolidation and the creation of the first Macedonian Slav state, the Kingdom of Samuel, 976–1018. In the 14th century it fell to Serbia, and in 1355 to

the Turks. After the Balkan wars of 1912–13 Turkey was ousted and Serbia received part of the territory, the rest going to Bulgaria and Greece. In 1918 Yugoslav Macedonia was incorporated into Serbia as South Serbia, becoming a republic in the Socialist Federal Republic of Yugoslavia. Claims to the historical Macedonian territory have long been a source of contention with Bulgaria and Greece. Macedonia declared its independence on 18 Sept. 1991. In April 1999 the Kosovo crisis which led to NATO air attacks on Yugoslavian military targets set off a flood of refugees into Macedonia, although most returned home after the end of the crisis.

In March 2001 there were a series of clashes between government forces and ethnic Albanian separatists near the border between Macedonia and Kosovo.

TERRITORY AND POPULATION

Macedonia is bounded in the north by Yugoslavia, in the east by Bulgaria, in the south by Greece and in the west by Albania. Its area is 25,713 sq. km. According to the 1994 census final results, the population on 20 June 1994 was 1,945,932. The ethnic groups were Macedonians (1,295,964), Albanians (441,104), Turks (78,019), Rhomas (43,707), Serbs (40,228), Vlachs (8,601). There were 36,427 others and 1,882 not stated. Ethnic Albanians predominate on the western side of Macedonia. Minorities are represented in the Council for Inter-Ethnic Relations. 1996 population estimate, 1.98m.; density, 77 per sq. km. In 1998, 61.1% of the population lived in urban areas.

The UN gives a projected population for 2010 of 2.38m.

The major cities (with 1994 census population) are: Skopje, the capital, 485,000 (in 1999); Bitola, 77,464; Prilep, 68,148; Kumanovo, 71,853; Tetovo, 50,344.

The official language is Macedonian, which uses the Cyrillic alphabet.

KEY HISTORICAL EVENTS

The explorer David Livingstone reached Lake Nyasa, now Lake Malaŵi, in 1859 and it was the land along the lake's western shore that became, in 1891, the British Protectorate of Nyasaland. In 1884 the British South Africa Company applied for a charter to trade. Pressure on land, the colour bar and other grievances generated Malaŵian resistance. In 1953 Nyasaland was joined with Southern Rhodesia (Zimbabwe) and Northern Rhodesia (Zambia) to form the Federation of Rhodesia and

Nyasaland, under British control. This union was dissolved in 1963 when Nyasaland was for a year self-governing, until on 6 July 1964 it became independent, adopting the name of Malaŵi. In 1966 Malaŵi was declared a republic and Dr Hastings Banda became the first president, establishing a one party dictatorship which lasted for 30 years. In 1994 Malaŵi returned to multi-party democracy.

TERRITORY AND POPULATION

Malaŵi lies along the southern and western shores of Lake Malaŵi (the third largest lake in Africa), and is otherwise bounded in the north by Tanzania, south by Mozambique and west by Zambia. KEY HISTORICAL EVENTS

Malaysia is a federation consisting of the eleven States of Peninsular Malaysia and the two states of Sabah and Sarawak. The Portuguese were the first Europeans to settle in the area and Malacca became a Portuguese possession in 1541. The Dutch took Malacca in 1641 and held it until 1794 when it was occupied by the British. Although Malacca was returned to the Dutch in 1814, it was finally ceded to Britain in 1824. At the same time (1814–24) Stamford Raffles established a settlement and

Singapore became British territory.

Singapore and what is now Malaysia were occupied by the Japanese from 1941 to 1945. Soon thereafter, in Jan. 1946, plans were published to create a Malaysian Union excluding Singapore. The Union came into being in April 1946 but was soon abandoned in the face of opposition. However, in Jan. 1948 the Union was reconstituted as the Federation of Malaya. From 1948 to 1960 a State of Emergency existed to counter revolt by Malayan Communists. Following lengthy negotiations independence was granted to the Federation of Malaya on 31 Aug. 1957. On 31 Aug. 1963 Malaysia was created from the Federation of Malaya, Singapore, North Borneo (renamed Sabah) and Sarawak. Malaysia became a member of the Commonwealth. Singapore left Malaysia on 9 Aug. 1965 to become an independent sovereign state. Under the leadership of Mahathir Mohamad, southeast Asia's longest-serving leader, Malaysia entered on a period of economic prosperity, broken eventually by the 1997–98 recession. Economic turbulence caused political dissent within the government. In Sept. 1998 Anwar Ibrahim was sacked from his job as finance minister and deputy prime minister and was subsequently jailed for 6 years.

TERRITORY AND POPULATION

The federal state of Malaysia comprises the 13 states and 3 federal territories of Peninsular Malaysia, bounded in the north by Thailand, and with the island of Singapore as an enclave on its southern tip; and, on the island of Borneo to the east, the state of Sabah (which includes the federal territory of the island of Labuan), and the state of Sarawak, with Brunei as an enclave, both bounded in the south by Indonesia and in the northwest and northeast by the South China and Sulu Seas.

The area of Malaysia is 329,758 sq. km (127,317 sq. miles) and the population (2000 census, provisional) is 22·2m.; density, 67·3 per sq. km. Malaysia's national waters cover 515,256 sq. km. In 1998, 55·8% of the population lived in urban areas.

The Constitution provides for the Head of State to be the Supreme Commander of the Armed Forces who exercises his powers in accordance with the advice of the Cabinet. Under their authority, the Armed Forces Council is responsible for all matters relating to the Armed Forces other than those relating to their operational use. The Ministry of Defence has established bilateral defence relations with countries within as well as outside the region. Malaysia is a member of the Five Powers Defence Arrangement with Australia, New Zealand, Singapore and the UK.

ECONOMY

In 1998 agriculture accounted for 13.2% of GDP, industry 43.5% and services 43.3%.

Policy. Malaysia's response to the economic crisis that swept Asia in 1997-98 was to put much of the blame on foreign speculators. After a fall in the value of the *ringgit* by 48% between July 1997 and July 1998, Prime Minister Dr Mahathir announced tough restrictions on currency transactions. The aim was to meet head on the problem of bank debt. Interest rates could be lowered without leading to a run on the *ringgit*. But short-term stability may not be enough to restore Malaysia to economic prosperity. In 1998 the economy shrank by over 5% and bank debt remains one of the highest in southeast Asia.

Performance. Between 1990 and 1996 the average annual real growth in GNP per capita was 6.1%. Malaysia was badly affected by the Asian financial crisis, with the economy contracting by 7.5% in 1998. There was a recovery in 1999, however, with growth of 5.4%. For 2000 growth of 8.7% was forecast. Total GDP in 1998 was US\$72.5bn.

Budget. 1998 budget: revenue, RM65·7bn.; expenditure, RM59·1bn. Revenue and expenditure for calendar years, in RM1bn.:

	1995	1996	1997	1998	1999
Revenue	50·9	58·2	65·7	56·7	59·9
Operating expenditure	36·6	43·3	44·7	44·6	48·9

Sources of revenue in 1996: direct taxes, 45·6% (47·5%—1999 est.); indirect taxes, 36% (30·8%—1999 est.); non-tax revenue, 18·4 % (21·7%—1999 est.).

Federal government net development (in addition to operating) expenditure in 1996: RM11,156m. (RM 21,508m. 1999), of which economic services 49·9% (50·9%—1999 est.), social services, 25·3% (27·0%—1999 est.), security, 19·0% (14·3%—1999 est.) and general administration, 5·8% (6·9%—1999 est.).

Currency. The unit of currency is the Malaysian *ringgit* (RM) of 100 *sen*. Foreign exchange reserves were US\$26·2bn. in Dec. 1998 and gold reserves 1·19m. troy oz in Jan. 2000. The average annual inflation rate during the period 1990–96 was 4·4%. The inflation rate in 1998 was 5·3% and for 1999 an inflation rate of 3% has been forecast. Total money supply in Nov. 1997 was RM63,365·1m. and RM54,134·7m. in 1998

Banking and Finance. The central bank and bank of issue is the Bank Negara Malaysia (*Governor*, Zeti Akhtar Aziz). 37 commercial banks were operating at 31 Dec. 1996 (including 16 foreign) with a total of 1,433 branches. Number of employees 69,154. Total deposits with commercial banks at 31 Dec. 1996 were RM194,974m. There were 12 merchant banks at 31 Dec. 1996. Number of employees 2,592. Their total assets were RM34m. The Islamic Bank of Malaysia began operations in July 1983. There were 40 finance companies in 1996 with 1,096 offices. Number of employees 26,728.

There is a stock exchange at Kuala Lumpur, known as BSKL, running about RM2bn. daily (Jan. 2000).

The economy suffered from the financial crisis that hit southeast Asia in Nov. 1997, but while the *ringgit* lost nearly 30% of its value in the second half of 1997, the underlying strength of the economy (a modest foreign debt and few non-performing loans) and effective exchange control measures was expected to lead to a recovery in 2000. The Central Bank (BNM) proposed the merger and restructuring of banking and finance institutions to consolidate and rationalize the industries and to spearhead the development of the financial sector.

KEY HISTORICAL EVENTS

Malta was held in turn by Phoenicians, Carthaginians and Romans, and was conquered by Arabs in 870. From 1090 to 1530 it was subject to the same rulers as Sicily. Subsequently, the Knights of St John ruled until dispersed by Napoleon in 1798. The Maltese rose in rebellion against the French and the island was blockaded by the British aided by the Maltese from 1798 to 1800. The Maltese people requested the protection of the British Crown in 1802 on condition that their rights

and privileges be preserved. The islands were finally annexed to the British Crown by the Treaty of Paris in 1814. Malta became independent on 21 Sept. 1964 and a republic within the Commonwealth on 13 Dec. 1974.

INTERNATIONAL RELATIONS

Malta is a member of the UN, WTO, the Commonwealth, the Council of Europe, the Organization for Security and Co-operation in Europe, the International Atomic Energy Agency, the Organization for the Prohibition of Chemical Weapons, the Comprehensive Test-Ban Treaty Organization and the Inter-Parliamentary Union.

Accession negotiations for Malta to join the EU were formally opened in Feb. 2000. The report on Malta's progress towards accession issued by the Commission in Nov. 2000 and endorsed by the European Council in Nice confirmed that Malta fulfills all the political and economic criteria for membership.

ECONOMY

Agriculture accounted for an estimated 3% of GDP in 1997, industry 26% and services 71%.

The Maltese economy grew steadily during the 1990s. The private sector is seen as the driving force in the economy and a privatization programme is in progress. At present, two important priorities for government are fiscal consolidation and membership in the European Union. The manufacturing and tourism industries, which are the two main pillars of the country's economy, are being consolidated further while initiatives are being taken to strengthen and modernize other economic sectors and structures.

Malta's industrial strategy encourages quality manufactured products and increased value-added output. Particular importance is attached to the development of small and medium-sized enterprises. Government's strategic overview of the future industrial development in Malta has been put forward in a White Paper 'Prosperity in Change: Challenges and Opportunities for Industry', published in late-1999. In the manufacturing industry promoting competitiveness is a key principle

and levies on imported products are being dismantled. The Institute for the Promotion of Small Enterprises (IPSE) launched various programmes to provide assistance to eligible companies. Attracting foreign direct investment is another priority.

Tourism is a pillar of the domestic economy and will continue to be developed for various specialized markets, such as conference and incentive travel, cultural tours, language schools and sports holidays. Another objective for the domestic tourism industry is the development of Malta as a hub port for cruise-liners.

Malta's strategic geographical position is being exploited for a multitude of the services, ranging from financial services to transshipment. The Malta Financial Services Centre (MFSC) regulates and promotes the growth of the domestic financial services sector. The MFSC is the autonomous government authority set up in 1994 as the primary regulator of financial services and provides for the setting up of international business operations including unit trusts, mutual funds, captive insurance, international trading and holding companies and other investment products. Apart from providing transshipment operations to a number of renowned international shipping lines, the Malta Freeport Corporation's industrial storage facilities are an important link in the transshipment chain.

Performance. The average annual GDP growth in 1994-98 was 5.5%, with growth in 1998 itself of 3.1%. 1999 saw growth of 3.5%. Total GDP in 1998 was US\$3.5bn. During the first nine months of 2000, the Maltese economy expanded by 4.3% in real terms.

Expenditure	578.7	641.7	666.0	691.0	719.5

The most important sources of revenue are VAT, customs and excise duties, income tax, social security and receipts from the Central Bank of Malta. Also significant in certain years are proceeds from the sale of Government shares, foreign grants and foreign and local loans.

Currency. The unit of currency is the *Maltese lira* (formerly *pound*) (MTL) of 100 cents. Total notes and coins in circulation at end of June 2000, Lm409.7m. (Lm393.0m. notes, Lm16.7m. coins). Annualized inflation was 2.67% as at Sept. 2000. Gold reserves were 10,000 troy oz in Oct. 1999 and foreign exchange reserves US\$1,443m. in Oct. 1997.

Banking and Finance. The Central Bank of Malta (*Governor*, Michael C. Bonello) was founded in 1968. In 2000 there were 5 domestic and 1 foreign bank undertaking business in the local market. 12 local financial institutions, licensed in terms of the Financial Institutions Act 1994, also provided services that ranged from exchange bureau-related business to merchant banking. There are also 17 international credit institutions that are licensed to undertake business in foreign currency and with non-residents.

Weights and Measures. The metric system is used.

ENERGY AND NATURAL RESOURCES

Electricity. Electricity is generated at 2 interconnected thermal power stations located at Marsa (272 MW) and Delimara (305 MW). The primary transmission voltages are 132,000, 33,000 and 11,000 volts while the low-voltage system is 400/230V, 50Hz with neutral point earthed. Installed capacity was 577,000 kW in 2000. Production in 1999 was 1.85bn. kWh; consumption per capita was 4,880 kWh.

Oil and Gas. Malta covers a large offshore area, representing the extensions of southeast Sicily, east Tunisia and northwest Libya where significant hydrocarbon reserves and production exist. Active exploration is at present being undertaken by AGIP and Hardman Resources NL in areas to the north and east of Malta. Discussions are also under way with other oil companies. For this purpose an extensive seismic survey is being carried out in 2001 to evaluate the hydrocarbon potential of the Maltese offshore. The survey will provide a regional geological framework and analogues for future exploration activity.

Water. The demand for water during 1999–2000 was 36.5m. cu. metres, 3.6% less than the previous year, mainly due to improved leakage control. Ground water provided 52.6% of the total water delivered to the distribution system. Seawater desalination (Reverse Osmosis Plants) provided 47.4% of the total potable water requirements.

Agriculture. Malta is self-sufficient in fresh vegetables, pig-meat, poultry, eggs and fresh milk. The main crops are potatoes (the spring crop being the country's primary agricultural export), vegetables and fruits, with some items such as tomatoes serving as the main input in the local canning industry. In 2000 there were about 2,375 full-time farmers and 15,519 part-time. There were around 11,513 agricultural holdings and 950 intensive livestock farm units.

INDUSTRY

Besides manufacturing (food, clothing, chemicals, electrical machinery parts and electronic components and products), the mainstays of the economy are ship repair and shipbuilding, agriculture, small crafts units, tourism and the provision of other services such as the freeport facilities. The majority of state-aided manufacturing enterprises operating in Malta are foreign-owned or with foreign interests. The Malta Development Corporation is the government agency responsible for promoting investment, while the Malta Export Trade Corporation serves as a catalyst to the export of local products.

KEY HISTORICAL EVENTS

Mexico's history falls into four epochs: the era of the Indian empires (before 1521), the Spanish colonial phase (1521–1810), the period of national formation (1810–1910), which includes the war of independence (1810–21) and the long dictatorship of Porfirio Díaz (1876–80, 1884–1911), and the present period which began with the social revolution of 1910–21. Mexico was conquered for Spain by Cortés in 1521 and became part of the viceroyalty of New Spain. A substantial part of Mexico's territory (including the present state of California) was lost to the USA by the Mexican War of 1846–48. In the 1860s France, Britain and the USA declared war on Mexico; France invaded the country and declared Maximilian, Archduke of Austria, to be Emperor. When the French withdrew in 1867 Maximilian was executed. The constitution of 1917 established a representative, democratic and federal republic, comprising 31 states and a federal district. The PRI (Partido Revolucionario Institucional) remained in power for 71 years until it was defeated by the conservative National Action party in the elections of July 2000.

TERRITORY AND POPULATION

Mexico is bounded in the north by the USA, west and south by the Pacific Ocean, southeast by Guatemala, Belize and the Caribbean Sea, and northeast by the Gulf of Mexico. It comprises 1,964,375 sq. km (758,445 sq. miles), including uninhabited islands (5,127 sq. km) offshore.

Population at recent censuses: 1970, 48,225,238; 1980, 66,846,833; 1990, 81,249,645; 1995, 91,158,290 (46,257,791 females); 2000, 97,014,867. Population density, 49·4 per sq. km. (2000). 74·0% of the population were urban in 1998.

The UN gives a projected population for 2010 of 112·9m.

Mexico City: Located on a plateau more than 2,400 metres above sea level, Mexico City was built on the site of the Aztec City of Tenochtitlán which was destroyed in 1521 by Cortés. The most populated city in the world with an estimated 16.7m. inhabitants, Mexico City suffers from pollution and atmospheric problems. However, that has not prevented it from hosting the Olympic Games and two series of football World Cup Finals.

CONSTITUTION AND GOVERNMENT

A new Constitution was promulgated on 5 Feb. 1917 and has been amended from time to time. Mexico is a representative, democratic and federal republic, comprising 31 states and a federal district, each state being free and sovereign in all internal affairs, but united in a federation established according to the principles of the Fundamental Law. The head of state and supreme executive authority is the *President*, directly elected for a non-renewable 6-year term.

There is complete separation of legislative, executive and judicial powers (Art. 49). Legislative power is vested in a General Congress of 2 chambers, a *Chamber of Deputies* and a *Senate*. The Chamber of Deputies consists of 500 members directly elected for 3 years, 300 of them from single-member constituencies and 200 chosen under a system of proportional representation. In 1990 Congress voted a new Electoral Code. This establishes a body to organize elections (IFE), an electoral court (TFE) to resolve disputes, new electoral rolls and introduce a voter's registration card. Priests were enfranchised in 1991.

The Senate comprises 128 members, 4 from each state and 4 from the federal district, directly elected for 6 years. Members of both chambers are not immediately re-eligible for election. Congress sits from 1 Sept. to 31 Dec. each year; during the recess there is a permanent committee of 15 deputies and 14 senators appointed by the respective chambers.

ECONOMY

Agriculture accounted for 4.9% of GDP in 1998, industry 26.6% and services 68.4%.

Policy. An economic programme for 1995 aimed to reduce inflation and provided tax concessions to stimulate investment. After the peso was devalued in Dec. 1994 an emergency economic plan was introduced to include an agreement between labour and employers to contain inflation, a fiscal adjustment to reduce the current account deficit, further privatization of infrastructural enterprises and the establishment of an international assistance fund. Between 1988 and 1997, 25 companies were privatized. An economic programme to attack 'the roots of poverty' was announced. Since the mid-1980s the economy has gone from being state-dominated and protectionist to being one of the most open in Latin America.

Performance. Real GDP grew by 5.1% in 1996 (in 1995 it had contracted by 6.2%), by 6.8% in 1997 and by 4.8% in 1998 and by 3.9% in 1999. For 2000 growth of 7.2% was forecast—the highest rate since 1981. In 1998 total GDP was US\$393.5bn.

Budget. In 1998 revenue was 545,176m. new pesos; expenditure, 610,332m. new pesos.

Currency. The unit of currency is the *Mexican peso* (MXP) of 100 *centavos*. A new peso was introduced on 1 Jan. 1993: 1 new peso = 1,000 old pesos. The peso was devalued by 13.94% in Dec. 1994. Foreign exchange reserves were US\$28,469m. in Feb. 1998 and gold reserves were 150,000 troy oz in Jan. 2000. The annual inflation rate, which in 1995 was 52%, was 18.6% in 1998. For 1999 a rate of 17% was forecast with a drop to 9% in 2000. Total money supply in Jan. 1998 was 261,132m. new pesos.

Banking and Finance. The Bank of Mexico, established 1 Sept. 1925, is the central bank of issue (*Governor*, Guillermo Ortiz Martínez). It gained autonomy over monetary policy in 1993. Exchange rate policy is determined jointly by the bank and the Finance Ministry. Banks were nationalized in 1982, but in May 1990 the government approved their reprivatization. The state continues to have a majority holding in foreign trade and rural development banks. Foreign holdings are limited to 49%. The largest Mexican banks are BBVA-Bancomer—formed in June 2000 through the merger of Grupo Financiero Bancomer and the Spanish bank Banco Bilbao Vizcaya Argentaria, and with assets totalling US\$36bn.—Banamex, Santander-Serfin, Bital, Banorte and Citybank.

There is a stock exchange in Mexico City.

A land-titling programme (PROCEDE) is establishing the boundaries of 4.6m. plots of land totalling 102m. ha. Other private farmers may not own more than 100 ha of irrigated land or an equivalent in unirrigated land. There is a theoretical legal minimum of 10 ha for holdings, but some 60% of private farms were less than 5 ha in 1990. Laws abolishing the *ejido* system were passed in 1992.

Trade Unions. The Mexican Labour Congress (CTM) is incorporated into the Institutional Revolutionary Party, and is an umbrella organization numbering some 5m. An agreement, 'Alliance for Economic Recovery', was reached in Nov. 1995 between the government, trade unions and business, providing for an increase in the minimum wage of 10.1%, increased unemployment benefits, tax incentives, the staggering of price increases, and a commitment to reduce public spending. A breakaway from CTM took place in 1997 when rebel labour leaders set up the National Union of Workers (UNT) to combat what they saw as a sharp drop in real wages.

MICRONESIA

Federated States of Micronesia

Capital: Palikir

Population estimate, 2000: 133,000

Estimated GDP: \$220m.

KEY HISTORICAL EVENTS

Spain acquired sovereignty over the Caroline Islands in 1886 but sold the archipelago to Germany in 1899. Japan occupied the Islands at the beginning of the First World War and in 1921 they were mandated to Japan by the League of Nations. Captured by Allied Forces in the Second World War, the Islands became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. The Federated States of Micronesia came into being on 10 May 1979.

American trusteeship was terminated on 3 Nov. 1986 by the UN Security Council and on the same day Micronesia entered into a 15-year Free Association with the USA.

TERRITORY AND POPULATION

The Federated States lie in the North Pacific Ocean between 137° and 163° E, comprising 607 islands with a total land area of 702 sq. km (271 sq. miles). The population (1994 census) was 104,724; 1997 estimate, 127,600; density, 181 per sq. km.

In 1995 an estimated 72.3% of the population lived in rural areas.

The areas and populations of the 4 major groups of island states (east to west) are as follows:

<i>State</i>	<i>Area (sq. km)</i>	<i>Population (1994 census)</i>	<i>Headquarters</i>

Pohnpei	344	33,372	Kolonia
Chuuk	127	52,870	Weno
Yap	119	11,128	Colonia

Kosrae consists of a single island. Its main town is Lelu (2,422 inhabitants in 1989).

Pohnpei comprises a single island (covering 334 sq. km with 30,000 inhabitants in 1994) and 8 scattered coral atolls. Kolonia (6,169 inhabitants in 1989) was the national capital of the Federated States. The new capital, Palikir, lies approximately 10 km southwest in the Palikir valley.

Chuuk consists of a group of 14 islands within a large reef-fringed lagoon (44,000 inhabitants in 1994); the state also includes 12 coral atolls (8,000 inhabitants), the most important being the Mortlock Islands. The chief town is Weno (15,253 inhabitants in 1989).

Yap comprises a main group of 4 islands (covering 100 sq. km with 7,000 inhabitants in 1994) and 13 coral atolls (4,000 inhabitants), the main ones being Ulithi and Woleai. Colonia is its chief town (3,456 inhabitants in 1989).

English is used in schools and is the official language. Trukese, Pohnpeian, Yapese and Kosrean are also spoken.

KEY HISTORICAL EVENTS

In Dec. 1991 Moldova became a member of the CIS, a decision ratified by parliament in April 1994. Fighting took place in 1992 between government forces and separatists in the (largely Russian and Ukrainian) area east of the River Nistru (Transnistria). An agreement signed by the presidents of Moldova and Russia on 21 July 1992 brought to an end the armed conflict and established a 'security zone' controlled by the 'peacekeeping forces' formed by military from Russia,

Moldova and Transnistria. On 21 Oct. 1994 a Moldo-Russian agreement obliged Russian troops to withdraw from the territory of Moldova over 3 years but the agreement was not ratified by the Russian Duma. On 8 May 1997 an agreement between Transnistria and the Moldovan government to end the separatist conflict stipulated that Transnistria would remain part of Moldova as it was territorially constituted in Jan. 1990. In 1997 some 7,000 Russian troops were stationed in Transnistria.

TERRITORY AND POPULATION

Moldova is bounded in the east and south by Ukraine and on the west by Romania. The area is 33,700 sq. km (13,000 sq. miles). In Jan. 1994 the population was 4,353,000 (52.3% female).

The UN gives a projected population for 2010 of 4.59m.

In 1998, 53.8% of the population lived in urban areas. The 1989 census population was 4,335,360, of whom Moldovans accounted for 64.5%, Ukrainians 13.9%, Russians 13%, Gagauzi 3.5%, Bulgarians 2% and Jews 1.5%.

Apart from Chişinău, the capital (population of 655,000 in 1999), major towns are Tiraspol (185,000 in 1993), Beltsy (156,000 in 1993) and Bender (133,000 in 1992). The official Moldovan language (i.e. Romanian) was written in Cyrillic prior to the restoration of the Roman alphabet in 1989. It is spoken by 75% of the population; the use of other languages (Russian, Gagauz) is safeguarded by the Constitution.

SOCIAL STATISTICS

1998 estimates: births, 64,000; deaths, 55,000. Rates, 1998 estimates (per 1,000 population): births, 14.3; deaths, 12.4. In 1995 the most popular age range for marrying was 20–24 for both males and females. Life expectancy at birth in 1998 was 63.8 years for males and 71.7 years for females. CONSTITUTION AND GOVERNMENT

A declaration of republican sovereignty was adopted in June 1990 and in Aug. 1991 the republic declared itself independent. A new Constitution came into effect on 27 Aug. 1994, which defines Moldova as an 'independent, democratic and unitary state'. At a referendum on 6 March 1994 turn-out was 75.1%; 95.4% of votes cast favoured 'an independent Moldova within its 1990 borders'. The referendum (and the Feb. parliamentary elections) were not held by the authorities in Transnistria. In a further referendum on 4 June 1999, on whether to switch from a parliamentary system to a presidential one, turn-out was 58% with the majority of the votes cast being in favour of the change.

Parliament has 104 seats and is elected for 4-year terms. There is a 4% threshold for election; votes falling below this are re-distributed to successful parties. The *President* is now elected for 4-year terms by parliament, after the constitution had been amended to abolish direct presidential elections.

The 1994 Constitution makes provision for the autonomy of Transnistria and the Gagauz (Gagauzi Yeri) region.

Transnistria. In the predominantly Russian-speaking areas of Transnistria a self-styled republic was established in Sept. 1991, and approved by a local referendum in Dec. 1991. A Russo-Moldovan agreement of 21 July 1992 provided for a special statute for Transnistria and a guarantee of self-determination should Moldova unite with Romania. The population in 1998 was 670,000. Romanian here is still written in the Cyrillic alphabet. At a referendum on 24 Dec. 1995, 81% of votes cast were in favour of adopting a new constitution proclaiming independence.

On 17 June 1996 the Moldovan government granted Transnistria a special status as 'a state-territorial formation in the form of a republic within Moldova's internationally recognized border'.

Elections for chief regional executive were held on 22 Dec. 1996. The electorate was 428,000; turn-out was 57.3%. Igor Smirnov (b. 1941) was re-elected for a further 5-year term against 1 opponent by 71.9% of votes cast.

Gagauz Yeri. This was created an autonomous territorial unit by Moldovan legislation of 13 Jan. 1995. In 1995 the population was 153,000. There is a 35-member *Popular Assembly* directly elected for 4-year terms and headed by a *Governor*, who is a member of the Moldovan cabinet. At the elections of 28 May and 11 June 1995 turn-out was 68%.

Governor: Dmitri Kroitor.

National Anthem. The Romanian anthem was replaced in Aug. 1994 by a traditional tune, 'Limba noastră' ('Our Language').

A run-off round was held on 1 Dec. 1996 between President Snegur and the speaker, Petru Lucinschi (ind.). Lucinschi was elected by 54% of votes cast. On 1 Dec. 2000 parliament was due to elect a new president but failed to agree on a successor. Following the parliamentary elections of Feb. 2001, parliament elected Vladimir Voronin, the Communist leader, as the new president on 4 April 2001. In so doing Moldova became the first former Soviet republic to choose a Communist as its head of state.

KEY HISTORICAL EVENTS

Temujin became khan of Hamag Mongolia in 1190. Having united by conquest various Tatar and Mongolian tribes he was confirmed as 'Universal' ('Genghis', 'Chingiz') khan in 1206. The expansionist impulse of his nomadic empire (Beijing captured in 1215; Samarkand in 1220) continued after his death in 1227. Tamurlaine (died 1405) was the last of the conquering khans. In 1368 the Chinese drove the Mongols from Beijing, and for the next 2 centuries Sino-Mongolian

relations alternated between war and trade. In 1691 Outer Mongolia accepted Manchu rule. The head of the Lamaist faith became the symbol of national identity, and his seat ('Urga', now Ulan Bator) was made the Mongolian capital. When the Manchu dynasty was overthrown in 1911 Outer Mongolia declared its independence under its spiritual ruler and turned to Russia for support against China. Soviet and Mongolian revolutionary forces set up a provisional government in March 1921. On the death of the spiritual ruler a people's republic and new constitution were proclaimed in May 1924. With Soviet help Japanese invaders were fended off during the Second World War. The Mongols then took part in the successful Soviet campaign against Inner Mongolia and Manchuria. On 5 Jan. 1946 China recognized the independence of Outer Mongolia. Until 1990 sole power was in the hands of the Mongolian People's Revolutionary (Communist) Party (MPRP), but an opposition Mongolian Democratic Party, founded in Dec. 1989, achieved tacit recognition and held its first congress in Feb. 1990. Following demonstrations and hunger-strikes, on 12 March the entire MPRP Politburo resigned and political opposition was legalized.

KEY HISTORICAL EVENTS

The native people of Morocco are the Berbers, an ancient race who have suffered the attention of a succession of invaders. When the city of Carthage fell to Rome in the second century BC, the African Mediterranean coast was under Roman dominance for almost six hundred years. When the Roman Empire in turn fell into decline, the area was invaded first by the Vandals in AD 429 and later by Byzantium in AD 533. An Arab invasion of Morocco in AD 682 marked the end of Byzantium

dominance and the first Arab rulers, the Idrisid dynasty, ruled for 150 years. Arab and Berber dynasties succeeded the Idrisids until the 13th century when the country was plunged into bitter civil war between Arab and Berber factions. The reign of Ahmed I al-Man-sur in the first Sharifian dynasty stabilized and unified the country between 1579 and 1603. Moors and Jews expelled from Spain settled in Morocco during this time and the country flourished. In 1415 the Moroccan port of Ceuta was captured by Portugal. Moroccan forces defeated the Portuguese in 1578 and by 1700 had regained control of many coastal towns which had previously been in Portuguese hands. During the 18th and early 19th centuries the Barbary Coast became the scene of widespread piracy.

By the beginning of the 20th century Britain had recognized Morocco as a French sphere of influence and in 1904 Morocco was divided between France and Spain, with the former receiving the larger area. From 1912 to 1956 Morocco was divided into a French protectorate, a Spanish protectorate, and the international zone of Tangier which was established by France, Great Britain and Spain in 1923. On 29 Oct. 1956 the international status of the Tangier Zone was abolished and Morocco became a kingdom on 18 Aug. 1957, with the Sultan taking the title Mohammed V. Succeeding his father on 3 March 1961, King Hassan tried to combine the various parties in government and established an elected House of Representatives but political unrest led him to discard any attempt at a parliamentary government and to rule autocratically from 1965 to 1977. In 1977 a new Chamber of Representatives was elected and under the constitution Morocco became a constitutional monarchy with a single elected chamber.

TERRITORY AND POPULATION

Morocco is bounded by Algeria to the east and southeast, Mauritania to the south, the Atlantic Ocean to the northwest and the Mediterranean to the north. At the 1984 census Western Sahara had an area of 252,120 sq. km and 163,868 population. The Moroccan superficie is 710,850 sq. km. Population estimate, 1995, 28.3m. CONSTITUTION AND GOVERNMENT

The ruling King is **Mohammed VI**, born on 21 Aug. 1963, succeeded on 23 July 1999, on the death of his father Hassan II, who reigned 1961–99. The King holds supreme civil and religious authority, the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. He resides usually at Rabat, but occasionally in one of the other traditional capitals, Fès (founded in 808), Marrakesh (founded in 1062), or at Skhirat.

A new Constitution was approved by referendum in March 1972 and amendments were approved by referendum in May 1980 and Sept. 1992. The Kingdom of Morocco is a constitutional monarchy. Parliament consists of a *Chamber of Representatives* composed of 325 deputies directly elected for 6-year terms. A

referendum on 13 Sept. 1996 established a second *Chambèr of Counsellors*, of whom 60% are elected for 9-year terms in tranches of one-third of the members by local councils, 20% by employers' associations and 20% by trade unions. The Chamber of Counsellors has power to initiate legislation, issue warnings of censure to the government and ultimately to force the government's resignation by a two-thirds majority vote. The electorate was 12.3m. and turn-out was 82.95%. The King, as sovereign head of State, appoints the Prime Minister and other Ministers, has the right to dissolve Parliament and approves legislation.

A new electoral code of March 1997 fixed voting at 20 and made enrolment on the electoral roll compulsory.

The opposition and the centre were expected to make an arrangement to constitute the next government. WESTERN SAHARA

The Western Sahara was designated by The United Nations in 1975, its borders having been marked as a result of agreements made between France, Spain and Morocco in 1900, 1904 and 1912. Sovereignty of the territory is in dispute between Morocco and the Polisario Front (Popular Front for the Liberation of the Saguia el Hamra and Rio de Oro), which formally proclaimed a government-in-exile of the Sahrawi Arab Democratic Republic (SADR) in Feb. 1976.

Area 266,769 sq. km (102,680 sq. miles). Around 230,000 inhabitants (estimate July 1997) are within Moroccan jurisdiction. Another estimated 196,000 Saharawis live in refugee camps around Tindouf in southwest Algeria. The main towns are El-Aaiún, the capital (159,000 inhabitants in 1995), Dakhla and Es-Semara.

Life expectancy at birth (1997 est.) male, 46.7 years; female, 50.0 years. Birth rate (1997 est.) per 1,000 population: 46.1; death rate: 17.5. The projected population for 2010 is 365,000.

The population is Arabic-speaking, and almost entirely Sunni Muslim.

President: Mohammed Abdelaziz.

Prime Minister: Bouchraya Hammoudi Bayoune.

Rich phosphate deposits were discovered in 1963 at Bu Craa. Morocco holds 65% of the shares of the former Spanish state-controlled company. Production reached 5.6m. tonnes in 1975, but exploitation has been severely reduced by guerrilla activity. After a nearly complete collapse, production and transportation of phosphate resumed in 1978, ceased again, and then resumed in 1982. Installed

electrical capacity was 56,000 kW in 1995, with production of 85m. kWh in 1998. There are about 6,100 km of motorable tracks, but only about 500 km of paved roads. There are airports at El-Aaiún and Dakhla. As most of the land is desert, less than 19% is in agricultural use, with about 2,000 tonnes of grain produced annually. There were 56,000 radio receivers and 6,000 television sets in 1997. In 1989 there were 27 primary schools with 14,794 pupils and 18 secondary schools with 9,218 pupils.

KEY HISTORICAL EVENTS

Mozambique was at first ruled as part of Portuguese India but a separate administration was created in 1752. Following a decade of guerrilla activity, independence was achieved on 25 June 1975. A one-party state dominated by the Liberation Front of Mozambique (FRELIMO) was set up but armed insurgency led by the Mozambique National Resistance (RENAMO) continued until 4 Oct. 1992. The peace treaty provided for all weapons to be handed over to the UN and all armed

groups to be disbanded within 6 months. In 1994 the country held its first multi-party elections. In early 2000 some 700 people died in the floods which made thousands homeless.

TERRITORY AND POPULATION

Mozambique is bounded east by the Indian ocean, south by South Africa, southwest by Swaziland, west by South Africa and Zimbabwe and north by Zambia, Malawi and Tanzania. It has an area of 799,380 sq. km (308,642 sq. miles) and a population, according to the 1997 census, of 15.7m., giving a density of 20 per sq. km. Up to 1.5m. refugees abroad and 5m. internally displaced persons during the Civil War have begun to return home.

The UN gives a projected population for 2010 of 25.05m.

In 1998 an estimated 62.2% of the population were rural, but urbanization is increasing rapidly. In the period 1990–95 the annual growth in the urban population was 8.7%, a rate only exceeded by Botswana. The areas, populations and capitals of the provinces are:

<i>Province</i>	<i>Sq. km</i>	<i>1 Jan 1987</i>	<i>Estimate 1997</i>	<i>Capital</i>

The head of state is the *President*, directly elected for a 5-year term. Parliament is a 250-member *National Assembly*.

The 1990 Constitution was under review in early 1999. The draft was launched for public debate before being tabled to parliament for approval.

The country's first free presidential and parliamentary elections were held in 1994. In the parliamentary elections of 3–5 Dec. 1999 the Liberation Front of Mozambique (FRELIMO) won 133 of the 250 available seats with 48.5% of the vote. The Mozambican National Resistance (RENAMO) won the remaining 117 seats with 38.8%.

In the presidential election, also held from 3–5 Dec. 1999, FRELIMO's Joaquim A. Chissano won a further term of office claiming 52.3% of the vote against RENAMO's Afonso Marceta Macacho Dhlakama.

INTERNATIONAL RELATIONS

Mozambique is a member of the UN, WTO, the Commonwealth, OAU, African Development Bank, SADC, Non-Aligned Movement, Organization of the Islamic Conference, Indian Ocean Rim, Organization of the Portuguese Language Countries and is an ACP member state of the ACP-EU relationship.

IMF projections to 2005 indicate the halving of aid inflows from US\$1bn. a year in the 1990s to US\$500m. Mozambique is very heavily dependent on foreign aid. In 1996 official aid made up 72% of GDP.

ECONOMY

Agriculture accounted for 34.3% of GDP in 1998, industry 20.8% and services 44.9%.

The government under prime minister Pascoal Mocumbi has attempted to curb the corruption which was rife. In 1997 the UK's Crown Agents were hired to operate the customs service for 3 years. More than 100 officials were dismissed, and the volume of tariff revenue which actually ended up in state funds increased by nearly 50% in the first 2 years.

Policy. In 1990 the government abandoned economic planning in favour of a market economy. In Dec. 1993 the National Reconstruction Plan was launched to repair the rural economic and social infrastructure. Its implementation is dependent upon foreign aid. A privatization programme launched in 1989 resulted in the public sector's share of GDP declining from 70% to less than 20% 10 years later.

Performance. Mozambique is one of the world's fastest-growing economies. The economy has doubled in size since 1992. However, annual GDP is only about US\$4bn. GDP growth has averaged 5.3% since 1990, making it Africa's second fastest expanding economy after Uganda. Real GDP growth was 8.0% in 1998 and 9.7% in 1999. Mozambique was forecast to have the fastest growing economy in the world in 2000, with GDP growth of 10%, but the disastrous floods of early 2000 have caused a major setback. Total GDP in 1998 was US\$3.9bn.

Budget. In 1996 revenues were an estimated US\$324m. and expenditure US\$600m.

Currency. The unit of currency is the *metical* (MZM) of 100 *centavos*. Inflation was an estimated 70% in 1994, but declined to 5.3% in 1997. In 1998 there was deflation of 1.3%. Foreign exchange reserves were US\$493m. in Feb. 1998. Total money supply in Feb. 1998 was 6,734m. meticais.

Banking and Finance. Most banks had been nationalized by 1979. The central bank and bank of issue is the Bank of Mozambique (*Governor*, Adriano Afonso Maleiane) which hived off its commercial functions in 1992 to the newly-founded Commercial Bank of Mozambique. In 1998 the Commercial Bank of Mozambique had 35% of deposits. There are 9 commercial banks, 1 investment bank and a leasing institution. The new Mozambique Stock Exchange opened in Maputo in Oct. 1999. By the late 1990s financial services had become one of the fastest-growing areas of the economy.

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 2m. kW in 1997. Production in 1998 was 1.2m. kWh. Consumption per capita in 1997 was 64 kWh.

Oil and Gas. Natural gas finds are being explored for potential exploitation, and both onshore and offshore foreign companies are prospecting for oil. In 1997 natural gas reserves were 57bn. cu. metres.

Water. Although the country is rich in water resources, the provision of drinking water to rural areas remains a major concern. Some river basins, especially the Rovuma, Zambezi and Lumpopo, are of interest to oil prospectors.

Minerals. There are deposits of pegamite, tantalite, graphite, apatite, tin, iron ore and bauxite. Other known reserves are: nepheline, syenite, magnetite, copper, garnet, kaolin, asbestos, bentonite, limestone, gold, titanium and tin.

Output (in 1,000 tonnes), 1995: coal (1996), 40; bauxite (1998), 6; salt (1997 estimate), 60; gold (1995), 6,800 kg.

Agriculture. All land is owned by the state but concessions are given. There were 2.95m. ha of arable land in 1997 and 0.23m. ha of permanent crops. Production in 1,000 tonnes (1998): cassava, 5,639; maize, 1,124; coconuts, 450; sugarcane, 369; rice, 191; groundnuts, 143; seed cotton, 91; bananas, 87; copra, 76; potatoes, 75; cottonseed, 60; sweet potatoes, 60; millet, 53.

Livestock 1996: 1.29m. cattle, 384,000 goats, 122,000 sheep, 175,000 pigs, 23m. chickens.

A quarter of all crops and a third of cattle were lost during the flooding which devastated the country in the early part of 2000.

Forestry. In 1995 there were 16·86m. ha of forests, or 21·5% of the land area (down from 17·44m. ha in 1990), including eucalyptus, pine and rare hardwoods. In 1998 timber production was 18·02m. cu. metres.

Fisheries. The catch in 1998 was 36,775 tonnes, of which 27,805 tonnes were from sea fishing. Prawns and shrimps are the major export at 14,000 tonnes per year. The potential sustainable annual catch is estimated at 500,000 tonnes of fish (anchovies 300,000 tonnes, the rest mainly mackerel).

INDUSTRY

Although the country is overwhelmingly rural, there is some substantial industry in and around Maputo (steel, engineering, textiles, processing, docks and railways). A huge aluminium smelter, completed in 2000, is scheduled to produce 250,000 tonnes annually and is a focal point in the country's strategy of attracting foreign investment.

Labour. The labour force in 1996 totalled 9,221,000 (52% males). In 1998, 83% of the economically active population were engaged in agriculture, 8% in industry and 9% in services. Women represent 48% of the total labour force.

Trade Unions. The main trade union confederation is the *Organização dos Trabalhadores de Moçambique*, but several unions have broken away.

INTERNATIONAL TRADE

Foreign debt was US\$8,208m. in 1998.

Imports and Exports. Imports and exports for calendar years in US\$1m.:

Passenger cars numbered 4,900 in 1996 (0·3 per 1,000 inhabitants), down from 60,000 in 1993. There were 4,748 road accidents in 1997, with 805 fatalities. The flooding of early 2000 washed away at least one fifth of the country's main road linking the north and the south.

Rail. The state railway consists of 5 separate networks, with principal routes on 1,067 mm gauge radiating from the ports of Maputo (950 km), Beira (994 km) and Nacala (914 km). Total length in 1995 was 2,983 km of 1,067 mm gauge and 140 km of 762 mm gauge. In 1995, 5·4m. passengers and 3·1m. tonnes of freight were carried. In early 2000 long sections of the railway line linking Mozambique with Zimbabwe were washed away in the floods.

KEY HISTORICAL EVENTS

After Burma's invasion of the kingdom of Assam, the British East India Company retaliated in defence of its Indian interests and in 1826 drove the Burmese out of India. Territory was annexed in south Burma but the kingdom of Upper Burma, ruled from Mandalay, remained independent. A second war with Britain in 1852 ended with the British annexation of the Irrawaddy Delta. In 1885 the British invaded and occupied Upper Burma. In 1886 all Burma became a province of the Indian empire. There were violent uprisings in the 1930s and in 1937 Burma was separated from India and permitted some degree of self-government. Independence was achieved in 1948. In 1958 there was an army coup, and another in 1962 led by Gen. Ne Win, who installed a Revolutionary Council and dissolved parliament.

The Council lasted until March 1974 when the country became a one-party socialist republic. On 18 Sept. 1988 the Armed Forces seized power and set up the State Law and Order Restoration Council (SLORC). On 19 June 1989 the government changed the name of the country in English to the Union of Myanmar. The military junta did not accept the outcome of the 1990 general election, and the leader of the party which won the elections, Aung San Suu Kyi, was put under house arrest.

KEY HISTORICAL EVENTS

In 1884 South West Africa was declared a German protectorate. Germany then introduced racial segregation and the exploitation of the diamond mines began. In 1915 the Union of South Africa occupied German South West Africa and on 17 Dec. 1920 the League of Nations entrusted the territory as a Mandate to the Union of South Africa. After World War II South Africa applied for its annexation to the Union and continued to administer the territory in defiance of various UN resolutions. In June 1968 the UN changed the name of

the territory to Namibia.

After negotiations between South Africa and the UN, a multi-racial Advisory Council was appointed in 1973 in preparation for independence but despite several attempts at organizing free elections, South Africa remained dominant in the area until the UN Transition Assistance Group supervised elections for the constituent assembly in Nov. 1989. Independence was achieved on 21 March 1990.

The area, including the Caprivi Strip and Walvis Bay, is 824,269 sq. km. South Africa transferred Walvis Bay to Namibian jurisdiction on 1 March 1994. CONSTITUTION AND GOVERNMENT

On 9 Feb. 1990 with a unanimous vote the Constituent Assembly approved the Constitution which stipulated a multi-party republic, an independent judiciary and an executive *President* who may serve a maximum of two 5-year terms. The bicameral legislature consists of a 78-seat *National Assembly*, 72 members of which are elected for 5-year terms by proportional representation and up to 6 appointed by the president by virtue of position or special expertise, and a *National Council* consisting of 2 members from each Regional Council elected for 6-year terms.

RECENT ELECTIONS

Presidential and parliamentary elections were held on 30 Nov. and 1 Dec. 1999. Incumbent Sam Nujoma (SWAPO) was re-elected President with 76.8% of votes cast followed by Ben Ulenga (Congress of Democrats/CoD) with 10.5%, Katutire Kaura (Democratic Turnhalle Alliance/DTA) with 9.6% and Chief Justus Garoëb (United Democratic Front/UDF) with 3.0%. In parliamentary elections the South West Africa People's Organization (SWAPO) won 55 of the available 72 seats with 76.1% of the vote; the CoD, 7 with 9.9%; DTA, 7 with 9.5%; UDF, 2 with 2.9%; Monitor Action Group, 1 with 0.7%. Turn-out was 53%. The Congress of Democrats, formed early in 1999 as an opposition party to contest the election, represents the best chance of a credible challenge to the dominance of SWAPO and its autocratic leadership in the future in spite of its small share of the vote at the 1999 elections.

ECONOMY

Agriculture accounted for 10.0% of GDP in 1998, industry 34.2% and services 55.8%.

The Namibian economy is heavily dependent on mining and fisheries.

In 1998 inflation was running at 5%. In Feb. 1998 foreign exchange reserves were US\$285m. Total money supply in Feb. 1998 was N\$3,053m.

ENERGY AND NATURAL RESOURCES

Electricity. In 1999 electricity production was 1.2bn. kWh. Namibia also imports electricity from South Africa (890m. kWh in 1999). Consumption per capita in 1995 was 584 kWh.

Oil and Gas. Natural gas reserves in 1997 totalled 85bn. cu. metres.

Water. The 12 most important dams have a total capacity of 589.2m. cu. metres. The Kunene, the Okavango, the Zambezi, the Kwando or Mashi and the Orange River are the only permanently running rivers but water can generally be obtained by sinking shallow wells. Except for a few springs, mostly hot, there is no surface water.

Minerals. There are diamond deposits off the coast, which produce a third of diamond production. Namibia produces more than 1.3m. carats per year, accounting for around 8% of world diamond production. 1996 output (in tonnes): salt, 493,000 (1997); lead, 67,760; zinc, 64,600; copper, 25,000; silver, 34 (1997); gold, 2,205 kg; diamonds, 1,600,000 carats (1998). Uranium production, 1998, 2,762 tonnes.

Agriculture. Namibia is essentially a stock-raising country, the scarcity of water and poor rainfall rendering crop-farming, except in the northern and northeastern parts, almost impossible. There were 816,000 ha of arable land in 1997 and 4,000 ha of permanent crops. Generally speaking, the southern half is suited for the raising of small stock, while the central and northern parts are more suited for cattle. Guano is harvested from the coast, converted into fertilizer in South Africa and most of it exported to Europe. In 1995, 45% of the active labour force worked in the agricultural sector, and 45% of the population was dependent on agriculture.

Livestock (1996): 2.2m. cattle, 3.3m. sheep, 2m. goats.

Fisheries. Pilchards, mackerel and hake are the principal fish caught. Since 1993 there has been a dearth of fish. The catch in 1998 was 352,188 tonnes (21,225 tonnes in 1989), of which more than 99% came from marine waters. The rate of growth in the annual catch between 1988 and 1998 was one of the highest in the world. Conservation policies are in place. The policy aims at ensuring that the country's fisheries resources are utilized on a sustainable basis and also aims to ensure their lasting contribution to the country's economy.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in Namibia in Jan. 2000 were Namibian Minerals Corp. (market capitalization of US\$227.5m.) and Namibia Breweries (market capitalization of US\$127.1m.).

Of the estimated total of 400 undertakings, the most important branches are food production (accounting for 29.3% of total output), metals (12.7%) and wooden products (7%). The supply of specialized equipment to the mining industry, the assembly of goods from predominantly imported materials and the manufacture of metal products and construction material play an important part. Small industries (including home industries, textile mills, leather and steel goods) have expanded. Products manufactured locally include chocolates, beer, cement, leather shoes and delicatessen meats and game meat products.

Labour. In 1996 the labour force totalled 650,000 (59% males). Nearly half the economically active population in 1991 were engaged in agriculture, fisheries and forestry. Around 20% of the workforce was unemployed in 1991. The main employers were government services, agriculture and mining.

Total foreign debt was US\$140m. in 1996. Export Processing Zones were established in 1995 to grant companies with EPZ status some tax exemptions and other incentives.
